Again in Demand

The wooden tub is back—the high cost of the metal is largely responsible, but a wooden tub has other advantages.

There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.

Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

JARDINE TOOLS

This is a remarkably efficient machine that one man of medium weight can operate with ease on the heaviest work. It has the usual direct leverage for upsetting light to medium tires, and, in addition, a geared leverage that increases the power more than three to one for heavy tires and axles. The jaws are of tool steel, the teeth are machine cut and carefully tempered. This powerful machine upsets any tire up to four inches by one inch, and axles up to one and one-quarter inch.

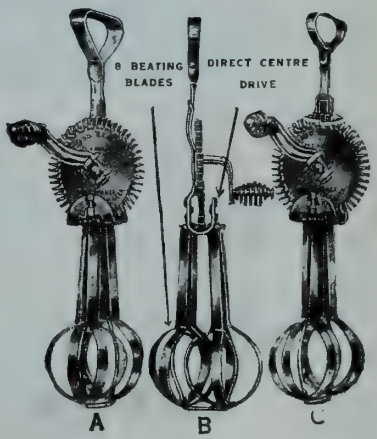
OPENS CANS OF ANY SIZE OR SHAPE

The Word Sanitary— and Egg Beaters



Goods that ACTUALLY ARE SANITARY are most desirable for kitchen use; they are head and shoulders ahead of those not really SANITARY—in fact, SANITARY goods stand in a class by themselves. For this reason manufacturers use the word SANITARY wherever possible. Our experience is, BOTH WOOD AND CASTIRON in kitchen Beaters are UNSANITARY. If any article must embody cleanliness, that's a kitchen beater and THAT'S WHY we have always made LADD ALL-STEEL BEATERS — ALL STEEL, NICKEL PLATED with a SMOOTH SURFACE, JUST 100% SANITARY, NO LESS. They cannot discharge dirt, dust, paint, etc., into the mixture. A VERY IMPORTANT TRUTH FOR SALES TALK.

LADD ALL-STEEL BEATERS—3 sizes for all requirements. **LADD MIXER CHURNS**--1 qt., 2 qts., Removable Beaters. **SATURN REELS**—2 finishes, 40 ft. cord. **SATURN CAN OPENER**—Safety, stationary. **CAN OPENERS** — 5 usual varieties. **RAZOR PARING KNIFE, NUT CRACKERS.** **Jobbers the world over, and Us.**

Roofing and Building Papers That Continually Boost Your Store

Building Papers, Tarred Felt, Sheathings and Tar Products, and Wrapping Paper of all kinds that give service in use, reflecting credit on the dealer and inspiring confidence in all the lines he sells—that's the McArthur line.

Drop us a line for an interesting little booklet on Roofing Materials. It will tell you of each one of our lines—reasons why they sell, and serve the consumer so that you hold his future trade.

We cannot tell of all the lines here, but, for instance, "Black Diamond" Tarred Felt is pure wool tarred roofing felt, from selected woollen rags saturated with pure coal tar, producing the most durable roofing felt possible to make.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

CANADA WIRE & IRON GOODS CO.
HAMILTON

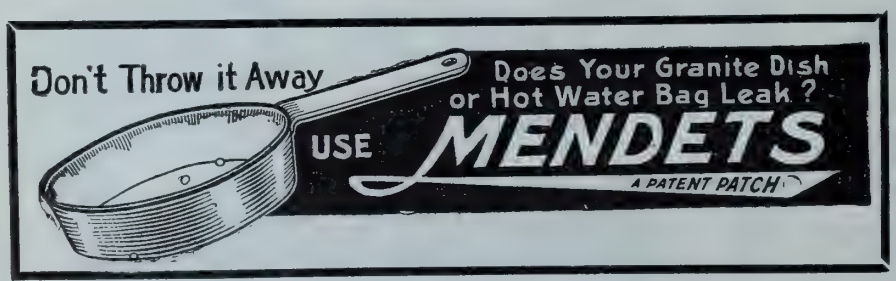
In design and construction it is the best torch of this type on the market to-day.

Detroit Torch
Takes Little Space

Our No. 42 Auto or Electricians' Torch has oblong tank and is very popular with mechanics desiring a tool that will take up little space in a kit.

Tank is made of heavy brass throughout. Supports on bottom of tank prevent torch from tipping over when placed on bench—not in the way when torch is not in use. Fitted with patented tapered burner, with hook and support for soldering coppers. Valve wheel is of wire and always cool, giving operator full control of flame at all times. Automatic pump of simple construction forms the handle.

Detroit Torch & Mfg. Co.
Detroit, Michigan



Display Boxes of Mendets on the counter occupy little space, take but a small investment and pay big returns. They cost practically nothing for rent, light, taxes or clerk hire and yet they keep extra money coming in all the time. Often they makes sales while you are busy with a customer. Why not have this extra profit? They sell by the millions of boxes.

Why has Hardware and Metal Such a Large Western Canada Circulation?

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 33 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

Dealers Should Have Assurance Regarding

QUALITY

Do the Slate-surfaced shingles you sell curl, and twist, after they are laid on the roof? Why? Let us tell you:

The total weight of a Slate-surfaced shingle as compared with another shingle of equal weight means nothing. It is the body or base of the shingle that counts. The TORONTO ASPHALT ROOFING MFG. CO., LIMITED, manufacture asphalt slate-surfaced shingles that differ from substitutes or imitations because they have a thicker, tougher and more enduring body.

This **body** consists of:

FIRST:—A heavier, all-rag felt, which prevents the shingles from curling and this all-rag roofing felt will absorb a larger body of pure asphalt saturant, which increases the water-proofing compound in the shingle and lengthens its water-proofing life in direct proportion.

On the other hand, a felt which is composed of hard rags and paper, will absorb only cheap, oily compounds. An asphalt shingle made from this base will curl and soon perish.

SECOND—On top of the body or base comes a heavy coating of special prepared asphalt compound, a material that is the result of many years in asphalt research. This compound protects the base from the sun and air and holds the crushed slate, which is embedded into it, securely, and makes the shingle non-curling under excessive heat.

Recently, many roofing concerns have cut prices practically to cost, and it is now very important that the Dealer should watch the **quality** of roofing being offered.

THE TORONTO ASPHALT ROOFING MFG. CO., LIMITED, manufacturers of Toronto Asphalt Quality Slates and Quality Roofings, wish to re-assure the Dealer and the Public that the quality of their products will be maintained at any cost.

Toronto Asphalt Roofing Mfg. Co. Limited

Good proposition to jobbers—

Manufactured only by—

THE COMMERCIAL OIL COMPANY, Limited

420 Jackson St. West Hamilton, Ont.

Somebody's Mistaken

WHEN a hardware dealer sells a Chevrolet owner the same oil that he recommends for a Stearns Knight—*somebody's mistaken!*

When a Stutz car stops and gets an oil correct for a Chandler—*somebody's mistaken!*

When Packard, Ford and Maxwell owners are given oil from the same barrel—*somebody's mistaken!*

Somebody's mistaken! Who? The hardware dealer himself!

How can a hardware dealer take out of his oil business *every possible chance* of being mistaken?

By stocking the *complete* line of Gargoyle Mobiloils and having at hand the Chart of Recommendations.

Only one oil is best for any automobile, motor truck, motorcycle or tractor. The Chart will give you its name. You are then in a position to build both good will and good profits.

Ask our salesmen for the Chart of Recommendations for your wall.

GARGOYLE

Mobiloils

A grade for each type of motor

IMPERIAL OIL LIMITED

Marketers of Gargoyle Mobiloils in Canada
BRANCHES IN ALL CITIES

Chart of Recommendations

Abbreviated Edition

How to Read the Chart:

THE correct grades of Gargoyle Mobiloils for engine lubrication of both passenger and commercial cars are specified in the Chart below.

A means Gargoyle Mobiloil "A"
B means Gargoyle Mobiloil "B"
E means Gargoyle Mobiloil "E"
Arc means Gargoyle Mobiloil Arctic

Where different grades are recommended for summer and winter use, the winter recommendations should be followed during the entire period when freezing temperatures may be experienced.

The recommendations for prominent makes of engines used in many cars are listed separately for convenience.

The Chart of Recommendations is compiled by the Vacuum Oil Company's Board of Automotive Engineers, and represents our professional advice on correct automobile lubrication.

Applying "Marking Act" to Hardware

Flexibility Would Assist in Enforcing Spirit of Law—Might Take a Bond from Exporters and Accept Regular Markings—No Marking on Repair Parts—Marking by Label Would be Dangerous in Shipping of Glass—Expensive to Mark Stock Already Made Up

MANUFACTURERS of hardware lines which will be affected by the regulations of The Marking Act are making a close study of the various provisions with a view to being prepared for it when it is made effective. The Act was to have been effective on October 1, according to original plans, but was subsequently postponed until January 1, and it is now stated as a possibility that it will be still further postponed and probably not made effective until after the election of a new government. In view, however, of the likelihood of some such legislation being enforced in order to cope with the situation which has produced the necessity for such regulations, it is interesting to note what various hardware manufacturers think of The Marking Act with its provisions for marking country of origin on all imports, and how it will apply to the various lines sold by the retail hardware trade in Canada.

William M. Pratt, President Goodell-Pratt Co., Greenfield, Mass., tool manufacturers, in discussing the point with Hardware and Metal, expressed approval of proper designation upon all products where it is practical to mark the product itself, otherwise upon all cartons in which the product is packed. Further dealing with the subject Mr. Pratt stated: "It seems to us, however, that the fine point of insisting upon 'Made in the U.S.A.,' even though it is plainly stamped or labeled with the name of the maker and his address followed by U. S. A., will do little to carry out the spirit of the law."

Might Take Bond From Exporters

"We believe that Canadian custom authorities should require a certificate and a bond if necessary, from all exporters covering their products and then should accept their regular stampings or markings upon the articles themselves where practical, otherwise upon the cartons or packages in which they are enclosed. Certain small products cannot be legibly marked and some flexibility in the enforcement of these regulations will assist in the enforcement of the spirit of the law and will insure its benificent effect."

An official of Brown & Sharpe Mfg. Co., machinery and tools, Providence, R. I., states that considerable study has been given the regulations and they find it difficult to determine just what is required. "We have discussed the matter with J. H. Andrew, Special Officer of the Canadian Customs of Boston, who called at our works and expressed the opinion that a liberal interpretation would be given to the regulations which have been imposed and that the difficulties which might arise from a strict interpretation would thus be avoided," said this official.

"It still remains difficult to determine just what a liberal interpretation might be and with the threat of seizure of goods and other penalties it puts uncertainty in the mind of the U. S. manufacturer who does business in Canada.

"We have been given to understand that in cases such as that of repair parts for a machine which was originally shipped into Canada and which has the name of the manufacturer cast integral with the frame, no requirements of marking would be insisted upon for such repair parts, and that small articles of manufacture, where it is not convenient to mark upon the goods would be exempt from the requirements of marking.

"Whatever is done in the line of placing restrictions additional to what already exist upon goods exchanged between the United States and Canada, either way, across the border, is certainly a restriction of trade and detrimental to the best development of mutual business interests. For this reason we regret that Canada considers it desirable to enforce such a law. When, however, it becomes effective we shall make an earnest effort to comply with its conditions as fully as possible; but instead of feeling that it will be a protection either to Canada or the United States we feel that the objectional features will more than offset any advantages which may accrue from it.

"There seems to be a tendency among many nations (France for example) to enact this type of legislation following the war and this may lead to reciprocal laws on the part of the United States which will tend to still further complicate the situation."

Dangerous to Label Window Glass

Regarding the application of the marking regulations to imports of glass, S. J. Rutherford, president of the Toronto Plate Glass Importing Co., Ltd., stated to Hardware and Metal that the understanding of the regulations held by that firm was that every individual article should be marked, and while this might be done in the case of plate glass by means of a label, it would be most difficult to apply to common or ordinary window glass, as the expense of putting a label on each pane would be considerable. Furthermore, when there are perhaps 50 lights in a box, each with a label on one particular spot, the thickness of the labels would make packing awkward as the glass would not press evenly throughout and it would therefore be easily broken when handling in transit."

No objection to stamping their products with any reasonable marking that may be desired, is expressed by another U. S. maker of tools, in discussing the matter with Hardware and Metal.

"From the manufacturing standpoint however, it is going to be a most annoying and rather expensive problem for all U.S. manufacturers who have goods in stock which are not marked in the proper manner. It will

Says All Hardware Stocks are Low

Manufacturers', Wholesalers', and Retailers' Stocks Liquidated In Past Year of Marking Time—Reasonable Manufacturing Costs Will Stimulate Demand for Products—Must Expect Reduced Returns on Investment of Capital—Good Judgment Used In Downward Price Movement

MANY interesting facts concerning general business conditions and current developments in the various branches of the hardware and metal industries were brought out at the joint convention of the American Hardware Maufacturers' Association and the National Hardware Association at Atlantic City, N. J.

President A. H. Decatur dealing with the period of liquidation and readjustment now being experienced, stated that this readjustment would naturally be slow. "The change from war conditions to normal could not take place in a few weeks or even months, but has extended into years, and it will still require much patience and perseverance as well as thrift and economy before we get through with this great transformation in economic conditions," he said. "That we are nearer the upward swing of business, no one doubts; there is already a change for the better. Many of the basic products have apparently reached bottom in price and made the turn upward, and demand for such products is increasing.

"The demand for all manufactured products will be increased when they can be produced at a reasonable cost. Basic conditions for return to normal were never better. The nation is now sound and is ready for the revival when the people get right. It is quite evident, however, that we have not yet reached that point. There is too much waiting for conditions to adjust themselves.

Cannot Expect Big Returns On Capital

"This is a time for working. If we expect to change the situation for the better, every merchant, every producer must make some sacrifice and do his part to restore confidence. When confidence is restored, adjustment may be speedily made, we will reach a normal condition, and we can then expect a period of unusual business. But we can not expect to have capital, much of which was accumulated under conditions that prevailed before the war, invested without some assurance of aproximately 100 per cent. value.

"As manufacturers, jobers, and retailers, we should not overlook the many obstacles to be overcome before business can be on a sound and profitable basis. Many of us have a wartime overhead expense, which must be reduced in proportion to the volume of business.

"The jobber, as a distributor, has felt that he must have the goods for delivery, and has carried a large stock on which he is taking the depreciation. This is a part of his sacrifice in the readjustment. The manufacturer and the retailer are making their sacrifices also, and they must continue to make them until confidence in values is restored.

"The interests of the jobbers and retailers are mutual and there should be the greatest co-operation between them. The jobber's success depends upon the success of the retailer. It is important, therefore, that the members of our Association render every possible aid to assist the retail trade at large in making their business profitable."

Has Used Good Judgment

T. J. Fernley, Secretary-Treasurer of the National Hardware Association in his address, expressed the opinion that the industry had exhibited remarkably good judgment in its downward price movement.

"The able leadership of those in control of our basic raw materials has served to make the downward course of price revision gradual rather than precipitate," said Mr. Fernley.

"The result of these far sighted policies has aided materially in attaining our present position with a minimum of loss.

"Every effort is being made by our members to conduct the service of distribution on the lowest possible percentage of overhead so as to convey hardware products to the consumer through the retailer on an attractive price basis.

"Some of the manufacturers who have indulged in experiments, dispensing with the service of the wholesaler, have learned considerable concerning the cost of individual solicitation of the retail trade of the country taking care of their own distribution, so that such an experiment has not been in the nature of the elimination of the wholesaler, but has been the creation by the manufacturer of his own wholesale department, one line of goods bearing the entire cost of distribution instead of spreading it over hundreds of lines as does the wholesaler.

"One notable example of this character of experiment became involved in financial difficulties, and is again seeking co-operation of the wholesaler in buying large quantities of goods on short terms and in handling the service of distribution.

"Hardware was about six months late in recognizing the downward tendency and the reductions in prices have been uneven, so that while the general average to date is about 80 per cent. over the pre-war average, some items are below that figure while many are above."

"Knowledge Is Needed"

Retiring President W. D. Biggers of the American Hardware Manufacturers' Association in addressing the convention pointed out that business prosperity depends on sales and sales hinge on knowledge—knowledge of the goods, knowledge of general conditons and knowledge of local conditions.

"This will be true to a greater extent durig the next two or three years than during the past—for some two years past, you could sell anything at any price," said Mr. Bigger. "This is not the case now. If business is to climb back to that most discussed and earnestly desired normal plane, business men must first get back to fundamentals.

"Manufacturers must do their utmost to impart to jobbers and retailers full information regarding the merchandise they produce. Jobbers must teach their representatives not only to sell put to pass on their selling information Retail merchants must educate their salesmen and that education must be based on accurate knowledge of the merchandise to be sold.

"Let the people know that you have good merchandise, or a good service to sell at a plain price, or as Herbert Hoover remarked the other day, '95 per cent. of the people don't want to know whether it's made in Paris or not, but they do want to know if it will wear, and how much."

"Business will be good for those who make it good. We must inspire courage and confidence.

"Good service will mean much this year. Every method that will reduce the cost of merchandise should be carefully considered by manufacturer, jobber and dealer, for it means a net saving to the user. The cost of distribution is largely dependent on railroad rates and railroad rates are dependent on labor. Excessive freight rates must be adjusted. The adjustment of labor must first be made before the roads can make a reasonable and just revision of rates.

"There is still a great lack of housing facilities and I believe there is no one thing that could do more for the unemployed than a building program. There is a great scarcity of homes with the consequent result of high rents. The building trades in many of our cities are partially to blame for the present shortage of homes. However,

(Continued on page 58)

Planning the Fall Hardware Sale

Effective Grouping of Utensils, Tools, Ash Cans, Stove Pipes, Hunting Goods, Paints, etc. to Appeal to the Fall Hardware Shopper—Dangers of Reducing Stocks Too Much—Competitive Era Demands Skill in Business Conduct.

Two window displays of seasonable Fall lines are shown herewith as arranged by Mills Hardware Co., Hamilton, Ont., in connection with the Fall Hardware Sale. Kitchen utensils, ash cans, stove pipe, tools and hunting requirements are shown effectively with price cards. The tinted leaves and stuffed animals give a realistic effect in the hunting window.

CONSIDERABLE activity was noted in the Mills Hardware Co. store in Hamilton on the occasion of a recent visit of Hardware and Metal, and it was established that much of this activity was due to certain selling plans which Mr. Nelson Mills has employed in connection with Fall selling. A glance at the window display shown herewith shows posters announcing a special "Fall Hardware Sale," supported with two window arrangements of seasonable Fall lines. Kitchen utensils, ash cans, stove pipe and tools are shown in one display, with price tickets affixed to each line of goods. In the other window is seen an effective arrangement of hunting goods showing ammunition, rifles and other equipment along with some tinted leaves indicating the Fall season and some stuffed animals to give the setting a realistic effect.

Inside the store these and other seasonable lines were also given good prominence, special tables being arranged of kitchenware for the housewife to leisurely examine. Mr. Mills stated to Hardware and Metal that from fifty to sixty per cent. of the business of the average hardware store located on a main thoroughfare is with women shoppers. For this reason he is of the opinion that more attention should be paid to women customers. A study of women's tendencies is recommended and certain of the features which attract women to the department stores might be adopted to advantage by the hardware store. One point in particular is that this firm have found that prices shown prominently in the retail advertising make them much more effective in pulling business.

Paint trade has been active this year in the Mills store, this firm having sold more cans of paint and more customers than during the previous year. It was found that the recent reductions on ready mixed paints have brought back many customers for this class of paint who formerly were buying lead and oil, and mixing their own paints.

Paint Customers Unlike Mechanic Buying a Tool

The necessity of salesmen having a thorough knowledge of the goods they sell was particularly emphasized by Mr. Mills in connection with the paint department.

"The average customer for a tool is a mechanic who can tell the salesman exactly what he requires," said Mr. Mills, "but the paint customer seldom knows the right manner in which to apply paints and varnishes or knows the most effective color combinations to use. This information must be supplied by the salesman if satisfactory results are to be obtained."

Discussing the possibilities of the merchant developing business in personal calls at the homes of customers, Mr. Mills pointed out that it would be a great deal more valuable for the merchant to spend an hour with a customer at the home, showing the method of applying paint, doing graining, etc., than to spend an hour putting up stove pipes, for the satisfaction gained through a pleasing paint job will bring much repeat business from this customer and from others who will be influenced.

Under prevailing conditions the necessity in retail trade is for the decreasing of costs and the increasing of turnover. In many cases, as pointed out by Mr. Mills, an outlay of money is necessary, such for instance as the use of advertising. Such means are however, justified and necessary to stimulate turnover.

Dangers of Reduced Costs

With the experience of the past year, Mr. Mills is of the opinion that next.

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO Winnipeg

TORONTO, SATURDAY, OCTOBER 29, 1921

SOME interesting income tax figures secured by Hardware and Metal show the relation of the various classes in Canada as regards contribution on income tax account. Of a total of $46,381,806, collected by the Federal authorities for the year 1920-21 farmers contributed $61,735. They numbered 16,652 out of a total for the whole country of 194,257 persons assessed. Merchants to the number of 24,483 paid $7,689,521. Manufacturers paid $8,217,730. Employees paid $11,301,805, professionals contributed $2,642,585 and the rest of the taxpayers paid $11,823,563.

Justifying Optimism

THE RESULT of recent investigations conducted by Hardware and Metal among various branches of trade, coupled with information brought out at recent gatherings of hardware interests, would seem to give a somewhat clearer idea of what is actually transpiring in the hardware trade and with this as a basis, to have more confidence in future developments.

Undoubtedly there is today a much more optimistic feeling among certain hardware manufacturers, wholesalers and retailers, than for some months. This is probably not general, due to the fact that Western Canada crop conditions are not quite up to expectations and buying power and debt paying power of Westerners may be somewhat curtailed as a result, but on the whole there is a better sentiment which bids fair to outdistance the usual seasonable flurry at this time of year. There will be some give and take before conditions finally settle down to a solid basis, but the pendulum has had its big swing each way and it is now in the stage where numerous transitory influences are somewhat restricting its gradually settling tendency. Adjustment of transportation charges, labor costs, raw material prices, and the removal of unsettlement caused by political developments, will help in the establishment of a sound basis of trade.

Many manufacturers of hardware have recently been manufacturing only for current needs and this has in most cases required only part time operations in these factories. The possibility of lower transportation charges, lower prices on materials, and the hand to mouth buying tendency of customers has not encouraged any departure from this plan, but it is encouraging to note that in many cases increasing current requirements are now making necessary the longer operation of plants each week. In view of the fact that many plants which were operating two and three days weekly are now up to a four day schedule and are still not manufacturing for stock, there would seem to be little the matter with the branch of industry which these firms represent. Other plants which for some months prior to August were operating on about half time are now operating to capacity with overtime in some departments. In many cases this could hardly be expected to be maintained over the next three or four months as this would be more in the nature of a boom than a return to normal conditions. At any rate the signs of increasing industrial activity and the improvement of sentiment among buyers are important factors in the present situation.

This is no time for generalities or admonitions concerning optimism, but it is time the true facts which justify optimism should be given their broadest application to overcome the psychological effect of conditions recently experienced. The merchant may well watch closely his trade newspaper and other sources of accurate information for details which justify optimism concerning the business outlook, and use these to advantage in selling.

Caution is Required

AS WAS expected, the Government is again letting itself in for considerable abuse regarding the proposed regulations governing the marking of the country of origin on all imports. This is a very broad question and one which has many possibilities, some favorable but many unfavorable. Undoubtedly it would be useful information to a Canadian buyer to know what country had manufactured the prospective purchase. It would serve as an added protection against importations of cheap goods, the sale of which largely depends upon the close imitation of better grade articles, and it would also give the Customs Department an effective means of checking imports. On the other hand the regulations will probably occasion much difficulty among manufacturers of the goods which are exported to Canada. Some of these manufacturers have put forth some suggestions which bear more or less merit, one manufacturer suggesting that the Canadian Customs officials take a bond or certificate from exporters, covering their products and that these officials then accept the exporter's regular stampings or markings upon the articles themselves or upon their containers. In a number of cases exporters fail to see the value of the specific marking "Made in ....." when the firm's name and address appears on the goods. Another opinion is that the objectional features of the regulations will more than offset any advantage which may accrue from it. In regard to the marking of glass and other lines of hardware the complications are increased and dangers to shipments in transit are threatened.

Undoubtedly the various countries which comprise the world are today faced with many severe problems as result of the chaos caused in the ordinary channels of trade by war conditions, but these problems are of a world-wide nature and it will not aid in their solution for each country to surround itself with such barriers as will discourage international trading. The success of the foremost industrial nations of the world has come through developing the world's channels of trade, selling their products abroad and offering a market for the product of other countries in return. Thus any international barriers which will restrict trade without any compensation to domestic business should be imposed only after much serious consideration. There are many angles to the marking of imports regulations and the counsel of interests involved might well be sought before applying these regulations.

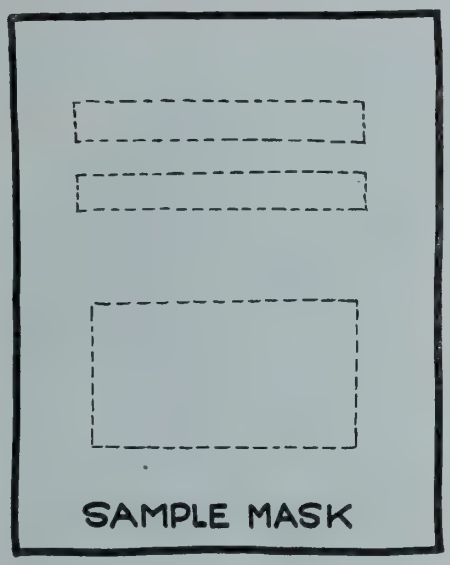
Show Cards for Fall Hardware Sales

Small, Neatly-lettered Show Cards for Both Store and Window Displays Effective in Aiding Fall Sales of Hardware—Kept Seasonable and Changed Quickly—Attractive Show Cards Improve Tone of Store and Window Displays

SHOW card colors are put up in glass jars, the smallest being the 2-ounce jar; this size is the most convenient, taking up little space on the working table.

Procure a few sheets of any smooth surface paper, plain manilla wrapping paper or ordinary white drug paper will do. Rule faint horizontal pencil lines across the paper about three inches apart for the letters and brush strokes and leave a space of an inch or so between each line of lettering. You can, of course, use your own judgment on this. The main idea is to give yourself enough space to allow for a free, uncramped movement of the brush.

Hold the brush between the thumb and forefinger much in the same manner as you would hold a pen or pencil, only a little more upright. Hold close down to the hair which will give you better command of the brush. Too much cannot be said on the importance and advisability of having a good flat chisel-like edge on the brush before beginning a stroke or letter. No matter how expert in lettering an individual may be, unless he has the brush in proper shape it is next to impossible for him to execute any quick single-stroke letter without "patching" or "doctoring" up afterwards.



Cut out on dotted lines. Place over Price Ticket and pencil lay-out.

Do not attempt to make an alphabet by laboriously outlining each letter. Alphabets requiring this treatment are seldom used by the cardwriter. Most show card alphabets are made via the "single-stroke" route. The term "single-stroke," of course, does not mean that each letter is completed in one stroke, but that each constructive stroke or part of the letter is executed by one sweep of the brush. Before attempting to letter the large alphabet shown in this issue you would do well to practise the constructive strokes. By diligent practice of these strokes, you will gradually gain confidence and steadiness which will make easier for you the lettering of the alphabet itself.

The big alphabet is commonly called Plain Gothic (upper case or capitals) and is one of the most widely used by the card-writer. Determine to master this alphabet and you will find the other alphabets comparatively easy.

It is a mistake to practise too carefully or in a hesitating manner. Boldness of stroke is all-important. Try to cultivate a moderately rapid even stroke right from the start. Don't just dip your brush in the color and proceed to practise but stroke it on a palette (a

News of Western Canada

Says B.C. Trade Discriminated Against

Freight Rate Hearing in Vancouver Followed with Interest — No Outstanding Changes in Hardware Prices on the Coast—B.C. Producers Want Better Access to Eastern Markets

THE main feature of interest in the hardware trade in B.C. this week has been the freight rates enquiry before the Dominion Railway Board which sat for four days in the Board of Trade rooms here. Business continues good and it will continue probably until the wet weather puts a damper on building activity in the leading centres.

Turpentine is 15 cents per gallon up being quoted wholesale at $1.80 per gallon in barrel lots. Brushes are off 15 to 25 per cent. but house-hold paints and white lead remain at the same figures following the early September adjustments on a lower basis. Lead, however went up a dollar following the three dollar decline and is now quoted at $16.80 per hundred.

The coast wholesale hardware distributors were represented at the enquiry by R. P. McLennan of McLennan and McFeely while A. B. Weeks of the Canadian Northwest Steel Co., presented the case for the structural steel machinery, mill, logging and metal products industries. Ernest Gadd of the Vulcan Iron Works spoke for the boiler-makers and engine manufacturers.

The writer, who attended the sittings of the commission, was impressed with the fact that without question, coast producers were the subject of unfair discrimination as against the eastern manufacturers, who, on account of favorable rates, were enabled to enter the Crow's Nest and Okanagan districts securing much business unobtainable by coast interests on account of a margin of freight rates which favored the east. Each of the witnesses submitted a mass of rate comparisons supporting their contentions.

It was shown at the enquiry that, on account of the industrial expansion on the coast due to war activities, British Columbia manufacturers were now producing many commodities such as nails, bolts, nuts, roofing material and several other lines not manufactured here before the war.

Counsel for the Canadian Pacific Railway secured admissions from W. L. Miles, a Toronto traffic expert, who prepared the comparisons, that they were prepared on a basis of distances and that gradients and density of traffic had not been taken into consideration. The case is to be further heard at Winnipeg, next month, and the final argument will be heard at Ottawa.

R. P. McLennan, stated in his remarks that unless the mountain scale was removed coast distributors would be confined to the market in British Columbia. Eastern manufacturers were given access to 9,000,000 people and he claimed fairer treatment should be accorded B.C. It was just such high handed action as the fixing of such rates that was responsible for strikes, revolutions and boycotts. Fifty per cent. of the heavy hardware tonnage used in B.C. was manufactured here.

In his evidence Mr. Weeks said that taking a point 810 miles equidistant from Winnipeg and Vancouver, a shipper in the former city could ship on a basis of $9.10 per ton cheaper than could the manufacturer on the coast.

"The result of this freight rate discrimination," declared Mr. Weeks. "is the throttling of industry on the Pacific Coast by excluding them from a large portion of their legitimate field of operations."

Western Firm Holds Salesmen's Convention

Winnipeg, Man.—The Annual Sales Convention of G. F. Stephens and Company, Limited, held at Winnipeg headquarters, was attended by a full muster of the Company's salesmen, drawn from their respective territories in Western Canada. The convention room on the third floor of the ware-house was tastefully decorated for the occasion, the pannelled walls being literally covered with the Company's advertising matter, the variety of color and design forming a pleasing and suitable setting for the deliberations of the sales staff.

The three-day convention, which was divided into morning and afternoon sessions, was formally opened by the President of the Company, M. F. Christie, who occupied the chair throughout the proceedings.

In his address of welcome to the salesmen, the president pad a beautiful and touching tribute to the memory of Mr. G. F. Stephens the founder of the Company. Mr. Christie sounded a conservative but optimistic note. "In my opinion," he said, "we have touched the bottom, in other words, have got to, and over the worst part of this re-adjustment period, and while we cannot expect any spectacular or immediate revival, yet, I believe we are on the turn in the right direction and may look forward with reasonable expectation to a slow but steady progress from now on. I believe, too, that this business depression will be of shorter duration and our 'come back' more rapid West of the Great Lakes and throughout the Prairie Provinces than in Eastern Canada, and certainly in the United States."

Demonstrations of a practical nature, which feature the convention from year to year, were carried out at each afternoon session, the salesmen following the work with the keenest interest, and proving by their talks and questions in the ensuing general discussions that they have a sound working knowledge of the fundamentals of paint and varnish application.

A very comprehensive review of the Company's advertising and publicity policies was given by L. C. Stephens, who also delivered an instructive address on the "Save the Surface Campaign."

F. W. Stephens, factory superintendent, gave a highly instructive paper on "The manufacture of graphite and its use in bridge and elevator paints."

At the conclusion of the Saturday afternoon session, the sales staff adjourned to the Royal Alexandra Hotel, where they were entertained at a banquet given by the directors of the Company.

THOS. DAVIDSON MANUFACTURING CO. LTD., OPEN IN CALGARY

Thos. Davidson Manufacturing Co. Ltd., announce the opening of a branch warehouse in Calgary for the convenience of Western customers. The firm has taken over the premises recently occupied by The Gurney Foundry Company at 305-10th Avenue East, where a complete line of goods is being stocked. It is hoped to commence shipping from Calgary stock by November 1st, 1921.

Hardware Conditions in Saskatchewan

James Feir, Regina Manager Wood Vallance, Ltd., Surveys Conditions—Outstanding Accounts Heavy—Credit Burden on Banks and Wholesale Houses—Retailers' Stocks Very Low—Majority of Merchants Selling at Fair Prices—No Pessimism Over Outlook

REGINA, Sask.—James Feir, Regina Manager Wood, Vallance Ltd., who has recently returned from a business trip in which many parts of the district were visited, deals with conditions as he found them in the hardware trade, in the following statement to HARDWARE AND METAL:

"The crop yield on the whole throughout Saskatchewan has been somewhat better than average and we had every reason to be satisfied until September 8th when very heavy rains set in before the threshing was one-third completed. These rains lasted nearly three weeks and Regina had a total of seven inches.

"Prior to these rains nearly all the crop was grading No. 1 Northern but when threshing was resumed the first week in October, it was found that a considerable portion of the grain had sprouted and been injured by the dampness, etc. Some of it continued to grade No. 1 Northern, but the most No. 2 and No. 3 Northern, some of it being tough, sprouted, damp, etc., and I should say that the general average will be about No. 3 Northern.

"In addition to this, the price commenced to drop as soon as heavy marketing began, and the average price now in Southern Saskatchewan for No. 1 Northern is 90c per bushel, fo.b. shipping point. I ran across some cases where the farmers have been told not to bring in any more wheat as the elevator buyers did not want it. Other cases where they were offered as low as 37c per bushel, and in many cases 50c and 60c, but I should say that the general average return to the farmer on the crop threshed since the rain would be from 65c to 75c per bushel.

"When you take into consideration the fact that it costs at least 20c per bushel to thresh and then add the value of the twine and the seed, and the other expenses of growing the crop and harvesting it, there is little or no profit in it for the farmer. We presume that wheat has got to come down in value to nearly pre-war level, but it is unfortunate that it had to drop so suddenly.

"The value of the crop harvested, therefore, will be considerably less than last year owing to these two factors.

(a) The inferior quality caused by the wet weather.

(b) Heavy decline in price.

"This is not withstanding the fact that the yield has been above the average.

Collections

"Most merchants have carried over on their books large balances from last year and early in the spring and summer very little credit was given on account of the uncertain future, but along in July and August when conditions seemed to be very favorable, a certain amount of additional credit was given which makes the outstandings of the various merchants very heavy. Owing to the decline in the value of the crop as above stated, most merchants are very pessimistic about collections, and it appears uncertain whether 50% of the retail merchants' outstandings on the average will be collected; whereas everybody thought when the crop was being harvested that a fine clean-up would be made in old balances this year.

"It is, therefore, reasonable to assume that retail merchants will have considerable difficulty in carrying on over the winter unless the banks and wholesale houses are extremely lenient, and it is difficult to see how the wholesale houses can afford to carry the burden of credit that they have done for the past few years.

JAMES FEIR

Regina Manager Wood, Vallance Ltd., who, as a result of recent trips throughout the district, gives a summary of conditions as particularly affecting the hardware trade.

Trade Outlook.

"Buying will be still from hand to mouth, because of the necessary curtailment of credit and shortage of cash. One redeeming feature is, however, that retailers' stocks throughout the country are very low which will necessitate their buying a little from time to time to prevent them from being out of stock. Last year when retailers' sales fell off, they did not have to buy to replace because they had heavy stocks carried over from the year before. These have largely been liquidated during the past twelve or fourteen months. There is no evidence of any marked revival in trade. Our own sales have been better than last year because we had only got nicely started this time twelve months ago and we have gone after business more aggressively and with an improved organization.

Retailers' Selling Prices

"I believe that although some retail merchants who did not keep closely in touch with the market are still asking unreasonably high prices on the stock they have carried over, the majority of them are selling at reasonable advances over today's values. Most of them have been obliged to replace the large majority of the lines in their stock during the last six months and should be in touch with the new values.

"Even in view of the above, we are not pessimistis over the situation and still have faith that this Western country will weather the storm and surmount the difficulties, serious as they may be. My opinion is that we have touched bottom and that we are on the up grade as far as business generally is concerned."

PERSONAL

J. F. MacKay, Vice President and General Manager of the John Morrow Screw & Nut Company, of Ingersoll, Ontario, was a business visitor to Winnipeg during the week and called on their representatives, Sutherland Bros. Mr. MacKay is covering the trade from Winnipeg to the Coast in the interests of his firm.

B. C. WINS POINT IN FREIGHT CASE

Vancouver, B. C.—Involving a saving of at least $2,000,000 annually to shippers and consignees of British Columbia, and marking another successful step in British Columbia's fight for equalization of railway freights, judgment has just been handed down by the Board of Railway Commissioners at Ottawa, placing British Columbia on the same rate basis as that prevailing between Fort William and Winnipeg.

The ruling will mean a reduction in freight costs on every car passing between Pacific Coast points and points as far east as Calgary, of between $50 and $60.

Events in the Trade

BUSINESS CHANGES

Florence, Ont.—C.E. Elson, hardware merchant, has been succeeded by O. E. MacRoberts & Sons.

The Annex Hardware and Electric Company, of Montreal, are reported to have discontinued business.

NEW FIRMS

Toronto.—C. S. Wilson is commencing a hardware business at 2294 Bloor Street, West.

OBITUARY

C. P. Lyman, manager of the Lyman Tube & Supply Company of Montreal, is dead, and William G. McNaughton, a business associate, in in a hospital in a serious condition, as a result of an automobile accident near Albany, N. Y.

Sarnia, Ont.—George Simas, manager of the Mackenzie-Milne Hardware Co., dropped dead in the company's factory here late Saturday afternoon, Oct. 23. A lifelong resident of this city, the late Mr. Simas was one of Sarnia's foremost business men.

St. John, N. B.—Joseph A. Tilton, Maritme merchandise broker, passed away suddenly while on a business trip to Toronto. Mr. Tilton left St. John in his usual health, and notice of his death came as a great shock to the citizens of St. John. He was a brother of J. F. Tilton, of W. H. Thorne & Co., Ltd., Hardware Merchants, St. John, N. B. A member of the Board of Trade, Commercial Club and the Masonic Fraternity.

INVENTOR OF AIR TIRES PASSES AWAY

John Boyd Dunlop, known as the inventor of the pneumatic tire, died in Dublin Ireland. He was 81 years of age His invention, first introduced in 1899, resulted in the popularizing of bicycling and was a forerunner to passenger automobiling.

PERSONAL

J. E. Hindes of L. S. Starrett Co., Athol, Mass., called on the Montreal trade this week.

C. J. Walker, Montreal, continues to act as sales agent for the Canadian Tungsten Lamp Company, Ltd., and the Ontario Lantern and Lamp Company, Ltd., of Hamilton, Ont., for Quebec and the Maritime Provinces, in addition to representing E. T. Wright Co., Ltd., and the Wentworth Manufacturing Co., also of Hamilton, for the Province of Quebec.

Electrical Development Pioneer Dies in Toronto

Hon Frederic Nicholls died at his home in Toronto this week. For six weeks he had been hovering between life and death. A member of the Canadian senate, president and general manager of the Canadian General Electric Company, and with other important interests, the death of Mr. Nicholls will create a large gap in the business and industrial world.

HON. FREDERIC NICHOLLS.

Member of Canadian Senate and prominently interested in many large industrial enterprises, who died in Toronto this week. Senator Nicholls has taken an active part in electrical development work in Canada.

Senator Nicholls was one of the pioneers of electric development in Canada. It was he who organized the Toronto Incandescent Electric Light Company, the first company in Canada which adopted the underground system of electric distribution and he has ever since been successful in interesting capitalists in his many undertakings. Among the large number of concerns in which he was directly interested are the Canadian General Electric Co., the Canada Foundry Co., Canadian Allis Chalmers, Limited, the Dominion Steel Corporation, the Canadian Sunbeam Lamp Co., the Dominion Iron and Steel Corporation.

In March, of this year, he resigned from the position of president and general manager of the Canadian General Electric Co., becoming chairman of its board of directors. He was connected with this company since its inception thirty-three years ago, and during this long period he was consistently widening his interests in electrical and other fields.

INCORPORATIONS

Toronto Saw and Tool Co., Ltd., has been incorporated in Ontario with head office in Toronto and capital of $400,000. Provisional directors are C. H. Kehoe, Wm. W. Fair and B. F. Wilson.

Taylor-Campbell Electric Co., Ltd., has been incorporated in Ontario with head office in London, Ont., and capital of $250,000 to manufacture, instal and deal in electric lighting plants, electric appliances and accessories, etc. Provisional directors are F. L. Campbell, A. T. Taylor and J. McKay Marshall.

In an amendment to the Articles of Incorporation, the name Standly Skid Chain Co., has been changed to Standley Manufacturing Company, Boone, Iowa. They will continue in the same line of business, manufacturing and selling automobile utilities.

BLUE-BIRD PLANT DAMAGED BY FIRE

Brantford, Ont.—A fire of incendiary origin, on the night of October 23, caused $10,000 damage to the plant of the Blue-Bird Corporation, washing-machine manufacturers. Oil-soaked waste and canvas found at the seat of the blaze proved beyond all doubt that firebugs were responsible.

The outbreak occurred in a storeshed next to the newly-completed extension to the Blue-Bird main plant. It was quenched only after a hard fight on the part of the fire bridgade. An investigation commenced immediately the blaze was conquered resulted in the discovery of the oil-soaked kindling.

MEETING OF MARITIME HARDWARE MERCHANTS'

St. John, N. B.—This week the executive of the Maritime Hardware Merchants' Association held their regular quarterly meeting in the St. John Board of Trade rooms. W. G. Stratton, of G. McAvity and Sons, Ltd., presided.

Others in attendance were R. M. Bartsch of the S. Hayward Co.; G. J. Metyler, of Wm. Stains, Sons & Morrow, Ltd., Halifax, N. S.; I. L. Crowell, of Wm. Robertson & Sons; A. W. Morton, of the A. M. Bell Co., Ltd., and R. P. Dickson, of the Lumner Co., Ltd., Moncton, N. B.

David Brewer Director A. Macfarlane & Co., Ltd.

MONTREAL.—The many friends of David Brewer, will be interested in learning that he has rejoined A. McFarlane & Co., Limited., Montreal, in the capacity of a Director and Vice-President.

Mr. Brewer started business with Messrs. Caverhill-Learmont & Company, of Montreal, in the spring of 1901. After spending nine years with this company, he joined A. McFarlane & Co., Limited, with whom he was connected twelve years; severing his connection with them to form a partnership with C. E. Adcock, in November of last year.

Mr. Brewer's genial personality and his long experience on the road, have made him a welcome visitor among the hardware trade.

DAVID BREWER
Who has rejoined A. Macfarlane and Co., Ltd., Montreal, in the capacity of Director and Vice-President.

ROTARIANS ENTERTAIN AT McCLARY FEAST

London, Ont.—Plates and cups of enamelware greeted the eyes of Rotarians at the noonday luncheon in the Tecumseh Hotel this week, and for a short time a number of the members were puzzled. However, it was a regular "McClary" luncheon, everything in the way of dishes and cutlery being supplied by the McClary Manufacturing Company.

W. R. Yendall, president of Rotary in London, who has but recently returned from a trip to the Canadian west, was given a great ovation as he took his accustomed place. He gave a short resume of business conditions as he found them in the prairie provinces, stating that stocks were getting low, and buying would have to start in the near future.

BRANTFORD TO SECURE ANOTHER INDUSTRY

Brantford, Ont.—The kitchen cabinet, bed and bee supply business of Ham Bros., with the factory on the north side of Elgin street, have been secured by a syndicate of local men. As soon as the option is taken up the new firm expects to extend the plant, now negotiating for the Canadian manufacture of a United States nationally advertised article.

"MADE IN HESPELER" DRAWS LARGE CROWDS

Hespeler, Ont. — The initial "Made-In-Hespeler" show, which recently took place, is generally described as a stirring success. It was estimated that over 2,000 people attended the exhibition on the opening night. Some 70 industries, including woolen and knitted goods, furniture, stoves and ranges, blacksmiths' tools, graniteware, washing machines, slippers, and other lines, were on display and gave the visitors an idea of the extent of the industries of this thriving town. A baby show and dance were additional features for opening night which was held under the auspices of the Hespeler Band.

INDUSTRY FOR KINGSTON

Kingston, Ont.—Kingston has secured a new industry. Ex-Mayor John M. Hughes has been appointed general manager for Canada of the Watkins Manufacturing Company, whose headquarters are in Kansas. A branch of the company is being established on Rideau street here. The company is engaged in re-babbiting worn-out bearings of machines, automobiles and tractors. The machinery is being installed in the local plant, and in the spring Mr. Hughes expects to have 25 men employed.

NEW INDUSTRY FOR CANADA MAKES HIGHEST QUALITY STEEL

Hitherto Canada has been dependent on foreign countries for most of its tool steel, and altogether for its molybdenum steel which is said to be the highest quality of steel, and is likely to surpass others in the future in the tool making trade and also for motor cars.

With the opening of the molybdenite concentrating mill of the American Molybdenite company, on which nearly $100,000 has been expended at Wilberforce, Ontario, with a production of six hundred tons a day, Canada will no longer be obliged to import tool steel, but is likely to become an exporter of molybdenum steel to other countries. The mill at Wilberforce will be able to take care of the molybdenite supply required by Canada for years to come.

Arrangements are being made to manufacture molybdenum steel with one of the largest steel manufacturing plants of Hamilton, which already has installed sufficient furnace capacity to take care of the entire requirements of the Canadian trade in molybdenum tool steel and in molybdenum steel necessary in the automobile industry, and such further uses as will rapidly be found for molybdenum steel, such as the making of spades, shovels, etc.

W. J. CLARKE JOINS HAMILTON STOVE AND HEATER CO.

Hamilton, Ont.—W. J. Clarke who has had extensive business dealings with the hardware trade of Western Ontario, has joined the sales force of Hamilton Stove and Heater Company, representing souvenir stoves and ranges in that territory. Mr. Clarke takes with him the experience gained from several years spent behind the retail hardware counter.

W. J. CLARKE
Who has joined the sales force of the Hamilton Stove and Heater Company, Hamilton, Ontario.

MUCH BURGLARY AMONG RETAIL STORES

London, Ont.—An unusally large number of cases of petty burglary and sneak thieving have been reported all through this district this week and police are warning all merchants not to leave money in their stores over-night. On Monday night the hardware store of James Howard at Goderich was robbed by thieves who smashed the glass in a side door, drew the bolt on the inside and walked in. They obtained $40.

ANOTHER PLANT WORKING OVERTIME

In the face of so-called business depression, it is encouraging to learn that one by one industries are coming back to their normal stride. News has just been received that the factories of the Aluminum Goods Manufacturing Co., makers of aluminum ware, are running day and night. A. J. Vits, General Sales Manager of this company, states that a greater volume of merchandise is being manufactured and shipped than ever before in the history of the company.

Remarkable Increase in the Stove Business

Present Volume of Trade in Stoves, Furnaces, and the Foundry Line Generally Said to be Remarkable—Optimistic Report on Current Trade Conditions

"WE'RE just as busy as we can be. The present volume of trade is remarkable. We haven't seen anything like it for over a year," were the exclamations of N. R. Turner, Sales Manager, of the McClary Manufacturing Co., Toronto, when interviewed by Hardware and Metal. Mr. Turner pointed to the activity of the shipping rooms, and extending throughout all other departments, as conclusive evidence of recent vast improvement in the volume of trade in Fall and Winter goods.

"Business is especially marked in stoves, furnaces, ranges, stove accessories, and similar products. In fact, the proportion of orders and sales in the foundry end of the business is very, very good. Electric ranges, and other electric lines, are also experiencing a firm demand, and these other goods are moving remarkably well," he said.

"Country business in Ontario has registered big gains, and our travellers on the road are turning in considerable increases in the size and numbers of orders generally. On the other hand, the city business is nothing short of wonderful, when previous returns are considered. Such improvement is the more noticeable in comparison with the dull summer period, and the cries of trade stagnation which have appeared almost on every hand."

Altogether, Mr. Turner's remarks can be summed up as constituting one of the most optimistic and encouraging reports on current trade conditions which have been received for some considerable time. It is generally admitted that the roofs of such business expansion are backed by good solid judgment and brisk activity is seeking the price ticket.

Hardware Outlook Is Now More Cheerful

Improved Tone Noticeable as Regards Immediat e and Future Trade, Says T. B. Williamson returning from N. H. A. Convention

ON his return to Toronto after attending the annual convention of the National Hardware Association in Atlantic City, T. B. Williamson, H. S. Howland Sons & Co., stated that the consensus of opinion at the convention was that a more cheerful outlook was now developing on the business horizon and that an improved tone was noticeable as regards the immediate and future development of hardware business.

"The opinion was expressed in numerous addresses and reports, that the bottom of the depression had been reached, and that trade generally was now on the road to recovery, after having passed through—as far as the U. S. situation is concerned—one of the worst periods of deflation in the business history of that country," said Mr. Williamson, continuing.

"Well-informed authorities now look for trade recovery, coupled with a better tone in general business relations. An increase, both in the volume of orders and the ratio of consumption, is looked for to commence almost immediately, and gradually expand. These developments are expected to be reflected and become more noticeable with the spring season of 1922."

"The general opinion of U. S. hardware men, from manufacturers to retailers, was that there can be no permanent stabilization of prices, without a reduction in freight rates, and its consequent effect in lessening production and distribution costs all through the trade. However, price changes, both advances and recessions, are likely to continue; but the extent of these developments are not expected to be so marked, or so extensive, as heretofore."

"Another interesting aspect introduced at the Convention was the probability of a shortage of goods occurring in the not far distant future. It was pointed out that with both retail and wholesale merchants confining their orders to current requirements only, manufacturers have also adopted the principle of catering merely to immediate needs. Upon the recovery of confidence in the markets, and the re-appearance of a normal demand for commodities generally, a shortage of goods, and delay in filling shipments is considered likely to develop. This would be chiefly due to the fact that there has been no anticipation of, nor preparation for future requirements. With price basis in many lines still uncertain, and with production costs awaiting the action of transportation companies with regard to freight rates, there is also very little incentive to manufacture for stock."

MAY BE GREAT FUTURE FOR STEEL IN INDIA

Details are available in regard to the recent registration of the United Steel Corporation of India with a capital of £20,000,000.

A high quality of iron ore and excellent coking coal have been found close together in the provinces of Bihar and Orissa. As the cost of erecting works in India is considerably below that in other countries it is believed India is capable of producing the cheapest steel in the world.

The Aluminum Ware Industry in Canada

THE Dominion Bureau of Statistics has published a report on the manufacture of aluminum ware in Canada during the calendar year 1920. In the report it is pointed out that aluminum manufacturing in Canada may be divided into two industries, namely: the smelting of imported ores for the production of aluminum metal; and the manufacture of aluminum metal products. The manufacture of aluminum metal products is the only subject dealt with in the report issued. The report, prepared in the Mining, Metallurgical and Chemical Branch of the Bureau, gives in good detail the general statistics of the industry and shows that the Canadian production of aluminum utensils in 1920 supplied over 70 per cent. of the domestic demand. Over one and one-third million dollars worth of aluminum kitchen utensils and other articles manufactured from this metal were made during the year, the entire production being confined to plants operating in the province of Ontario. The entire production of the industry amounted to over $1,600,000, and represented an increase in value of the materials used by the process of manufacture, amounting to more than one million dollars. The industry furnished employment to more than three hundred individuals, the amount paid in wages during the year being $351,643. In addition to the above amount $45,698 was paid to members on the administrative staffs. It is further stated that the amount of capital actually invested in this industry in Canada was more than three and one-quarter million dollars. Full details are given regarding the time in operation, salaries and wages paid, number of employees, quantity and nature of fuel used, and power equipment of the plants. General financial statistics of the industry are also shown.

The aluminum industry of America dates from 1890 when the first successful process was worked out for the economical extraction of the metal from its ores. The lightness and ductility of the metal and the fact that it is not readily attacked by organic acids, air or water, together with the fact that it transmits heat readily, soon brought it into favor as a material for kitchen utensils and it is in this connection that it has become so well known. Large quantities of aluminum wire are now used for electric transmission lines and quantities are used in the manufactutre of such apparatus as cream separator parts and other light machinery. Alloyed with magnesium it finds extensive use as an alloy possessing great tensile strength which can be soldered. Aluminum bronzes, too, are finding extensive uses.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

CURRENT market developments indicate that present prices are more stable, with business trends registering a better proportion of activity. While these conditions are considered of a temporary nature, yet it is noticeable that price changes this week are far less numerous than has been the case during recent months. Price revisions to a lower basis are announced on hay fork handles, manure fork, hoe, and rake wood handles. Hay rakes; coke tin plates; carpenters' braces; white and colored cotton wipers; sad-irons; wood barrel churns; and one line of barn door hangers, track and brackets, supply reduced quotations. A price decline is also given on some electric irons, toasters, and grills.

Ingot metals have generally failed to retain the degree of improvement recently noted. The upward trend of raw cotton prices—which was more or less directly reflected in quotations on manufactured cotton goods—has now subsided. The rise in primary copper markets also failed to hold, the movement having temporarily spent itself. A reduction of $7.00 per ton has been made by the U. S. Steel Corporation in the base price on standard steel rails. Ammunition is now in seasonal demand; while a marked volume of business is recorded in stoves, furnaces, ranges, and stove accessories. The steel markets are a little quieter this week, the recent gains being firmly held, but the ratio of increases now marking time.

Through revised discounts, a decline of almost 20 per cent. appears on shovels, scoops, and spades.

MONTREAL MARKETS

MONTREAL, October 27.—Price changes are confined this week to the smaller lines, and carpenters' braces offer the chief reduction, being lowered from 7½ to 10 per cent. on all standard lines. Mrs. Potts' sad irons are lower, also cotton wipers. Horse and wool cards have new lower prices. Lamp wick marks the only advance in quotations. The season for skates and hockey sticks is now approaching, and jobbers are shipping booked orders. Prices on skates are holding at revision last Spring, hockey sticks are about 10 per cent. lower than last season.

The recent improvement in steel products is no doubt now settling on the market for many stable commodities in the hardware trade, and accounts for the fewer changes in hardware prices this week. Without exception, all lines of heavier steel goods have withdrawn from the easier tendency evident all through the summer months and are now quoted on a much steadier basis. Revisions to higher levels on these same commodities, referring to sheets, iron and steel bars, boiler tubes, corrugated sheets, eavetrough, and conductor pipe, are not yet made owing to local stocks being ample, and purchasing on outside markets not yet required.

NO CHANGE IN CEMENT QUOTATIONS

Montreal

Quotations on Portland cement are holding steady with the movement continuing seasonably good. Dealers anticipate good business from now until the winter months set in, as a considerable amount of building locally and in the surrounding district still remains to be done this year. Following are local prices;

CEMENT—

Car load lots—400 to 1,000 bag cars—	
Per bag, f.o.b. cars	$0 98
Per bag, delivered	1 05
Less car lots—	
Per bag, f.o.b. yard	1 09
Per bag, delivered	1 19

Less 5 per cent.

Rebate 20 cents for empty sacks.

MRS. POTTS' SAD IRONS ARE LOWERED IN PRICE

Montreal

There has been a reduction in prices of Mrs. Potts' irons, and the nickel plated will now sell for $1.95 per set, the polished at $1.90 a set.

HORSE AND WOOL CARDS DOWN IN PRICE

Montreal.

Both horse and wool cards show a decline in price this week. Following are new prices on both lines:

HORSE CARDS—	
No. 04, per dozen	$ 4 20
No. 4, per dozen	5 20
WOOL CARDS—	
No. 5, per dozen pairs	$17 80
No. 8B, per dozen pairs	17 40

SKATE ORDERS NOW BEING SHIPPED

Montreal.

Local jobbing houses are now shipping their booked orders of skates, and report shipments somewhat lighter than last year, but wholly satisfactory. Skate orders this season depends a great deal on the opening of winter, and it is hoped the earlier months will be favorable to the outdoor sport. Prices this season are with little change from quotations announced in the spring, and following are list prices and discounts of the "Starr" line;

STARR SKATES—

No. 190H Tube, aluminized	$6 00
No. 190H, N.P. Tube nickel plated, net ex.	1 00
No. 190 P. Pleasure aluminized	6 00
No. 156 Acadia	2 10
No. 157 Beaver	2 75
No. 162 Beaver flanged blades	3 25
No. 184 Glacier, flanged blades	3 50
No. 188 Rex	4 00
No. 194 Regis	3 25
No. 129 F. W. Mic-Mac	5 00
No. 150 Demon	1 90
No. 153 Demon	1 70
No. 154 Bulldog	2 10
No. 173 Climax	3 50
No. 176 Scotia	4 00
No. 181 Velox	6 50
No. 189 Featherweight Regal	5 00
No. 193 Dreadnought	4 00
No. 196 Imperial	1 60
Genuine Acme—	
No. 100 with solid steel blades	1 75
No. 101 Do., nickel plated	2 25

Less 30 per cent., 2 per cent., 30 days.

LAMP WICK ADVANCES IN PRICE

Montreal.

Quotations on lamp wick show an approximate advance of 10 per cent. Following are the new net prices on the popular sellers;

LAMP WICK—

	12-yd. roll.	32-yd. roll
A	0 40	1 05
B	0 58	1 55

COPPER AGAIN ADVANCES ON PRIMARY MARKETS

Montreal.—Copper on the primary markets has again improved, recovering from the slight reaction last week. The advance now recorded is slight, but fully satisfactory as dealers are hoping the gain will not be of a rapid nature. Prices on sheets, rods and tubing are holding unchanged, with the tendency again of an upward nature. Following are existing quotations:

BRASS—	Base.
Sheets, base	0 25
Rods, base ½ to 1 in., round	0 23
Tubing, seamless, base	0 32
F. o. b. Montreal.	
COPPER—	
Rods, ½ to 2 in.	0 30
Soft sheets, plain, 16 oz. and heavier lb.	0 32
Plain tinned, 16 oz. and heavier, lb.	0 38
Polished and tinned, 16 oz. and heavier, lb.	0 43
Tubing, lb.	0 34

Above prices are full sheets and bars. Cut sheets and bars are 5c per lb. higher.

LEAD GOODS ALSO FIRMER

Montreal.—Following the tendency of the metals used in their manufacture on the primary markets, lead and zinc products are somewhat firmer in tone. The finished products have for some time been selling at what was considered bottom prices, and it is now felt that the continuance of the improvement of the ingots will very shortly reflect on the market for these products. This would especially apply to solders and zinc sheets, these being somewhat stronger than the rest. Business is reported as only fair, but not unusually so, as the season is advancing to the usual dull period. Following are prevailing prices:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3* lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½

Cut sheets ¼c lb. extra, and cut sheets to size, ¾c lb. extra.

Solder, guaranteed, lb.	0 25½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 20½
Do., wiping, lb.	0 21½
Do., wire, lb.	0 35
Zinc sheets, casks	0 11½
Do., broken lots	0 12

CORRUGATED SHEETS SOMEWHAT FIRMER

Montreal.

The undertone of the market for corrugated sheets is somewhat firmer, owing to the improvement in the plain sheets situation. There is no present indications of any revision of prices, this probably because of the quiet season now approaching for these products. Sales are only fair, the season recognized as being fairly well over. Following are current prices;

Corrugated.—	
No. 28 gauge	7 00
No. 26 gauge	7 50
No. 24 gauge	10 50
No. 22 gauge	12 50
No. 20 gauge	14 00
No. 18 gauge	18 50

Less 7 ½ per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

CONTINUED IMPROVEMENT IN IRON AND STEEL

Montreal.

The market tone of bar iron and steel continues firmer, but not to the extent that is evidenced in sheet products. However, it is generally conceded that the next change in quotations will be in the nature of an advance, the time for which to appear depending on future developments at the mills. Although no advance has yet been recorded locally, the much better feeling still exists. Business locally shows a seasonable improvement with more enquiries, but large orders are not yet in evidence. Current prices are as follows:

Common bar iron, 100 lbs.	3 00	3 25
Refined iron	4 00	4 30
Irish finish machinery steel	....	3 45
Mild steel	3 00	3 40
Single reeled machinery steel	5 00	5 25
Band steel	3 00	3 40
Spring steel	....	6 00
Sleighshoe steel	3 00	3 40
Tire steel	3 00	3 60
Toe calk steel	4 00	4 30
Harrow tooth steel. per lb.	....	3 55
Mining tool steel per lb.	....	0 22
Black Diamond tool and cast steel, per lb.	....	0 22

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

Flats, iron and steel, 3-16 and thinner, 50c per 100 lbs. extra.

DOMINION WIPERS SHOW A REDUCTION IN PRICE

Montreal.

While cotton wastes have been much firmer in tone, wipers did not follow, and these are now quoted at a reduction. The white wipers have been reduced from 22 cents to 20 cents; colored from 16 to 14 cents. Wastes and wool packing are remaining on a steady market, but the firmer tone to the market is not as pronounced as was evident a few weeks ago. Following are prevailing prices;

COTTON WASTE—Cream polishing 20c. White, XXX, 17c; XX, 16c; X, 15c; XLCR, 15c; X Empire, 14c; X Press, 13c; 6 X Special, 12c. Colored, Fancy, 14c; Lion, 12½c; Popular, 10c; Keen, 9c; Wool Packing, Arrow, 30c; Axle, 25c; Anvil, 20c.

DOMINION WIPERS, Washed and Sterilized:	
White cotton	0 20
Colored Cotton	0 14

Above lines subject to trade discount for quantity.

RANGE BOILERS FIRMER BUT AGAIN UNSETTLED

Montreal.

The undertone of the market for range boilers continues firm as do most other sheet products. However locally there is again a rather unsettled feeling among the trade. The season is now advancing and jobbers are finding a slight slackening in sales. Being stocked fairly heavy they are now anxious to dispose of any surplus, and are offering a reduced figure. The older quotation of $8.75 is again found among some dealers. Following is the revised list of a few weeks ago;

RANGE BOILERS—	Standard.	Ex.Heavy
30 gallon	9 25	11 75
52 gallon	21 00	26 00
35 gallon	12 00	14 50
40 gallon	14 50	17 00
52 gallon	21 00	26 00
66 gallon	30 00	36 00
82 gallon	37 50	50 00
100 gallon	48 00	58 00
120 gallon	57 00	67 00

SHEET PRICES HOLD; FIRM TONE CONTINUES

Montreal.

It was anticipated that some slight revision to higher levels in sheet quotations would have likely developed, but this week still finds former prices holding. The tone in the primary steel markets continues firm; specially marked in sheet products and a change in local prices would cause little surprise. Sheet distributors state that while present local stocks hold out, prices will in all probability remain unchanged, but immediately they are forced to purchase at the higher mill prices, an increase will have to be put through. Stocks have been comparatively small for sometime but the demand has been such that they are found ample to meet all requirements up to the present. There is an improvement continuing in sheet orders and the better tone of the market remains. Further developments at the mills will be watched very carefully by dealers in anticipating their new selling prices.

English sheets and Canada plates also have a firmer outlook but are held unchanged, as in the case of American products, Local distributors state no change will be made in quotations until present stocks are exhausted. Local current quotations are as follows:

BLACK SHEETS

10 gauge	4 30 to	4 65
12 gauge	4 40	4 75
14 gauge	4 50	4 85
16 gauge	4 60	4 95

SCARCITY OF MOUSE AND RAT TRAPS

Montreal.

Jobbing houses report a shortage in their supplies of the Joker mouse and rat traps, also the wood choker traps.

HOCKEY STICKS LOWER THIS SEASON

Montreal.

As the season is fast approaching for the sale of hockey sticks, jobbing houses are now stocked to meet requirements for the coming months. Booked orders are not nearly as heavy as last year, and wholesalers are anxious that the winter sets in favorable for skating and hockey. Prices on sticks this season are lower than last year by from 10 to 15 per cent. The grading is said to be much improved also, which should help in bringing about a satisfactory season.

FIRMER TONE CONTINUES IN EAVESTROUGH

Montreal

The recent improvement in steel products generally, which was accompanied by higher prices being announced on certain products, has reflected a somewhat firmer tone in the market for eavestrough and conductor pipe. There is no indication locally of higher prices at present, probably because of the off-season, but it is generally believed the next revision in prices will be in the nature of an advance. Activity in these products is confined to small orders, dealers no doubt finding their customers still require troughing done before the winter commences. Following are list prices and discounts:

EAVESTROUGH—

O. G., Square Bead. per 100 ft., 8 inch, $15.90; 10 inch, $17.70; 12 inch, $21.20; 15 inch, $28.80; 18 inch, $36.80.

O. G. Round and Half Round, per 100 ft.—8 inch, $16.90; 10 inch, $18.70; 12 inch, $22.20; 15 inch, $29.80; 18 inch, $37.80.

CONDUCTOR PIPE—2 inch, $18.40; 3 inch, $22.30; 4 inch, $29.60; 5 inch, $40; 5 inch, $49. Discount 60|10 per cent. off list.

CONDUCTOR ELBOWS—

Plain round or round corrugated:

2 inch, list	$ 5 25
3 inch, list	6 00
4 inch, list	10 50
5 inch, list	24 00
6 inch, list	29 00

Less 55 per cent.

PIPE FITTING PRICES HOLD

Montreal.—There is practically no change to report on pipe fittings. Prices hold at revisions of a few weeks ago, and sales are fair, and of a sorting character. Following are prices and discounts:

FITTINGS—	Per Cent.
Cast iron fittings	25
Bushings, cast	27½
Do., malleable	25
Flanges	37½
Plugs	27½
Flange unions	22½

Class B	0 21½	0 28¼
Class C	0 14	0 21½

BRACES ARE REDUCED IN PRICE

Montreal

The announcement of a reduction in the prices of the standard lines of carpenter's braces is made this week. The decline in prices is approximately 7½ to 10 per cent.

INGOTS METALS ARE AGAIN MORE SATISFACTORY

Montreal.—The ingot metal markets are more or less marking time with no special changes in prices, and as far as the American markets are concerned, there is naturally some little hesitation owing to strike talk. The situation generally, however, is satisfactory, and there is no desire to see prices advance too rapidly.

Tin.—Although the changes are not very great, the tendency generally is slightly upward and the strength of sterling exchange assists in this direction. It is not likely that there will be any pronounced movements as yet, but there is little doubt but that the trend will be gradually upward. Local price 35½ cents.

Copper.—The slight reaction in New York is over for the present, and prices are again somewhat higher. Export business is, however, a little less in volume, and will be until the exchange situation in Germany becomes more stable. The situation generally is unsatisfactory, producers not being inclined to cut prices. Local market is steady at 17¼c, for electro, 17c. for casting.

Lead.—London market is quite firm, but there is little change at East St. Louis. The situation is quiet but firm, with a fair demand, and supplies generally adequate. Local price unchanged at 6¾c.

Spelter.—Both London and East St. Louis are slightly easier but the reduction is not very great and the situation in Europe is quite firm. A further advance is looked for when the present reaction is through. Unchanged quotation is 17¾c.

Antimony.—The market for antimony is easier again in New York, the recent advance having petered out. Local prices are also slightly lower in sympathy. Chinese is quoted at 7 cents, high grade English at 8 cents.

Aluminum.—Aluminum apparently refuses to cause interest in the market, and remains dull and quiet at 28 cents.

TORONTO MARKETS

TORONTO, October 27.—With only a moderate number of price revisions occurring on the current hardware markets, quotations generally have now developed a more stable attitude. This condition, although only temporary, is significant with the increase in the volume of business now recorded. Trade in seasonal lines is now very brisk; the activity being specially noticeable in stoves, ranges, and stove accessories.

Price lowerings are shown on hay fork, manure fork, hoe, and rake wood handles. Hay rakes, and coke tin plates, also supply revisions to a lower basis this week. The U. S. Steel Corporation have announced a reduction of $7.00 per ton in the base price on standard steel rails.

Through revised discounts, a decline of almost 20 per cent. appears on shovels, scoops, and spades.

The copper markets have now developed a quiet attitude, with only a moderate proportion of inquiry. The ingot markets generally have failed to retain the recent tone of improvement. There has been no marked increase in the scrap material demand; while the rise in raw cotton prices—which was reflected in quotations on many manufactured cotton goods—has now evidently spent itself. Optimistic expressions as to the future outlook in business conditions in general, and the hardware trade in particular, are more noticeable, and several encouraging factors are pointed out.

NO LARGE INCREASE IN SCRAP DEMAND

Toronto.

The slight increase in buying has continued in the scrap iron and steel markets, but this current improvement in demand is described as not being large enough to affect prices. Quotations, therefore, have not yet responded, and generally remain unchanged. Other scrap metals are quiet, with a lessening in the call for copper. A spasmodic movement is noted. It is said that scrap rubber is just moving sufficiently to keep the market from becoming stagnant. The following averages of dealers' nominal prices, are for fairly large quantities:

SCRAP MATERIALS—		
No. 2 busheling	.....	11 00
Heavy melting steel, gross ton	9 50	10 00
R. Rd. wrought iron, No. 1, gr. ton	10 25	11 25
Scrap pipe, gr. ton	6 00	7 00
Stove plate, net ton	11 00	12 00
No. 1 machinery cast, net ton	15 00	16 00
Heavy lead	3 75	4 00
Tea lead	2 00	2.50
Red brass	....	9 00
Yellow brass	5 00	6 00
Light brass	3 00	3 50
Heavy copper	9 25	10 00
Scrap zinc	3 00	3 50
Old rubbers, boots and shoes	2 00	2 50
Lumberman's rubber boots	1 25	1 75
Auto tires	0 50	1 00
Solid tires	0 75	1 25

STANDARD RAIL PRICE IS LOWERED $7.00 PER TON

Toronto.

The United States Steel Corporation has reduced its price on open-hearth standard rails $7.00 per ton. This change brings the base down to $40.00 per ton. The statement of the President, Judge E. H. Gary, announcing this decision, follows:

"We have decided to recommend that our subsidiary companies reduce the selling price of standard rails to $40.00 per ton base f. o. b. our mills.

"The present costs of production do not justify this action but it is hoped and expected that reductions in freight rates and otherwise together with larger operations will soon have a beneficial effect upon our costs."

MAINTAIN LOWER PRICES ON COPPER PRODUCTS

Toronto.

In spite of the firm undertone in the copper markets generally and also the fact that quotations on copper products have been advanced from one cent to 1½ cents per lb. in some markets, the local prices on copper and brass goods remain unchanged. The lower levels announced a few weeks ago are still being maintained on rods, tubing and sheets.

The recent upward trend of prices, and increased demand on the primary market circles seems to have spent itself. It is stated that this factor is the reason for local distributors adhering to unchanged price lists. Should, however, such improvement be regained, the consequent stronger tone would force an early increase in local prices. Prevailing quotations follow:

BRASS—	
Sheets, base, per lb.	$ 0 22
Rods, base, per lb.	0 20
Tubing, base, per lb.	0 25
COPPER—	
Rods, base per lb.	0 26
Soft sheets, plain, 16 oz. and heavier, lb	0 28
Do., plain tinned 16 oz. and heavier, lb	0 35
Do., polished and tinned 16 oz. and heavier, lb.	0 40
Tubing	0 27

FEW RANGE BOILERS SOLD AT NEW LIST PRICES

Toronto.

The new quotations on range boilers, given in the revised list recently announced, are reported as not being well maintained. Business in these products is undoubtedly dull, with the 30-gallon size showing the only signs of movement. One dealer steated that there had not been very many boilers sold at the new prices, the evident deduction from this being that buyers had practically been sold up during the period while price cutting was in progress. The prevailing price list on range boilers is as follows:

RANGE BOILERS—

	Standard	Ex. Heavy
30 gallon	$ 9 25	$ 11 75
35 gallon	12 00	14 50
40 gallon	14 50	17 00
52 gallon	21 00	26 00
66 gallon	30 00	36 00
82 gallon	37 50	50 00
100 gallon	48 00	58 00
120 gallon	57 00	67 00
144 gallon	.....	76 00

WOOD HANDLE QUOTATIONS ARE NOW REVISED

Toronto.

The revised prices on wood handles, which change was outlined in last week's issue of Hardware and Metal, are now available. The new quotations follow:

WOOD HANDLES—

Hay Fork Handles—Bent, No. 1 quality.	
4 feet, per dozen	3 20
4½ feet, per dozen	3 40
5 feet, per dozen	4 00
5½ feet, per dozen	4 80
Manure Fork Handles—Long Bent—	
4 feet, per dozen	3 40
4½ feet, per dozen	3 70
Hoe Handles—	
4 feet, per dozen	1 70
4½ feet, per dozen	2 30
Rake Handles—	
5 feet, per dozen	3 00
5½ feet, per dozen	3 60
6 feet, per dozen	4 50

Above all not 1 quality.

NEW DISCOUNT ON SPADES SHOVELS AND SCOOP

Toronto.—A reduction of almost 20 per cent has now been made in the quotations on shovels, spades and scoops. There is a marked revision in the discounts on the black list, as appearing in the current market quotation pages. The new discount is 55 per cent., compared with the previous figure of 45 per cent. The last change in prices on these products occurred during the summer months, when a similar alteration of 10 points was made in the discount list.

MARKET FOR BOILER TUBES IS QUIET

Toronto.

Quotations on boiler tubes are being held practically unchanged, with very little of marked interest to record. Developments of an outstanding nature in this market are not generally expected until well into the winter months, according to certain distributors in the trade, and with the current quiet demand, the nature of stocks has shown very little change. Dealers are however, looking forward to an improvement in activity, but are evidently not expecting this to materialize immediately. The firmer tone in the primary steel markets has hardly been reflected in tubular goods, as yet. Prevailing prices follow:

BOILER TUBES—

	Seamless:	Lapweld.
1 inch	26 00	.....
1¼ inch	27 25	.....
1½ inch	26 25	.....
1¾ inch	29 75	25 00
2 inch	28 00	22 00
2¼ inch	32 00	25 00
2½ inch	40 00	27 00
3 inch	44 00	35 00
3½ inch	60 00	40 00
4 inch	75 00	50 25

ROPE MARKETS UNCHANGED WITH PRICES HOLDING

Toronto.

The rope markets are practically unchanged, with conditions quiet at this season of the year. Recently some slight price increases were recorded in American circles, but prices are holding at current levels on the domestic markets. No marked developments are generally looked for until the Spring trade arrives.

FAIR INTEREST IN CORRUGATED SHEETS

Toronto.

Quotations on corrugated sheets are holding at the lower levels recently announced, and with an average volume of business recorded. Further price revisions on the flat galvanized sheets have created a renewed interest in corrugated, owing to the proportionate range on these products. With the higher prices on flat galvanized now developing, a firmer tone is reflected in current quotations on corrugated sheets. The prevailing levels follow:

Corrugated—

No. 28 gauge	$7 00
No. 26 gauge	7 50
No. 24 gauge	10 50
No. 22 gauge	12 50
No. 20 gauge	14 00
No. 18 gauge	18 50

Less 7½ per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

RISE IN RAW COTTON PRICES NOW SPENT

Toronto

The tide is now reported to have turned in the cotton markets generally, and the course of the recent rise in raw cotton goods, has evidently spent itself. This easier tone has resulted in holding prices on cotton wastes, with dealers stating that these recent cotton developments have generally served to maintain present quotations. While it was at first thought in some quarters that higher waste prices might materialize, as a result of the cotton flurry, distributors have adopted the principle of adhering to prevailing levels, rather than discourage the present volume of business through advancing prices. However, it is said that easier waste prices are not so likely to develop under current cotton market conditions, for the downward tendency was undoubtedly more evident prior to the recent gains in the raw material. Quotations therefore, are being held at the revised list announced last June.

BETTER DEMAND FOR LEAD AND ZINC PRODUCTS

Toronto

Prices on lead and zinc products are firm and unchanged. This sentence is a brief summary of the market conditions at present governing lead and zinc goods. A recent increase in demand has not only reflected a current improvement, but has also caused a brighter outlook for future activity in these markets. Following are the prevailing quotations:

LEAD AND ZINC GOODS—

Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subjected to a discount of	10%
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft. in rolls, lb.	09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 29
Do., strictly, lb.	0 22
Do., commercial, lb.	0 20
Do., guaranteed, lb.	0 24
Do., wiping, lb.	0 20
Zinc sheets, per lb.	0 13

REVISED PRICES ANNOUNCED ON HAY RAKES

Toronto.

New prices are now announced on hay rakes. The revised quotations are:—iron bow bent, $7.60 per doz.: wood bow bent, $8.25 per doz.

METALS DO NOT RETAIN RECENT IMPROVEMENT

Toronto

Ingot metals generally have failed to retain the recent degree of improvement and after some advances on the primary markets, are now marking time at slightly easier levels. Both the domestic and foreign demand for copper is now described as only of light proportions. Some market fluctuations, and the threatened railroad strike have produced a stationary effect on other metals.

COPPER—A quieter market and lower prices have developed on copper at primary centres. Producers quotations have eased from the high advances recently recorded, and both the domestic and foreign demand has fallen off noticeably. The local situation remains unchanged, and prices are still at the 17 cent level.

TIN—The dominant feature in this market has been the steady rise in exchange rate during the greater part of the past week. These have fluctuated and recovered alternately for some time and tin in the primary circles has reflected the changes, generally winding up a little firmer. The threatened rail strike is described as a factor tending to discourage buying in metals at this time. The local price of 35 cents still prevails.

LEAD—In this market, the planned lock-out of employees in the operating departments of American railroads, has resulted in consumers being little disposed to place orders. The consequent lack of demand, caused an easier tone generally. Local prices are holding arounr $6.50 to $6.75.

SPELTER—Trading in this metal has recently been a little brighter. Any apparent movement, however, has not been brisk enough to affect prices, which generally remain unchanged. The local quotation of $7.00 still generally remains.

ANTIMONY—After registering a stronger market, with conditions making for an improvement in demand, antimony has again weakened owing to the drop in silver. However, these changes have not been of drastic proportions, and local prices remain from 8 to 10 cents.

ALUMINUM—Market conditions in aluminum are dull. Prices on practically all markets are unchanged. but owing to the recent easier values of the mark, some lower offerings are anticipated from Germany. The average local price remains at 28 cents.

LONDON MARKETS

LONDON, Oct. 26.—Lower prices have again developed on a number of lines this week. Among the various hardware commodities registering revised quotations are, cistern pumps, both open and closed spouts; wood barrel churns; the Richard-Wilcox line of barn door hangers, track, and brackets; the Canadian Beauty make of electric irons, toasters, and grills; wood handles, and linseed oil.

Good seasonable business continues throughout this district. Fall hardware has enjoyed a general good sale, and the movement of winter goods is gathering momentum. There is a good demand for furnaces, stoves, stove pipes, and elbows; ammunition; game traps, and many other cold weather requirements.

WOOD BARREL CHURNS REGISTER DECLINE

London, Ont.

Wood barrel churns are included among the list of commodities showing lower prices this week. The extent of the current decline is approximately 5 per cent. Following are the revised quotations:

WOOD BARREL CHURNS—No. 0, $10.30 each; No. 1, $10.30; No. 2, $10.90; No. 3, $11.70; No. 4, $13.60; No. 5, $15.10.

BARN DOOR HANGERS ARE NOW QUOTED LOWER

London, Ont.

The Richard-Wilcox line of barn door hangers, brackets and tracks, all have reduced quotations, according to current announcements. The new lower prices are as follows:

BARN DOOR HANGERS—No. 321, $16.53 per dozen pairs; No. 20, $14.58; No. 21, $14.58; No. 021, $10; No. 821, $19.12.

BARN DOOR TRACK—No. 31, $16.53 per 100 feet.

BRACKETS for No. 31 track, $1.70 dozen.

CHANGE ELECTRIC IRON AND TOASTER PRICES

London, Ont.

A decline in quotations has been announced on Canadian Beauty electric toasters, irons, and grills. New lower list prices, and discounts, follow:

CANADIAN BEAUTY—Irons, No. 90, $6.75 list, each; toasters, No. 210, $7.50; Grills, No. 402, $13.50. Less 27½ per cent.

CISTERN PUMP PRICES REGISTER DECLINE

London, Ont.

New lower prices are now in effect on cistern pumps, both on the open and closed spout styles. Following are some of the revised quotations:

CISTERN PUMPS—Open spout, No. 1, $2.50; each; No. 2, $2.85; No. 3, $3.25. Closed Spout, No. 1, $2.65 each; No. 2, $3; No. 3, $3.50

NAIL DEMAND BETTER WITH FIRMER TONE

London, Ont.

There has recently been a firming up in the tone of the nail market generally, and a fair movement in these products is evident at present. Since the last revision on wire nails a few weeks ago, quotations have remained unchanged at the following levels:

Wire nails ..... $4.25 base
Cut do ..... 4.95 base

Miscellaneous wire, list, less 70 per cent.

PRICES ON POTTS SAD IRON HANDLES NOW REDUCED

London, Ont.

Prices on the Mrs. Potts line of sad iron handles have now been reduced. This decline brings quotations to $1.75 per dozen, compared with the previous price of $1.90.

WOOD HANDLES NOW QUOTED AT NET LIST

London, Ont.

Wood handles are now selling locally at net list. While no new lists have been issued, it is stated that the manufacturers have lowered quotations on all the various types and makes of handles listed on the market pages.

LINSEED OIL QUOTATIONS AGAIN LOWERED

London, Ont.

A further decline of three cents per gallon is announced this week on both raw and boiled linseed oil. This change brings quotations to 87 cents per gallon, on raw in 1 and 2 barrel lots, and 90 cents for boiled. The weakening of oil prices is attributed to the easier quotations on flax seed, coupled with the lower price levels that have developed locally. Following are the revised quotations:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrels, per Imp. gal. ...	0 87	0 90
3 to 5 bbls., per Imp. gal.	0 86	0 89
6 to 9 barrels., per Imp. gal. ..	0 84	0 87

Less barrels add 15 cents gallon.

PRICES ON TURPENTINE HOLD AT HIGH LEVEL

London, Ont.

While the price on turpentine is practically unchanged this week, stocks are stated as being fairly low, and the firm undertone generally prevails. The following quotations are general among local dealers:

TURPENTINE—	Imp. Gal.
1 barrel lots	1 15
2 and 4 barrel lots	1 14
5 gallon lots	1 80

CATTLE CHAINS SELLING MORE LIBERALLY

London. Ont.

Cattle chains are now selling in more liberal quantities, according to reports received from local dealers. There has been no change in the quotations on these products, the prevailing price of list plus 37½ per cent, still being general.

BOOKING ORDERS FOR ICE SKATES IMPROVE

London, Ont.

Dealers report that the current sale of ice skates is gradually improving. Both jobbers and factories indicate that there has recently been an increase in booking orders for these winter sport goods, and the following are prevailing quotations on the Starr line:

ICE SKATES—	List Pair
No. 153	$ 1 70
No. 150	1 90
No. 154 Bull dog	2 10
No. 156, Acadia	2 10
No. 173, Climax	3 50
No. 157, Beaver, plain	2 75
No. 194 Regis	3 25
No. 162 Beaver, flanged	3 25
No. 189 Regal	5 00
No. 181 Velox	6 50
No. 193 Dreadnought	4 00
No. 190 H. Tube	6 00
No. 196 Imperial	6 00
No. 184 Glazier	3 50
No. 197 Mercury	7 00

Less 30 per cent.

SEASONABLE MOVEMENT OF STEEL GAME TRAPS

London, Ont.

Steel game traps are now selling well. There has been no change in price, and following are the current quotations on these seasonable lines:

GAME TRAPS—

Victor, with chain, No. 0, $2.20 doz.; No. 1, $2.65; No. 1½, $4; No. 2, $5.50; No. 3, $9.35; No. 4, $11.25.

O'Neida Jump, with chain, No. 0, $3; No. 1, $3.50; No. 1½, $5.25; No 2, $8.40.

Newhouse, with chain, No. 1, $7.50; No. 1½, $11.35; No. 2, $16.75; No. 3, $22.35; No. 4, $26.35.

Hawley and Norton, with chain, No. 0, $4.25; No. 1, $5; No. 1½, $7.60; No. 2, $10.60; No. 3, $14.15; No. 4, $16.65.

SEASONABLE SALES FOR ASH SIFTERS

London, Ont.

The approach of the cold weather and the commencement of the furnace season, has been reflected in current demands for ash sifters. Many dealers report sales of these products being good at present. Following are unchanged quotations on popular lines:,

Common wood sides..$2.40 per doz.
Banner, No. 2 ..... $2.10 each
Banner, No. 3 ..... $2.10 each

STOVE ACCESSORIES NOW SELLING WELL

London. Ont.

Coupled with the current demand for stoves, ranges, and furnaces, the movement of stove boards, stove pipes, and stove pipe elbows has also been showing a noticeable increase. Sales in these products are now more numerous, and following are the prevailing quotations on these stove accessories:

STOVE BOARDS—

Wood lined, list less 15 per cent.
Paper lined, list less 30 per cent.

MADE-UP STOVE PIPES—	10 lengths
6 inch common,	$14 65
6 inch bright	18 31
7 inch common	16 22
7 inch Br.	19 34
STOVE PIPE ELBOWS—	
6 inch light, dozen.	2 20
6 inch, heavy	2 46
7 inch light	2 40
7 inch heavy	2 76

AMMUNITION SALES NOW REPORTED GOOD

London, Ont.

The Fall movement of shells and cartridges is well under way, and dealers report good sales for ammunition generally. Quotations remain unchanged, with the Dominion make being quoted at list less 30 and 20 per cent; and the American make at list less 22½ per cent discount.

SNOW SHOVELS NOW GOING FORWARD

London, Ont.

Orders for snow shovels are now going revision since the new quotations recently announced. Following are the prevailing levels:

SNOW SHOVELS—	doz.
Prince, long handle	5 50
Prince, d. handle	7 20
King, d. handle	8 00
Moose d. handle	10 50
FURNACE SCOOPS—	doz.
D. handle	5 50
Long handle	5 50

CROSS-CUT SAWS NOW BEING SHIPPED

London, Ont.

Booked orders are now being shipped for cross-cut saws. A seasonable movement is anticipated in these products, while prices are also holding unchanged. Following are the quotations on the Maple Leaf Lines:—Lance, Premier, Racer, and Pangburn makes: 5 feet, $5.50 each; 5½ feet, $6.25 each; 6 feet, $7.25 each.

SEASONABLE MOVEMENT OF WINDOW GLASS

London, Ont.

The current sales in window glass are noticeably improving, and good sorting sales now prevail. This betterment is seasonable, and has been generally anticipated since the advent of the Fall season. Prices are being maintained at the new net list on both single and double diamond in case lots, while the quotation on cut lights, remains at list less 75 per cent.

SEASON COMMENCES FOR AUTO TIRE CHAINS

London, Ont.

The approach of the Fall and Winter seasons has seen a corresponding stimulation in sales of automobile tire chains. These products are in general demand during practically all months, excepting the summer season; but the movement is specially noticeable throughout the winter. Quotations on the Rid-O-Skid and Weed types of tire chains, still remain at the recently revised levels, of list less 25 per cent. On lots of 12 sets in one shipment, a discount of list less 33 1-3 per cent is quoted.

SALES OF WHITE LEAD IN OIL SLOW UP

London. Ont.

With the advanced season, the sale of white lead in oil has now slowed up considerably. Prices remain unchanged as follows: Pure, in ton lots, $13.30 per 100 lbs.: in less quantities, $13.65 per 100 lbs. Elephant white lead, $13.80 per 100 lbs. in ton lots, and $14.15, for less tons.

WINNIPEG MARKETS

WINNIPEG, October 27.—Interest is shown in the hardware markets this week by the announcement of price adjustments both in an upward and downward direction. The list of changes while not very lengthy, covers several important lines. Chief among the recessions are lower prices on Community plated ware, Lufkin rules and tapes, linseed oil, fence staples and Heller's horse rasps.

Items quoted at advanced prices are soft copper wire, and turpentine. Higher prices are also recorded on kerosene oil and gasoline, also fuel oil, and some lines of lubricating oils.

TURPENTINE PRICE SHOWS ANOTHER INCREASE

Winnipeg.

The price of turpentine advanced this week and is now quoted at $1.30 per gallon in barrel lots.

OIL QUOTATIONS RECORD RECENT GAINS

Winnipeg.

Prices on coal oils, gasoline, and some lubricating oils have all been advanced this week. The change in current quotations is attributed to the recent gains in crude oil, and the strength of the oil markets generally. The revised prices are contained in the pages devoted to Winnipeg current market quotations.

BRIGHT FENCE STAPLES LOWER IN PRICE

Winnipeg.

The price has been lowered on bright Fence Staples. Following are the new quotations:

Ft. William Price $5.00 per 100 lbs.
Winnipeg Price $5.65 per 100 lbs.

PIPE CUTTERS

Winnipeg.

Lower prices are now in effect on Trims pipecutters. Following are the revised quotations on these products:—

No 1 $3.25 each.
No. 2 $4.50 each.
No. 3 $1.50 each.

COMMUNITY TABLE WARE SHOWS REDUCTION

Winnipeg

The Oneida Community Co., have announced a reduction in prices on both Community and Community Par plated ware. The higher grade shows a reduction of approximately 11 per cent and Par Plate 20 per cent. For example, the Community tea spoons which formerly sold for $5.74 per dozen, are now quoted at $5,14 per dozen. Par plated spoons formerly at $2.56 will now cost $2.06.

SOFT COPPER WIRE—No 8, 28c per lb.; No. 9, 28c; No. 10, 28c; No. 11, 29c; No. 12, 29c; No. 14, 29c; No. 16, 30c; No. 18, 31c; No. 20, 32c; No. 22, 33c; No. 23, 35c; No. 24, 36c; No. 25, 37c; No. 26, 38c.

QUOTATIONS REDUCED ON TRIMS REVISED DISCOUNT ON HELLERS HORSE RASPS

Winnipeg

Through a revision in the discounts, lower quotations are given on Hellers horse rasps. The new discount is 65 per cent.

LOWER PRICES ON LUFKIN RULES AND TAPES

Winnipeg.

A decline in price is now recorded on rules and tapes. The general revision of prices has been announced on the Lufkin line of measuring products which shows a lowering in quotations varying approximately between 10 and 15 per cent. Following are the revised prices on a number of the Lufkin lines.

LUFKIN MEASURES— No. 260, $3.40 each; No. 263, $5.10; No. 100, $3.80; No. 103, $5.50; No. 243; $4.55; No. 603, $3.35; No. 604, $3.70; No. 713, $6.50 per doz.; No. 714, $9 per doz.; No. 143, $7.60 per doz.; No 165, $1.65 per doz.

SUBSTANTIAL DROP IN LINSEED OIL PRICE

Winnipeg.

A big reduction is made this week in linseed oil, and the prices now quoted are 95 cents per gallon for raw and 98 cents for boiled in barrel lots.

COPPER WIRE PRICES SHOW ADVANCE

Winnipeg.

The prices on copper wire have been increased this week. Following are the latest quotations;

PITTSBURG MARKETS

PITTSBURGH, October 27.—While the production of steel has probably continued to increase up to date, or to within a week or two, the rate of buying of steel products at present does not seem to presage any further increase for the time being. The steel market is distinctly quieter, according to most members of the trade, although here and there mills report orders increasing.

Production of steel ingots is running at a trifle above 35 per cent of capacity, this comparing with rates at 32 per cent. in September, 30 per cent in August, and 21 per cent. in July. There has been a fairly continuous increase in the production rate for three months, but the probability is that there will be no material increase over the present rate in the remainder of the year and this means, of course, that there may be some recession. It is quite impossible, however, that production should drop to the low rate of last July, for that represented an altogether abnormal condition. There was consumption then, but it was supplied in large part by stocks of steel in the hands of jobbers and manufacturing consumers, and of manufactured wares in various hands. These stocks being largely liquidated, demand upon the steel mills has been returning to a normal relation with the actual consumption, which has been proceeding right along.

The sheet mills continue to show by far the best operation of any branch of the finished steel trade. The American Sheet and Tin Plate Company, (Steel Corporation) has been operating about 90 per cent of its sheet mills, while the independents have been averaging 75 or 80 per cent. There has been a slight decreasing tendency in the past two or three weeks. Tin mill operations have decreased materially, the average being now about 50 per cent. Wire mills are operating at former rates, from 40 to 60 per cent. Pipe mill operations have increased somewhat, and now average close to 50 per cent. Merchant bar mill operations have been increasing, but are still very light.

It is the low operation of bar, shape, plate and rail mills that pulls down the general average, for it would seem strange for steel to be produced at only about 35 per cent. of capacity when sheet mills are running at 75 per cent and more and wire, pipe and tin plate mills are going at far above 35 per cent.

As to rails, the railroads have not been specifying to any extent of late, and a considerable part of the rail tonnage put under contract for the present year was in line to be carried over to next year, partly because the railroads are short of funds and partly, no doubt, because the roads have lately been hoping that there would be a reduction in the price for next year. The United States Steel Corporation has in the past few days announced a reduction of $7 a ton, from $47 to $40, in its rail price, and this may cause the railroads to take out some tonnage now which otherwise they would have carried over to next year.

As to finished steel prices in general, they show a stiffening rather than a weakening tendency, but there are no clear cut advances. Efforts are being made, more or less, to get prices up, but this is no easy thing when mills are so indifferently employed. In bars, shapes and plates the advance to $1.65 for bars and $1.75 for shapes and plates still hangs fire. The Carnegie Steel Company got up to this basis several weeks ago, and a few independents are adhering to the prices, but there are a few aggressive sellers at lower prices. These lower sellers have been endeavoring to accumulate enough business to justify their withdrawing the lower prices but it has been very difficult to gather up tonnage, except small orders for immediate shipment. For delivery in the Pittsburgh district and nearby, bars, shapes and plates can be done at $1.60 if the order is attractive in tonnage and specifications, but this is not the market for the whole country, since the usual "Pittsburgh plus" system is abandoned in much of the territory, at least for the time being. Thus there is a seller in the Buffalo district that will name delivered prices equivalent to $1.50, Pittsburgh, on bars, while in the west $1.75, delivered Chicago, has been done on bars. To meet this competition a Pittsburgh mill would have to sell at $1.37, mill, and of course this could not be done.

Just what will occur as to sheet prices remains to be seen. The great majority of independents have formally announced an advance of $5 a ton, but some would probably sell at the old price, and the Steel Corporation has made no advance. If the advance were effective it would raise black sheets from $3.00 to $3.25 and galvanized from $4.00 to $4.25. Superficially blue annealed sheets would seem to go up from $2.50 to $2.75, but in the actual market it has developed that blue annealed sheets can be bought at the $2.25 price ruling before the September advance was made.

That the steel market has been distinctly less buoyant in the past couple of weeks is now recognized in all quarters. Whether the demand, as a whole, has actually decreased is a question, but it is certain that it has not been increasing as it was a few weeks and more ago. Whether improvement will be resumed in the near future is uncertain. An opinion could be formed if it were definitely known what has arrested the progress of the advance. If it is the season of the year, then no further improvement can be counted on until the late winter. If it is the fact of freight rate reductions having come into nearer prospect, then a decided improvement in buying can reasonably be expected when freight rates are reduced. A general reduction would decrease somewhat the cost of producing steel, resulting in somewhat more attractive prices, while it would reduce the cost of moving steel, and that would reduce the cost to the consumer, for whatever the formal terms in a sale of steel the essence of the transaction is that the buyer stands the freight. If half of what has been said lately is true a reduction in freight rates would stimulate business in general, and the steel industry would naturally get its share

White Lead Shows Decided Improvement

Pig Lead Now on a Healthier Market, Brings White Lead in Oil to a Firmer Basis—No Price Change Likely in the Near Future

MONTREAL. — Discussing the present situation in pig lead and its relative position to white lead in oil, John Irwin, president McArthur-Irwin Limited, informed Hardware and Metal that there was every indication of continued strength in the pig lead market and a steady and firm outlook of the finished product, white lead in oil.

"I can see nothing else but a firm tone to the white lead market, with prices remaining very steady for the following months," said Mr. Irwin.

Referring to a schedule of prices on pig lead existing from the beginning of 1920, it was pointed out that values had fluctuated considerably down through the months with the levels reduced to a much lower figure in December than was ruling in January 1920. Commencing with January 1921 the prices again receded until the low point was reached in the mid-summer months this year. During August the improvement was first in evidence, and September showed considerable gain. When pig lead was at the low point during the summer months, it was generally conceded that the market had dropped to a figure unwarranted by surrounding conditions and that higher prices were imminent. These made their appearances, as stated, in September and the tone of the market has been much healthier since. The improved tone was noted at the time when a general improvement was beginning to be felt in all metals and was brought about undoubtedly by a betterment in demand, coupled by the realization of the low quotations then existing.

"Linseed oil is a factor in the cost of producing white lead, but not to the extent that is generally believed by the trade," continued Mr. Irwin. "To every 91 pounds of the metal, 9 pounds, or approximately one gallon, of linseed oil is used. Thus the amount of variation in the price of one gallon of oil is reflected on the price of 100 pounds of white lead in oil."

Although not down to 1914 prices, present levels were within reasonable reach of these prices to-day. In 1914, white lead was selling at $8.25, present quotations being $12.00 per 100 pounds. This leaves a difference of $3.75 per 100 pounds, and with present higher productive costs this product is now at a very reasonable figure, especially in comparison with other commodities in as staple a class as white lead in oil.

Continued Strength in Primary Market Not Likely to Advance White Lead Prices for Some Time

When asked if a continuance of the strength now showing in pig lead would have any effect on the prices of the finished product, Mr. Irwin said he did not believe any change would be made for some time at least. Corroders had already contracted for supplies and they were now facing a quiet period in the industry. The winter months would not, in all probability, bring out any new prices.

Window Glass Shortage Affects Prices

Shipments from Belgium are Not in Full, Owing to Closing Down of Many Plants—Relief Will Likely Come Later, but Many Merchants' Orders Are Now Held Up

MONTREAL. — The closing of many of the Belgian glass plants during the summer months is now reflecting on the local markets for window glass. Owing to strikes, lock-outs, and labor troubles in general, a number of manufacturers closed their doors and have been idle since the early summer. In this connection, too, the depression of the market in the previous few months undoubtedly assisted in forcing the cessation of operations with many of these firms. Reports state that only three out of approximately twenty factories were turning out supplies up until a recent date. This situation has improved slightly when it is stated that others are now commencing to light their fires, but a further delay will here be experienced as this operation invariably causes an enormous amount of breakage. It is estimated that from three to four weeks will yet elapse before exports from Belgium are within normal capacity. To the Canadian market this will hardly be in time to meet the earlier demands, as from the present time to the middle of November marks the busiest season in the glass trade. The merchant enjoys the biggest demand during the month of November, thus an improvement in Belgium imports will have to be made or another source looked to, to prevent a subsequent shortage.

Importers are not regarding the situation as serious, but are looking for heavier arrivals in the near future. Boat loads are expected, one the latter end of this week. However, the amount of window glass allotted to the different houses is still uncertain. If they are as short as recent shipments, ample supplies will still be wanting.

Canadian Manufacturers May Relieve Situation

Canadian manufacturers may greatly relieve the situation if there is time Our home industry realize the position of the market and are doing their utmost. With another large enterprise to commence operations in the near future, Canadian made glass should be very prominent on the domestic market.

The American window glass market cannot be looked upon as favorable for import, as competition with Canadian and Belgian glass is today out of the question for our neighbors to the south with their present prices and tariff rates.

Although a shortage, temporary at least appearing on the Canadian market, there are no present indications of advanced prices, and the close of navigation would seem to be the next factor to further cause a firming of prices. The market is now undoubtedly firmer than it has been for some time, but will, according to local dealers, remain unchanged in prices till freight rates from St. John, New Brunswick add to the transportation cost of import.

SERVICE

CONFIDENCE

FAIR DEALING

Sentiment and Character

"I have never looked upon this Paint Business as altogether a money making business. It is more than that. It is a man-making business."

IN these words often reiterated, our late President, Mr. Houston Lowe, speaking before his business associates made clear in no uncertain manner the policy which is at once the sinews ; heart and mind, of Lowe Brothers' Organization.

Mr. Lowe is dead. But he has left behind him to perpetuate his name ; character and principles, his son, Mr. John Lowe—who, like the idealist his father was, guards jealously the big, human, square, friend-invoking principles which above all else are responsible for our happy connections.

Sentiment in Business ? Yes, of course !

Sentiment is *feeling*—and it is that "feeling" injected into everything we do which is responsible for the wonderful and gratifying testimonials of satisfaction and pleasure received from day to day from our "High Standard" Agents. We and the dealer are *one*—working together toward a common end—"*Better Business.*"

Standardization in Brush Making Industry

War Conditions Made Necessary Standardization of Products, Processes, etc. — Modified Form of Standardization Now Necessary to Meet Public Requirements

STANDARDIZATION has become an important factor in almost every branch of industry and the need for it has become more apparent in recent years than ever before. The application of standardized principles to brush manufacture is an interesting subject and the trade are herewith given some details concerning standardization in the brush industry of Britain

"Before the war efficient methods of production were comparatively unknown in the United Kingdom brush industry. In most firms each operative made the entire brush throughout all its processes," said F. W. Field, H. M. Trade Commissioner in discussing this subject with Hardware and Metal.

"The war, with its heavy military and naval requirements, made the introduction of up-to-date methods imperative, with the consequence that division of labor began to be more generally adopted, and new and improved machinery was installed by many manufacturers," continued Mr. Field. "Standardization was a fairly simple matter during the war, as military and naval requirements consisted mainly of certain standard types. After the war, however, manufacturers had to turn their attention to the more varied types of brushware required by the public, and so a modified form of standardization was substituted. For instance, many firms now use one variety of brush back for many different varieties of brushes and a few standard mixings of bristle, fibre, etc., often replace the many variations that formerly were considered necessary. Machinery parts also are now to a great extent standardised and interchangeable. Obviously these methods have led to greater economy in production and considerably increased output, facts which are appreciated by the majority of dealers, who have the advantage of a smaller variety of goods to carry in addition to the benefits of better quality and lower price. The education of the consumer, who is notoriously conservative, is much slower, as he does not always realize the advantages of standard production over more expensive but not necessarily more efficient special production. There can be little doubt that the standardised methods of production recently adopted by most British manufacturers of brushware have helped materially towards the high reputation which British brushware holds throughout the world for reliability of construction and quality of finish."

SHOWCARD SUGGESTIONS

(Continued from Page 39)

piece of cardboard will serve) until a flat, chisel-edge is obtained.

Regarding cardboard—you can obtain a supply at any wholesale paper house. It is made in standard size sheets coated white; 22 x 28 inches is known as a full sheet. It is also made in the larger 30 x 40 inch size in varied thicknesses or plys. Either 8 or 10 ply is suitable for show cards.

Here I now present for your consideration and practice the lower case or small letters of the plain Gothic alphabet.

As you will observe from the Plate all elements of the alphabet are made either on the down-stroke of the brush or from left to right (see direction of arrows on plate.) I use a No. 12 brush for this alphabet. Try practising with the No. 12 brush; it is a good medium size and produces stocky "well-fed" letters.

As you know, there are 1,001 different styles of lettering, designs, shading, ornamentation and fancy scrolls used by different cardwriters; in fact, every card-writer has a style peculiar to his own individuality.

Your best plan is to get familar and proficient in the production of the good plain every-day alphabets, have them thoroughly mastered from A to Z; then you will be prepared to acquire a fuller knowledge of the advanced stages of cardwriting such as: arrangement, layouts, color combinations, contrasts, etc.

The subject of "arrangement" or "layout," as it is commonly called, is a large one and will be dealt with in later articles as the series progresses.

It is a well known fact that a well-balanced, artistically arranged card, even though the lettering itself is indifferent, is far more pleasing to the eye than a card well-lettered but badly spaced.

Here are a few simple rules to follow in laying out the inscription on a card; follow them out carefully and you cannot go far wrong:

First, rule a pencil line right down the centre of the card; by so doing you will be able to balance the wording properly.

Keep all your lettering well centred.

Do not overcrowd the card with lettering but leave a generous margin or white space all around.

Some beginners have the mistaken idea that a good show card consists of a creation in multi-colored hues and elaborate decorative schemes. Cards of this order tend to give the average passer-by the same impression he registers on seeing a "loud" necktie or a circus advertisement. In truth the manifestations of so-called art by some beginners actually border on the burlesque. The moral is—steer clear of using vivid colors on show cards unless you fully understand color harmony. Of course on special occasions and holiday seasons appropriate colors and suitable simple decorations are to be commended.

St. Patrick's Day, Valentine Day, Easter, Hallowe'en, Thanksgiving and the Christmas season give the cardwriter an opportunity to display his originality in the matter of attractive, seasonably decorated cards.

In practising lower-case letters, whether it be brush or pen alphabets, it is wise to rule a horizontal pencil line above and below the guide lines proper. This will enable you to make all the letters b, h, I, g, j, y, and the others of a like nature.

When you require to make a large number of price cards at one time bearing perhaps, one or two lines of lettering and the price, it is a good plan to make a mask or lay-out to serve for all the price cards to be written.

To make the mask (figure of which is shown) is a matter of but a few moments and you will find it to be a great time-saver also in making your tickets uniform in appearance.

TO HOLD BICYCLE SHOW

Alderman George Wenige of London, Ontario, proprietor of the Bicycle and Motor Sales Company, London, is the choice of the 1922 directors of the Canadian Bicycle Dealers' Association for the office of president of the association for the ensuing year.

Announcement is also made that N. N. Ferries, son of N. S. Ferries, proprietor of the Wentworth Cycle Works, Hamilton, Ontario, is the choice of the directorate for the post of secretary-treasurer for the next year.

The Canadian Bicycle Dealers' Association intends to make early plans for a bicycle show to be held in conjunction with the 1922 convention of the association which has been awarded to London, Ontario, to be held during the last week in September. It is also proposed to conduct an inter-city bicycle race-meet with riders of London and Ottawa competing in a two-cornered series of events.

Boeckh's Brush News

"The Brush"

How interesting it would be to know just what picture is called to the minds of different people on hearing this word.

It might be an artist's brush, the delicate tracery of which has given pleasure to so many people, or it might be the white-wash brush which Mark Twain made so alluring to the small boy.

This article deals with the paint brush which requires great care in selection in order that it may give the best service.

Boeckh's Rubber Set brushes are guaranteed and, therefore, the purchaser is safe-guarded against loss from a defective article.

Boeckh's brushes are **perfect** to commence with, but must be used with proper care to preserve that perfection.

They should not be dipped in water before using in paint or oil—neither should they be soaked so as to cause the handle to swell and burst the ferrule. No brush however perfect can be guaranteed against this treatment. A brush that has been used in water-paint should be thoroughly dried out before being put in oil or paint.

The "Scientific American" says: "A brush should not be put in water either before or after being used in paint, but should be kept in oil, preferably coal oil, while not in use."

The perfect quality of the bristles used in Boeckh's Rubber Set Brushes gives a regular flow of varnish or paint and so leaves an evenly covered surface, and the splendid finish of the handles and bright appearance of the ferrules are very pleasing to the eye of a prospective purchaser.

The small number of Boeckh's Brushes claimed defective which are returned (a good percentage not being defective but ruined by abuse of the consumer) is in itself a proof of their perfection. And the readiness with which the brush is replaced, provided it has had fair use and attention, is ample evidence of how desirous the house is to have satisfied customers.

One dealer remarked that in ten years' selling of Boeckh's Brushes, the defective ones were practically nil.

Dealers may therefore recommend Boeckh's Brushes with a feeling that the purchaser will be perfectly satisfied.

Weekly Paint Markets

MONTREAL

MONTREAL, October 27.—Linseed and turpentine attract attention in the paint markets this week. The former is again somewhat easier, with local prices receding to 81 cents for raw, and 83 cents for boiled in one barrel lots. This product continues to fluctuate from week to week in an endeavor to keep pace with the flax seed situation, which also is unsettled owing to reports of crop conditions. Turpentine has been on a steady to firm basis in recent weeks, with a price increase on the local market of 2 cents per gallon this week. Although dealers have stated that the turpentine demand immediately fell when the recent announcement of higher prices was made, it seems the condition of the market will not allow a weakening. Both local and outside markets report a light demand at present.

White lead in oil is now on a very satisfactory basis. The undertone has improved since the lower prices were announced this Fall, and corroders and jobbers look for a continued steady condition. Putty is also selling well at present with a good season anticipated for all concerned. Prices are holding unchanged, with few signs of a revision in either direction for the season. There are still signs of a shortage in window glass although importers are not yet regarding it as very serious. Although manufacturing in Belgium is not up to normal capacity, dealers base their hope for a more ample supply with the arrival of heavier shipments from now until the close of navigation. Local prices are firm at the net list with no change thought likely until the port of Montreal is closed and freight rates from an ocean port will have to be added to transportation costs.

PUTTY SALES INCREASING

Montreal.

A totally satisfactory volume of business is now recorded in putty. Sales are increasing from week to week, showing that the advancement of the season governs the movement. Dealers stocks are very low and purchases are made only as the requirements calls for. The undertone of the market is one of steady to firm, and following are present prices.

PUTTY— Standard, per 100 lbs.	5-ton lots	1-ton lots.	Less
Bulk barrels, 800 lbs.	4 00	4 50	4 75
Bulk drums, 100 lbs.	5 00	5 50	5 75
Do., or tins, loose, 25 lbs.	5 25	5 75	6 00
Drums or tins, cased, 25 lb.	6 00	6 50	6 75
1-lb. tins	8 75	9 25	9 50

Pure Linseed Oil Putty, $1.50 per 100 lbs. ad-

EASIER TONE DEVELOPS IN LINSEED OIL MARKET

Montreal.

The fluctuating of the linseed oil market is clearly demonstrated when last week a firmer tone seemed to develop, and prices were increased; this week it is again easier, prices again receding. General current quotations are 81 and 83 cents for raw and boiled respectively in one barrel lots, but some jobbing houses are maintaining slightly higher figures. The situation locally is, as stated, a little easier this week but it was thought to be only due to the fluctuation of the flax market, and another improvement in the near future would not be surprising. Outside markets report much the same position, but state that the crusher, and those well informed, are generally of the belief that the present slight set-back is only temporary and the market would continue its recovery in the very near future. Local prices are as follows:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal.	0 81	0 83
3 to 5 barrel lots, per gal.	0 79	0 81

Less barrels, add 10 cents per gallon.

TURPENTINE QUOTATIONS ADVANCE 2 CENTS

Montreal.

The firm undertone prevailing on turpentine has this week developed into a price increase of 2 cents per gallon, bringing the present local quotations to $1.09 in one barrel lots. There is now a quiet market on this product, with sales slackening further in the past few weeks. This season of the year is usually a dull one for turpentine, and the price advance was solely from conditions in the Southern market. Notwithstanding this, the increased quotation is very general. Stocks locally are limited, but ample to take care of the present light demand. Current local quotations are the following:

TURPENTINE—	Imp. gal
1 barrel lots	$1 09
2 to 4 barrel lots	1 07
Broken lots	1 19

A STEADY OUTLOOK FOR WHITE LEAD

Montreal.

With quotations on white lead in oil unchanged, the market continues on a steady to firm basis. Lead on the primary market is holding firm with recent slight advances in quotations recorded. Although a recession in demand will be noted during the quiet winter months following, there seems every indication of a steady unchanged position for this product. Corroders have now contracted for their metal requirements, and a continued improvement in the primary market will not likely reflect on white lead in oil, especially when dealers are now entering the quiet period. Current quotations are $12.00 in five ton lots, $12.75 in 1 ton lots and $13.10 in less quantities.

STOCKS OF WINDOW GLASS BECOME SMALLER

Montreal.

Local stocks of window glass are gradually becoming lighter owing to the Belgian situation. Shipments from this source have for the few weeks past been light, and by no means ample to meet present orders now in the hands of importers. There is slight relief this week-end upon the arrival of a boat load, but shipments that are to arrive between now and the close of navigation here will have to be much heavier than recently, or a subsequent shortage may be felt at the busy season for the merchant.

Jobbing circles are not yet considering the situation as serious enough to cause extra concern, but base their hope of relief in the boat loads that are to arrive in the near future. Prices too are so far unaffected, but remain in the meantime somewhat firmer than has been the case during the summer months. It is stated that the close of navigation will likely be the next factor in strengthening prices, as freight rates from an ocean port to Montreal will have to be then considered.

TORONTO

TORONTO, October 27.—For the initial time in several weeks the prominent position which turpentine and linseed oil usually present in the current paint markets have been usurped by shellac and window glass respectively.

The recent gains in price of shellac gum, have now been reflected in a firmer tone all through the shellac markets. On the other hand, turpentine quotations remain unchanged locally, but the recent gains in both the domestic and primary markets are being well maintained. While no large purchases have been recorded, it is intimated that any resumption in foreign demands would further enhance values. At present, however, consumers are generally ord-

TORONTO PAINT MARKETS

(Continued from Page 56)

ering for immediate requirements only.

With the continued fluctuations in flax seed, the easier levels announced last week on linseed oil remain unchanged. Big consumers are quite reluctant to purchase, and orders are consequently of the small variety. The continued weakness in English oil is said to be a contributing factor to the prevailing easier quotations.

Belgian Glass Industry Unfavorable

Window glass sales are picking up steadily, according to current opinions from various wholesalers, but the movement is stated as not too brisk for this season of the year. Under normal conditions, marked activity should prevail in the glass markets during the present season, but the proportion of buildings under construction during the Fall period has been a little disappointing from the glass distributors' viewpoint. Quotations at the new net list recently announced, with a 5 per cent discount being given on orders of 25 cases or more.

European prices on Belgian sheet glass are stated as being very erratic at present, owing to the fact that several factories in Belgium have been forced to close down. This condition has caused a temporary shortage of glass in some sizes, but the fact that fresh shipments are on the way, is generally calculated to offset this factor prior to the seasonal demand for sheet glass.

NO LARGE PURCHASES OF LINSEED OIL

Toronto.

There is very little evidence of quantity buying in linseed oil at present, and there is a lack of interest shown by the large consumers except as regards current requirements. Prices still remain at the new lower levels announced last week, which are inserted below.

There is reported to be a little inquiry from the varnish makers, and also from the manufacturers of linoleum; but no liberal sized orders have been recorded for some time. The continued weakness of English oil is said to be a contributing factor to these easier quotations. Following are the prevailing prices:

LINSEED OIL—		
1 to 2 barrel lots, per gal.	0 87	0 90
3 to 4 barrel lots, per gal.	0 86	0 89
6 to 9 barrel lots, per gal. ...	0 84	0 87

Less barrels, add 15 cents per gallon.

FIRM TONE IN SHELLAC PRODUCES HIGHER PRICES

Toronto.

Shellac prices have recently advanced in some quarters, owing to the firm tone in the primary shellac markets, and the increased quotations of shellac gum. New higher prices of $5.25 per gallon for pure white barrels, and $4.75 per gallon for pure orange in barrels, are now being quoted. Quotations on gallon jugs are generally 50 cents in advance of the above levels.

FIRM TONE CONTINUES IN TURPENTINE MARKETS

Toronto.

Current demand for turpentine has been restricted to small quantities covering immediate requirements. The large consumers are evidently content to purchase sparingly, while quotations are held at the present higher levels. Local prices this week are unchanged, but the firm undertone to the primary market continues. Stocks are moderate on both the local and Savanah centres and Southern producers claim that any increase in foreign requirements would further enhance the value of present holdings.

While there is no indication that the planned strike of American rail operatives will be carried out, yet in event of this developing, some effect could be expected in turpentine prices. With local distributors buying sparingly according to current orders, and with a lack of any apparent surplus on hand, the dependability of domestic interrupted rail service is obvious.

The following are the prices generally quoted:

TURPENTINE	Imp. gal.
1 barrel lots, ...	$1 15
2 to 4 barrel lots	1 14
5 gallon lots	1 30

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton London, Brantford, Collingwood, Guelph, Windsor, or Montreal, but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots, 15 cents per gallon

WESTERN ONTARIO NEWS

J. A. Brownlee, hardware merchant at London, Ont., has been awarded the heating contract for new $10,000 school at Manor Park.

PLANNING THE FALL HARDWARE SALE

(Continued from Page 37)

year should show considerable improvement in retail hardware conditions.

This merchant is of the opinion that as a class retail merchants have conducted their business wisely, but that the danger now is the reduction of stocks to a serious level. This firm follows the plan of immediately reducing prices when reductions are passed on by the wholesalers. Many customers do not appreciate this fact but competition leaves the merchant little alternative in most cases. Mr. Mills is of the opinion that the competitive era now entered upon in the retail trade will make big changes in the manner of conducting hardware business, that reduction of costs will be very necessary and that increased turnover will be achieved only by the closest attention to business pulling influences and the possible extension of the field of goods handled.

HARDWARE STOCKS ARE LOW

(Continued from Page 36)

with a better price understanding in the building trades; with low priced lumber; with other materials considerably reduced there should be considerable new home building during the fall and spring.

"Each one of us should study his particular line to see how best this adjustment can be accomplished. It is necessary, not only that prices shall be reduced by manufacturers, but this reduction must be based on, through jobber and retail dealer, to the consumer.

Stocks Are Low in Most Lines

"Many industries have been marking time during the last year. The result has been that they have, to a great extent, liquidated their stock on hand and have bought very conservatively.

"There can be but one result from this policy and that is that stocks of materials and merchandise will soon be broken and particularly if there is any marked degree of activity in the trade. Many jobbers and dealers may be going too far with their waiting game and may find their stocks broken sooner than they expect. While it may not be time to abandon a conservative policy, the question of delivery should be given careful consideration.

"Stocks in many lines are low and, with easier money and more spending power in the hands of such important groups as the railroads and the farmers, improvement is inevitable.

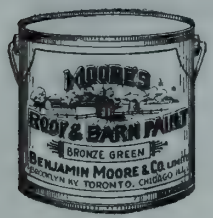
"For that reason it appears that it is time for business to begin to prepare for a period of activity which will surely be followed by a period of prosperity."

APPLYING MARKING REGULATION

(Continued from Page 35)

mean that on all shipments made after the regulations are made effective, the goods which are to be forwarded will have to be unpacked and stamped by hand in rather a crude manner and then repacked before they can be boxed and shipped. It will mean that there must be a great deal of care and watchfulness in order that no mistakes may be made. If therefore the enforcement of such regulations as are now proposed can be postponed until such time as American stocks can be reduced and new stocks made up with the proper markings it will be the means of saving a great deal of annoyance and, incidently, money."

W. J. Lind, The Independent Cordage Co., Toronto, is of the opinion that the marking regulations constitute a very good idea in order to stimulate the demand for Canadian goods. The Plymouth Cordage Co., while doing the bulk of their Canadian business from a factory at Welland, Ont., occasionally make shipments from North Plymouth plant and a tag will be used on all such shipments. Under the trade mark on this tag are the words "Made in U. S. A."



Moore's Paints

A line that enables the merchant to make a sale wherever paint is called for.

Moore's House Colors, Morelustre Enamel, Moore's Automobile Finish, Sani-Flat, Mooramel, Moore's Shingle Stain, Impervo Deck and Porch Paint, Moore's Roof and Barn Paint, Moore's Floor Paint, Moore's High Gloss Enamel Paint are some of the members of this popular paint family that are most familiar in over-the-counter sales.

The house-cleaning season of Fall and Winter makes it important to have your stock well sorted and displayed, now!

C.C.M. Perfection Ankle Supports Very Popular

THIS line jumped into immediate popularity because an ankle support of this nature has been badly needed for many years.

C. C. M. Perfection Ankle Supports are so designed that, by means of a hinge and sliding attachment, the ankle may bend forward or backward but cannot bend sideways.

They are particularly good for skaters whose ankles tire easily. They provide complete support, giving real comfort and improving the skating of the wearer.

Now made in C. C. M. Factory.

Are You Carrying This Line in Stock?

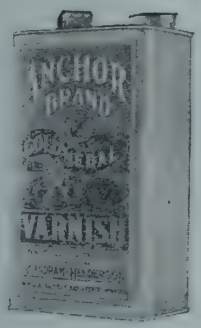
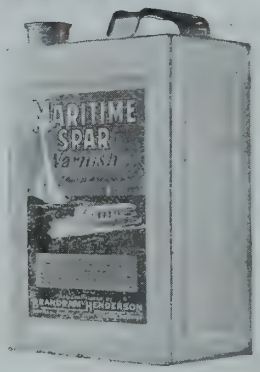
Showing Schooner "Bluenose" which has just won the Fishermen's Race Trophy — defeating the "Elsie" of Gloucester.

B.H. ANCHOR MARINE PAINTS

used exclusively on the Bluenose





That B-H Anchor Marine Paints were chosen for use on the "Bluenose," the pride of the Maritime Provinces, is noteworthy. It confirms the fact that B-H Marine Paints manufactured by Brandram-Henderson since 1878, and used extensively in the shipping industry throughout Canada, are still regarded as the best available.

For mor ethan 30 years Brandram-Henderson have specialized in Marine Paints, with the result that our paints for Marine purposes are being supplied in great quantities to-day to fishermen and shipbuilders throughout Canada.

For every purpose in which a brush is used there is a high-grade Brandram-Henderson product that is held in as high regard by Canadians from coast to coast as our Marine Paints are among the fishermen and shipbuilders.

TINKER TOM'S TALKS.

Talk No. 336

The Railway Strike

At the time of writing this it looks rather "squally"—Black clouds in sight and the wind rising, but maybe by the day of publication the good sense of all concerned will prevent a storm.

You may wonder how a strike on U.S. Roads would affect Galvanized Sheets in Canada —Well, there would be a scarcity right away, and as our stock is now depleted we fear that the best efforts of the Canadian sheet mills would hardly supply the demand.

At present prices, strike or no strike, every sheet metal user can afford to carry some stock, and if you've followed our recent advice, you have it. If not, phone or write your jobber at once.

TINKER TOM.

CARTER'S

Your Paint Customers Know It.
CARTER'S GENUINE DRY RED LEAD.

Carter's has won the confidence of the Canadian paint user because of its never changing Quality. Recommend Carter's. It is made from the very best grade of Canadian pig lead, highly oxidized and very finely ground. Mixed with pure linseed oil it furnishes a free flowing protective paint for all manner of metal work.

Carter's Genuine Orange Lead, Genuine Dry White Lead and Litharge are three other Carter products worth stocking.

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Beautify Walls Economically

Silkstone beautifies walls at less cost than wall paper. It can be washed easily without rubbing off. Its soft, silky finish gives an artistic effect much appreciated by home lovers. The economical side of Silkstone, its beauty, its durability and gratifying service are all factors in the splendid sales it enjoys. It sells profitably with mutual satisfaction to merchant and customer.

The satisfaction it gives is a delight to the conscientious merchant who tries to serve his customers well and build permanent trade. Silkstone fills the bill for the Canadian housewife. She has tried it and liked it, and uses it whenever walls need beautifying, without regard to season. Silkstone is a year-round seller. Let us show you what's in it for you—write.

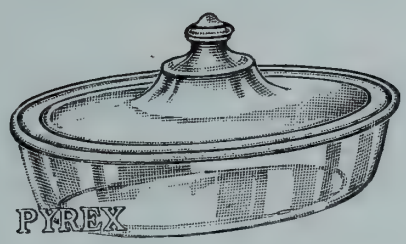
PYREX

TRANSPARENT OVEN WARE

Individual Baker—Round (Ramekin)

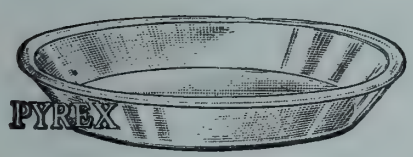
Custard Cups

Casserole—Round

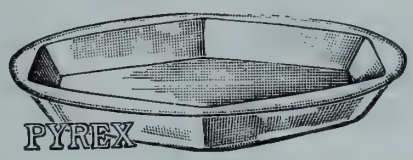


Casserole—Oval

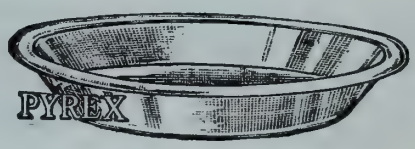
Casserole—Round-Shallow



Pie-Plate—Round



Pie-Plate—Hexagonal



Pie-Plate—Round

PYREX saves about one-half the fuel usually required, because it absorbs nearly all the oven heat and bakes food quickly.

PYREX saves food in many ways. Meats, vegetables, etc., when cooked in PYREX, retain their natural color and flavor to such a degree that economy may be practiced in buying the less expensive kinds and yet have delicious food. Most foods usually cooked on top of the stove can be better prepared in the oven.

PYREX saves labor—it is always free from grease and odors, for nothing can penetrate the hard, smooth surface. You can wash it as easily as your china and silver.

Every practical shape and size for baking is made in PYREX. It is ready for immediate use and never discolors, rusts, crazes, dents or chips.

Good displays at this seasonable time of PYREX in your windows or on your counters will pave the way to a gratifying volume of sales and a bigger Christmas business.

Name on Every Piece - Guaranteed Not to Break in Oven Use

O.P.W.

PAINTS & VARNISHES FOR EVERY PURPOSE

Five Years From Now

will you be pleased with the line of paints and varnishes you were handling in 1921? Will the oil have dried out and the paint be chalky? Will the paint have dulled and lost its color? Not if you are handling O. P. W. The oil-film will have stood by you, and while the house may need repainting at that time, there is no doubt at all to whom the order for the paint will go.

Seventy-two dealers who were handling the O. P. W. lines years ago are handling them today. How are you on interior finishes? There is an O. P. W. Product for every purpose.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

BURLAP DECORATIVE WALL
The Dominion Oilcloth & Linoleum Co., Ltd.

Barrett Roofings, Cements Industrial Paints etc.

First Sales *Easy*—Repeat Sales *Sure*

When you handle Barrett products you are aided by two strong selling forces:

(1) Our big national advertising campaign in the leading newspapers, farm journals and technical magazines. This advertising is creating new business for Barrett Dealers in every city, town and village throughout the Dominion.

(2) The high quality of the products themselves. This *keeps* the business. The railroads, the large industrial concerns, and many thousands of individual users know from their own experience that the Barrett trade-mark stands for sure dependability and sound economy.

Are you carrying *all* these famous Barrett Products?

Take up your pencil and check this list:

- ____ Everlastic "Rubber" Roofing
- ____ Everlastic Single Shingles
- ____ Everlastic Multi-Shingles
- ____ Everlastic Liquid Roofing Cement
- ____ Plastic Elastigum Patching Cement
- ____ Liquid Elastigum
- ____ Everjet Carbon Paint

The demand for these products far exceeds the demand for any similar products on the Canadian market. Their sale is increasing by leaps and bounds. Don't miss the opportunity to cash in on this big and growing demand.

A Word to The Wise

HYGIENIC KALSOMINE

For Interior Decorating

There is plenty of work to be done inside during the winter months. You can get this business and maintain year-round sales with Hygienic Kalsomine.

It is made in a large variety of popular shades and has unlimited decorative possibilities.

Because of its superior mixing, wearing and light proof qualities Hygienic Kalsomine has been given preference in actual tests by leading architects and large contractors.

Hygienic Kalsomine affords a legitimate margin of profit and brings large returns thru continuous sales.

"The Home Decorator" Free to

Painters, Dealers, and Home Owners. Contains artistic color combinations possible with Hygienic Kalsomine. It performs a valuable service for you.

Wear Resistant on Floors

Water Resistant on Furniture and Floors

"61" FLOOR VARNISH
What it Means to You

WHEN you sell "61" Floor Varnish — "The Balanced Varnish" — you realize, as do thousands of dealers, painters, architects and home-owners, that "61" possesses unusual — exceptional — qualities. "61" is so finely "balanced" that it possesses the maximum *combined* degree of *wear*-resistance and *water*-resistance. "61" *dries quickly* and *lasts long;* has *great luster* and *spreads far;* has *brilliancy* of color and *permanency* of color. And in addition to these selling points, good old "61" has a thirty-year-old reputation!

Right now in your vicinity people are being told about the "balanced" varnish in the national magazines. *Be ready to sell them when they ask for "61."*

"61" Floor Varnish means steady, profitable business — turnovers instead of leftovers! Write *now* for particulars of the "61" introductory proposition.

Pratt & Lambert-Inc., 24 Courtwright Street, Bridgeburg, Ontario.

Obscure Lines As Good As Meakins?

There may be one, but we doubt it. Anyhow, think of the additional cost to you in using your selling time to convince a prospect that some obscure, little-known brand of brushes is as good as Meakins!

While you are succeeding in winning one argument and sale, of this kind, you could have made several sales of Meakins Brushes.

The sales are quick, short, and profitable with the popular Meakins Brushes, because you are making more sales per hour with consequent lowered costs.

Consumers recognize Meakins Brushes as leaders.

Have You Anything To Sell?

Earnest Elmo Calkins a recognized authority, describes "good advertising as advertising that sells goods. **The goods may be a commodity, or a service, or even a state of mind.**

To those who have anything to sell to the Canadian hardware trade, an opportunity is presented for placing your story before practically, the entire hardware buying fraternity in Canada. This claim is not based on guess-work. It is based on 33 years of constant effort to get the hardware buyers of Canada reading one weekly paper. That we have been successful in getting 95 per cent. of the hardware buying power in Canada to pay for, and read HARDWARE & METAL is shown by a check-up on our circulation. In order to safe-guard our advertisers and prove our claims, we also have our circulation records audited by the Audit Bureau of Circulations—(no other hardware publication in Canada has submitted its circulation to this test).

At minimum cost, we offer you the opportunity to place before the hardware buyers of Canada, anything you may have to sell, a commodity, a service or a state of mind. Our unique circulation offers you a select, well rated audience that you cannot reach so completely in any other way. We recommend a weekly message, with extra space in the 33rd Annual Fall Buying and Directory Number to be issued on August 20.

The 33rd Annual Fall Buying Number, published August 20, will reach the hardware trade at a time unique in the history of the Canadian hardware trade—a time when stocks are low—a time when fall and spring (1922) buying is under consideration—a time when greater care is being taken in buying—a time when the trade is looking for new, profit-making lines—a time when clerks in the stores are looking for all the sales information they can secure from HARDWARE AND METAL—a time when unknown, unadvertised lines are losing out in the race for business. We know the 33rd Annual Fall Buying and Directory Number will be read and re-read. Hardware buyers in Canada will also hang up their copy of the Annual Fall Buying and Directory Number close beside their desks for ready reference. A cord is inserted in the upper left-hand corner for this purpose. This idea was adopted at the request of hardware buyers.

The Fall Buying and Directory Number has been an annual feature in Canadian hardware trade circles for 33 years—showing greater growth and improvement with each succeeding year. Last forms close August 12. To ensure good position reservations should be made immediately.

Member A. B. C. **HARDWARE & METAL** *Member A. B. P.*

Canada's National Hardware Weekly since 1888

143-153 University Avenue - - - Toronto, Canada

Published every week since 1888. The only weekly hardware paper in Canada, and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

HERE'S YOUR OPPORTUNITY!

Every Hardware Dealer is anxious to secure the good will of the folks who patronize his store—and to get new customers.

Here's The Way To Do It.

Instead of selling them an ordinary every day light weight ash can, show them a REED "SUPER-SERVICE" 18" x 18" HOUSEHOLD ASH CAN. It will win instant approval, for it's stoutly built of 22 gauge galvanized steel and reinforced with heavy iron bands. Bottom is set off the ground. Joints are hand rivetted, hard soldered. It's built to withstand years and years of rough handling by the ashman—it will make hosts of friends for YOU.

Write to-day for quantity prices.

Boost Your Roaster Sales With Popular Viko Roasters

The big season for selling roasters is here. The popular Viko line of aluminum includes four types of roasters in different sizes—round and oval shapes—that are big sellers wherever they are shown.

Women prefer aluminum ware for cooking and roasting. VIKO, The Popular Aluminum, is durable and is priced to appeal to present day buying tendencies—big value at moderate price.

The Viko line contains utensils for every kitchen need. It offers you a good profit and builds repeat sales. To get your share of the Thanksgiving and holiday trade on roasters and other aluminum utensils take on the Viko line—now. For full information—

Just a few words about Hardware and Metal

HARDWARE AND METAL is Canada's national hardware weekly and has been published every Saturday since 1888 by the MacLean Publishing Co., Toronto, who publish fifteen papers.

HARDWARE AND METAL'S circulation is national, and has been audited by the Audit Bureau of Circulations.

HARDWARE AND METAL is edited by a staff of editors who have had practical hardware experience.

HARDWARE AND METAL'S weekly market service is one of its strongest features. Our reports are used as a basis for Canadian Government's annual report on wholesale prices.

Write to any 100 retail hardware dealers in Canada, asking them "Do you subscribe to HARDWARE AND METAL?"

If you will do this, you will use HARDWARE AND METAL too, for it is better than any other medium in Canada, gets your proposals home to the men of value to you as sellers of your goods.

***HARDWARE AND METAL*---Montreal, Toronto, Winnipeg**

Should Retailers Display Your Goods?

Do You Set a Good Example?

RETAILERS have their displays in "silent salesmen," and in windows where the goods appeal silently to the desire of every passer-by.

And your goods—where do you display them to create desire in the buyers of the Canadian hardware trade?

There is one street, with one great national display window, where the hardware buyers of the Dominion throng each week eager and interested to see what new goods, new models or new messages are displayed to the trade there. This national display window is the advertising section of HARDWARE AND METAL. Its pages are intently studied each week by all the wholesale hardware buyers of Canada and over 90% of the retailers.

Let us show in detail that it pays you to display your goods in HARDWARE AND METAL's National Show Window.

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

Using Parcel Post in Export Trade

Shipments of Light Goods Can be Made to Advantage by Parcel Post—Details of Packing—Export Clubs Being Formed Throughout Canada as Branches of Canadian National Exports Club—Possibilities for Trade Abroad Are Reported Upon.

CANADIAN business men are showing increased desire to acquaint themselves with the possibilities and requirements of various export connections abroad. This is shown by the enthusiasm which is being displayed in connection with the various export clubs which have been formed in various parts of Canada, and other clubs are now in process of formation. A review of recent developments among these clubs will be made herewith.

Toronto Export Club

At a recent meeting of the Toronto Export Club a good number of members heard three informative addresses on matters relating to the objects of the club. The first speaker, F. L. Freudemann, Sterling Rubber Company, Limited, Guelph, read a paper on the use of the parcel post in export trade. In his business, the manufacturer of seamless rubber goods, he had found the advantages of the parcel post so great that about half their deliveries within Canada and every foreign shipment within the past four or five years had been made by this means. He believed that other manufacturers who had frequent shipments of light goods could also utilize the parcel post's services.

Mr. Freudemann explained in some detail his company's method of packing shipments for parcel post and mentioned the hearty co-operation they had received from the Post Office. H siggested that parcel post deliveries should be made by all Canadian Government Merchants Marine vessels as that would reduce delays and enable Canadian exporters to compete more efficiently with those of other countries. He also advocated the establishment of a C. O. D. collection system, such as is now in force between Great Britain and the United States.

W. E. Lemon, Postmaster of Toronto, gave the club an inside view of the Canadian postal system. He explained the routing of domestic and foreign mails and made some suggestions about ways in which manufacturers could co-operate with the Post Office to their mutual advantage. He also dealt with the new schedule of postal rates.

Major Hugh Chislom who has recently returned from Cuba, Central America, Mexico and the West Indies made a few remarks on the possibilities for trade there. Panama, he thought, deserved the consideration of Canadian exporters, for it is rapidly becoming a distributing centre for Central America and parts of South America and Mexico. He was of the opinion that there was a good field for trade in Mexico, but Cuba was not a good market just now as the slump in sugar and the United States preference made trade too difficult.

Export Club For Montreal

Plans for the organization of an Export Club in Montreal were laid at a meeting of the Executive committee of the Montreal Branch, C. M. A. After discussion of the objects of such a club it was decided to go ahead with the project, and an organizing committee was appointed, composed of B. W. Coghlin, A. D. Huff, J. A. Lapraes, F. R. Whittalls, S. E. Gettus, W. A. Twohey and J. A. Ashcroft.

The functions of the club, it was stated at the meeting, would be to promote friendly relations between members; to circulate reliable information regarding the export trade; to co-operate with the Department of Trade and Commerce, the Canadian Manufacturers' Association, and other organizations having simlar objects for the advancement of export trade for the Dominion, and to assist in the formation of other export clubs in Canada.

This new club will be known as the Montreal District Export Club, the membership to include the whole of the Montreal district including Ottawa and certain parts of eastern Ontario. An organization meeting will be called later, when definite action will be taken, including the election of officers.

Under the direction of the Canadian National Export Club, which was formed in April of this year, export clubs are being organized in every town and city in Canada.

The movement was started by the Canadian Manufacturers' Association. The first local club to be formed was that in Toronto and is known as the Export Club of Toronto. The officers of the Toronto Club are:—president—B. B. Holliday, Canada Cycle & Motor Co., first vice-president—L. L. McMurray, Gutta Percha and Rubber Co., second vice-president—Basil Wedd, Masey-Harris Co., Secretary, P. M. McKerrich. Active membership in these clubs is confined to the export managers or other responsible representatives of exporting firms.

One of the most interesting features on the constructive side of the committee's work, and one which it believes will be very fruitful in results, has been the formation of the Canadian National Export Club under the aegis of the As. sociation.

Objects of The Club

The objects of the Club as stated in the constitution are:

Sec. 2. The objects of this Club shall be by the interchange of ideas and by the study and discussion of questions of mutual interest:

(a) To promote friendly relations between members;

(b) To ascertain sound principles on which the further development of Canadian export trade may be based, and distribute outlines of these principles to members;

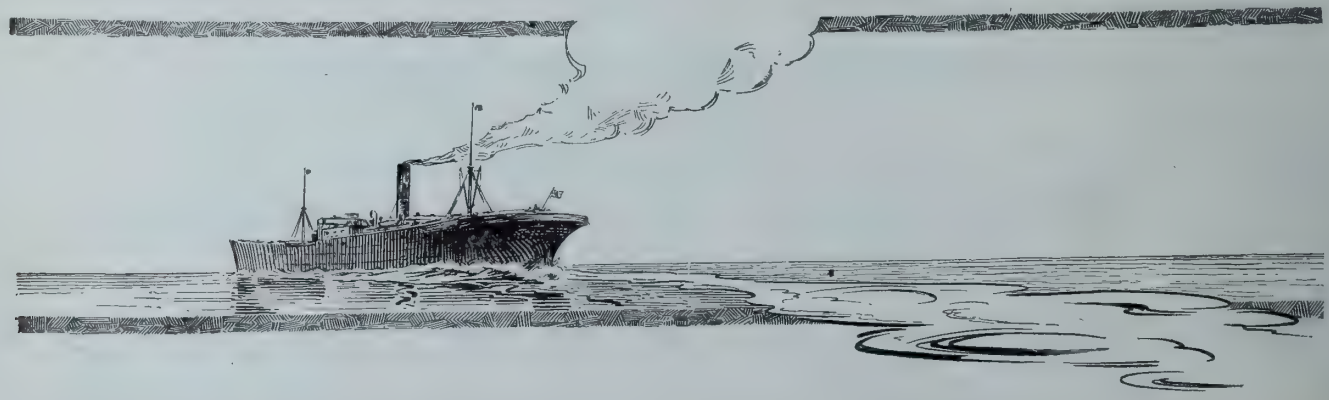
(c) To spread reliable information dealing with subjects relating to export trade;

(d) To co-operate with the Department of Trade and Commerce, the Canadian Manufacturers' Association and other organizations having simiiar objects on questions of national importance to the export trade;

(e) To assist in the formation of local export clubs in Canada;

(f) To act as a general clearing house for useful ideas developed in local clubs;

(g) To call general meetings of Cana-



Manufacturers to Organize An Export Club

Members of Montreal Branch, Canadian Manufacturers Association Seeking Foreign Markets —Will Hold Organization Meeting in Montreal First Week of November

MONTREAL—In the hope of encouraging export trade, officials of the local branch of The Canadian Manufacturers' Association are planning to form an Export Club, consisting of members interested in seeking foreign markets. Circulars have already been issued to the district members of the Association. comprising 1,050 firms, asking whether or not they are interested in the formation of such an organization. It was stated by the secretary that the replies received have been very encouraging, at least 50 per cent. expressing a desire that their firms should be identified with the Export Club, indicating that the manufacturers of this Province are actively seeking new export markets in competition to the exporter of continental Europe.

Further, as soon as the Export Club is established on a firm basis, steps will be taken to elect as honorary members, representatives from the banking institutions, the transportation companies, the marine insurance companies, and others interested in Canadian export trade. They will be invited to take an active part in the work of the Club, with a view to co-ordinating the different interests connected with, and interested in, the exploitation of Canada's foreign trade.

The organisation meeting will be held during the first week of November, and a luncheon will be held in connection, at which it has been arranged that officials prominent in the Canadian export trade will be guests of the Club and deliver addresses on export conditions. Officers will also be elected, and arrangements made at this meeting fo rcarrying on the permanent work of the Export Club.

Those apparently interested in the forming of such an organisation represent the manufacturers of a wide variety of goods for which Quebec Province is seeking foreign trade. According to the circulars received at the offices of the C. M. A. here, these include such lines as electrical goods, leather goods, paper and pulp, steel and metal products, railroad springs, sewer pipes, bridges, paints, leather belting, axes, brooms, glassware, cars, furniture, rubber goods, oils and hardware.

Selling in Mediterranean Countries

Letters to Levantine Houses Should be Written In Language of Foreign Buyer and Prices Quoted in Metric System of Weights and Measures.

VANCOUVER.—A representative of Hardware and Metal interviewed W. McL. Clarke, Canadian Trade Commissioner, while he was in Vancouver. Discussing trade possibilities, the Trade Commissioner said:

"As the market on the Mediterranean countries is not unlimited, and competition is very keen, it becomes necessary for our manufacturers who wish to export to go about their business in a more systematic way than they have done to date.

"It must be remembered," he said, "that Germany, Great Britain and Italy had the Mediterranean trade almost exclusively to themselves before the war, and the Canadian and United States merchants were looked upon as newcomers without any experience by the importers generally. Up to date, I must frankly state, our Canadian exporters have not done a great deal to remove this impression. Letters to Levantine houses are seldom written in the language of the foreign buyer, not even in French, which is the language of commerce in the Levant generally. Furthermore, prices are not quoted in the metric system of weights and measures, notwithstanding the fact that the metric system is in universal use throughout Europe.

"If Canada is to seriously consider the question of building up export business," stated Mr. Clarke, " it will be imperative to use either the particular language spoken by the merchant addressed, or at least use French, which is the universal commercial language for practically all parts of Europe."

Mr. Clarke related one experience of the kind of attitude that will not build up foreign business. One salesman from this continent mentioned to him that he would in all probability remain in the Levant for five years for his firm, but wouldn't learn their—language, further volunteering the statement, "If they want to buy from me they'll have to talk Yoo-nited States."

During the war and following the war, Canada and the United States got a lot of business that ordinarily would have gone elsewhere. There were some exporters who gathered an entirely erroneous opinion of the hold they had on the markets, and with conditions approaching the normal those foreign buyers who were treated in a high-handed manner will revert to their old connections as early as possible. It will take courtesy, and salesmanship to hold any advance made during the unsettled period just passed. Mr. Clarke further stated that quotations to Mediterranean countries should be in metric weights and measures, should be made c. i. f in foreign port to which the goods would be consigned, and the date of delivery should be given and most religiously observed.

Send Investigators

Unless these points receive the attention they merit, Mr. Clarke states that there is a slim possibility of Canada retaining the large business which has been built up between this country and Italy, Greece, Spain and Egypt. The commissioner also emphasizes the necessity of sending investigators to personally look over the ground before a serious attempt is made to enter the market.

USING PARCEL POST

(Continued from page 96)

Canadian export men whenever it is feasible, desirable and necessary.

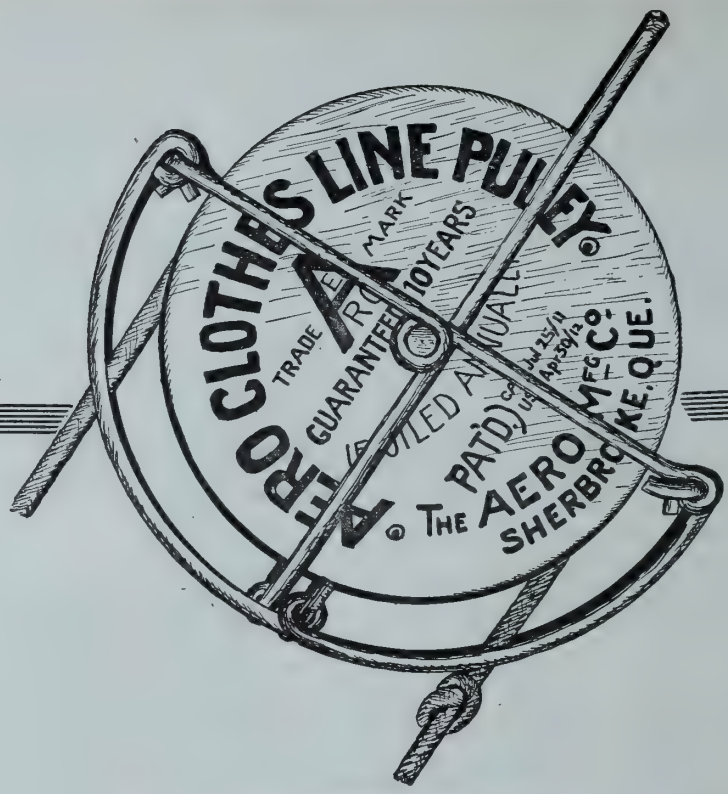
There is without question a great fund of general and specific information about the export trade stored up in the minds of the men conducting the expo business of Canadian companies. A great deal of this information could be very readily exchanged among the various members without in any way injuring the interests of the individual companies concerned. That this is true is shown by the fact that very large exporters, who are so well informed that they will be giving very much and more than they will receive, are very deeply interested in associating themselves with the Export Club. In addition to this interchange of points of information about documents, banking facilities, trading customs in various countries, etc., there are many other subjects of a general character that can be very freely discussed with much benefit to the members, and to the development of Canadian export trade.

National in Character

Many other questions of vital interest will doubtless readily come up and unquestionably everyone, no matter how able or experienced, would gain much from a capable summary on any of these questions by one or two speakers followed by an open discussion and informal question and answer.

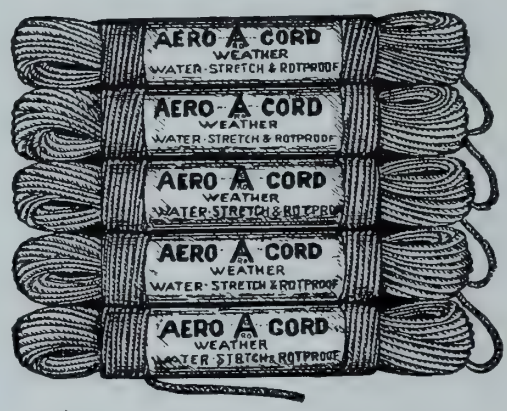
The representatives of any firms now members of the association are ipso facto members of the Club without additional fee on signifying their interest export trade. Provision is made f other active members of the Club b having men engaged in the export departments of members of the C. M. A. take out additional membership in the C. M. A.

The organization is thus constituted to include all members of the C. M. A., and is therefore national in character and scope. Provision has also been made for the formation of local export clubs at all points in Canada where there are enough manufacturers interested in export trade to warrant the successful operation of a club.



Aero Cord

The only truly weather-proof, rot and stretch-proofed cordage made. It is superior in tensile strength and durability. Aero Cord is made by covering a special, twisted, fibre core with braided, multiple plies of cotton under high tension. It is also weather-proofed. Aero Cord is unexcelled for Sash Cord, Clothes Line, Trolley Cord, Bell Cord, Signal Cord, Tent Rope and Tiller Rope.



Aero Pulleys

These are the most effective clothes line pulleys known. The Aero Clothes Line Pulley has a deep V-shaped friction groove which will accommodate itself to various diameters of clothes line. The space between groove and guard is sufficient to allow passage of knots. The weather proofing treatment repels moisture; hence, no freezing. Pulley being of wood, weather-proofed, lubricates itself at bearings, rendering it noiseless and smooth working. The use of wood does away with all troubles from rust. The large axle and bearings render the Aero Clothes Line Pulley capable of carrying heavier loads than others used for a like purpose. The diameter (6") insures easy working for long drives. The wire guard guides the rope to its proper place on pulleys no matter at what angle the pulley may be swayed by the wind. The price is lower than for others of similar diameter. The Aero Junior (2 3-4") is for general domestic use.

And The Hardware Merchant

We offer on this page two simple articles that are sold in hardware stores, every day, all over the Dominion. But we are offering you something better in these lines, something that lifts the common clothes line and pulley out of the rut and puts them on the map.

The Aero Product sells better because it has individuality that distinguishes it from just Clothes Lines and Pulleys. It gives greater satisfaction because its large sales are based on genuine, substantial selling points.

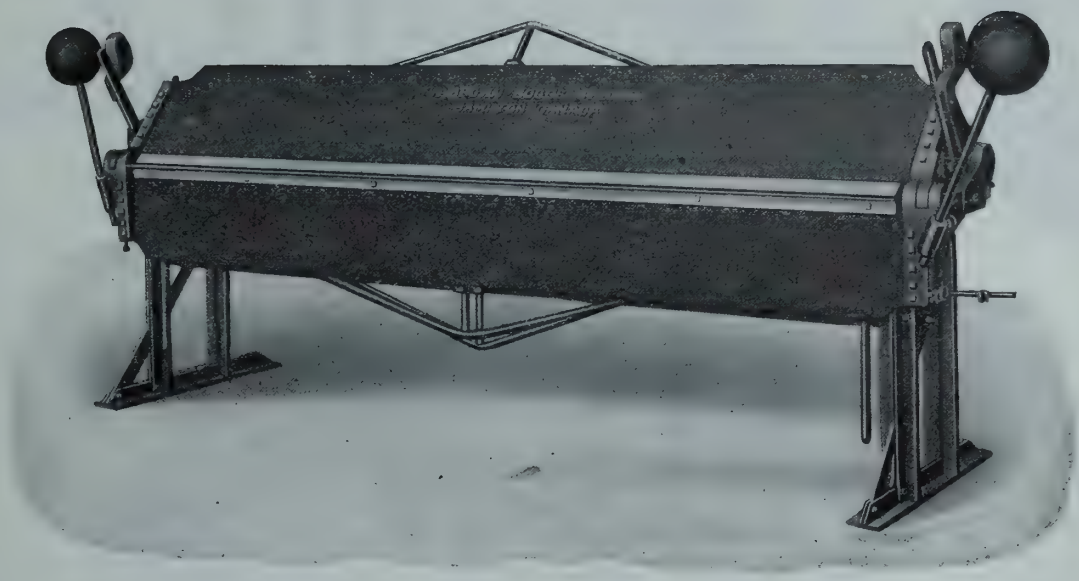
Why Not Make Your Own Eavetroughs, Furnace Pipes, etc.?



No. 125—8 ft. Steel Brake for 18 Gauge.

Have you ever figured the great spread between the sheets and finished material? That spread should be in your pocket.

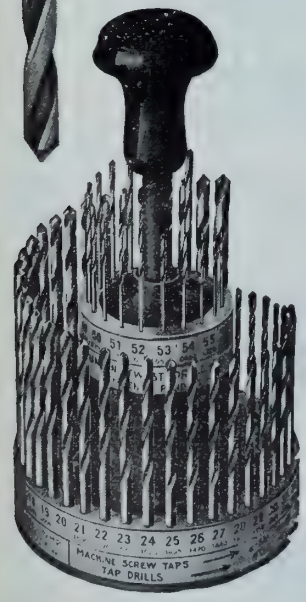
Install a B. B. Steel Brake and make up your troughing, furnace pipes, etc. on days you cannot work outside and which would otherwise be lost time.

Get our proposition on one of these machines. It will soon pay for itself.

THE BROWN BOGGS CO., LIMITED

HAMILTON, CANADA

BUTTERFIELD



Save Time, Money and Argument

The merchant's selling cost runs on all the time. Clerk hire, rent, taxes, light, depreciation, interest on money invested, put an appreciable value on every minute of your selling time.

The cost of these minutes spent in persuading a customer to accept an obscure line of tools, instead of Butterfields, eats up a great deal of the apparently high profit on a single sale of the little-known brand.

Mechanical men accept Butterfield Tools quickly when offered, recognizing them as standard tools of unquestioned leadership.

Figure 2

Johnson Brass Well Screen

In many districts of Canada the water bearing material is glacial drift, soft sandstone or shale. The fine particles are carried into wells and stop the flow of water. Johnson's Brass Well Screens prevent this.

Many patterns of well screens catch and HOLD sand, defeating their object.

Others are so designed that sand cuts away the edges of the screen until they are no longer serviceable.

Johnson Brass Well Screens by superior design overcome all these objections.

They are made with a continuous slot. The intake is sharply undercut. The extreme hardness of the brass prevents "sand-cutting." The inlet width is correctly adapted to keeping out sand and affording maximum well capacity.
Ask for booklet with valuable information on this subject.

GOODELL-PRATT
1500 GOOD TOOLS

SELL SATISFACTION
with every tool

THE growth or shrinkage of your business rests with your customers. Your future depends upon whether or not your customers come back for more. The goods you handle must give satisfaction to your trade if you are to retain their good will.

Satisfaction is built right into every Goodell-Pratt Tool. Materials, design, and workmanship are all up to the highest standards. Goodell-Pratt Tools bring customers back for more.

Take Screw Drivers for instance: You can buy plenty of screw drivers for less money than you pay for Goodell-Pratt's, but why sell cheap Screw Drivers without profit to yourself or satisfaction to your customers?

Our line of Screw Drivers embraces automatic, ratchet and plain in almost every style and size. We make all kinds but poor ones. There are sixteen pages of them in our catalog.

If you need Screw Drivers before January 1st order them now. You can't lose because we guarantee all of our prices against decline until that date.

Vol. XXXIII. No. 45 | THE MACLEAN PUBLISHING COMPANY, LIMITED PUBLICATION OFFICE : TORONTO, CANADA | November 5, 1921

You'll Get The Benefit of The People's Preference

If you are not already selling Sherwin-Williams Paints and Varnishes, we recommend a careful consideration of the following facts:—

In every community, wherever paint and varnish are used, there is a big and growing demand for the Sherwin-Williams lines.

People know Sherwin-Williams Products. Sherwin-Williams quality backed by aggressive consumer publicity have convinced the paint-buying public that the "Cover the Earth" Trade Mark is an assurance of better paint and varnish values—the guarantee of a right quality product for every painting and varnishing need.

You can turn this paint buying preference to good account by means of the S-W agency. We shall be glad to put our plan before you for consideration and we invite you to compare it point by point with any other paint selling proposition.

Write now for detailed information.

Concentrate Your Purchases

Does not this presentation of eleven of our most popular lines suggest the desirability of concentrating your purchases on PEXTO products? Each line is very complete.

Knowledge and experience of 100 years of tool making is built into each and every PEXTO product. They are distinctive. Their possession spells satisfaction to the owners.

Quality of material and workmanship is of paramount importance to us and the PEXTO Oval on the tools you buy is significant. Insist upon having PEXTO TOOLS; accept no substitute.

Prepare For The Advance Guard Of CHRISTMAS GIFT Buyers

SOME gifts are like social calls, brief and soon forgotten. "Universal" gifts combine sense, service, sentiment and surprise. They are peculiarly fitted to express and perpetuate the deep-rooted attachments of family and home. They appeal to buyers who are looking for novelties. And the most novel thing these days is a really *useful* gift.

THE advance guard of gift buyers is already moving toward the "Universalized" store. Let it be *your* store—the one place where everybody can buy everything "Universal." Write for particulars about the "Universal" Advertising and Sales Promotion Plan. It is new, complete, vital to your welfare.

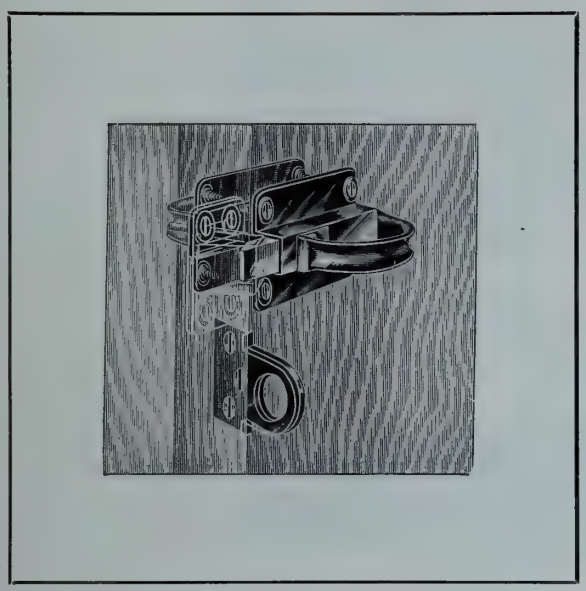
The Door to Prosperity Opens with C.S.G. Co.'s Latches



No. 1240 Barn Door Latch

opens all doors quickly and easily, just as it performs all the other duties of a latch, even the duty of selling readily and with a profit for the merchant. A durable, commonsense latch with Japanned frame and handles, tinned bolt and a Sherardized spring of piano wire that cannot rust. Packed one-quarter dozen in a carton, including padlock eyes. Weight, 175 lbs. per case.

The "Challenge" Latch

has opened a new door to profit for many a shrewd dealer, for it possesses more points of quality and value — selling points — than any other thumb latch on the market; for instance, it is made entirely of wrought steel and it is absolutely impossible for the thumb piece to work loose or get out of place. Packed one-half dozen in a box. 12 dozen in a case. Weight, 180 lbs. per case.

Westinghouse

TYPE MH Electric Ranges

THE CLEANEST AND MOST DESIRABLE RANGES ON THE MARKET TO-DAY

SOME DISTINCTIVE FEATURES:

All oven parts are removable by hand to permit thorough cleansing. A heat shield over the main heating unit gives even distribution of heat throughout the oven.

When desired a thermostat is provided, with an adjustable pointer which can be set for any temperature desired. When the desired temperature is reached, electrical contacts in the thermostat close, ringing a bell, notifying the operator that the oven is ready for use.

Westinghouse
For Better Cooking

Westinghouse Ranges have been in regular service in Canadian homes for a great many years, and to these homes they have brought the message of better cooking—cooking by electricity

B.S.A. Martini Rifle

No. 12 Model .22 Bore

Super-Accurate Target Pattern

Blade up

LENGTH — Over all 45½ in. Of Barrel, taken down, 29 in. Stock from trigger 14⅜ in. Fore-end 12 in.

WEIGHT — 9 lb. 9 oz.

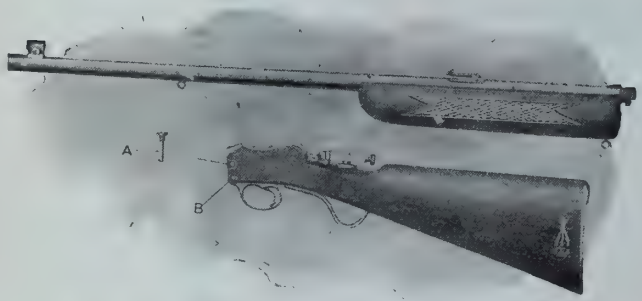
DISTANCE — Between Foresight and open Backsight 19¼ in. Between Foresight and aperture Backsight 32 in.

BALANCE — 6¼ in. in front of trigger.

6-hole Aperture Eyepiece for use with the No. 8A rear sight allowing the aperture of the rear sight to be suited to the intensity of the light upon each occasion

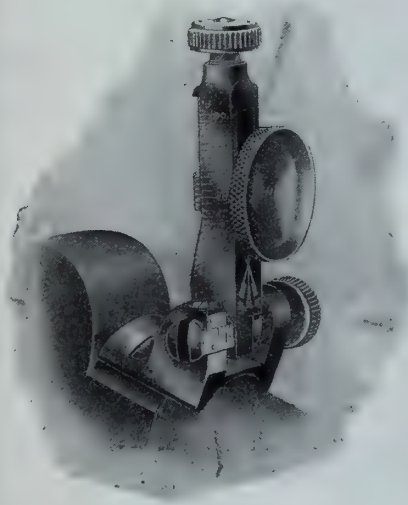
No. 19. Special foresight (shown above) is used chiefly in conjunction with the B.S.A. No. 8 Aperture backsight, but it can be used with advantage on any kind of sporting or target rifle.

Gives a choice of either a broad blade or thick ring (see illustrated). The alternative angle may be brought into position by means of the external lever shown on the sight.



The take-down feature entails great convenience in cleaning and transport. "A" forces the barrel into position. "B" holds the detachable action in place.

A Remarkable Offer and the Wonderful Rifle and Sights that Make it



B.S.A. No. 8 Aperture Sight is a privilege and an opportunity for lovers of accuracy. The vertical and lateral movements are controlled by very accurately manufactured screw movements. Each 1-200th of an inch of movement is clearly indicated by an audible and 'feelable' click. With a sight radius (distance between sights) of 36 in., a movement of 1-200th of an inch of the backsight gives a corresponding adjustment of the shot group on the target, at 25 yards, of ⅛ in. Such minute corrections may be made with the B.S.A. sight with absolute certainty.

There is no other sight in existence that works with anything like this fine mathematical accuracy. Imagine the microscopically accurate manufacture that permits of the splitting up, with absolute sureness, of an inch of movement into 200 perfectly equal parts. Adjustments are read off on the finely cut vernier scales, clearly illustrated on the left hand side of the stem.

HAMILTON MONTREAL

Packed in 12½lb., 25lb. 50lb. and 100lb. IRONS or in 500lb. Wood Kegs

This photograph shows Mr. G. P. Baker at the age of **76**, *with his Stevens Favorite Rifle. After shooting this rifle more than* **10,000** *rounds, Mr. Baker says: "It is such an accurate rifle that I consider that Stevens rifles are the most accurate rifles I ever shot and I have shot these rifles for* **40** *years."*

STEVENS IS STILL STEVENS

We've always said that Stevens accuracy was a 58 year old tradition. Here's the unbeatable proof.

The above reproduction shows targets made by Mr. G. P. Baker, who for 40 years has shot the Stevens Favorite Rifle. And Mr. Baker at the age of 76 made these targets with the same rifle that he has fired more than 10,000 times.

A pretty convincing argument for Stevens accuracy and a pretty positive proof that the healthful outdoor life of the Stevens shooter keeps a man young for a long time.

The steady hand and undimmed eye that made possible these targets, have been trained to shoot straight by a lifelong association with Stevens accuracy.

Once again results have proved that Stevens is still Stevens.

For Your Customers—Mr. Dealer

Here's some information to hand your Stevens customers.

Put this in your window or paste it on the inside of your gun case—anywhere so long as people coming into your store can see it.

It's using facts like these that helps the Dealer cash in on his Stevens stock.

This ad mounted on cardboard will look well in your window.

The Eveready Line with the Ever-Steady Turnover—

Hitch Your Wagon to a *Star*

EVEREADY is the star-performer on the flashlight and battery circuit. It is kept busy responding to sales-encores, to the merry accompaniment of the well-known cash register bell.

Proof? Just you lay in a stock of Eveready Flashlights and Batteries. Display them where your customers can get their hands on them. The "Eveready" name itself is all the salesmanship required.

Eveready dealers, on an average, "turn" their stock of cases 4 times, and batteries 8 times a year. On cases alone, profits run exceptionally high on a small investment.

The Eveready jobbers in your district have an assortment that has proved a self-starter and a repeater. Get one of them to show you the line. If you don't know who the nearest jobber is, we'll tell you, if you'll just drop us a postcard.

Do that today and watch your sales-curve bend skyward.

There Are Many Good Points to DOMSTEEL

Galvanized Barbed Wire

Two and four point, sharp, clean-cut and repellant. The wire used is of high breaking strain. It is made from heavily zinc-coated wire, galvanized by the "hot-dip" process. The barbs are firmly secured, absolutely immovable, and evenly spaced.

This wire, manufactured by Canadians in Canada is made to withstand the severe requirements of Canada's climate, and will give entire satisfaction under the most rigorous conditions.

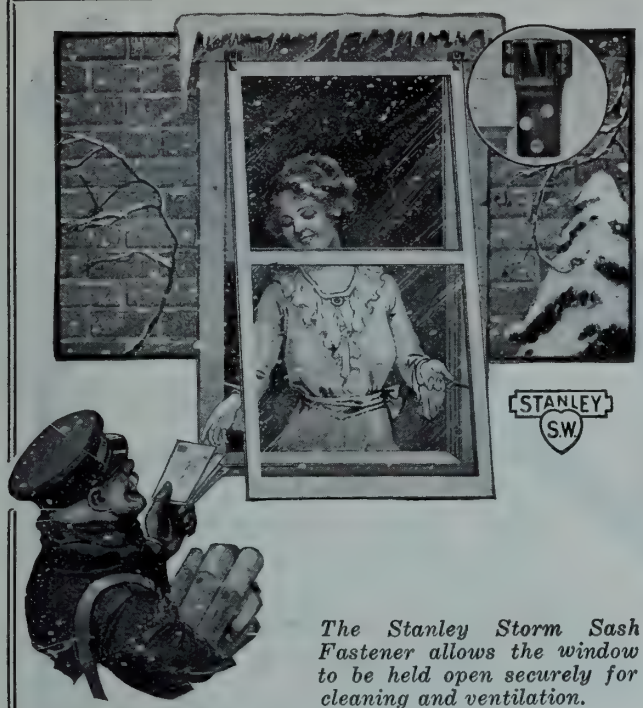
DAVIDSON



The Stanley Storm Sash Fastener allows the window to be held open securely for cleaning and ventilation.

Don't Wait Until Snow Flies

LOOK over your line of hardware for storm sash windows and see that it includes the STANLEY STORM SASH FASTENER No. 1719 and HANGER No. 1715, illustrated above.

The FASTENER is made in two lengths —5 inch for windows four feet high and smaller: 10 inch for windows over four feet high. It may be locked either in open or closed position.

The HANGER enables the storm sash to be quickly and easily put in position without tools.

To those who carry STANLEY STORM SASH HARDWARE in stock, (or will do so), we will be pleased to furnish an attractive folder R111 *in three colors in quantity, imprinted with name and address.*

—a feature that appeals to every class of hardware trade—

Manufacturers use Self-Fluxing solder because it speeds production—repairmen, garagemen and tinsmiths, because it is convenient, rapid and certain—householders, because it is the only solder for the layman. And all of these customers are impressed by the remarkable work it does, and therefore continue to buy—

KESTER ACID CORE WIRE SOLDER
FLUX IN POCKETS

You, too, will like this Self-Fluxing, genuine lead-and-tin solder. First, for the same reason your customer likes it; because it will enable you to do your own work better—second, because it is easy to handle. It stocks two items in one—flux and solder. It's easy to sell; easy to *keep* sold.

Satisfaction all along the line! Why? Simply because fluxing, the hard part of soldering, has been eliminated by putting the flux in the solder. Note that the flux feeds out before the solder melts, insuring a perfect bond; no chance of faulty fluxing; soldering time cut in half!

Try it on your hardest job. If you like it, you can buy it in one pound cartons and on one, five and ten pound spools.

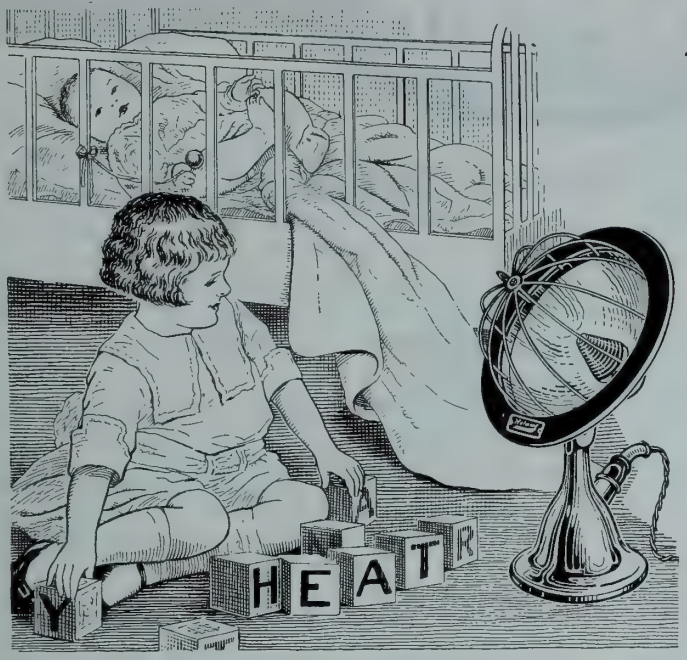
Safe, Healthful Electric Heat for the Nursery---for any room



AS harmless and healthy as the genial rays from the sun—the Heatray uses up absolutely no oxygen from the air. It is electric heat.

In the nursery, bathroom—anywhere—you can enjoy this splendid heat the moment you want it by simply carrying the Heatray to the spot and putting the plug into the receptacle.

The

National ELECTRIC HEATRAY

has **extra** heavy cast base beautifully nickeled. It is hard to tip, but if it does tip, the safely secured guards make it entirely free from danger.

Link up with national consumer advertising now running in daily papers throughout Canada, by displaying National Heating Heaters in your windows.

Birkett Salesmen Want To Co-operate With You

Many retailers are warm, personal friends of ours and of our salesmen. Even if you are not yet one of these, even if you are just beginning to deal with us, co-operation is extremely valuable to us, to you, and to our salesmen. The instant you become a distributor for the goods we sell we become interdependent upon each others' success.

So, you see, with all sentiment or questions of friendship eliminated, it is very much to our interest and to our salesmen's interest for us to co-operate with you.

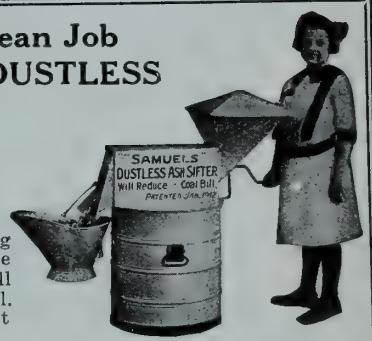
It Does a Clean Job
SAMUELS DUSTLESS Ash Sifter

Tell your customers they need no longer put on the "diving suit" and take to the lane, or back-yard to sift ashes. Sifting the Samuels' way can be done right in the house; all the dust stays in the barrel. The Samuels' sifter will not rust—it is galvanized.
If you are not our agent, we may be able to talk business. Write to-day for particulars.



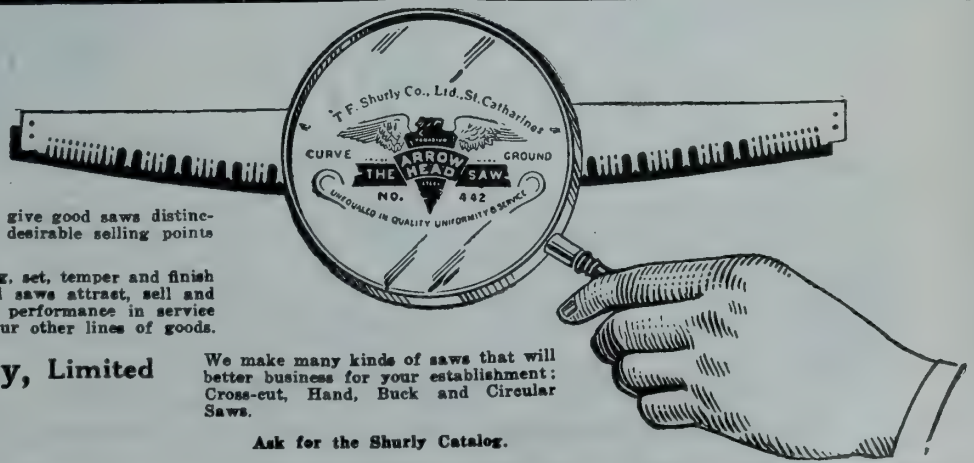
J. Samuels
275 Queen St. W., Toronto

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

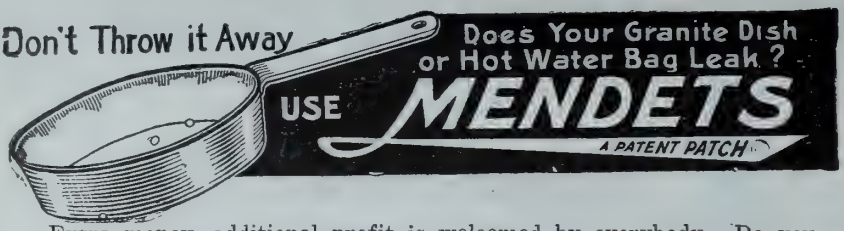
Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.



T. F. Shurly Company, Limited
St. Catharines
Ontario

We make many kinds of saws that will better business for your establishment: Cross-cut, Hand, Buck and Circular Saws.

Ask for the Shurly Catalog.



Extra money, additional profit is welcomed by everybody. Do you know that Mendets are selling by the millions of boxes? Do you know that you have only to put a display package on your counter and they'll sell while you're busy? You might as well have this extra profit coming in.

Collette Mfg. Company, Collingwood, Ont.

"Hercules" Sash Cord

The reputation of this brand has been thoroughly established in the Canadian market for the last eighteen years. It compares in quality with the best imported brands, but is sold at a considerably lower price and can be safely recommended for any job.

All wholesale hardware dealers carry "Hercules" Sash Cord and can fill orders promptly

Manufactured in Canada

JARDINE TOOLS

TIRE UPSETTER NO. 2. This durable machine has a very quick grip. both the eccentrics being raised and lowered by one lever. It has a strong and sure grip. The eccentrics and jaws are faced with tempered steel. The tire cannot slip.

It is extremely durable, because it is made of heavy castings, strong enough to stand the very heavy work for which it is designed. All the pivot pins are of steel; the eccentric strap is a heavy forging. In fact, the whole machine is well and substantially made throughout.

This machine upsets tires up to four inches wide. We have on hand repair parts to replace those worn out in use on this and other Jardine Tools.

Tire Upsetter No. 2. **Ask for Catalogues.**

LIMITED
HESPELER, ONT.

The Original Keystone
WESTCOTT
Adjustable "S" Pipe Wrench

Makes a special appeal to your customers because it can be used in many out-of-the-way places quite inaccessible to the ordinary monkey-wrench. These efficient, reliable wrenches are made of first-class material, and are strong, and durable.

These are the genuine Keystone "Westcott" wrenches, plainly trade marked "Westcott" on the handle. Many of your customers have used these exceptionally satisfactory wrenches for years and will replace them with no other kind. Display them well. Let the prospects know you have "Westcott" wrenches.

If your jobber cannot supply you, write us direct.

The Keystone Mfg. Company, Postal Station "B", Buffalo, N.Y.

The Matchless Opener

Every One Warranted

This powerful, lever principle, crate opener is forged steel from tip to butt. The length is 12½ inches; long enough to give tremendous leverage and make it the most useful tool made for opening boxes, barrels, shoe cases and the like. Notice the hook for ripping off thin boards, box strapping and so forth. It does the work of a hammer, chisel, and nailpuller. It will pull and drive anything from a carpet tack to an 8d nail. Fine steel, carefully hardened and tempered; oval wood handle securely rivetted.

A *Silent* Salesman that *Talks* and *Sells*

and every time it sells it earns 30% profit for YOU

You can invariably sell more silverware if it is displayed in an attractive manner. This handsome cabinet of Rogers 1881 Silverware has been especially designed for effective counter display. It is beautifully made, approximately 18 inches square, covered in black imitation leather and lined with blue plush. When opened and placed upon your counter, it makes an irresistible appeal to the customer in your store. The Display Tray contains a set of lacquered samples which will not tarnish and the compartments directly beneath the samples contain a stock of staple and ready selling articles such as knives, forks, spoons, etc.

Inside the cover—in full view—is a forceful advertisement directing attention to the silverware below, listing the various pieces with retail selling prices and your own name and address.

To secure this Cabinet, we do not ask you to invest a large amount of money in silverware. This "Silent Salesman" holds a sufficiently complete line to meet your daily or weekly needs, and you can easily re-order in small quantities.

In the centre section of the case are handy order-postcards. As you sell from the cabinet, you merely send in re-orders from day to day or week to week on these cards, as demand requires.

We will take care of these re-orders carefully and promptly. A special staff will look after this work and your order will be packed and shipped the same day as received. No waiting on your part—no delay on ours.

The price of the Cabinet complete as described is $65.00. Order yours today and you'll be surprised at the profits it will make for you.

Be Prepared for a Christmas of Practical Giving

IT'S to be the Christmas of practical giving. Folks that in other years went out and bought at random are this season going to snoop around for days on end, seeking out the most practical gifts on the market.

And what gifts more practical than electrical appliances or an electric heater! What gift could be more downright sensible and practical than a trim Canadian Beauty Electric Iron, a Toaster, a Three-Heat Grill or any of the other members of our popular family of electrical appliances?

Can you think of a gift that could be of greater use than a Majestic Electric Heater?

The dealer that handles New Canadian Beauty Appliances and who goes out vigorously after all the business he can get will benefit by this condition—unquestionably.

Every New Canadian Beauty Appliance sold creates an everlastingly favorable impression, because it gives such perfect service. Build wisely, then—Look ahead. Think of the many future sales that will spring from every single sale made this season!

Are you ready? Fully stocked? Equipped to do a roaring trade? If not, act **now.** Wire your order, write it or 'phone it to your nearest jobber or direct to us. But, take our tip. Don't delay. Get your order in at once.

"Industrial Situation Is Clearing"

Pendulum Has Had Its Big Swing in Both Directions and is Now Settling Down—Many Transitory Influences of Minor Character Still at Work but Correct Relation of Costs and Earnings Will Result from Stabilization Soon to Come—Advises Sorting Up Of Surplus Stocks Among Jobbers and Retailers

AN APT description of the present fluctuating tendency of prices and industrial conditions in general, was that made to Hardware and Metal by James Arnold, General Manager The Canada Foundries and Forgings Co., Limited, Brockville, Ont., in likening the situation to the swing of a gigantic pendulum which had its swing upward in 1919 and 1920, its return swing in 1921 and which is now described as gradually settling. In the period now entered upon it was held as likely that there will be further advances and declines, generally on a smaller scale than recently, until the readjustment has been sufficiently completed to allow constructive forces to get under way unhindered.

With the Brockville plant of this company now operating at capacity compared with a three-day-a-week schedule last August, the future is looked to with a great deal of hope. Such activity as is now being experienced could hardly be maintained throughout the next two or three months as this would be unusual and more in the nature of a boom than a return to more normal operating conditions, but this firm anticipates that by February of next year there will be a renewal of activity on a foundation of solid business with a gradually increasing trade. The expected revival of activity in building in the Spring, of which there are said to be many definite indications, will help business in tools and such lines as are manufactured by this company.

Many Transitory Influences

Reviewing conditions in the hardware and other industries, Mr. Arnold pointed out that much of the unsettlement of the present was being caused by many transitory conditions which would gradually be eliminated. It was stated that the surplus of many lines on the U.S. markets due to banks forcing manufacturers to liquidate stocks, and also due in part to war surplus stocks being marketed in that country, had also influenced conditions in Canada to some extent, some of this surplus having found its way to the Canadian market at prices which reflected a loss to the manufacturer despite the existence of dumping regulations to offset this. These prices have been met by Canadian manufacturers in many cases and to-day, it was stated, a number of hardware and other lines are being sold by domestic industries at a loss. Advantage has been taken recently of the opportunity for slightly advancing quotations on some of the hardware lines so affected. In other cases further reductions will be made following declines in raw material costs, distribution charges, etc. Thus the further fluctuation of prices is compared with the movement of the pendulum in its settling process.

Dealing with the fluctuations in prices of materials entering into the manufacture of hardware lines, Mr. Arnold stated that manufacturers have willingly submitted to the necessity of basing prices of finished products on replacement values as soon as declines have been made in materials. The latter have not been such an important factor in connection with prices on finished hardware however, due to the fact that there is little difference on the individual article due to the small extent of the decline represented by the material in that article. Labor cost was described as the big item which influences prices of such products. In this connection it was stated that manufacturers in the smaller cities such as Brockville have not the huge labor turnover which is experienced by industries in the larger centres and so have not been forced to make drastic reductions in wages. Sentiment is also a more potent influence in the smaller cities than in the larger centres and it is frequently the case that with some urging, production can be increased and more efficiency practised thus avoiding the necessity for cutting wages. Increased mechanical efficiency in the various processes was also described as an important factor in reducing costs.

JAMES ARNOLD.

General manager of The Canada Foundries and Forgings Co., Ltd., Brockville, Ont., who outlines herewith a number of the influences still hindering a return to normal trade, particularly in the hardware business.

Manufacturing for Current Requirements

A considerable improvement in trade has been responsible for the increased production of this plant since August.

With the factory averaging a capacity production manufacturing is still being done only for current requirements and not for stock. The volume of recent trade has not been quite up to that of last year but lower prices must be considered in making any such comparison.

To retailers and wholesalers, Mr. Arnold's advice is to carry fair stocks, not to load up nor to let them dwindle to the danger point where possible business will have to be turned elsewhere. In order to carry well assorted stocks and where high priced stock is already on the shelves, Mr. Arnold makes the suggestion that requirements be purchased at to-day's prices and averaged up with the higher priced stock on hand and so reduce the cost to the consumer and simultaneously clear out stock which might otherwise remain on the shelves for considerable time and eventually be sold at a loss. Retailers who are not following the plan of taking their losses and basing prices on replacement values were described as short sighted, and were said to be following a plan which would send much business afield to business interests such as the mail order houses. A great many of such merchants are complimenting themselves that they are able to do business on this basis but in the next breath they are complaining that their volume of sales is not up to those of last year. The rest of the business, it was pointed out, was going to those who give the customer the benefit of price reductions. In this connection, Mr. Arnold pointed to the reading of metropolitan newspapers being done by inhabitants of the rural districts. This reading keeps them in touch with price movements and they can readily see if the local merchant is passing on any price advantage.

Averaging Stocks

A number of wholesalers and retailers were said to be averaging up stocks among themselves with a view to stimulating the movement of high priced stocks from the shelves. In the United States some manufacturers of axes and other tools were said to be following this plan.

"This idea helps the manufacturer as well as the wholesaler or retailer," said Mr. Arnold, "because they will all be in the market at the same time then for further requirements and they will be at one price whereas the price cutting which would be bound to follow individual effort to move such stocks would be disastrous to trade and further hinder the establishment of sound levels."

Speaking of hardware, Mr. Arnold offered the opinion that prices would, on the average, be fairly stable, at least for a time due to the fact that iron and steel and other metals seem fairly stable, there having been no outstanding change in the past few weeks.

Regarding the recently threatened railway strike in the United States, it was the opinion that its failure was due to the fact that there was too much possibility of defeat in the railroad that such a defeat would have been too severe a blow at the American Federation of Labor. Mr. Arnold agreed that the wages paid railroad workers were

Officials Discuss Scale Controversy

Director E. O. Way, of Weights and Measures Department, Discusses Hardware and Metal Charges of Discrimination Favoring Department Store in Sale of Spring Weighing Scale—Scale Can be Kept as Ornament if Springs Removed, but Should Not Be Offered for Sale

A VISIT has been paid to the Editor of Hardware and Metal in Toronto by E. O. Way, Director of Weights and Measures, Ottawa, Ont., to discuss various points concerning the controversy aroused by this paper in connection with the sale of gasoline from pumps when purchased on a weight basis, and also in connection with the denial of the right to a hardware firm to import a spring weighing scale which is simultaneously allowed to be sold by a Toronto department store. Some further information secured on the gasoline subject will bring about the re-introduction of this controversy in the next issue of Hardware and Metal. In connection with the weighing machine matter little further progress was made by the discussion, except to establish more firmly the stand taken by this paper on the subject.

After being made aware of the various proceedings in connection with the weighing machine case, it being explained that a Toronto department store was apparently allowed to offer for sale a scale such as is prohibited by the regulations in effect since 1914, and a scale similar to the one which was denied admittance to this country from the United States, when application was made to the Chief Inspector in Toronto of the Weights and Measures Department, Mr. Way stated that the scale being shown by the department store was one of a number imported by this store prior to the enforcing of the regulations in 1914 and that at present there was no objection to the store using the scale as an ornament providing no attempt was made to sell it and also providing that it was not in shape to be used as exposed. It was his opinion that the springs had been removed from the scale and that no attempt was being made to sell the machine. It was stated that Inspector McConvey in Toronto, had made attempts to purchase the scale and was satisfied that the store was not endeavoring to sell it.

Contrary Evidence

This situation is very much contrary to the experience of Hardware and Metal representatives who found that the scale in question was in shape for use and, no difficulty would have been experienced in purchasing the scale for $33.00 whenever desired. Mr. Way's suggestion that the salespeople might probably have offered to sell the spring scale with the idea of switching interest to the legitimate bar scales is hardly likely in view of the fact that the price of the bar scale is $2.00 higher than that of the spring scale. Were the prices reversed, the contention might carry more weight.

At any rate, if the springs were removed from the scale so that it could not be used, such as was claimed by the Director of Weights and Measures, why was it necessary for Inspector McConvey to endeavor to purchase the scale?

Sell Spring and Scale Separately

In view of the fact that the inspectors would allow the scale to be kept on display providing the springs were removed, the suggestion was put forward by Hardware and Metal that the scales might be imported and subsequently have the springs removed so as to pass inspection, the scale and the spring then to be sold separately. Mr. Way objected that the inspector would be made aware of the importation of scales in any quantity and would be quickly on the job to inspect them and that no such practice would be expected of the average firm with which they have to deal.

Nevertheless the facts of the issue are quite clear and until the department store in question is prohibited from offering for sale this type of scale, and until the scale is adjusted so that it cannot possibly be used for weighing purposes, the failure of the Department of Weights and Measures cannot be looked upon by hardware merchants as anything else but discrimination.

Mr. Way promised to go into the matter more fully with Inspector McConvey in Toronto and advise later what action was taken along these lines.

The Hunter Shoots the Duck

Mechanical Display in Montreal Hardware Window Shows Movement of Both Hunter and His Target—Device Also Used in Sporting Goods Window When the Football is "Kicked"—Saw, Hammer, and Plane in Motion, in Display of Tools

IT HAS been said that a window may be neatly and carefully trimmed, displaying the merchandise carried on the shelves on the inside of the store in an extensive way, and still not attract the necessary attention of the buying public who pass the store day by day. The goods are placed too regular, too much uniformity, and offer what is termed a "stiff" display. This may be true, but what is a "stiff" window?

Advice comes from those familiar with the art of window trimming not to overload the window. They advise specializing on a certain line and not placing the entire stock on display. Use display cards and price tickets freely, these removing any bare appearance that may have crept in, as well as assisting the window in selling by explaining and telling the price. Added to the importance of the above suggestions comes the placing of a moving article, or having a movement of some kind on display.

Levac & Lalonde, 1365 Wellington St., Montreal are strong believers in action for their window displays, especially where the actual use of the article can be shown. They have spared no little time and work to this end, and are now able to cause a moving display in many lines of merchandise placed in their windows.

The Duck Shooter

This firm recently featured a sporting window for the sale of guns, ammunition and other hunting requisites. The natural surroundings were obtained by the use of sod, reeds and small brush. Demonstrating the duck shooter, water was produced by a galvanized tub, the sides of which were covered with a green baize cloth and sod. Reeds were placed in the water and through the sod on the floor, also forming the background of the display with other brush. The hunter was a fully dressed dummy, complete in every detail. He wore his hunting boots, leather leggings, hunting suit of jacket, breeches and cap. His face consisted of a foot-ball bladder with eyes, nose and mouth painted and a hair mustache. He was shown crouching behind his "hide," taking aim at the duck in the water.

The window at first sight was very attractive, no detail being forgotten in its make-up, but the feature was the actual shooting of the duck. The hunter cocks his gun, pulls the trigger, and the ducks falls over. Here is where the "hide" is used for two purposes, to hide the hunter, and contain the mechanical device that causes all actions. Covered by a rustic colored cloth and sticks is a wooden wheel, about 18 inches in diameter, run by an electric motor in the basement of the store. On the one side of this wheel is a projecting peg on which is fastened a wooden shaft about a foot long. This shaft connects the lever of the gun with the wheel so that the continued turning draws the lever back, cocks the gun, and returns the lever to its proper position by the return motion of the wheel on the upturn. On the other side of the wheel are two pegs, placed at proper distances from each other, and from the peg connecting the lever on the other side, to allow perfect action in the shooting. The one peg trips the trigger at every revolution by coming in contact with a wire connection to the trigger, (the wire connection is necessary so as to not allow the wheel to be shown). The third peg deals with the duck. A covered string is attached from the bottom of the decoy in the water to the wheel. As the wheel turns it draws the duck under, and this is uprighted again because of the buoyancy of wood from which the decoy is made. With the turning of an electric switch, the display is set in perfect action.

Kicking The Football

With the electric motor and its speed reducing belts and pulleys a permanent fixture in the basement, action is transferred to the window opposite, when desired, by a belt. Mr. Lalonde explained how a football was "kicked" from the floor of the window to the ceiling in the ealier months when sporting goods were on display.

The wooden pulley and projecting peg are used in this case, the same as in the hunting scene, only it is now placed in the basement directly opposite the motor. The peg, on every revolution comes in contact with one end of a narrow board about three feet long, a spring (a common screen-door spring) is attached to the other end. It is pivoted in the centre to allow the wheel on the one end to slowly draw it down and when the peg commences its upturn it immediately leaves it and the board is forcibly

A realistic hunting scene which will make any sportsman take a second look is that shown herewith by J. L. Sauve, hardware merchant, Montreal. The cauldron and ladle are shown suspended on a rustic prop and cross bar. Other camp equipment including thermos bottles, oil, fry pans, rifles, axes, ammunition, etc., is shown in a natural setting with a background of boughs, leaves and animals.

thrown by the spring at the other end. By the use of a wooden peg reaching through the floor of the window, this gives the force of the "kick" for the football.

In the window a conical basket is formed by strings from the ceiling to the floor. By the use of screw eyes in the ceiling and floor this basket is made about four feet in diameter at the ceiling and a little better than the diameter of the ball at the floor. When the ball is quickly forced upward, it strikes the ceiling and is again guided back by the strings ready for the next "kick." Every revolution of the wheel causes a kick and return of the football.

Tools in Motion

A display of tools was in the window this Spring, and by using this mechanical device, a saw, hammer and plane were set in actual motion on a display board. The wooden wheel and pegs were again used, and by the use of shafts from the pegs to the tools, the hammer pounded, the saw sawed and the plane planed.

"We find a feature always causes interest, and while the different devices take time and trouble to complete, we are convinced they are worth all the pains taken," said Mr. Lalonde.

NEW SENIOR TRADE COMMISSIONER ARRIVES

Montreal.—G. T. Milne, who replaces Capt. E. J. Edwards as His Majesty's Senior Trade Commissioner for Canada, Newfoundland and the West Indies, has arrived in Montreal and will assume his new duties this week.

Following the decision of the authorities in England, the activities of the trade Commissioner's office will be curtailed to a degree, but Mr. Milne hopes that future work will meet with sufficient support from the Canadian business community to meet the needs of expanding business during the reconstruction period. Apart from a reduction in the appropriations made by the British Government, the essential features of the office will be maintained and the work carried on as usual.

Imports Regulations To Be Changed

St. John, N.B.—A conference was held with regard to the marking of the country of origin on imported goods between Hon. J. B. M. Baxter, minister of customs and excise, and the members of the Board of Trade, representing the wholesale interests committee of the board. A request was made that the enforcement of the act be deferred until the government had an opportunity to give it further consideration, as it appeared that amendments were necessary to relieve excessive burdens imposed on importers by the act, especially the dry goods interests. The minister expressed himself in sympathy with the request and said that he would recommend that the act be not enforced until it had been reconsidered by the government. Representatives of the various interests pointed out the difficulties which the act imposed and declared that Canada would be out of the world markets, and that it would inflict other hardships on them.

RECENT BRITISH DEVELOPMENTS IN STAINLESS IRON

The extent to which stainless steel has revolutionized the Sheffield cutlery trade is well known but it is not so generally appreciated, it is pointed out, that stainless iron is of equal importance. Both materials, were discovered seven or eight years ago. Stainless steel was first manufactured, and soon after it was found that stainless iron could be produced by much the same process, with the exception that a smaller quantity of carbon-free ferro-chrome was required.

Stainless iron has been largely used for the production of golf clubs; it has attracted the attention of makers of stove grates and is being used for kitchen ranges, grates and fenders. An important and useful direction in which the material has been applied is in the fitting of motor cars; it is supplied in sheets for making hoods, and there is in contemplation its greater use for bodies and, since it does not tarnish, for replacing nickel-plated parts. It is made up into a wide variety of kitchen utensils and is used for shop signs and door plates One British firm is producing the material in wire form, to be made up into door mats, and it is also being used for spring mattresses.

Another important development in contemplation is the use of stainless iron for the furnishing of railway carriages, engines, and rolling stock generally. The proposal is that it should replace brass door handles, brackets, and many other fittings.

Fort Frances, Ont.—Robbers broke into the hardware store of Ed. Tompkins, Emo, and stole a number of articles. Among other things taken were four rifles, a quantity of ammunition, packsacks, knives and cooking utensils.

Advertising Current Price Reductions

Hardware Prices Reduced

Many people think that the only things which have dropped in price are those which they themselves sell or grow.

Each man is better informed on his own line than on any other, and should consider that the other fellow is "hit" the same way.

Here are a few changes in staple lines of hardware:

	War prices.	Now.
All copper Wash Boilers	$ 7.50	$ 4.00
Galvanized Wash Boilers	2.25	1.25
Galvanized 1-gallon Oil Cans	1.35	.90
Nickel plated Tea Kettles	4.50	3.00
2-blade English Pocket Knives	1.50	1.00
Hand power Washing Machine	25.00	20.00
General purpose Shovel	1.35	.90
White Lead	22.00	17.00
Turpentine	4.00	1.50
Raw and Boiled Linseed Oil	3.50	1.40
Paint, a quart	1.85	1.40
Gas Ovens	7.50	6.50
Wire Nails, a pound	.08	6½c
9-wire Fence, 48 inches high, a rod	.76	.70
Stove Pipe, 6 or 7 inch, a length	.35	.25
Window Glass, a light	1.00	.50

—Just half of what it was.

J. H. Slater

Phone 72 RIDGETOWN, Ont. Hardware

One of the best ways to convince customers that hardware prices are reduced is to and that prices have been reduced to conform with general price reductions. In Slater, hardware merchant of Ridgetown, Ontario, in the above ad. The average buyer wants to know that he is getting some price concession in buying hardwa e and that prices have been reduced to conform with general price reductions. In many cases business is being held up until confidence is established. This is one of the best plans for gaining the confidence of the customer.

Stop Price-Cutting on Perfection Oil Heaters

Toronto Department Store Agrees to Abide By Re-sale Price, Says Manufacturer's Representative—Few Heaters With Japanned Trim Being Sold at $7.95

ARTICLES which have appeared in two recent issues of Hardware and Metal have created considerable activity in trade circles and have brought forth an announcement from the Perfection Stove Company, a representative of which called at the office of Hardware and Metal this week to state that the department store in question had agreed to abide by the resale price established on Perfection Heaters. A Toronto newspaper dated October 29, carried an advertisement by this store featuring a nickel plated Perfection heater and quoted a price of $9.75. As far as Hardware and Metal can learn no further advertisements have appeared quoting a price on the heater with japanned trimmings.

A representative of Hardware and Metal called at the department store on Tuesday, November 1 and was shown the Perfection oil heater with nickel plated trimmings at $9.75. Upon enquiring for a cheaper heater he was shown a heater with japanned trimmings at $7.95 and was told that the heater in question was a Perfection heater made by the Perfection Stove Company but bearing the name plate of another prominent stove manufacturer. This price of $7.95 is $2.20 higher than the price quoted on the same heater shown in the advertisements reproduced in recent issues of Hardware and Metal. The store salesman further stated that they had only a few heaters left with japanned trimmings, to offer at $7.95.

Mr. Wells, representative of the Perfection Stove Company who called at the office of Hardware and Metal, claims that there will be no further price cut ing on the part of the department store. He admitted that a great deal of dissatisfaction had been caused in trade circles through price cutting by department and furniture stores as well as by some hardware firms.

ACTIVE TRADE IN BUILDERS' HARDWARE

London, Ont.—The unusually fine fall weather is resulting in a large amount of building and this month's permits will average one new residence every day. In addition extensive repair work is being undertaken. All this activity is being reflected in a steady demand for builders' hardware.

While it is a little early to make any definite predictions yet many of those in close touch with the situation see a large amount of building in sight for the spring. Hardware merchants generally report that business has been very fair. While there has been no big rush, seasonable lines, especially heating equipment and things required in getting ready for the cold weather, have been moving steadily. Collections are reported to be good, although in some cases it is admitted this is the result of persistent effort.

An Early Start for Christmas Trade

One of the secrets of developing a big Xmas season trade is to get interest under way at an early date. The windows are an important factor in developing this interest and plans should be made early for effective trims, to be changed frequently throughout the pre-holiday season. The hardware stock offers a wide range of articles which lend themselves to effective treatment in the window displays and the above offers some good pointers for the arrangement of the Xmas suggestions. The background is of painted wallboard. The generous use of glass shelving at the sides and on pedestals allows the display to be built up with a wide range of goods and not appearing overloaded. This display by J. Thompson, of Mills Hardware Co. (King Street Store) Hamilton, Ontario, won first prize in places over 5000 population in the 1920 Hardware and Metal Christmas Window Contest.

Hardware and Metal

Canada's National Hardware Weekly

Member Audit Bureau of Circulations Member Associated Busines Papers

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO Winnipeg

TORONTO, SATURDAY, NOVEMBER 5, 1921

A PROMINENT official of the National Board of Fire Underwriters states that the electric iron has caused 42 per cent. of the home fires in America in the past year. Another home trap was the dustless mop. His suggestion to lessen the fire hazard in connection with the mop was to keep it in a galvanized can. Gasoline was also mentioned as being a common cause of home fires. These products are all dealt in by the hardware merchant and it will be in the general interests to see that purchasers of such lines are advised concerning protective measures.

GOVERNMENT officials have recently declared that they are impressed with the necessity of a considerable change in the regulations governing the marking of imports. Such marking would no doubt have some merit but in the suggested form it presented a great many difficulties which would have proved obstacles to trade at a time when every aid to business is required.

CONSIDERABLE interest is attached to the September reports of Canadian railways, all of which show improvement from the standpoint of net earnings. The early harvest and marked increase in volume of passenger traffic are cited as partially responsible, but the figures are important in that they reflect healthy conditions in one of Canada's most important industries—an industry which serves as a barometer of general industrial conditions. The shrinkage in value of commodities carried affects the producer and trader but does not affect the railway's charges for carrying them. There is no question that a continuation of this condition will bring an insistent demand from producers and traders for reduced carrying charges.

SHORTAGE of natural gas in many parts of the country has brought about action on the part of gas companies who are calling upon consumers to have their gas burning appliances adjusted and improved wherever possible. The appointment of inspectors to see that only efficient appliances are used, has been suggested. This is a move which is worthy of the support of hardware merchants and one which offers a potential field for business.

UNDER THE heading "The Value of a Dealer's Experience," a recent co-operative advertising campaign in the daily press advised readers to consult with the retail merchants for suggestions concerning the particular line dealt with. It was pointed out that the retailer was anxious to give this co-operation and that it would prove advantageous. This situation is just as true of the hardware business as of any other retail trade and in times like the present when every possible stimulant to trade is required the merchant cannot give too much attention to close co-operation with customers.

ADVICE has recently come from the Birmingham, England, Chamber of Commerce to the effect that some Canadian purchasers of English made goods were repudiating their accounts and when pressed to settle threatened action against English joint stock companies for trading in Canada without being registered. This issue is one that organized business in Canada should deal with, with a view to removing a stigma which is wholly unwarranted insofar as the business men of Canada as a class are concerned. It may well be that some British concerns do not know all the laws of this country and may easily place themselves in the hands of unscrupulous dealers. Court action brought on by the British creditors would soon force payment as the debtors would hardly relish such publicity.

An Interesting Review

A CLEAR and concise review of conditions in the hardware industry with an opinion as to how these conditions are likely to develop in the near future, is given elsewhere in this issue as result of an interview with James Arnold, General Manager The Canada Foundries & Forgings Co., Ltd., Brockville, Ont. In these times when the business world is being flooded with hasty predictions and biased reports it is refreshing to read such a comprehensive and untrammelled review as that given by Mr. Arnold.

Comparing the trend of business with the swing of a huge pendulum it is shown that the big upward swing took place in 1919 and 1920 and the big backward swing followed in 1921 and the present fluctuations on a smaller scale represent the settling down process to a normal relation of earnings and costs. Much of the unsettlement was attributed to the fact that the readjustment process in many cases did not eliminate this unfair relation of earnings to costs. Thus the reaching of lower price levels failed to stimulate business in the lines affected, contrary to the predictions of so-called economists.

It is the opinion of Mr. Arnold that had the correct relations of these factors been maintained that it would have been immaterial if the average worker's wage had been maintained at double what it was in pre-war times. The trouble has come from a shaking down of certain costs, thus bringing about an inequality which causes difficulty until the correct relation of these factors is established on the lower scale.

Many of the disturbing influences still at work were described as of a transitory nature and ones which are likely to be eliminated without much difficulty. To the retailers and wholesalers some suggestions are offered concerning the averaging up of stocks in order to solve the problem of moving high priced stocks from the shelves without delay. Many of these suggestions are meritorious and might be acted upon by merchants who find themselves faced with the difficulties described. Further fluctuation of prices of finished products, including some advances and some declines, was mentioned as a factor which would be peculiar to the settling down process described.

In the case of this and a number of other hardware firms in the same district, manufacturing is proceeding in fair volume, producing for actual requirements only. If subsequent developments justify production for stock, overtime operations will be necessary in certain industries. No boom is anticipated but a gradual improvement in conditions with business on a firmer basis next year is predicted.

Events in the Trade

NEW FIRMS

Toronto.—A. R. Hamilton has commenced business with a hardware stock at 1325 Queen St., East, Toronto.

Toronto—C. S. Wilson, formerly manager of the London, Ont. branch of the Bank of Commerce is commencing a hardware business at 2294 Bloor St. W., and will handle tires, oil, gasoline and other auto and motor cycle accessories in conjunction with the hardware stock.

Burlington, Ont.—The Globe Code Standard Electric Co., will soon start in this town. This new industry will manufacture electric goods of all kinds. The principal line handled will be porcelain insulators.

Toronto.—A new concern, The Tools & Stampings Ltd., has started at 87 Jarvis St. They will manufacture dies, tool, and metal stampings, and will also handle electro-plating work. Mr. Wise is the owner of the new concern.

Peterboro, Ont. — The Red Arrow Tires, Ltd., is a new company to establish its plant in Peterboro, Ontario. Land has been bought and plans for the plant are now being prepared. It is expected that the first unit will be in operation in the spring and that some 400 men will be employed. The company will be incorporated for $2,000,000.

OBITUARY

Announcement is made of the death of James Kinsman, North Bros. Mfg. Co., Philadelphia, caused by a very sudden attack of acute indigestion. For almost 40 years Mr. Kinsman was associated with this Company, and had many friends in the hardware trade of Canada and the U. S.

Woodstock, Ont.—James Holmes Sr., who for the past 40 years has conducted a hardware store in this city is dead.

He was 87 years of age, and had enjoyed the best of health until his death, having been at his place of business daily. Evidently he had arisen early in the morning and in making his way to the basement of his home had missed his step on the stairway, and fallen to the floor below, were he was later found by one of the family. James Holmes was Woodstock's oldest business man.

Announcement is made of the death of John W. Thompson, 175 2nd. Avenue, Ottawa, who has represented the firm of Frothingham & Workman, Ltd., in the city of Ottawa and vicinity for the last twenty-eight years. Friends of Mr. Johnson affectionately bestowed on him the nick-name of "Honest John." Death followed an illness of some months as a result of an attack of pneumonia. A number of his friends in the hardware trade went to Ottawa to attend the funeral, and to pay their last respects.

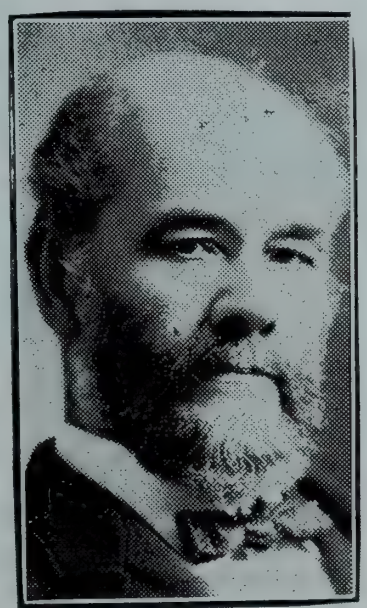
He was 68 years of age, and had been a member of the Commercial Travellers Association for thirty-eight years.

PERSONAL

Moncton, N. B.—At the annual meeting of the N. B. Petroleum Co. F. R. Sumner, president of the Sumner Co., Ltd., was re-elected president and Mr. Miles E. Agar, hardware merchant of St. John, a director.

W. S. McLennan, general sales-manager, Brandram-Henderson, Limited, is on a business trip this week to Ontario points, touching Toronto, Windsor and Detroit.

Walter H. Cottingham, president of the Sherwin-Williams Company of Canada, Limited, is visiting the Montreal branch this week.



LATE JAMES HOLMES, Sr.

Pioneer hardware merchant of Woodstock, Ont., who died at the age of 87 years after being engaged in the hardware business since 1875. Deceased was known as Woodstock's oldest business man. Death resulted from a fall down a stairway.

WESTINGHOUSE CO. BANQUET

Hamilton, Ont.—One hundred and twenty-five members of the Veteran Employes' Association of the Canadian Westinghouse Company gathered in the Arcade Rose Room on the occasion of its third annual banquet. C. A. Hunter, president, presided over the enthusiastic gathering. Speeches of a felicitous nature and which indicated the good fellowship which pervaded were made by Paul J. Myler, F. A. Merrick, H. U. Hart, N. S. Braden, C. H. Mitchell, F. H. Forsyth and the baby members, Alex. Moffatt and J. W. Jamieson.

TO ERECT NEW BUSINESS BLOCK

London, Ont.—Kilpatrick Brothers, East London hardware merchants, made an important purchase of valuable business property this week when they secured five lots on what was formerly the Cronyn estate. Three lots front on Adelaide St. and two on Dundas. Mr. Kilpatrick stated to Hardware and Metal that it is his intention to erect a fine business block.

QUEBEC R.M.A. WILL AFFILIATE WITH DOM. ASSOCIATION

The Quebec Retail Merchants' Association held recently an important meeting, one that was by far the largest and most enthusiastic ever held in Quebec. Over one hundred prominent merchants were in attendance, and the discussion that took place interested everyone.

For some time past, at the meetings of the local Retail Merchants' Association, these latter have been studying the opportunities afforded them by affiliating as a district with the Dominion Retail Merchants' Association. At their last meeting Mr. M. Lapointe, the energetic general provincial secretary of the association, was present and gave the merchants a most interesting explanation and convincing proof of the advantages that would be derived through the merchants grouping together on this central association of retailers.

After a general expression of opinion by the merchants present it was unanimously adopted to adhere to the principles of affiliation as a district to the Dominion Retail Merchants' Association.

ROBBERIES AT ST. CATHARINES

St. Catherines, Ont. — The Imperial Oil Company's offices were broken into and the safe blown open. The robbers carried away about $300.

There Is a Firm Tendency in the Oil Markets

Decrease in the Production of Crude Oil—Recent Increase in the Volume of Foreign Demand and Inquiry—Increase in Pennsylvania Crude Not Reflected Here Says Oil Official

OIL markets in general, and prices on oil products in particular, continue to register a firmer tendency. Higher quotations now appear on certain grades of motor lubricating oils; while a further increase has developed in fuel oil prices.

During recent weeks, interest in the trade has centered upon the advancing quotations of crude oil. A decrease in the production of crude, was one of the incentives in this direction; but the fact that current consumption has not equalled the amount produced, has reflected a temporary halt in the movement to higher levels This marking up of quotations on crude, has therefore, been reflected in prices on other refined oil products generally, including gasoline, coal oil, fuel, and some lubricating oils.

Oil Stocks Now Plentiful

Stocks of oil, at present on hand, are stated as ample for current requirements. It is intimated that refineries, and other concerns with storage facilities, have vast accumulations of oil. Therefore, the trend of prices is of particular interest; and future developments are attracting keen attention. Conditions in southern primary markets are described as very unsettled. The recent advance in price has found large consumers regarding the prevailing situation as unsettled; some questioning the healthy state of the advances. Recent increase in the volume of foreign inquiry and demand, is stated to have caused sharp activity in primary oil centres; and upon this sustained call for crude, depends the future rise or fall of quotations on the refined products. This improved export movement is a prime factor in petroleum markets. European countries are included among active purchasers, and while shipments have not increased in number, the cargoes are now reported as of larger volume. This particularly applies to southern Europe. The French demand is considered quite good, but the call from England is stated as disappointing. China has also gained prominence as a buyer of coal oil.

Good Call For Fuel Oil

While there has been a seasonal increase in the demand for kerosene, there is also a noticeable slackening in gasoline requirements. The call for fuel oil continues of good proportions; but no changes have developed as regards lubricating oils. The heavy consuming season for gasoline is now comparatively over. Coal oils are one of the strongest features of the oil markets; the domestic consumption being described as stationary, but with fair-sized foreign inquiries sustaining the buying interest.

It is admitted that much of the present buying is for immediate requirements only; but no intimation as to the future trend of the oil markets can be secured from reliable sources. The contributing factors do not stimulate over anxiety in accumulating these commodities, but moderate supplies are generally being covered.

"There have been no additional price changes," said W. C. Skelding, General Manager of the British-American Oil Company, to Hardware and Metal. "Although the Pennsylvannia grade of crude oil has recently advanced another 25 cents per barrel, we are not predicting any additional immediate increases on the various refined products."

INDUSTRIAL SITUATION CLEARING

(Continued from page 36)

too high in comparison with the scale in effect in other industries. He was not so much in favor of a general reduction in wages paid to labor as he was for a revision of wages to bring about a proper proportion. Thus he described it. If every worker was getting $2 to-day where formerly he got $1.00 then there would be no need for reductions as business would go along with expenses and earnings bearing the right proportion to each other.

Fair Readjustment Wanted

"It is the inequality of the present scale that is causing the trouble and there will be no satisfactory basis until readjustment has been made to bring about a fair relation of all these factors," said Mr. Arnold, adding, "that no general reduction in prices could now be made by such industries until freight rates were reduced, and this in turn would depend upon cutting the labor cost on the railways. Mr. Arnold was of the opinion however, that it was not lower prices that were needed to stimulate trade. Confirming this he pointed to the fact that in the steel industry lower prices resulted in no stimulation of business, but rather a stimulation occurred only after prices showed a firmer tendency.

Credits and collections were said to be in a very satisfactory state and one of the features of current business was said to be the big demand for heating equipment for small homes in the larger cities, indicating that a number of such houses are being constructed to relieve the house shortage.

Western Canada Conditions

Mr. Arnold had but recently returned from Western Canada and stated that trade in certain places was quiet due to some extent to the reduced buying and debt paying power of the farmer. This condition was partly attributed to the lower prices now being paid for grain, to the fact that much grain was, through being left exposed, reduced in grade, and also partly due to the high freight rates, the farmer being paid at prices less freight to Fort William. In this connection Mr. Arnold pointed out that these freight charges are 50% higher than a few years ago and the Western farmer has therefore been hit rather hard. Much sorting up of stocks between Western hardware jobbers was reported, in an endeavor to overcome the disadvantages of having a high-priced slow-moving stock in the warehouse. There was said to be considerable need for hardware lines in the West and that stocks were moving out gradually. The result would be that the Western trade would be able to absorb a fair volume of hardware but there might be some difficulties in connection with financing, due to the inability of farmers to liquidate all their debts and the fact that Western hardware wholesalers must carry large stocks. Mr. Arnold stated that the Western spirit of optimism prevails and no fear is expressed as to the immediate future.

Export Connections Reopening

In connection with export trade it is interesting to note that this firm is now reopening some of its pre-war connections. These are for now being chiefly restricted to British possessions due to the difficulties in exchange in developing trade with other countries. Constant enquiries are coming from old and new connections in the British possessions and a gradually increasing trade of this nature is expected to develop.

Stocks of manufactured goods held by this firm are light, as is the case with a number of industrial plants in the district. Should conditions later justify the manufacture of goods for stock, and current requirements be maintained at the present volume there will have to be overtime work in many departments of this industry and among others who are reported to be experiencing much the same condition. Optimism is expressed by the officials of this company concerning the future but nothing in the nature of a boom is anticpated, but rather a gradual settling down to a normal basis with the various apparent transitory influences gradually readjusting themselves and bringing all branches of industry into a stable and correct relation to each other.

TO LOCATE IN PETERBORO

Birmingham Motors of Jamestown, N. Y., will locate their Canadian plant in Peterboro. Arrangements are said to be complete for taking over the plant formerly occupied by Henry Hope & Son, of Canada.

News of Western Canada

Plan for Rating of Local Buyers

C. H. Phillips, Hardware Merchant of Rosetown, Sask., Originates Plan of Co-operatively Rating All Local Buyers—Separate Department for Furniture Stimulates Trade

C. H. PHILLIPS, hardware merchant of Rosetown, Sask., is one of the many hardware merchants of the West who has found that a good line of furniture can be carried successfully and made to be one of the best paying lines handled. Since the accompanying photograph was taken, Mr. Phillips has moved his entire line of furniture to the floor above. A wide stairway has been found since making the department exclusive from the general line that an increase in sales has taken place.

Rating Local Buyers

Mr. Phillips is the originator of a system of rating of buyers in the district, that the Rosetown merchants prepared about a year ago. The list was prepared with the co-operation of every merchant in town. The average rating was struck in this way. A meeting was held of every merchant in town also the bank managers. The names of all buyers were taken alphabetically, starting for instance with James Abel. One merchant might say, "Abel's credit is all right, he always paid me, he should be rated in A." Another merchant might say, "No Abel should be in D class he owes me a lot of money." A vote would then be taken. Slips of paper would be passed around for the merchants to indicate just how much money Abel owed each man. These slips were then placed in a hat and the bankers would read off just how much Abel owed.

It might be found that Abel owed a good deal of money spread out among the different merchants, while with other merchants he might have a clean sheet. (Of course when the slips are placed in the hat the merchant does not put his name on it. Nobody knows just who the money is owed to.) The rating is then struck from the amount of money owing, of course taking into consideration the assets of each man. They have a list of over 640 names and a meeting is held three time a year.

Mr. Phillips was born in Selkirk, Man. and opened in store in Rosetown on August 1st, 1915.

The use of tables divided into various sections for displaying various smallwares is an important feature of the C. H. Phillips Hardware, Rosetown, Sask. These sections will be noted herewith containing various lines of kitchenware. The furniture stock has been entirely removed to the second floor where better attention can be given furniture customers. Modern display cases, wall fixtures, etc., are noted throughout the store and some interesting plans adopted by this firm are outlined in the article herewith.

WESTERN CANADA NOTES

Lacombe, Alta.—Horncastle's Bazaar is a new store just opened at Lacombe, Alta.

ELECTRICAL APPLIANCE DEALERS ENTER PROTEST

Winnipeg.—Vendors of electrical appliances in Winnipeg are in arms against the civic electrical bylaw which, it has been asserted, has increased the cost of wiring nearly 30 per cent., and which, they charge, has interfered seriously with their business.

A committee from the electrical industries, with J. G. Smith as secretary, informed the civic public safety committee that twenty installations in September, 1920, averaged $19.40 each, and twenty in September, this year, averaged $45.33 each, and this in face of lower material costs of 20 to 25 per cent. The delegation said it had a list of persons who had definitely decided to purchase electrical apparatus, but who had not proceeded with the purchase because of the high cost of wiring. It was recognized that the bylaw was framed to minimize danger to life and property, but accidents resulting from installations under the old bylaw did not seem to justify the increased cost under the new one.

A suggestion was made that it should be possible to revise the bylaw so as to reduce this cost materially.

During discussion by members of the civic committee it was suggested some arrangements might be made whereby such installations might be paid for on the instalment plan as in the case of purchase of apparatus.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

PRICE developments of varying importance are again prominent on the current hardware markets. Changes involving a decline in quotations appear on poultry netting, screen wire cloth, soldering coppers, dull Canada plates, carpenters' braces, force cups, the steel disc wheel auto coaster waggons, Crown and Sturdy sprayers, Columbia "bell-ringer" batteries, and also the Every-ready line of "unit" cells for flashlights. Copper bull rings, and some lines of hat and coat hooks are quoted at reduced levels this week.

Other price revisions representing an upward trend appear on certain grades of automobile lubricating oils, fuel oil, lubricating greases, and paraffine wax. These changes are a direct reflection of the recent higher prices on crude, and the firm tone of the primary oil markets generally. Turpentine prices again show further advances, after fluctuating trends extending over many weeks.

Through a change in the differential between Queens' Head and the Fleur-de-Lis brands of galvanized sheets, quotations on the Queen's Head are lowered 25 cents per 100 lbs. Although there has been no revision in the list prices on the 30-gallon standard range boiler, yet price shading on this size has again developed in some quarters, through the combined influence of surplus stocks, and the anxiety to reduce them prior to the winter season.

Business continues to be fairly active, with conditions generally holding the recent degree of improvement. Several lines of German made cutlery have recently been offered on the Canadian markets. In some cases these have been accepted; but other dealers have declined to handle these foreign products, in spite of the lower prices.

MONTREAL MARKETS

MONTREAL, November 3.—Price changes of varying extent and importance have again developed on the current hardware markets this week. Among the revised quotations noted are, dull Canada plates; the Queen's Head brand of galvanized sheets; carpenters' braces, and force cups; all of which have registered lower price levels. On the other hand, advanced quotations are recorded on lubricating greases and paraffine wax, thes eproducts reflecting the recent higher tone of the primary oil markets.

The discount on spades, shovels and scoops has been revised to 55 per cent. off list, thus lowering these lines approximately 20 per cent. This was pointed out in the general market summary last week, and the revised discount was also shown on the current quotation pages. This change was followed by a decline in handle prices.

The reduction in sheets is attained through altering the differential between the Queen's Head, and Fleur-de-Lis brands. Although there has been no revision in the list quotations on the 30-gallon range boiler, yet price shading on this size can be obtained through some of the wholesale houses. An improvement in this condition is generally looked for as soon as surplus stocks of these products are reduced. Business continues to be fairly active; and although winter goods are still backward in many cases, yet current sales are stated as altogether satisfactory.

PARAFFINE WAX AND GREASES ADVANCE IN PRICE

Montreal

The marked advance in the quotations of crude oil is reflected on both paraffine wax and greases. Wax quotations show a price increase of one-half cent per pound, while greases are advanced approximately one cent on the various grades.

COPPER AND BRASS GOODS PRICES ARE MAINTAINED

Montreal

With copper on the primary markets reported much quieter this week, prices are remaining steady The recent increased demand and upward price trend seems to have spent itself, but producers seem satisfied and are awaiting the next buying movement. The improvement is also expected to continue, but will in all probability be gradual. Brass is in a satisfactory position, but buying in this metal is also light. The finished products, namely sheets, rods and tubing, are unchanged in price this week, apparently awaiting the next move of metals in the primary stage. Following are present quotations:

	Base.
BRASS—	
Sheets, base	0 25
Rods, base ½ to 1 in., round	0 23
Tubing, seamless, base	0 32
F. o. b. Montreal.	
COPPER—	
Rods, ½ to 2 in.	0 30
Soft sheets, plain, 16 oz. and heavier lb.	0 32
Plain tinned, 16 oz. and heavier, lb.	0 38
Polished and tinned, 16 oz. and heavier, lb.	0 43
Tubing, lb.	0 34
Above prices are full sheets and bars. Cut sheets and bars are 5c per lb. higher.	

LUBRICATING OILS STILL HOLD IN PRICE

Montreal

Although crude oil has shown the necessary advance for a corresponding increase in the prices of lubricating oils, these are so far remaining unchanged. Coal oil and gasoline were both advanced in price two weeks ago, and these are followed by higher quotations on wax and greases this week. Dealers state that advanced prices on all lubricating oils at any time would not be surprising, as the market continues very firm.

IRON AND STEEL PRICES ARE MAINTAINED

Montreal

While the tendency of iron and steel bars is not to the extent of firmness that is shown in the sheet market, quotations on the various lines remain firm. No actual price change is yet in sight. Following are present prices:

Common bar iron, 100 lbs.	3 00	3 25
Refined iron		4 90
Irish finish machinery steel		3 45
Mild steel	3 00	3 40
Single reeled machinery steel	5 00	5 25
Band steel	3 00	3 40
Spring steel		6 00
Sleighshoe steel	3 00	3 40
Tire steel	3 00	3 60
Toe calk steel	4 00	4 30
Harrow tooth steel. per lb.		3 55
Mining tool steel per lb.		0 22
Black Diamond tool and cast steel, per lb.		0 22

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

Flats, iron and steel, 3-16 and thinner, 50c per 100 lbs. extra.

CANADA PLATE PRICES ARE REDUCED

Current quotations on dull Canada plates are reduced 20 cents on each of the different quantity boxes.

Queen's Head galvanized sheets also have lower prices through a change in the differential, and these are now quoted 25 cents per 100 pounds less on all gauges.

These two price changes, however, do not denote the trend of the sheet market in general, and the firmer tone prevailing in recent weeks still continues. There is a temporary shortage locally of the lighter gauges of galvanized iron, but stocks will in all probability be replenished in the near future. Stocks among the jobbing houses have been comparatively light during the summer months, and the increased business of the past few weeks caused supplies to become depleted in different quarters. Orders for replenishment are expected within the next week or so before any shortage is felt.

BLACK SHEETS

10 gauge	4 30 to 4 65
12 gauge	4 40 4 75
14 gauge	4 50 4 85

GASOLINE AND COAL OIL PRICES HOLD

Montreal

Current quotations on both gasoline and coal oil are holding unchanged for the present, although it is stated in some quarters that a further revision in the near future is looked for. Prevailing prices on gasoline are 32½ and 35½ cents for the two grades, and coal oil is selling for 21 cents.

IMPROVEMENT IN SCRAP IS GRADUAL

Montreal.

The better feeling in the market for waste materials still prevails, but the development into actual sales is only progressing very slowly. Business is on a more active scale than during the quiet summer months, but dealers were hoping for a much more active period than is now showing. However, with open weather continuing during the present month, it is felt that much business will still be done before winter sets in. Prices on the various lines hold unchanged, although dealers state that quotations on some lines of iron and steel scrap are at present very low, and a revision to higher levels may be made in the very near future. Much depends, however, on the general conditions in the steel industry, in this regard. Following are nominal local quotations:

Automobile tires	0 75
Rubber shoes	0 02½
Yellow brass	0 05
Red brass	0 08½
Light brass	0 04
Scrap zinc	0 03½
Lead, heavy	0 04
Lead, tea	0 02½
Light copper	0 07¾
Heavy copper	0 10½
Wrought iron, R. Rd., No. 1 per gr. ton	10 50
Malleable scrap (ton)	10 50
Pipe scrap (ton)	7 00
Heavy melting steel	7 50 8 00
No. 2 busheling,	4 00
Boiler plate	8 00
No. 1 machinery cast	20 00

RANGE BOILERS STILL SELLING FOR $8.75

Montreal

Although the new list of prices on range boilers calls for the 30 gallon boiler to sell at $9.25, the quotation of $8.75 can still be found at a few jobbing houses. Anxiety on the part of these wholesalers to rid themselves of any surplus stock with the approach of the quieter months is responsible for the lower prices on the standard sized boiler. While this condition exists at present, manufacturers do not anticipate an unsettled market for any length of time, and as soon as these supplies run low, prices will be generally maintained. The buying movement is holding fairly well, jobbers reporting sales, while small, are quite satisfactory. Following are prices on the various sizes:

RANGE BOILERS—	Standard.	Ex.Heavy
30 gallon	9 25	11 75
52 gallon	21 00	26 00
35 gallon	12 00	14 50
40 gallon	14 50	17 00
52 gallon	21 00	26 00
66 gallon	30 00	36 00
82 gallon	37 50	50 00
100 gallon	48 00	58 00

WIRE NAILS SELL AT $4.25 BASE

Montreal.

No further change has been made in the price of wire nails since the revision to $4.25 base made in September. The buying movement is being fairly well maintained considering the season of the year, a fair amount of building construction under way before colder weather commences. Cut nails also show no change, the base price remaining at $4.85.

POULTRY NETTING AND WIRE CLOTH HAVE NEW PRICES

Montreal.

Revised prices on poultry netting, and also on screen wire cloth, are announced just as the current issue of Hardware & Metal is ready for the press. The quotations on poultry netting for spring booking show a discount of 15 per cent, off list: while the new price on screen wire cloth is $3.0 per 100 sq. ft.

FAIR AMOUNT OF BUSINESS IN CORRUGATED SHEETS

Montreal.

The sales in corrugated sheets have been reported as very irregular all season, and this is apparently continuing; for while last week a falling off in buying was noticeable, business is said to be again fairly active for the season of the year. The season is advancing, but with open weather continuing, jobbers are hopeful of a fair amount of activity during the whole of the month. There is little or no change in the market tendency of these sheets, and while flat sheets continue on their present standing, corrugated will remain with a showing of firmness List prices and discounts are as follows:

Corrugated.—

No. 28 gauge	7 00
No. 26 gauge	7 50
No. 24 gauge	10 50
No. 22 gauge	12 50
No. 20 gauge	14 00
No. 18 gauge	18 50

Less 7 ½ per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

SPADES, SHOVELS & SCOOPS NOW COST LESS

Montreal

Following the trend of harvest tools, a reduction of approximately 20 per cent. is made on shovels, spades and scoops, through increasing the discount to 55 per cent of list prices, former discount being 45 per cent. off.

SHOVEL HANDLES AT LOWER PRICE

Montreal.

Accompanying the lower prices on spades, shovels and scoops, are new lower prices announced on the handles for these. The new quotation is $5.75 per dozen, former price being $6.75.

NO CHANGE IN WROUGHT PIPE

Montreal.

Wrought iron and steel pipe continues to sell under list No. 53, with no indication of a price revision in either direction at present. The recent firmer tone in other steel products has failed to have any effect on piping as far as price tendencies are concerned. List No. 53 will be found on current market pages.

FURTHER REVISION IN PRICES OF CARPENTERS' BRACES

Montreal.

Following the reduction in quotations of carpenters' braces, announced in last week's issue, a further revision on many lines has again appeared of approximately 10 per cent. Stanley rules also show a corresponding price decline.

TORONTO MARKETS

TORONTO, Nov. 3.—Another lengthy budget of price developments has been recorded on the current hardware markets. Changes representing a decline in quotations appear on poultry netting; screen wire cloth; soldering coppers; the steel disc wheel auto coaster waggon; Crown sprayers; Columbia bell-ringer batteries; Sturdy sprayers; and the Ever-ready unit cells for flashlights. Through a change in the differential between different brands of galvanized sheets, the quotation on the Queen's Head are slightly lower.

Other prices revisions involving an upward trend to the market prices affect such products as, grindstones; Polarine motor oils; and fuel oil. The oil markets are generally firmer, and these changes are a direct reflection of the recent higher prices on crude.

There has been some reported shading in price on the 30-gallon standard range boiler, but this situation is chiefly attributed to the desire in certain quarters to reduce stocks prior to the winter season. Quotations on copper and brass goods, such as tubing, rods, and sheets, are still marking time at the lower levels recently announced. Bar iron and steel prices are holding unchanged, with a firm undertone to these markets, but with a slight recession in the volume of active demand. The slightly better tone in boiler tubes, is described as not meeting expectations for this season of the year.

LEAD & ZINC PRODUCTS REMAIN FIRM

Montreal

Prices on lead and zinc products remain on a steady to firm basis following the trend of metals, chief in their manufacture, on the primary markets. This week there is very little change recorded in these metals either in price or market tendency. They have improved in recent weeks bringing the finished products to a firmer standing. Solders are said to be firmer than other products at present, with a change in prices thought likely at any time. Buying continues on a fair scale, but only in smaller orders. Following are existing prices:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3* lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½

Cut sheets ¼c lb. extra, and cut sheets to size, ¾c lb. extra.

Solder, guaranteed, lb.	0 25½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 20½
Do., wiping, lb.	0 21½
Do., wire, lb.	0 35
Zinc sheets, casks	0 11½
Do., broken lots	0 12

LOWER PRICES ON FORCE CUPS

Montreal.

A reduction is announced on both the Simplex and the Handy Andy force cups, and following are new quotations:

FORCE CUPS—	Simplex.	Handy Andy.
No. 1, dozen	5 20	4 20
No. 2, dozen	6 35	5 20

FITTING DISCOUNTS HOLD UNCHANGED

Montreal

Cast iron and malleable pipe fittings have seemingly settled on a steady market, with no marked change recorded in discounts for a few weeks past. Buying in the various lines continues more or less irregular, but fairly satisfactory. Present net prices and discounts are as follows:

FITTINGS—	Per Cent.
Cast iron fittings	25
Bushings, cast	27½
Do., malleable	25
Flanges	37½
Plugs	27½
Flange unions	22½
Malleable unions	42½
Dart unions, black	29
Do., galvanized	8
Nipples, ⅛ to 4 in., close and short	50
Do., long	60
Do., 4½ to 8 in., close and short	40
Do., long	50
Couplings, 4 in. and under	30
Do., 4 in. and longer	10

POUND GOODS—	Blk.	Galv.
Class A	0 53	0 65
Class B	0 21½	0 28¼
Class C	0 14	0 21½

INGOTS REMAIN UNCHANGED ON STEADY BASIS

There is no special feature attached to the ingot metal markets this week, with prices generally showing little change. Business continues in fair volume but is quieter than is general for October. Locally there will probably be a little further activity this month in view of the approaching close of navigation.

SPRING BOOKING PRICES ON SCREEN WIRE CLOTH

Toronto.

New lower prices for Spring booking now appear on screen wire cloth. The downward revision in this respect now brings quotations on this product to a base of $3.00 per square feet.

POULTRY NETTING QUOTATIONS NOW UNDER REVISION

Toronto.

Reduced quotations are reported as imminent on poultry netting. The extent of this contemplated decline had not been definitely decided upon at the time of going to press, but it is expected to vary 10 to 20 per cent The actual new quotations for spring booking are likely to appear in the next issue of Hardware & Metal. It is reported, however, that this change will lower prices on poultry netting to list, less 10 per cent. There are intimations that the downward revision may be even more drastic, and as much as 12½ per cent. may be quoted, but as stated above, the final decision in this connection is not yet to hand.

GERMAN CUTLERY LINES APPEAR IN CANADA

Toronto.

A number of lines of German made cutlery have recently been offered on the Canadian markets. In some cases these have been accepted, while other dealers have declined to handle this class of foreign made product. One of the chief features regarding the appearance of German manufactured articles of this description is their comparatively low prices.

OIL STOVES BEING SOLD BY WAR DISPOSAL BOARDS

Toronto

It has been pointed out that some substantial quantities of oil stoves and heaters have recently appeared on the Canadian markets, which are surplus stocks being sold through brokers and others by Government War Material Disposal Boards. Huge accumulations of various hardware commodities are gradually being offered through British and French Government sources to world markets, including Canada and the United States. In many cases, also, these materials are generally offered at much lower quotations than the current market prices. Oil stoves are stated as being among the articles disposed in this manner, and the vanguard of this influx has already been experienced on the domestic markets.

SURPLUS WAR STOCKS OF SHOVELS AFFECT PRICES

Toronto.

Referring to the new lower quotations on spades, shovels, and scoops, it is stated that Canadian manufacturers of these products have been practically forced to reduce their prices, owing to foreign competition, coupled with the appearance on the market of surplus was stocks. In this respect, it is noticeable that the recent change—which was ennumerated in last week's issue of Hardware & Metal—constituted the second downward revision in prices on the domestic markets during the last three months. Furthermore, in each case the altered quotations registered substantial declines, the last drop amounting to almost 20 per cent. It has been pointed out that only strong influences of the nature described above would cause such repeatedly severe price cuts on these otherwise stable hardware products.

"BELL-RINGER" BATTERIES REDUCED IN PRICE

Toronto.

Some styles of batteries are shown with reduced quotations this week, among them being the Columbia "Bell-Ringer" This line is now priced at 90 cents each, compared with the previous level of 98 cents.

REVISED DIFFERENTIAL ON GALVANIZED SHEETS

Toronto.

Through a change in the differential between Queen's Head and the Fleur-de-Lis brands of galvanized sheets, the Queen's Head are now quoted 25 cents per 100 lbs. lower on all gauges.

REDUCED BASE PRICE ON SOLDERING COPPERS

Toronto.

A substantial decline is now announced in the base price on soldering coppers. The new quotation is 35 cents per lb.

DISCOUNTS ON CANADA LINE OF FILES

Toronto.

The discounts on the Canada line of files, including the Globe, Kearney & Foot, and other makes of equal quality are quoted at 60 and 5 per cent.

GRINDSTONE PRICES ALSO SHOW REVISION

Toronto.

New prices appear on practically all the different sized faces and weights of grindstones, and the revised levels are slightly higher. The new quotations follow:

GRINDSTONES—	Per Cwt.
Under 40 lbs. weight—	
Smaller than 2-inch face	5 25
Two inch and over	4 50
40 to 80 lbs. weight.	
Under 2 inch	4 75
2 inch and over	4 25

REVISED QUOTATIONS ON SOME AUTO COASTERS

Toronto

Revised quotations are now anounced on the Auto coaster wagons with the steel disc wheels, the new prices effective of these products being as follows:

AUTO COASTER WAGONS—	
No. 10, each	5 70
No. 20, each	6 35
No. 30, each	7 00

FURTHER ADVANCES IN FUEL OIL PRICES

Toronto.

The continued strength of the oil markets generally, coupled with a further advance in the price of Pennsylvania crude oil, has resulted in a further advance in quotations on fuel oil. The increase, this time, however, is comparatively slight, amounting to three-fifths of one cent per gallon. Prices now prevailing, are therefore, as follows:

FUEL OIL—	
Per barrel, net	$0 11.60
Tank wagons, net	9.10.60
Tank cars, net	0.09.60

POLARINE QUOTATIONS SHOW TEN CENT INCREASE

Toronto.

Polarine motor oils have now been increased ten cents per gallon on all grades, with the exception of Polarine transmission oil, which only registers a 5 cent advance. The higher prices are generally attributed to the continued strength of the oil markets combined with recent price gains on primary centres. The revised quotations on Polarine follow:

POLARINE—	
Per gallon, list	1 15
Medium grade, list	1 15
Heavy grade, list	1 15
Ex-Heavy, list	1 50
Less 25 per cent.	

NEW LOWER QUOTATION ON CROWN SPRAYERS

Toronto.

A reduction of 50 cents per dozen is announced on the Crown line of sprayers. The new quotation is $7.50 per dozen.

STURDY POTATO SPRAYERS ALSO QUOTED LOWER

Toronto.

The Sturdy line of potato sprayers is now quoted at $5.50 per dozen; which level is a fifty-cent reduction from the previous price of $6.00.

EVEREADY UNIT CELLS ALSO COST LESS

Toronto.

The Unit Cell battery, which is the latest Eveready idea for refilling flashlights and electric pocket torches, has also been slightly reduced in price. The revised quotation is 20 cents each net.

REPORTED SHADING IN RANGE BOILER PRICES

Toronto.

Current business in range boilers is now of a spasmodic nature, with sales generally light It has been reported that some dealers with fairly heavy stocks on hand of the 30-gallon size, have been quoting easier levels as a leverage in order to reduce their holdings prior to the winter season. How far this situation has developed, is difficult to ascertain, but in local circles the standard list price of $9.25 is generally being maintained. Following are the prevailing quotations:

RANGE BOILERS—	Standard	Ex. Heavy
30 gallon	$ 9 25	$ 11 75
35 gallon	12 00	14 50
40 gallon	14 50	17 00
52 gallon	21 00	26 00
66 gallon	30 00	36 00
82 gallon	37 50	50 00
100 gallon	48 00	58 00
120 gallon	57 00	67 00
144 gallon		76 00

PRICES OF COPPER GOODS STILL MARKING TIME

Toronto.

With the quotations governing copper on the primary markets now holding at a steady level, the current prices on copper and brass goods likewise continue to mark time. The easier quotations recently recorded on copper and brass rods, sheets and tubing, remain unchanged, with prevailing trade in these markets reported to be registering signs of slight improvement in general business conditions The average prices generally in effect, follow:

BRASS—	
Sheets, base, per lb.	$ 0 22
Rods, base, per lb.	0 20
Tubing, base, per lb.	0 25
COPPER—	
Rods, base per lb.	0 26
Soft sheets, plain, 16 oz. and heavier, lb	0 28
Do., plain tinned 16 oz. and heavier, lb	0 35
Do., polished and tinned 16 oz. and heavier, lb.	0 40
Tubing	0 27

DECLINE IN PRICES ON COKE TIN PLATES

Toronto.

Reduced quotations are now given on coke tin plates, the extent of the decline being approximately 5 per cent. This change brings prices on these products to the following levels:

PLATES, CANADA—	Per box
Dull 60 sheets	$5 65
Ordinary, 52 sheets	5 60
PLATES, COKE TIN—	
I.C., 20 x 28, 112 sheets	16 00
IX, 20 x 28, 112 sheets	19 00
1X, 20 x 28, 56 sheets	12 00
PLATES, CHARCOAL TIN—	
1X, 20 x 28, 56 sheets	14 00
1XX, 20 x 28, 56 sheets	16 00
PLATES, TERNE—	
1C, 14 x 20, 112 sheets	12 00

BAR IRON & STEEL PRICES HOLDING UNCHANGED

Toronto.

There appears to be a lull in steel buying generally; the apathetic attitude of consumers arising from the fact that recent reports of advances in the prices on various steel products, such as bars and sheet bars, haven't resulted in stimulating sales to any great degree. On the other hand, shapes and bars continue to show weakness on the primary markets when faced with the presence of desirable tonnage. The local markets are reported as fairly firm, with quotations generally unchanged at the following levels:

IRON and STEEL—		
Mild Steel bars, base	3 25	3 50
Mild steel bands, 3-16 in. base	3 75	4 00
Bar iron, base	3 25	3 50
Angle iron, base	3 35	3 60
Horseshoe iron		4 10
Tire steel	4 70	5 95
Spring steel	9 50	.11 5[illegible]
Crucible cast sheet steel	30 00	.35 00
Mining drill steel		18 50
Cast tool steel, high grade	20 00	23 00
Cast tool steel, medium	20 00	23 00
Sleigh shoe steel	4 10	4 50
Hoop steel	4 50	4 75
Toe caulk iron	5 40	6 40
Norway iron		15 00

LEAD AND ZINC GOODS HOLDING THEIR OWN

Toronto.

Conditions in the lead and zinc markets remain generally unchanged, and these products are described as just "holding their own." Prices have remained steady for some weeks, and this is attributed to the fact that stocks have been thoroughly liquidated, and quotations are considered as being down to rock-bottom. The position and developments on the primary material markets re-act, from time to time, in lead and zinc products. Following are the prevailing quotations on these goods:

LEAD AND ZINC GOODS—	
Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subjected to a discount of	10%
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft. in rolls, lb.	09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 29
Do., strictly, lb.	0 22
Do., commercial, lb.	0 20
Do., guaranteed, lb.	0 24
Do., wiping, lb.	0 20
Zinc sheets, per lb.	0 13

SLIGHTLY BETTER TONE IN TUBE MARKETS

Toronto.

Quotations on boiler tubes remain nominally unaltered, with the average range of prices generally being maintained to care for current business. The weakness in this market has now subsided to some extent, and although there

is no marked revision in demand for this class of tubular products, yet the recent improvement throughout the steel industry generally is reflected in the better undertone in tubes. Production of semi-finished steel products has recently increased, together with a better demand. This recovery has not been featured to any extent in the boiler tube markets, but a gradual expansion of inquiry is now looked for with the approach of the winter season. Following are the local prices on tubes generally prevailing:

BOILER TUBES—

	Seamless.	Lapweld.
1 inch	26 00	.....
1¼ inch	27 25	.....
1½ inch	26 25	.....
1¾ inch	29 75	25 00
2 inch	28 00	22 00
2¼ inch	32 00	25 00
2½ inch	40 00	27 00
3 inch	44 00	35 00
3½ inch	60 00	40 00
4 inch	75 00	50 25

TONE IN CORRUGATED SHOWS IMPROVEMENT

Toronto

While the average demand for corrugated sheets does not contain any development of a marked nature, yet the undertone has recently improved owing to the firmer basis on primary sheet circles. With the slight price advance on plain galvanized sheets, and a general improvement all through the steel industry—both as regards the percentage of production, and the volume of inquiry—quotations on corrugated sheets are now more firmly held. No further revisions have been recorded, and although the seasonal demand is drawing to a close, the tendency towards easier prices on corrugated is not so pronounced, in spite of the quieter period in this class of trade now approaching. Following are the unchanged quotations:

Corrugated—	
No. 28 gauge	$7 00
No. 26 gauge	7 50
No. 24 gauge	10 50
No. 22 gauge	12 50
No. 20 gauge	14 00
No. 18 gauge	18 50

Less 7½ per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

SCRAP MATERIALS SHOW SIGNS OF RECOVERY

Toronto

Scrap metals have been in fair movement. Some dealers increased their prices considerably recently on copper and composition scrap, purchasing on a purely speculative basis, but this faction has now retired from the market. White metals are quiet. Lead has been in movement; but type metals are dull.

Iron and steel scrap grades have taken on a little brighter appearance during the past couple of weeks, but prices have remained unaltered.

The scrap rubber market is still in the same position as it has been for some months.

The following averages of dealers' buying prices for large quantities, f.o.b. Toronto, are more or less nominal:

WASTE MATERIALS—

Scrap Iron

Gross Tons—		
Heavy melting steel (Hamilton)	9 50	10 00
Borings and turnings	2 50	3 50
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	5 50	6 00
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	15 00	16 00
Stove plate	11 00	12 00
Grate bars	10 00	11 00
Standard car wheels	13 50	14 00

Scrap Metals.

Heavy copper and wire	9 25	10 00
Light copper	7 50	8 00
No. 1 composition	8 00	8 50
No. 1 comp. turnings	6 00	6 50
Light brass	3 00	3 50
Heavy yellow brass	5 00	6 00
Heavy lead	3 75	4 00
Tea lead	2 00	2 50
Scrap zinc	3 50	4 00

Scrap Rubber

Boots and Shoes	2 00	2 50
Lumbermen's Rubber boots	1 25	1 75
Auto tires	0 50	1 00
Solid tires	0 75	1 25

INGOT METAL MARKETS HOLDING UNCHANGED

Toronto.

While prevailing quotations on the various metals in the primary ingot markets show repeated signs of fluctuation, yet these current changes are not generally considered of sufficient importance by prominent domestic distributors of metals, to cause them to make any marked revision, as yet, in prices quoted on the local markets.

LONDON MARKETS

LONDON, November 2,—Price changes on the current hardware markets are not numerous this week, but the revisions that have come to hand include increased discounts on spades, shovels and scoops, thus bringing these quotations to a lower level. Other price revisions cover one line of hat and coat hooks, and also copper bull rings.

Turpentine again attracts marked attention, two advances having been recorded during the past few days. The initial increase of 2 cents per gallon, was followed by another rise of 5 cents, making quotations in all seven cents higher than formerly.

Collections continue good. Business in this district is reported as brisk; and merchants generally are anticipating a further degree of improvement with the arrival of cooler weather.

TURPENTINE REGISTERS TWO PRICE ADVANCES

London, Ont.

Turpentine quotations have registered two advances during the past few days. The initial increase recorded was to the extent of two cents per gallon, which was followed by another rise of 5 cents, thus making a total advance of 7 cents. The prevailing prices reflect this higher level, but some fluctuations are looked for in the near future, which may cause a slight recession from these new figures. The revisions follow:

TURPENTINE—	Imp. Gal.
1 barrel lots	1 22
2 and 4 barrel lots	1 21
5 gallon lots	1 37

NO LARGE PURCHASES OF LINSEED OIL

London, Ont.

There is very little evidence of quantity buying in linseed oil at present, and there is a lack of interest shown by the large consumers except as regards current requirements. Prices still remain at the new lower levels announced last week, which are inserted below.

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrels, per Imp. gal.	0 87	0 90
3 to 5 bbls., per Imp. gal.	0 86	0 89
6 to 9 barrels., per Imp. gal.	0 84	0 87

Less barrels add 15 cents gallon.

NEW DISCOUNT ON SPADES SHOVELS AND SCOOPS

London, Ont.

A reduction of almost 20 per cent has now been made in the quotations on shovels, spades and scoops. The new discount is 5 per cent., compared with the previous figure of 45 per cent. The last change in prices on these products occurred during the summer months, when a similar alteration of 10 points was made in the discount list.

The following are the new net prices on some of the good selling lines, figured at 55 per cent. off list:

SPADES AND SHOVELS—

Black Cat or Star, doz.	$11 80
Fox or Olds, doz.	12 25
Bull Dog or Jones, dozen	14 05

These prices are for polished. The black finish are one dollar per dozen less.

SCOOP SHOVELS—

	Black Cat.	Moose.
No. 2, dozen	14 40	15 53
No. 4, dozen	15 10	16 23
No. 6, dozen	15 80	16 93
No. 8, dozen	16 50	17 63
No. 10, dozen	17 20	18 33

HAT AND COAT HOOKS HAVE REDUCED QUOTATIONS

London, Ont.

Some lines of hat and coat hooks have been reduced in price this week. The revised quotations on these products follow:

HAT AND COAT HOOKS—

No. 102, A C or D B finish, dozen	0 85
No. 103, " " "	1 00
No. 104, " " " "	1 15

FURTHER REDUCTIONS ON COPPER BULL RINGS

London, Ont.

New lower quotations are now in effect on copper bull rings. The revised prices announced this week are as follows:

COPPER BUL LRINGS—

No. 22½ x 2½, plain, dozen	$3 75
No. 72½ x 2½ self-piercing, dozen	4 25
No. 52½ x 2½, heavy self-piercing, doz.	5 50
No. 203½ x 3½, Giant, doz.	18 50

GOOD SALE FOR PUTTY

London, Ont.

There is reported to be an excellent demand for putty at the present season of the year, with prices holding unchanged since the revisions which took place during September. Following are the current quotations;

PUTTY—

Standards, 100-lb. drums, per 100 lbs.	6 30
Standard, 25 lbs., per 100 lbs.	6 55
Pure, 100 lb. drums, per 100 lbs.	7 80
Do., 25 lb drums, per 100 lbs.	8 05

SKATES AND HOCKEY STICKS NOW GO FORWARD

London, Ont.

A fair proportion of booked orders for ice skates and hockey sticks are now going forward. These shipments are not in large quantities, but the orders are numerous. Following are current quotations:

SKATES—(Starr makes) quoted at list less 30%

HOCKEY STICKS—

Special seconds, doz.	3 25
Dominion Special, dozen	4 10
Hespler Special, dozen	6 00
Spalding, No. 0, dozen	8 75
Munro Professional, dozen	9 50
Munro Hand Made, dozen	13 50

IMPROVED DEMAND FOR AUTO TIRE CHAINS

London, Ont.

Dealers now report that there is an improved remand for automobile tire chains. Quotations on these products remain unchanged at the following levels:

Weed and Rid-O-Skid list less 25 per cent.

In lots of 1 dozen pair in one shipment list less 33 1-3 per cent.

HAND SLEIGH ORDERS NOW GOING FORWARD

London, Ont.

Booked orders for hand sleighs are now going forward, in anticipation of the annual seasonal trade in these lines. Prices remain at list, less 35 per cent.

WHITE LEAD IN OIL SALES ARE NOW MODERATE

The mild weather has recently assisted in the current sales of white lead in oil. At present, however, sales are usually in small quantities only. Following are the unchanged quotations:

WHITE LEAD IN OIL—

	Tons.	Less Tons.
Pure, Per 100 lbs.	13 30	13 65
Elephant, per 100 lbs.	13 80	14 15

WINNIPEG MARKETS

WINNIPEG, November 2,—Price changes this week are not so numerous, but comprise both increases and declines. The principal downward revisions are harvest tools, boat and bridge spikes, jack chain and Gem hat and coat hooks. Reduced prices are also recorded on wagon and carriage hardware.

English cutlery is costing 20 per cent. more. Iron and steel markets are very firm. Wrought iron pipe also remains unchanged. On the whole prices are beginning to steady and it is thought that fewer reductions will be made during the next month.

DECLINE IS ANNOUNCED ON HARVEST TOOLS

Winnipeg.

A reduction of 10 per cent. has been made in the prices on harvest tools this week. The discount quoted now is 60 per cent. off list prices.

REVISED PRICES ON BOAT AND BRIDGE SPIKES

Winnipeg

New prices are given on boat and bridge spikes this week. Following are the revised quotations:

BOAT AND BRIDGE SPIKES—

¼ x 4 inch, per 100 lbs.	9 30
¼ x 6 inch, per 100 lbs.	9 00
5-16 x 5 and 6 inches, 100 lbs.	8 55
⅜ x 6, 7 and 8 inch, 100 lbs.	7 75
½ x 8, 9, 10 and 12 inch, 100 lbs.	7 50
⅝ x 10 and 12 inch, 100 lbs.	7 50
¾ x 14 inch, 100 lbs.	7 50

FIRMER UNDERTONE IN SHEET MARKETS

Winnipeg

The undertone of the market on sheets continues very firm, but prices locally remain unchanged. It is expected however, that a change to higher prices will possibly be made in the near future, as higher prices are announced at the mills. Stocks are low at the present time, and importers do not anticipate making any change in their prices until further stocks are received.

The prices now in effect are as follows:

SHEETS—

	Black.	Galvanized.
	Per 100 lbs.	
10 gauge	5 70	....
12 gauge	5 70	....
14 gauge	5 80	....
16 gauge	5 90	6 75
18 gauge	6 30	6 90
20 gauge	6 30	6 90
22 gauge	6 35	7 05
24 gauge	6 35	7 20
26 gauge	6 40	7 50
28 gauge	....	7 80
10¾ oz.	....	8 20

LOWER PRICES APPEAR ON JACK CHAIN

Winnipeg.

New lower prices are recorded this week on Jack Chain. Following are the new quotations:

IRON JACK CHAIN—

	Single.	Double.
7	1 10	1 40
8	0 95	1 15
9	0 90	1 05
10	0 80	0 95
12	0 65	0 72
14	0 55	0 60
16	0 48	0 53
18	0 40	0 48
20	0 20	....

BRASS JACK CHAIN—

	Single.	Double.
10	3 50	4 75
12	2 30	3 20
14	1 60	2 05
16	1 00	1 32
18	0 70	0 90
20	0 55	0 72
22	0 55	0 72
24	0 55	0 72

PERFORATED ZINC COSTS ADVANCE ONE CENT

Winnipeg.

An advance of one cent per pound is made in the price of perforated zinc this week. Sizes 1/16 in. and larger are now quoted at 28 cents per pound.

WROUGHT PIPING HOLDS

Winnipeg.

The movement of wrought iron pipe is still slow although prices have declined considerably since the first of the year. No further change is anticipated however for some time. The present prices are as follows:

WROUGHT PIPE

	Black.	Galvanized.
	Per 100 feet.	
⅛ inch	6 25	8 50
¼ inch	4 96	7 48
⅜ inch	5 10	7 63
½ inch	6 56	8 50
¾ inch	7 90	10 10
1 inch	11 27	14 53
1¼ inch	15 25	19 67
1½ inch	18 25	23 50
2 inch	24 55	31 65
2½ inch	38 80	50 00
3 inch	50 80	65 45
3½ inch	65 50	83 20
4 inch	77 60	98 50
4½ inch	88 85	113 20
5 inch	103 60	132 00
6 inch	104 40	171 25

ADVANCE IN PRICES OF ENGLISH CUTLERY

Winnipeg.

Pocket knives and several other lines of English cutlery are higher priced this week, and the extent of this advance is approximately 2 per cent.

"GEM" HAT AND COAT HOOKS NOW COST LESS

Winnipeg.

New lower prices are quoted this week on hat and coat hooks.

The revised quotations are as follows:

COAT AND HAT HOOKS—

	Per Gross.		
	Coppered.	Brassed.	Japanned.
2½ in.	1 15	1 60	1 30
3 inch	1 30	1 70	1 40
3½ inch	1 60	2 00	1 70

Pittsburg Markets

PITTSBURGH, November 3rd.—On the whole, demand upon the steel mills has tapered off a trifle in the past week. There is no important decrease in buying but the change is noteworthy in that the continued improvement for three months has ended, though perhaps only for a very short time. The change does not necessitate a decrease in steel production, for while the appearance has been for months past that all the buying was for prompt shipment, the fact is that some of the mills have accumulated a little volume of business for the remainder of the year.

Indeed, the mills as a whole appear to be operating at a slightly better average rate than two or three weeks ago, despite the fact of the market being a trifle less active. The rate of steel ingot production seems to be close to 40 per cent., with the Steel Corporation operating at that rate or a trifle more, and the independents at somewhat below 40 per cent. Production of steel ingots in October was probably at about 35 per cent., against about 32 per cent for September, while at the low point last July production dipped just below a 20 per cent. rate.

Demand by Products

While the steel markets as a whole show slightly lessened activity, demand upon the pipe mills has continued to increase, particularly in standard pipe and oil country goods. In the latter, the increase will hardly be held as winter would naturally bring lighter demand. At long range view demand for structural shapes has been increasing, though it is still light relative to capac-

Paint Saves More Than It Costs

Principle Underlying the "Save the Surface and You Save All" Campaign—Original Conception of the Use of Paint to Make Things Look Pretty Now Being Replaced Through Spread of Correct Knowledge as to Paint Being An Agency for Preservation

"WHAT is Paint?" some interesting features regarding the development of paint. and the growth of the industry were pointed out in a recent address by Geo. B. Heckle, Secretary of the American Paint Manufacturers Association, at the exposition of Chemical Industries, held in New York City.

"The paint manufacturing industry was started many years ago, but up until three years ago, the average citizen believed, when he thought about it at all, that things are painted to make them look pretty," said Mr. Heckle.

Paint—A Sanitary Agency

"The erroneous conception of the purpose of painting has now, been corrected in the minds of a large and constantly increasing number of people. It is true that paint is a beautifier as well as a sanitary agency; but first and foremost it is an agency of conservation—"Save the Surface and You Save All"—and it is this fact, that it saves more money than it costs, that is the true and proper incentive for its large and constantly increasing use," said the speaker.

Now what is this commodity that beautifies while it protects—that conserves invested wealth out of all proportion to its actual cost?

"Any paint manufacturer and especially any paint technologist will realize that answer to the question, "What is paint?" is neither simple nor easy—ot somewhat resembles the question, "what is food?"

"The "Paint Catechism" answers the question as follows: "Any liquid or semi-liquid substance applied to any metalic, wooden, or other surface to protect it from corrosion or decay; or to give color or gloss, or all of these qualities to it." Thus far the definition is quoted from "Rustless Coating." It continues as follows: "More properly speaking, paint is a mixture of opaque or semi-opaque substance (pigments) with liquids, capable of application to surfaces by means of a brush or a spraying machine or by dipping, and of forming an adherent coating thereon."

Paint Coatings Preserve

"The definition of Webster's Dictionary is as follows: "A preparation of a pigment or coloring substance made by mixing with some suitable vehicle, as oil, water or varnish, and forming, when applied to a surface, an adhesive coating; also, the pigment or solid coloring matter alone, or a cake of it; as, a box of paints. Paints are prepared variously, often containing driers, as japans and thinners, as turpentine. Paints differ from dyes and stains is not being solutions, and in forming surfaces coatings which are commonly used to preserve as well as to color. Paint in which oil, especially linseed oil, is the vehicle is called oil paint. Such a paint usually differs from a varnish in that it dries by oxidization and so increases in bulk, while a varnish usually dries by evaporation and diminishes in bulk."

60% Paint Used On Buildings

"While no accurate figures are available it is probable that about 60% of the annual paint consumption is on buildings and other structures, and the remaining 40% on equipment, manufactured products, etc.

"One of the recent advertisements of the "Save the Surface" Campaign consisted of a list of over 1000 articles, structures, materials, on which paint is used. In this list, materials so widely different as wood, steel, concrete, appeared. It is obvious to the most casual thought that no simple definition could adequately describe a material intended for preservation or decoration of substances so diverse in chemical and physical qualities. Add to this patent fact the further consideration that the conditions of service are as diverse as the materials to be protected, and we realize that any adequate answer to the question "What is Paint?" involves technical knowledge of a wide and varied range. Advancing civilization imposes upon us needs that become more and more vaired and complicated.

"Up to the middle of the last century, paint was used largely as a decorative adjunct, the protection afforded being incidental. Up to that time also, the manufacture of paint was based on well-established traditional routine. Practically the only white pigment available was basic carbonate white lead. Practical the only available oil vehicle was linseed oil. Zinc oxide, lithopone, basic sulphate white lead, titanium oxide, China wood oil, soya bean oil, perilla oil, slumbered with the coal tar colors, in the womb of time.

Early Stages of Industry

"In such a stage of advancement, it is not surprising to learn that the painter ground his own lead and colors and that simple mixture of white lead and linseed oil supplemented by a few natural colors and lamp black satisfied all needs. Every country paint shop was a miniature paint factory, and men are still living who can remember the day, somewhat earlier, when every painter was his own varnish maker and the use of both paint and varnish was confined to the dwellings of the rich who wished to flaunt their prosperity.

"Life was too strenuous, materials for replacement were too abundant, and the art of the industry was too primitive for any other condition. The Dutch, however, long before had embodied their conviction in a proverb 'Good paint costs nothing,'—the legitimate answer of the slogan 'Save the Surface and You Save All.'

"Today, after we have depleted our natural resources and come to realize that iron does not grow in the ground, nor even trees in the forest, unless permitted to do so. We are coming to realize that in lieu of supplies that are not

FAIR DEALING

Thanks Heartily!

A Public Acknowledgement of a Gracious Sentiment.

We are greatly indebted to the Fowler Hardware, Limited of Sudbury for the following interpretation of our Exclusive Agency Proposition in terms of results accomplished.

Mr. Lorne Fowler says:-

"We have been handling your products now for about seven years, and consider your line one of the most valued assets to our business.

"We have congratulated ourselves several times since that we were fortunate enough to secure your Agency. To quote the words of Mr. R. Dorsett, one of the largest Painting Contractors in town. 'Lowe Brothers Paints are the best I ever dipped a brush in. They also cover better and spread more evenly under the brush than any paints I ever used.'

"We can guarantee that any Hardware Merchant who is fortunate enough to get your Agency will greatly increase his Paint sales on a quality basis alone, to say nothing of your co-operation, which adds greatly to the sale of your line."

Can we say more about our ideals - policy and the fulfilment of our "claims"? We can't! So, in deference to our good friends Fowler Hardware, Limited, we publish their esteemed sentiment.

Lowe Brothers, Limited.
PAINTMAKERS — VARNISHMAKERS
TORONTO — CANADA

inexhaustible we must conserve those we have or go without. The steel that has disappeared from a railway bridge or a plow-coulter as rust is gone forever. It is unavailable for the use of man in all eternity. The wood that has rotted or crumbled into dust is, for human use, as if it had never existed in the forest.

Paint Means Protection

"The concrete structure that has disintregated through electrolysis of enclosed steel or from the surface action of the elements, mingles with the debris of creation, irreclaimable and irrecoverable. But all of these materials and a thousand more can serve indefinitely, practically without deterioration, if systematically and sensibly protected by paint, and in this statment we have the true and complete answer to the question "What is Paint."

"The history of paint and varnish manufacture parallels the history of other great industries. First a traditional art handed down from father to son, then a rule of thumb, hit or miss practice stumbling through repeated failures to final success; and finally the advent of the patient research man, and the informed technologist who bring us to the plane of systematic, intelligent investigation, carefully controlled and duplicated practice.

"Not every paint or varnish plant of today employs a research man or even a chemist, but the knowledge leaks, the example spreads and the entire industry, as well as the consuming public benefits.

"Neither the paint nor the varnish of today have reached final perfection, but year by year these products serve better and better and better an increasing number of consumers.

"Why Is Paint?"

"The fuestion "What is Painnt" is to my mind of less practical importance to the consumer of paint than the question "Why is Paint?" The answer to this latter is what he really needs, for the good of his soul and the integrity of his pocket-book. For given the ownership, the investment of his money, in property of any kind, susceptible to preservation by surface coating, it is vital to him and vital to the conservation of the country's invested capital and its material resources that he should know and realize what paint is for and what it will do. If his clothing wears thin, so that it no longer adequately protects his body, contact with the elements will prompt him to renew his covering. But his property has no voice to remind him of its needs. Yet the same elements which would destroy him if his body were not constantly armed against them, will even more surely destroy his investment, if it be not as carefully and constantly protected.

"All honest paint is good paint, and the worst of it, with special exceptions, better than no paint. Take from the resources of the manufacturer and the ultimate command of the consumer the 65,000 or 80,000 tons of zinc oxide, the 30,000 or 50,000 tons of sublimed white lead, the 85,000 or 100,000 tons of lithopone, yes, even the 100,000 or 125,000 tons of inert pigments bartyes asbestine, annually consumed in the paint industry; take away from him and the varnish manufacturer the vast imports of oriental oils and you would doom much valuable property to certain destruction in the near future. If the paint manufacturer can make, as we know he can, highly serviceable paint out of any or all of these materials, he is doing well his "bit" in the service of civilization."

Setting Quotas Aids Paint Business

Monthly Quota Followed by Daily Quota a Good Way to Develop Active Paint Trade—Fall Painter Wants Quick Action—Price Argument in Retailers' Favor

A VALUABLE suggestion in connection with plans for doubling paint trade in 1922 was given by the speaker at a recent convention. He said in part;—

"The big objective for 1922 will be successful only if we conceive the job with the utmost care for the parts in which the battle of 1922 will necessarily be divided. We must get down to quotas. First the quota by the calendar. If we make January the best January we ever had, and February the best February we ever had, and March the best March we ever had, and so on through each month of the year, 1922 will necessarily be the best year we have ever had. But we must divide even more finely than by months. The only way to make January and March the best of all January's and March's, will be to make each day of January and each day of March better than any corresponding day in the previous January's and March's."

Fall Painter Wants Quick Action

In discussing with a number of retailers, manufacturers and salesmen prospects for future paint trade, a number of interesting points have been brought to the attention of Hardware and Metal. The requirements this Fall are extensive and varied. While it is true more property is receiving protection each year, there are still a great many whose homes and other buildings—rural and urban—have been neglected. An important fact to keep in mind is that the fall painting season is not long and when a man decides to paint he wants to paint quickly and he will expect good service from the merchant. It is therefore important to see that a well assorted stock is kept available.

Price has been an important question in retail merchandising of late, and recent further reductions in paint prices should therefore prove of considerable help this fall. The present price of paints and varnishes allows of adequate protection being given property at reasonable cost. The value of using paint is obvious and when the price is right there should be little argument in selling a customer. These price reductions provide a good argument against the use of cheaper grades of paint which bring nothing but dissatisfaction and trouble to both customer and merchant. There is just as much difference between the appearance and durability of poor and good paint as there is between cheap grade and best quality shoes.

Who Are Prospects?

Now is the time when it is necessary to go out and push the sale of paint and varnish. At this time of year people must be educated to the use of these lines, and a little convincing talk to some good prospects should bring in a good deal of paint and varnish trade. Both employed and unemployed are prospects for paint business, but the former will probably prove to be the better class of customer as the latter will not undertake anything but a little work around the house with specialties, in order to occupy his spare time. But there are lots of vocations regularly employed whose money goes farther under these conditions than it formerly did. Such trades as the policeman, barber, clerk, lawyer, dentist and many others who are on the job working, who take a pride in their property and who are therefore good prospects for paint and varnish. Have a definite proposition ready before approaching him.

A coat or two of good paint in the fall is the best property protection for a severe winter. Automobiles will be repainted by the handy motorist during the cold weather and the motorist who will be driving his car all winter will want to see that it is properly protected against the snow and rain. Screens should be painted before put away for the winter, and the storm windows may need a coat of paint before being put up this fall.

HILLCREST
A GUARANTEE OF QUALITY

HILLCREST COLORS in OIL

There is considerable unemployment at present. As you probably know, when there is unemployment more paint is sold; men put in their spare time working for themselves. Beside this class of painters there is the "general handyman" that keeps his house in prime condition all the time. These men do the outside work in summer and work on the inside walls, floors, trim, etc., in the winter time.

For such men, a selection of Hillcrest Colors in Oil furnishes the foundation for a working equipment of paint. Ask the Hillcrest Salesman about Colors in Oil.

We Also Manufacture

Hillcrest Colors in Oil; Colors in Distemper; Colors in Japan; Porcelain White Enamel; Ebony Black; Spanish Enamel; Bath Enamel; Motor Car Enamel; Paste Filler; Crack Filler; Pearcy's Pure Prepared Paints; Hillcrest Barn Red Paint; Outside Gloss White; Inside Flat White; Aluminum Paint; Carriage Paint; California Gold Paint; Graphite; Machine Paint Liquid; Orange Shellac; White Shellac; Oil Stain; Varnish Stain; Shingle Stain; Cottage Shingle Stain; Varnishes—all kinds; Pure Lead; Bronzing Liquid.—All with the Hillcrest labels as having the Hillcrest guarantee of quality.

Hillcrest Paint Products

Watch For Our Semi-monthly Bulletin Next Saturday

Weekly Paint Markets

MONTREAL

MONTREAL, November 3.—Increased quotations on both turpentine and linseed oil are the features of the paint market this week. Turpentine shows the more marked tendency of firmness with the price raised 3 cents per gallon, and the market remaining strong. In some quarters the price is a little higher than this quotation, and it would not be surprising if a further general advance is recorded in the next few days. Low local stocks and a better business in the southern markets are stated to be the causes stiffening the prices of this product.

Linseed oil records a change of 2 cents higher in quotations, bringing raw oil to 83 cents in one barrel lots. The flax market is still very uncertain, but the by-products, meal and cake, are expected to play a prominent part in the oil market from now on. At present, both products are at a very low price with little improvement yet in sight. It is stated that this condition may be a deciding factor in Spring oil prices, as crushers must govern their oil prices to quite an extent by the market of both these by-products.

The shortage of Belgian glass fails to show any improvement and the arrival of a boat last week brought a disappointing shipment for local importers. Stocks are in no shape to take care of orders now on hand, and if the arrival of another shipment next week has not the large supply on board, fear is expressed for some dealer orders as the season is now well at hand. White-lead-in-oil and putty are unchanged in price, with a steady to firm tendency on both products.

TURPENTINE ADVANCES THREE CENTS—OUTLOOK FIRMER

Montreal.

The firmer situation in turpentine is again shown by a further advance of 3 cents per gallon this week, bringing the present one barrel price to $1.12. The improvement in the market commenced last week, when a price increase of 2 cents was recorded, and from indications there seems a likelihood of further improvement. Local stocks for some time have been comparatively light, and the trend of the Southern market has had a direct effect on the domestic position of this product. In the outside markets there is reported a continued betterment, and while gradual for the most part, shows promising for future conditions. Supplies are now being received here and with the higher prices now prevailing in the South, the maintenance of a steady to firm market is looked for.

Better business in general is said to be the chief factor in stiffening prices, this coupled with the attitude of producers, who claim prices could not remain at former levels and show a profit for them. Present quotations are as follows:

TURPENTINE—	Imp. gal.
1 barrel lots	1 12
2 to 4 barrel lots	1 10
Broken lots	1 22

LINSEED OIL AGAIN FIRMER: PRICE ADVANCE

Montreal.

Continuing on its irregular trend, linseed oil is again firmer in tone this week, with a subsequent advance in quotations of 2 cents a gallon. This brings raw oil up to 83 cents, and boiled to 85 cents in one barrel lots. Although the health of the present strength would seem questionable when the trend of the market for the past few weeks is considered, fluctuations featuring from week to week—some dealers can now see a firmer outlook. Apart from the flax seed prices, there are the by-products which are now figuring prominently in the situation. Both cake and meal are at very low prices at present, with the future trend not too promising. Crushers too are experiencing very little demand for either product at present, and with this continuing it offers the higher tendency for oil prices.

There is little change in the local oil business, larger orders not yet appearing. The demand, however, may be expected light during the following two months as the close of the year is considered a quiet period. Following are present quotations:

LINSEED OIL—	Raw.	Boiled
1 to 2 barrel lots, per gal.	0 83	0 85
3 to 5 barrel lots, per gal.	0 81	0 83

Less barrels, add 10 cents per gallon.

STEADY MARKET FOR SHELLAC

Montreal.

Although more or less of an off season for shellac, the market is stated to be very steady with a tendency toward's firmness if anything. Sales are small, as might be expected at present, but gum shellac offers the firmer tone, this continuing to show strength on the outside markets. Quotations locally remain unchanged as follows:

SHELLAC—	
Orange shellac, in barels	$4 15
Do., in one gal. jugs	4 50
White, in barrels, or 5 gal. jugs	4 65
Do., in one gal. jugs	5 00

ACTIVE SEASON FOR PUTTY: PRICES STEADY

Montreal.

Increasing demand is the only feature of the putty market. Quotations are holding steady to firm with sales now very active. This may be expected to continue during the month, as November marks the busy season for this product. Following are unchanged quotations:

PUTTY—	5-ton lots	1-ton lots.	Less
Standard, per 100 lbs.			
Bulk barrels, 800 lbs.	4 00	4 50	4 75
Bulk drums, 100 lbs.	5 00	5 50	5 75
Do., or tins, loose, 25 lbs.	5 25	5 75	6 00
Drums or tins, cased, 25 lb.	6 00	6 50	6 75
1-lb. tins	8 75	9 25	9 50

Pure Linseed Oil Putty, $1.50 per 100 lbs. ad-

BELGIAN GLASS SHIPMENTS STILL DISAPPOINTING

Montreal.

With the window glass season advancing week after week, the situation as far as Belgian glass is concerned, becomes more acute. Importers' stocks are low and shipments are not ample to meet the demand. Jobbing houses, who were depending on the arrival of heavier shipments in the near future to relieve the shortage, were disappointed in the arrival last week, it being found that only a comparatively light cargo of glass was on board and not nearly sufficient to meet orders now on hand. Another shipment is expected early this month, and if this is found to be light, fears are expressed for dealers who have not already received their season's requirements. Quotations remain unchanged but firmer at the Montreal net list.

TORONTO

TORONTO, November 3.—Increased prices on turpentine constitute one of the prime developments in the current paint markets. Quotations are now generally shown at 7 cents per gallon higher than the level recorded in the previous issue of Hardware and Metal. This advance really reflects two distinct increases which have taken place on the primary markets; rises which were attributed to an increase in foreign demand coupled with damage to production centres caused by a recent hurricane in south Florida. This unexpected element has contributed in a certain measure to the prevailing turpentine situation, through the consequent difficulties attending the collection of gum in those districts affected by the storm. Reports on this condition

(Continued on page 56)

Results Insured

There's a sureness about the Glidden result that will cement your relationship with the painter and make the owner a steady customer for you both.

The results are insured by a policy of paint making that builds up the right quality first and then maintains that quality in every package.

Why should you or the painter run risks when you can get a sure Glidden product for every kind of painting in demand? Glidden "everywhere on everything" solves the problem for *everyone*.

Write to-day for our complete plan with prices and selling data. There's no obligation.

"Save the surface and you save all" *Paint & Varnish*

THE GLIDDEN COMPANY, LIMITED, Toronto, Ontario
Branches: Montreal and Winnipeg

TORONTO PAINT MARKETS

(Continued from page 54)

are not definite, but it would appear that the turpentine interests have been fortunate in this respect. The fact that present stocks of this commodity are not, of course, directly affected, has reduced the resulting price developments to within conservative limits. As a matter of fact, an increase in the export demand, coming chiefly from England, has been a strong incentive to the higher price levels. While southern quotations have since eased considerably from the peak advance recorded earlier this week, prices generally have failed to recede to the previous levels.

Putty Sales Satisfactory

Quotations on linseed oil remain unchanged this week, although the flax seed markets continue to develop almost daily fluctuations. Other paint products also maintain previous market trends, with very little of marked interest to record. The reported shortage in certain sizes of window glass is expected to be relieved in the near future, through the early arrival of another shipment from Belgium. Sales for white lead in oil, are described of a moderate character; while the seasonal movement in putty is now of a more satisfactory nature.

LINSEED OIL MARKETS UNSTEADY: PRICES AT PRESENT UNCHANGED

Toronto.

While linseed oil quotations are primarily holding unchanged at the level of 87 cents per gallon for raw, and 90 cents for boiled, yet these markets generally continue of a fluctuating nature. The periodical rise and fall of flax seed prices still remains one of the prime forces behind the current quotations on linseed oil. Due to an upward trend in seed costs, a tendency to increase oil by two cents per gallon appeared earlier in the week, but this movement failed to hold, due to the excessively light demand now prevailing for linseed. The market tone is again easier, although the duration of these specific trends is hard to gauge under existing circumstances. However, the following quotations are generally conceded to represent the average of present values in this commodity:

LINSEED OIL—

1 to 2 barrel lots, per gal.	0 87	0 90
3 to 4 barrel lots, per gal.	0 86	0 89
6 to 9 barrel lots, per gal. ...	0 84	0 87

Less barrels, add 15 cents per gallon.

WINDOW GLASS MOVEMENT GRADUALLY IMPROVES

Toronto.

Window glass sales are stated as gradually attracting the usual seasonable proportion of attention. The current movement is registering a better tone, orders being fairly numerous. but chiefly of small variety. There has been no further change in prices, since the recent adoption of the new net list. rent prices are contained in the paint quotation page.

TWO ADVANCES RECORDED ON TURPENTINE PRICE

Toronto.

The turpentine markets command specific attention this week, several price developments having been recorded. At the end of last week, prices advanced three cents per gallon, and this change has been followed by another rise of 4 cents; thus making the current level 7 cents per gallon higher than the previous quotation given in Hardware and Metal. This upward trend is attributed to the prevailing movements on the primary sources of supply, where a slight increase in the foreign demand for turpentine, coupled with a severe storm in southern producing circles, has accounted for successive increases.

It is noticeable, however, that while Savannah markets recorded both a sudden upward spurt in quotations followed by slightly easier levels, the local prices are held at the higher mark. This factor has been attributed to the low state of domestic stocks, with current supplies having been purchased according to southern price tendencies. It is pointed out that while shipments continue to be made for immediate requirements, primary market fluctuations should continue to be more or less directly reflected in local quotations. Whether prices will now develop an easier level, corresponding with Savannah quotations, has not been intimated due to the prevailing uncertainty of turpentine generally at this period of the year. Should the primary quotations revert to their former level, further recessions from the following local prices are generally looked for:

TURPENTINE	Imp. gal.
1 barrel lots	1 22
2 to 4 barrel lots	1 21
5 gallon lots	1 37

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton London, Brantford, Collingwood, Guelph, Windsor, or Montreal, but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots, 15 cents per gallon additional.

SPRING PAINT BUSINESS NOW BEING BOOKED

Toronto.

Paint manufacturers and distributors report the present volume of trade in paint and the allied products as quite satisfactory for this season of the year. While there is a moderate movement of paints and varnishes for Fall business the seasonal painting activity is now somewhat declining. Quite a lot of Spring business is being booked. These current orders are generally of a minor size, but the quantity indicates that good business in these various products is almost assured for next season.

PITTSBURGH MARKETS

(Continued from page 49)

ity. Bars are practically stationary. Plates show a very light demand, a demand that would appear light even if there had not been such a great increase in productive capacity in the past four years. Sheets show a slight tapering off in tonnage, but still make the best showing of any of the finished steel products. Wire products are rather quiet, in keeping with the season of the year. Tin plate is in lighter demand, also reflecting seasonal conditions.

Sheet, wire, pipe and tin plate mills are all operating at 50 per cent or better, on an average, or well above the rate of steel production. Bar, shape, plate and rail mills are all at less than the general average.

Steel Price Trend

Since the early part of September it has been a conundrum whether finished steel prices as a whole were advancing or declining. There were two advances, September 12th in wire products, and a week or two later in sheets. Meanwhile list prices on tubular goods were reduced, but only by a little more than the shading previously existing. Bars, shapes and plates have been presenting the appearance of trying to advance, but without a great deal of success. Some mills advanced their prices more than a month ago, expecting others to follow, and the others probably themselves expected to follow, but only after they had booked a certain amount of business, as backlog, which business it seems now they were unable to gather together. At any rate it has been found in the past week or two that at least two important producers who had previously stiffened up their prices are again meeting the competition. This seemed to swing the general weakening rather than strengthening. A trend in the same direction is furnished in sheets, for more than a fortnight ago the majority of independent mills advanced their asking prices a second $5 a ton and this action has not worked out into an actual advance in the market, which is easier in tone than if the attempt had not been made.

Thus a careful scrutiny of actual facts in the market indicates that if there is any trend in steel prices it is downward. Added to this are two theoretical considerations, involving freight rates and the Steel Corporation's earnings statement for the September quarter. Everything is up in the air as to what will occur with freight rates, and a wide variety of guesses is being made, but the steel buying public is likely to count upon rates being reduced at some time, expecting therefore that mills will be able to reduce prices somewhat on account of reduced costs.

Steel Corporation Report

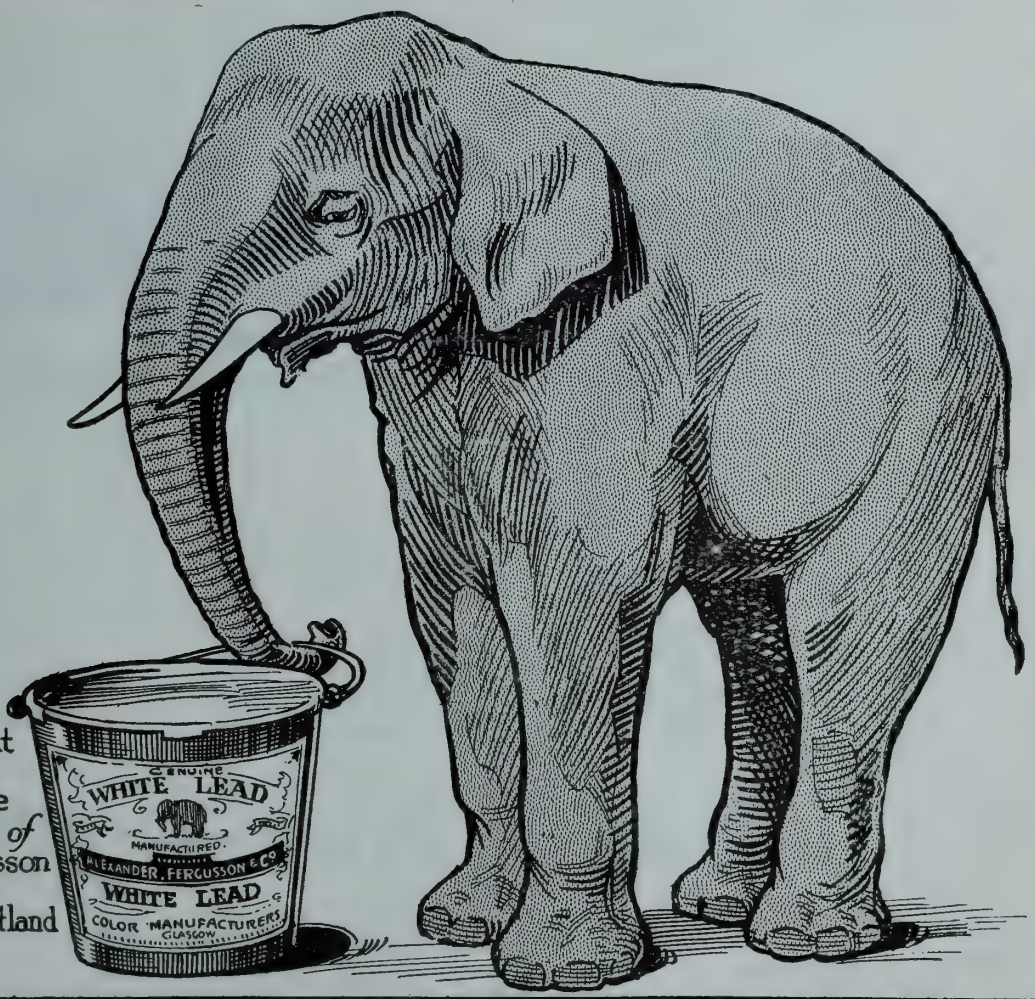
The Steel Corporation's report is very important since it shows that even with a very light operation and existing freight rates and wage rates it is possible to make money in steel production. That is contrary to what was being said in the steel market during the quarter now reported upon. It was claimed that the steel mills generally were losing money, and as to some of them it was claimed that the more tonnage they made the more they would lose.

GENUINE ELEPHANT

Their Faith

Every man pins his faith to some one thing or another. Paint users pin theirs to Genuine Elephant Pure White Lead. Their belief in its goodness is as fixed as the Pyramids or the North Pole. That's why the men who ask for Genuine Elephant won't hear of a substitute.

It's like beating the wind to try and sell some other white lead to customers who want Genuine Elephant. They have used it and know beyond any doubt that Genuine Elephant is the purest, finest and whitest White Lead ever produced. If your White Lead sales are slow stock Genuine Elephant.



Genuine Elephant Pure White Lead is made from the original formula of Alexander Fergusson & Company of Glasgow, Scotland

C·C·M· Bob Skates

The Improved Line

This line is an improvement on the old styles of Bob Skates that have been on the market for several years.

Note the Set Screw and Spring Nut. Also notice that the sole plate is entirely free from projections, presenting a comfortable surface for the foot.

Complete with straps.

How many pairs do you need?

They are now made in the C.C.M. Factory.

Canada Cycle & Motor Company, Limited

Montreal; Toronto; WESTON, ONT.; Winnipeg; Vancouver

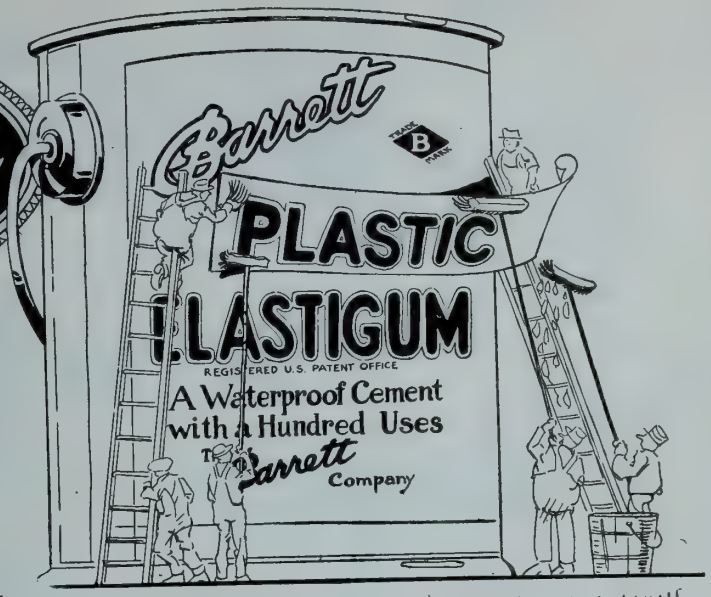
Barrett Roofings, Cements Industrial Paints etc.



Start these money-making cements to work for you to-day—

Don't sit back waiting for the building boom, and let five, immediate profits slip right through your fingers. All around you are roofs—hundreds of 'em—in pressing need of patching and repairs. Don't miss this trick—don't pass up the profits on this roof-repair business.

Tell folks in your community how easy it is to renew their old roofs with Barrett Roof Repair Materials. Let 'em know your store is headquarters for these famous roof-repair materials. Go after this business hard, and then—watch the profits roll in.

Plastic Elastigum

A tough, elastic, waterproof, acid-proof cement with the consistency of thick molasses. There are so many uses for this ever-ready patching cement that it is known generally as "The Waterproof Cement with a Hundred Uses."

It is extremely easy to apply with trowel or putty-knife to any surface, wet or dry. It expands and contracts with surfaces of all kinds, whether metal, stone, concrete, wood, glass, glazed brick or terra cotta. Among its many uses, it is particularly useful for flashing work of all kinds; for waterproofing gutters; for damp-proofing parapet and fire walls above flashings, for stopping leaks in roofs, around chimneys, skylights, etc.

Liquid Elastigum

A high-grade cement in liquid form, unequalled for recoating old and worn felt, metal, and "rubber" roofings. It actually gives new life to old roofs by forming a tough, weatherproof coating over the entire surface.

It not only seals cracks and small holes against moisture, but it is of sufficient body to level small hollows, and reinforce weak spots.

Liquid Elastigum is composed of non-volatile oils combined with asbestos fibre. It is applied very easily with brush or squeegee, and because of its fibrous nature spreads in a thicker layer than ordinary roof paint.

Liquid Elastigum is also very economical, one gallon covering from 100 to 250 square feet, depending upon the surface to be painted. Even after years of service it is still tough and elastic.

Dependable Products that Bring Big Profits

By carrying and recommending Barrett Plastic Elastigum and Barrett Liquid Elastigum you'll not only swell the total on your sales sheet, but you'll create genuine customer good-will by furnishing tested products that are sure to give satisfaction.

Velvet Finish

(The Can With the Orange and Black Label)

This line will develop big business in sales for wall and ceiling finishes in homes, churches, halls, stores, etc.

Gives an egg shell gloss finish without rubbing on plastered walls, wall board, woodwork, metal work, etc.

It can be used in or out of doors.

This flat finish is adapted to universal use, which increases its possibility for sales, greater turnover and larger profits.

Spreading, covering and wearing qualities are the same as all other Floglaze lines.

Our dealers' booklet, "A Guide to Larger Profits," describes Floglaze Velvet Finish fully. Write us for this book.

TINKER TOM'S TALKS.

No. 337

Politics!

My friends all say—"Don't mix business and politics!"

Well, I've talked about almost everything in this little old space, so I'll cross my fingers and say a few words about

Arthur Meighen

Now I happened to be lucky enough to attend a big International Conference at Ottawa last spring and as an added attraction Premier Meighen was asked to attend a banquet and greet the Yanks—It was during the closing days of the session and Parliament was boiling overtime. Rather unexpectedly the Premier came in and without opportunity to sense the meeting made an appeal for international co-operation which took the bunch by storm.

One Yank said to me—"He's the Canadian Abraham Lincoln, and I wish we had one like him now in the U. S."

Now, if that's politics, exeunt.

GLASS

YOU needn't worry about receiving prompt shipments of Glass. Greater now than ever before are the advantages to the Dealer in having a near-by and dependable source of supply, whether it be for *one* light of Glass or car-lots.

We are receiving quantities of Window and Plate Glass and can quote you very attractive prices for immediate deliveries or for import shipments. We stock or manufacture Plate, Bevelled Plate, Mirrors, Figured, Leaded, Wired and Prism Glass.

Write, Wire or Phone for Prices

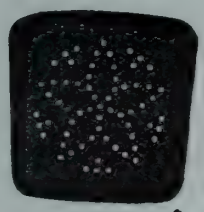
Hobbs Manufacturing Company, Limited.

MONTREAL TORONTO LONDON WINNIPEG

Real Profit in Canadian Veneer Chair and Toilet Seats

We are talking about real, tangible profit that comes in particularly freely in the Fall months because there is a little extra demand now.

These splendid three-ply, veneer seats are made in a pleasing variety of patterns, carefully shaped, corners rounded, and fastened with genuine, water-proof cement. They will not warp, curl, crack or come apart.



Everlasting 7- and 11-Ply Toilet Seats

These are expertly joined in 7 and 11-ply veneer. They cannot come apart and will outlast any other seat on the market
Write today and let the extra profit come to you as soon as possible.

Wa-Ko-Ver Stain
Beautifies All Woodwork

Not only does it beautify, but it wears like iron. You will find it pays in future sales always to recommend Wa-Ko-Ver Stain whenever your customers have worn floors or scratched woodwork to renovate. It restores the freshness of the floors or woodwork, pleases your customers, and makes permanent business for you. The established reputation of this effective, serviceable stain makes it a pleasure to sell. Good displays in your windows, on your counters, or other conspicuous places, remind visitors to your store, and people that would otherwise be "passers-by," of their need for Wa-Ko-Ver stain. This sales-maker will handsomely reward a little sales-effort on your part.

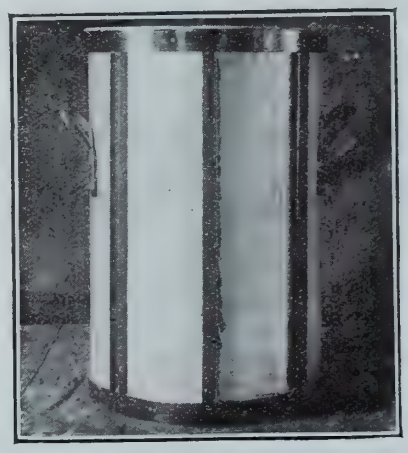
FRIEND MAKING FEATURES



DEALERS!

There are many friend making features about the REED SUPER-SERVICE LINE of GARBAGE and ASH CANS which will make hosts of friends for you —the kind that are so satisfied that they can't help talking about it.

Take for instance, the Style "B" Can illustrated above. **Service** and **durability** are built right into it. No. 18 Galvanized Steel is used throughout in its construction. All joints are hand riveted and hard soldered. Top and bottom are reinforced with heavy iron bands, and the sides with six channel irons. There's no chance of the garbage man battering this can up. It's built to last. The bottom is set up to clear ground, and either hand forged or milk can handles can be supplied.

It will pay you to investigate the SUPER-SERVICE LINE. It's made in Canada. **This fact will save you money on duty, exchange and freight, and give you a greater margin of profit.**

TWEED
SANITARY CLOSETS
will find a ready sale

Our No. 1 Tweed Sanitary Closet with mahogany finished seat and lid with nickel-plated hinges. Every Tweed is built on similar lines and guaranteed to give satisfactory service.

These Tweed Sanitary Closets will find ready customers among farmers, suburban dwellers, or any class of people who live in a locality without city conveniences and it is among these people that you can do a profitable business.

The Tweed is simple to install, absolutely dependable, sanitary and inoffensive, and can be used in any room in the house. The Special Tweed Chemical used in connection with the closet destroys all trace of odor. No plumbing of any description is needed. The Tweed solves the problem of putting city conveniences into country houses at a fraction of the cost.

Let us tell you more about the Tweed as a selling proposition. Write us for price lists and literature describing Tweed Sanitary Closets, Tweed Baths and other home conveniences manufactured by us.

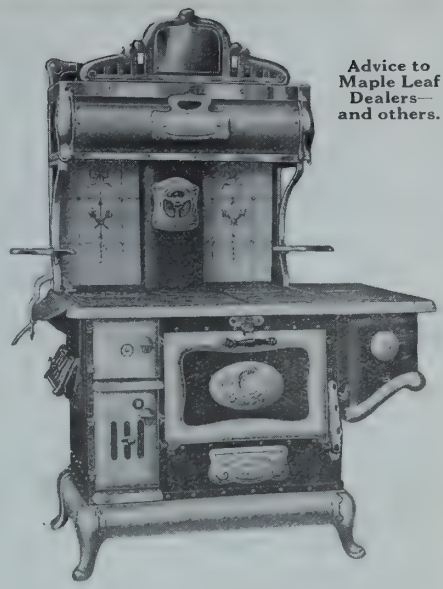
TWEED -:- ONTARIO

Show the goods — and Boost!

ONE of the standard tenets of merchandising is—"goods well displayed are half sold."
Make some one member of the Maple Leaf line a prominent feature in your salesroom. Place it where it will be an outstanding feature and you will be surprised at the business it will bring to you.

Maple Leaf stoves and ranges are pleasing in appearance. They are made on honor and they are priced right. Every time you sell a "Maple Leaf" you are making a new lifelong friend—besides which you are also making money.
If you have not the latest price list with this leading line of heat making machines—ask us for it.

Maple Leaf Thatsit The newest in Quebec style of ranges. 6-hole top with an undertop heat control that makes all six holes available and efficient. Large side oven 14 x 20 x 11½ with balanced spring type drop door, friction catch, non-heating handle and thermometer—beside many other modern appliances. Can be fitted with either hot water boiler or copper reservoir. With or without warming closet. Feature the "Thatsit."



Advice to Maple Leaf Dealers—and others.

Maple Leaf Falcon

A steel range with all the modern attachments and appliances that the housekeeper appreciates in a kitchen range. Beautiful in design and made in several different styles. The Falcon will back up any claim that you can make.

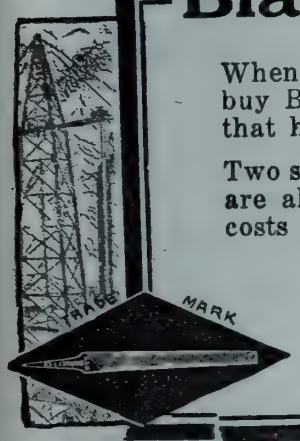
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

BANNER
Trade Mark Registered
ASH SIFTERS

The trade-mark name BANNER is your guarantee. It is a household word. It stands for the best in ash sifters, and we stand back of you in recommending the BANNER.

It is made better this year than ever. Special machinery is helping us to meet the demand.
No dusty, backbreaking shaking—the simple and easy rocker motion eliminates dust and nearly all the work. It is the common-sense ash sifter.

Order now as the demand is becoming enormous. Ask your jobber or wholesale house, or write to us for full particulars, prices, etc.

The Burrowes Manufacturing Company
607-611 King Street West, Toronto

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Why has Hardware and Metal Such a Large Western Canada Circulation?

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 33 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

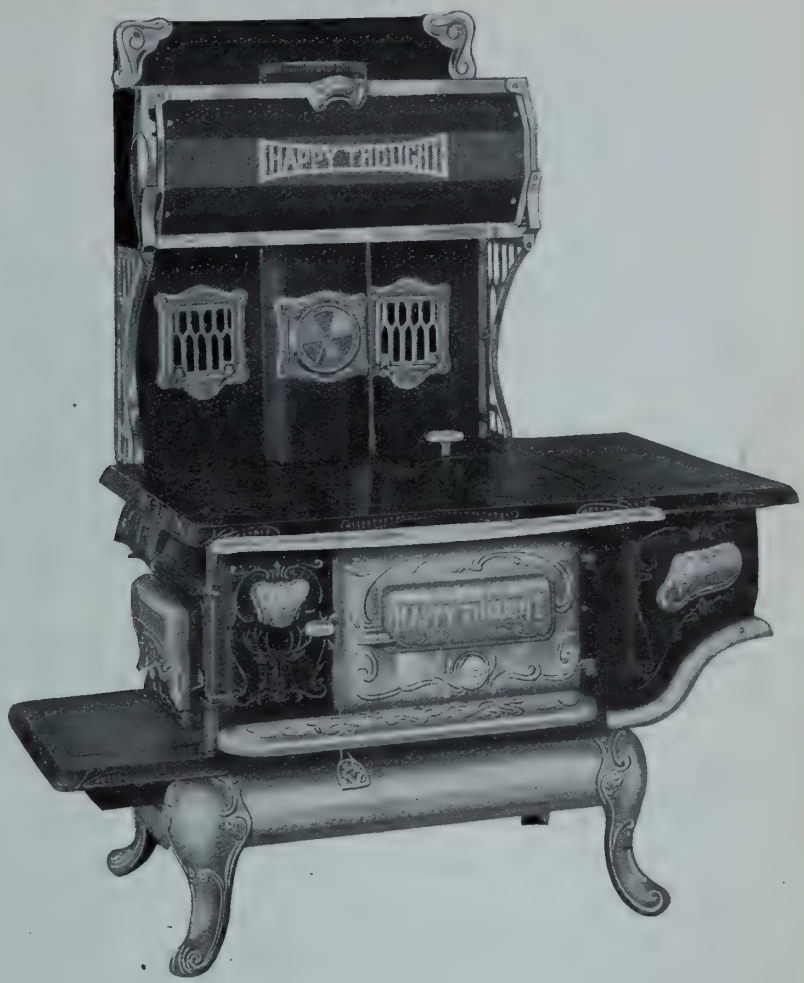
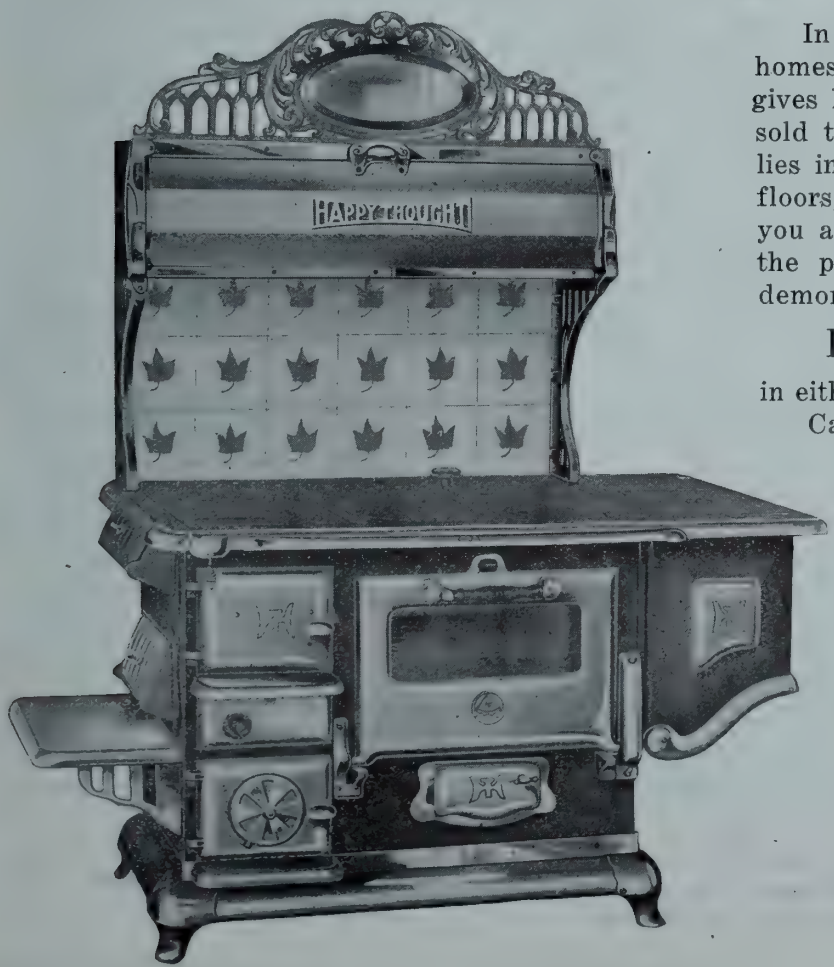
Two Happy Thoughts



The Coal and Wood Range season is here. The cooler atmosphere of the Fall days and nights tinged with frost, forcibly reminds your prospects that there can be no more delay. Their time for buying is now. The desire is already created—the need is emphasized—the necessity undeniable—will you get your share of this annual business?



In country farmhouses, rural and city homes, one of these two Happy Thoughts gives loyal service. Their quality is already sold to your community. Your opportunity lies in making an effective display on your floors, and in your windows. Advertise that you are the "Happy Thought" dealer. Get the prospects in your store—talk comfort, demonstrate and sell the

Happy Thought Range

in either cast or steel.

GREASE AND OIL CUPS

The New Panel "KASEMENT" DOOR

In addition to our regular pattern Kasement screen doors we are now making the design shown to the left. It has a solid bottom panel and judging from advance sales, this new door will be very popular.

It has the same genuine mortise and tenon construction that has always characterized "Kasement" doors.

All 'Kasement" doors are made with the "Ledge" on the inner face which makes it easy to fit an uneven door casing.

Sizes; 2—6 x 6—6; 2—8 x 6—8; 2—10 x 6—10; 3 x 7. Finishes— numbers 2 and 5 are Oak Stain Varnished; numbers 4 and 6 are Natural Finish Varnished. Fitted with Black or Galvanized wire.

Be sure to buy genuine "Kasements"
Sold with complete sets of Kasement Hardware.

Kasement Skrene Dore Co., Limited
269 West Richmond St., Toronto, Ont.

"MONITOR"
Wickless Coal Oil Stove
Silent Pattern

We also offer Other Stoves, Furnaces, Blow Lamps, Brazing Lamps.

Collapsible Legs Save Space

This model (for indoor use) has a capacity of 2¼ pints and very low consumption of fuel. The collapsible legs make it very convenient for stowing away. Constructed of Polished Brass. An attractive and carefully finished article. Free from Smoke or Smell. Easily lighted, regulated and extinguished. Burns coal oil—hotter, cleaner, safer.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly: packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Good papers furnish A. B. C. reports to their advertisers.

Hardware and Metal is a member of the Audit Bureau of Circulations.

In design and construction it is the best torch of this type on the market to-day.

Detroit Torch

Takes Little Space

Our No. 42 Auto or Electricians' Torch has oblong tank and is very popular with mechanics desiring a tool that will take up little space in a kit.

Tank is made of heavy brass throughout. Supports on bottom of tank prevent torch from tipping over when placed on bench—not in the way when torch is not in use. Fitted with patented tapered burner, with hook and support for soldering coppers. Valve wheel is of wire and always cool, giving operator full control of flame at all times. Automatic pump of simple construction forms the handle.

Detroit Torch & Mfg. Co.
Detroit, Michigan

Nickel Plating

Jobbing work promptly attended to.

Re-nickelling stoves a specialty.

Your Customers look for the RAINBOW Trade Mark

Because genuine Rainbow Sheet Packing — the original red sheet — has held the confidence of the mechanical world for over 30 years, steam engineers everywhere have learned to look for the Diamond Rainbow Trade-Mark on every yard. They know that it is their best assurance of permanently packed flanges.

Hardware dealers throughout Canada who are displaying genuine Rainbow and letting their customers know they have it in stock—ready for quick delivery — are building up a profitable business with steam plants, large and small. And these sales of Rainbow Sheet Packing lead to sales of supplies, tools and fittings.

It will pay you well to link your store with the Rainbow reputation for dependability and economy.

Genuine Rainbow is made in Canada and is stocked by your jobber. We will be pleased to send details of special interest to the hardware trade.

Dominion Rubber System

Head Office - - Montreal

That Advertisement

will alternate with another in the December issues of leading National periodicals going to over 5 million addresses—many more readers. It's that many suggestions of a Bissell for Xmas.

A Bissell Sweeper for Both

CHRISTMAS! And a handsome new Bissell Carpet Sweeper for mother, a welcome lightener of household burdens. But little Margie hasn't been forgotten. Mother wants Margie to learn early that Bissell is the housekeeper's best friend, so she has bought her a toy Bissell. Now Margie can help mother keep house.

BISSELL'S

("Cyco" Ball Bearing)

Carpet Sweeper

raises no dust. Picks up threads, dirt and litter. Cleans more thoroughly, more safely and more easily. Healthier and a work saver. Run it with one hand. Where there is an electric cleaner the every-day convenience of a Bissell is marked.

Costs only a few dollars. Saves more than original price every year for ten years or longer. Sold everywhere. Booklet, "Sweeping Facts and Fallacies," on request.

Bissell Carpet Sweeper Co.
234 Erie St.,
Grand Rapids,
Mich.

Oldest and Largest Sweeper Makers

Made in Canada, too

Bissell's Toy Sweeper
"Just like mother's"
Delights little girls and teaches tidiness. 25c and 50c in the Eastern and Middle States; a few cents more elsewhere.

Always popular for Christmas giving, the price of the Bissell sweeper will make it particularly so this year while people are buying conservatively. It's a great little utility gift — saving work for mothers. Sell it to new users; sell it to old users on the basis that their old sweeper has paid for itself many times over and should be put into semi-retirement upstairs where the work is lighter — give mother a new "Cyco" Ball Bearing Bissell.

Toy sweepers are fine sellers, too, at Christmas time and add interest to a sweeper and cleaner department. Attractive models. Very popular prices.

BISSELL'S
FALL-XMAS OFFER
An Extra Sweeper Free

Ask us or your jobber about it and get your shipment on the way. BISSELL CARPET SWEEPER CO., of Canada, Limited, Niagara Falls, Ont. (Factory) and Grand Rapids, Mich. Oldest and Largest Sweeper Makers.

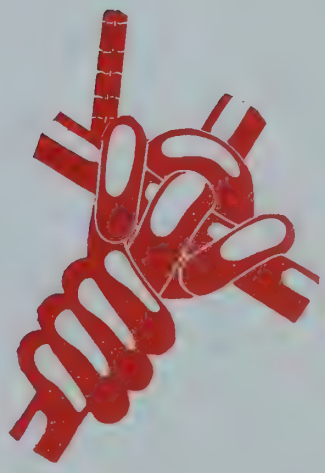
PUBLICATION OFFICE : TORONTO, CANADA

The Frost Organization Will Help You Increase Business

Frost Fence is known best as a trade builder by those dealers who have been part of the Frost organization for many years. Their continued patronage from year to year is the best proof of this. **You** can be part of this organization if you are located where there is no Frost dealer. You will find a good business awaiting you in fencing if you handle Frost Products. Those who buy it are, for the most part, the best class of farmers, whose trade in all lines you could not well afford to miss.



The advertising campaign carried on in the farm magazines is such as to create a demand for Frost Goods. The quality of these goods is well known to all who have used Frost Fence and "once a Frost customer always a Frost customer," is a well known remark that you hear from those dealers who are regular Frost representatives.

Frost Fence

Our lines of fencing, wire, gates, etc., are most complete. The goods are built to give service and the lock, illustrated here, is the strongest woven fence binding known.

All these goods are made here in our own plant from wire which is drawn from the rod to full size, treated so that it will be tough and springy and well galvanized to resist rust, and thus, in Frost completed products, you get materials which are best suited to give your customer his money's worth.

Frost dealers see big business ahead for 1922. Let us tell you more about it.

Frost Steel and Wire Company, Limited

Galvanized and Bright Wire, Hay Wire and Bale Ties, Woven Wire, Farm, Factory and Ornamental Fences, Galvanized Gates, Manufacturers' Wire Supplies

THE CONSTRUCTION FOREMAN KNOWS

That there is no harder service required of a rope than that which he demands.

In no industry is rope given as little care as on the construction job.

Yet Plymouth Rope stands up under this grilling work and gives a surprising measure of service.

That is why it is preferred by most consumers.

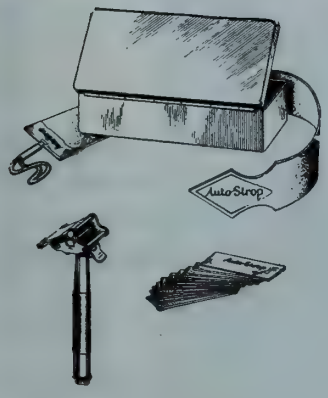
PLYMOUTH TRADE MARK 1824

PLYMOUTH ROPE

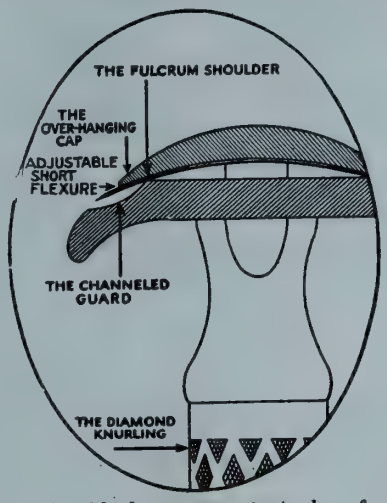
'RICE LEWIS' NEWS



The "Auto Strop"

We carry a full range of styles that will meet every Christmas requirement you will have. Don't wait until the demand is here; pave the way for it by showing these goods. Sort up.

The "Improved Gillette"



You should have your stock of the "Improved Gillette" safety razors very complete for Christmas selling.
The improvement in this razor is proving to be just the thing that was needed for shaving and selling.

Our stock consists of:
the **Richwood**, the **New Standard**, the **Tuckaway**, the **Big Fellow** and the **Aristocrat**—Sell $5 and up.
We also carry the regular Gillette and the Brownie—the latter sells at $1.00.
Order today. Sort your stock.

The "Eveready"

Here are the styles we are carrying in stock now. "Town" in celluloid case, "Touring" in nickel case, the "Chummy" in black flat case, "Sedan" in red flat case, "Sport" in cigarette case, "Speedster" in cabinet wood case. The new "Eveready" Safety Razor styles are decidedly attractive. We also carry the regular style in stock.

The "Gem"

If every man had the same idea about shaving there would be no necessity to carry in stock more than one kind of razor but fortunately there are many ideas. The "Gem" idea makes it worth while keeping your stock well assorted.

The "Durham-Duplex"

combines the practical features of the old straight blade razor with the safety idea. This razor meets the demands of a certain type of man who has since boyhood days used the old straight razor. We carry all styles including the "Demonstrator."

Hatch
Garage Door Outfits

To be reliable, serviceable and efficient, a set of garage hardware doesn't have to cost almost as much as the automobile. The Hatch Garage Door Outfit has all the qualities the heart could desire in a dependable outfit—yet it is low priced. Low priced, that is, for the high quality. Try it on your own garage; then you'll realize why the customers are delighted.

The Set Includes:

3 Special Swivel Door Rollers; 22 feet of Track; 3 Pairs Special Garage Door Hinges; 3 Stay Rollers (floor guides); 2 Extra Heavy Garage Door Handles; 1 Safety Hasp (for fastening doors outside); 1 Hook and Eye (for hooking back swinging section inside).

The track comes in separate bundles—two 8-foot and one 6-foot lengths. Screws and bolts for everything. Japan finished and all neatly packed in a wooden box. Ask for prices and details.

Now is the time to sell Roasters

"DURO" Aluminum ROASTERS

MEET EVERY REQUIREMENT

OVAL ROASTER

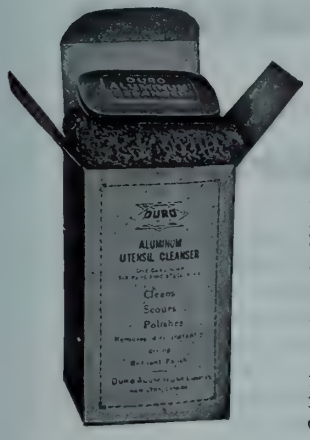
No	Length	Width	Height
170	18¼ in.	11¼ in.	8¼ in.

Self-basting, heavy, seamless roaster. Air chamber in bottom of base prevents burning. Rivetted handles. Cover fits pan snugly, retaining all the juices and prevents shrinkage of the meat. Easy to clean. Holds large sized turkey. Indented cover for automatic basting. Polished finish.

ROUND ROASTER

No.	Diam.	Height
175	12 in.	6 in.

Rivetted handles. Four inch indent in cover for automatic basting. Suitable for small roasts or small fowl. It is self-basting. By using an asbestos mat it can also be used as a Bread Baker on an open flame without putting in oven. Polished finish.



"DURO" Aluminum Cleanser

Contains one cake of soap, six pads fine steel wool. Cleans, Scours, Polishes, removes dirt instantly, giving Brilliant Polish. "Duro" Cleanser is also useful for cleaning Glass, Enamelled ware, Sinks, Bath Tubs, Faucets, Bathroom Fixtures, etc.

"Duro" Cleanser will remove Paint and Varnish from Woodwork, Glass, etc.

"Duro" is sold at popular prices—wide range to choose from—leading jobbers handle it.

This Sectional View Shows the Advantages of the JEWEL Pipeless Furnace

Notice These Points Particularly--

The Jewel stands for simplicity, as well as comfort, economy and efficiency. It can be installed by an ordinary mechanic in less than a day. It can be installed whether the cellar is full size or not. An excavation large enough for the furnace is sufficient. The cellar is not filled with cumbersome pipes. The Jewel has a large feed door—a target that any man can hit without spilling coal. The ash-pit is deep, with a full-sized pan that can be removed, saving cleaning out with a shovel. The combination dome and radiator provide a large area of effective heating.

Write us to-day for Booklet and learn what the Jewel Pipeless Furnace will do for the hardware man.

Decorative Wall Burlaps---

A Profitable Line For The Hardware Merchant.

Burlaps are extensively used by builders, contractors and house owners, for at present prices, there is no more economical wall covering on the market.

Now that building materials are coming down in price—building will increase greatly and Burlaps will, consequently be in much greater demand.

It costs but little to lay in a stock of Burlaps, for they come in three shades only—White, Drab and Green. Burlaps are easy to handle—they do not require much floor space and they allow you a good margin of profit.

Round out your "Builders Supply" Stock by putting in Burlap and you will add materially to your profits.

Write us for selling helps and complete information as to prices, etc.

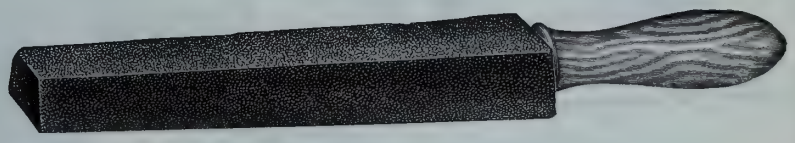
HART MOWER FILE

and utility sharpening tool and its many uses by Farmers, Mechanics and Housewives



—and he longed for a sharp hatchet!

All last summer, on every auto tour, picnic and camping trip, he had promised himself to have that hatchet sharpened. Somehow, when the trip was over, the hatchet was never sent out to be sharpened.

The other day he got wise and bought one of these reliable, utility sharpeners —the Hart Mower File—and now he has an edge on the hatchet, the axe and the ice-chopper ready for sidewalks this winter. Moral: Let customers know the many uses of Hart Mower Files.

Some Other Uses

Mower and binder sections, cutter-box knives, ensilage knives, scythes—though not especially shaped for them it cuts quickly, carpenter's tools, knives, grass clippers, lawn mower blades, tinsmith's shears.

Order Hart Mower Files from your jobber.

FACE THE FACTS

New model National Cash Registers help merchants meet new conditions

New methods insure success

This merchant has installed a new model National Cash Register especially designed to help merchants meet new conditions.

(1) It gives facts necessary for managing his business.
(2) It provides an easy way to keep tax records.
(3) It gives quick, accurate service to customers.
(4) It prints a receipt for each customer.
(5) It helps clerks sell more goods.
(6) It reduces overhead.

He has made conditions in his store right.
He is meeting present-day conditions successfully.

A National Cash Register is the only machine that issues a receipt, indicates, adds, prints, classifies, and distributes records *at the time of the sale,* all in one operation. No figure work. No delays. No mistakes. Just read the totals.

"Please send me," he said,

And we mailed him the book. This is the letter he wrote us:

Dayton, O., June 2, 1921.

"Henry Disston & Sons Inc.
Philadelphia, Pa.

"Gentlemen:—I want to thank you for your 'Saw, Tool and File Book,' which I received several days ago, and with which I am very much pleased.

"Your Book is just what I need, I have six of your saws, but the way I have been filing them I think I shall need a jointer.

"I feel very good toward you for your courtesy to me! in fact, I think you are just about as fine as your saws. I don't think that I could pay you a higher compliment.

"I am fifty-five years old, and in all my years I have heard only two men praise any but the 'Disston Saws.'

"I am not familiar with your other tools, and, frankly, I didn't know that you made any others, but I shall get acquainted with some of them very soon.

"In conclusion let me again thank you for the Book; it has so much valuable information in it, and so many fine illustrations that I hardly know which to praise more—its utility or its art. I like both, and am immensely pleased.

Yours truly,
WM. BENZING,
1220 Wyoming Street."

When a man gives us a compliment like that, do you wonder that we want to talk about it? We wish you would read the book. If you would like a copy, or several for your clerks and customers, write your name and address on this page, and mail it to us. Address the envelope to Desk No. 2. We will send you the book free of charge.

FRIEND MAKING FEATURES

DEALERS!

There are many friend making features about the REED SUPER-SERVICE LINE of GARBAGE and ASH CANS which will make hosts of friends for you —the kind that are so satisfied that they can't help talking about it.

Take for instance, the Style "B" Can illustrated above. **Service** and **durability** are built right into it. No. 18 Galvanized Steel is used throughout in its construction. All joints are hand riveted and hard soldered. Top and bottom are reinforced with heavy iron bands, and the sides with six channel irons. There's no chance of the garbage man battering this can up. It's built to last. The bottom is set up to clear ground, and either hand forged or milk can handles can be supplied.

It will pay you to investigate the SUPER-SERVICE LINE. It's made in Canada. **This fact will save you money on duty, exchange and freight, and give you a greater margin of profit.**

An Explanation

For every happening there is a cause and an explanation. Sometimes this explanation is simply a poor excuse. Sometimes it is a real alibi.
For several months of this year our service and deliveries have not been the best and we feel that an explanation and apology is due to our customers.

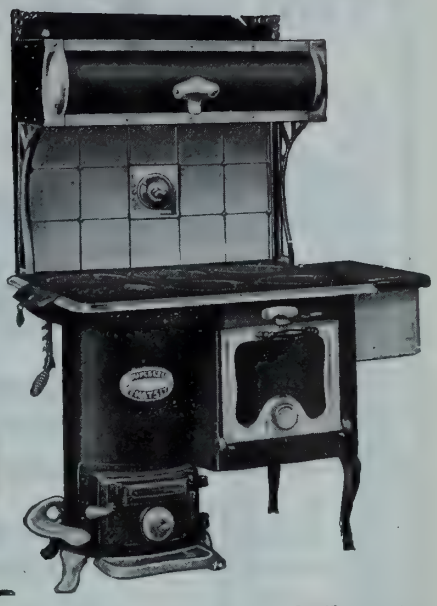
Here is the Reason

Our business had increased more rapidly than we had foreseen until it was far beyond the possible capacity of our old plant. To remedy this we had planned and were building a newer and larger one. But while we were dismantling the old plant and installing machinery and equipment in the new one an interruption of production was inevitable.

On August 15th, we were enabled to start operating in our new plant—straining every resource to catch up with back orders, and to build up our depleted stocks. And we are pleased to inform you that we now can give reasonably prompt shipments on all staple lines—filling most orders the day received or at the outside in two or three days.

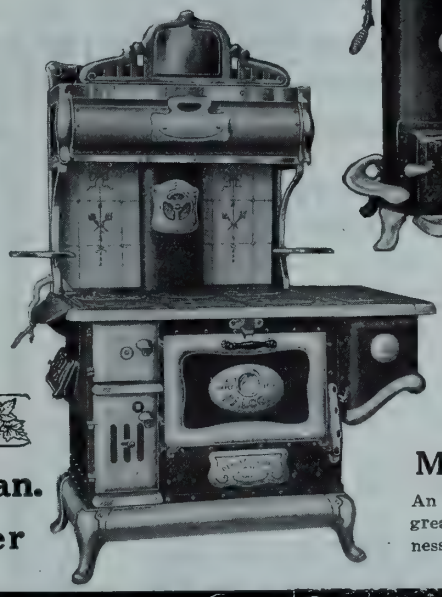
Bear in mind, that our new plant has three times the capacity of the old one and that we are continually increasing our output, and taking care of the increased demands.

There need be no hesitation on your part in pushing the Maple Leaf line of stoves, ranges and heaters to the limit of your ability as you can safely depend on our backing you up promptly and completely.



Maple Leaf Thatsit

The newest of all Quebec type cooking ranges—able, roomy, efficient and beautiful. It's a leading feature.



Maple Leaf Falcon

An aristocratic steel range of great beauty and supreme usefulness.

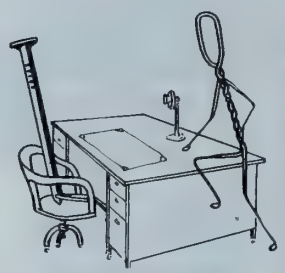
Their Chat No. 4

Overlooking the Business that's Going



"Believe me, W. N., I put the skids under one fellow this week—a hardwareman who had got into a rut and didn't try to get out. He complained that business was punk and that there was nothing doing in building in town. I got him to take a little walk with me and we landed around where a whole row of houses was going up—just in time to see Smith's Hardware truck dumping off two kegs of nails. I didn't need to repeat the moral to him, he took the hint and I'll venture to say he is on the job from now on."

Moral:—"Get the business that's going, even if it isn't big."

Laidlaw Bale Tie Co. Ltd.
Hamilton - - Canada

JARDINE TOOLS

In this reliable, dependable machine all the rollers are geared. These powerful rollers are grooved for two thicknesses of iron for bending edgewise. Unless otherwise ordered we supply grooves for 3-8 inch and 1-2 inch iron.

This useful machine will take iron up to six inches wide. It bends up to four inches by one inch, or it will bend wider iron of proportionate thicknesses. It gives service for circles by bending up to one and three-quarters by five-eighths inches edgewise. The top roller is removable. All Jardine Benders have the center roll removable.

We are enabled to offer this machine at an extremely low price, only because we produce them in large volume.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

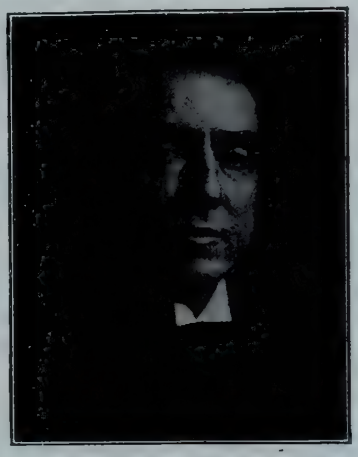
Increase in Confidence Among Buyers

Next Year Expected to Surpass 1921 Trade Records, Though No Record Breaking Seasons Anticipated—Canadian Industry Makes More Favorable Showing Than That of U.S. or European Countries Since the War—England Will Make Complete Recovery In Record Time

Based on interview of Hardware and Metal with W. H. Cottingham, President The Sherwin-Williams Company, of Canada, Ltd.

"WHILE 1922 can hardly be expected to yield record breaking seasons for paint, varnishes and allied products, the early indications now presented, certainly point to next year surpassing 1921 records," said W. H. Cottingham, president of the Sherwin-Williams Company of Canada, Limited, to Hardware and Metal in discussing the outlook for the products of their company. This year had been quite favorable for the industry, and the lack of painting during war years was no doubt responsible to a great extent. However, there still remained a good amount of outside work to be done, and where it was curtailed this year because of high prices, the obstacle had now been removed by the reduction of prices at the close of the summer months. Taking from the first of September, the returns of the company showed an increased volume of business, but owing to the decline in values, the cash turnover could not be expected in excess of last year.



W. H. COTTINGHAM

President The Sherwin-Williams Company of Canada, Limited, who reports an increasing confidence among buyers and predicts improved trade during 1922.

"The volume of business in the past two months offers encouragement, and the reason why we may look for further increased sales, is the return of confidence on the part of the buying public which has been lacking during the period of the declining market. People are beginning to realize that, comparatively, paint prices are within reasonable reach of 1914 prices," continued Mr. Cottingham.

Possibilities of lower prices seemed very remote. Rather, from every appearance, a steady market might be anticipated for the coming year's trade. Touching on the present cost of raw materials in comparison with prices previous to the war, it was pointed out that linseed oil was lower than pre-war prices, also turpentine. White lead in oil was within easy reach of 1914 prices, also zinc oxide, lithophone and most dry colors. To comply with these conditions on the basic materials, prices had been accordingly lowered until paint was now being placed on the market at quotations realized by both dealer and consumer to be productive costs plus a reasonable amount of profit.

"Canada should really be congratulated on her present standing and the headway she has made since the close of the war. The returns of our Canadian Company in the fiscal year just closed, show more favorably than either our American or English plants," was Mr. Cottingham's reply to the question of Canada's present position in comparison with other countries where this firm operates. The reason of the progress, when compared with the United States, was, in his opinion, the difference in sentiment between the average Canadian citizen and his neighbor to the south. The American was usually more optimistic when times were good, and more pessimistic when times were the reverse. The people of Canada had commenced their reconstructive work in a quiet and determined way and although at times were faced with circumstances that would often cause an uncertain outlook, had never ceased in their endeavor to surmount the difficulties.

Mr. Cottingham has been in England for the most part of the summer and therefore was quite conversant with trade conditions in the mother country. Speaking briefly, he stated that England was suffering from the loss of her export trade, depending so much as she must, on her foreign markets. This was gradually being overcome and it would not be long before she would regain her former standing. The exchange rates on her money markets had also proved an obstacle which would probably yet take some time to adjust. Internal troubles were to-day very prominent, requiring careful and steady legislation, the result of which was being closely watched by the world at large. However, through it all, Mr. Cottingham believes England will be one of the first to make a complete recovery from the long period of depression.

This information concerning England's recuperative powers will be of interest to those business men interested in noting evidences of improvement in world business affairs.

In view of plans being made by many hardware merchants to stimulate next year's paint trade beyond any volume yet experienced it will be encouraging to note Mr. Cottingham's remarks concerning the possibilities for trade in 1922. Lower prices combined with more confidence among buyers and a continuation of the national sentiment mentioned, should help hardware trade considerably in the coming year.

Canadian Metal Importers Restricted

Government Customs Ruling Restricts Importation Into Canada of "Scrap" Brass from Munitions—Classes Such Scrap as Manufactured Product—Germany and United States Purchase Large Quantities of Such Material with Advantage to Domestic Brass Industries

HOW the existing Canadian tariff schedule is operated to the disadvantage of certain Canadian manufacturers, and to the distinct gain of foreign producers of brass goods, is contained in the present interpretation of Clauses Nos. 352 and No. 348, in the tariff regulations.

The definition as to what constitutes "scrap" brass has arisen in connection with brass forgings of fuse bodies, noses and primers, taken from shells, huge quantities of which have been sold by the British Government War Stocks Disposal Board. Naturally, certain Canadian concerns interested in this connection, have attempted to import their purchases of this material under the description of "scrap" brass. It is claimed that these brass forgings, when being removed from the shells are damaged in the process to such an extent that they are of no possible further use except as scrap.

However the minister of Customs and Excise adheres to the clause No. 352, which places a 20 per cent. ad valorem duty on all imported articles of brass manufacture coming from Great Britain; although clause No. 348 of the same tariff schedule provides for the "free" admission of "scrap" brass. The ruling of the Customs Department at Ottawa that these caps and primers are liable to the duty, has far-reaching effects as regards Canadian brass products, and is liable to be reflected in the future degree of activity in the brass manufacturing industry of this country.

Importation Prohibitive

"The application of this duty," said E. W. Knight, Purchasing Agent of Frankel Bros., Limited, to Hardware & Metal, "renders the importation of this waste material prohibitive. At the same time, this material is being imported duty free into the United States, and other foreign countries; a state of affairs which gives brass manufacturers of those countries a distinct 'edge' in the cost of production over the Canadian competitor."

"The fact that the British Government listed this material as 'scrap' and sold it under that description," said Mr. Knight, "is claimed as an admission that the forgings are of no practical use, except for re-melting purposes. On the other hand, the Canadian authorities claim that they are part of a manufactured article, and as such are liable to taxation. This ruling is looked upon as absurd, both in the waste material markets, and also among those interested in scrap brass from the viewpoint of manufacturing brass products of various description, for it is a distinct restriction to Canadian trading in this commodity."

180,000 Tons Available

"The largest quantity of scrap brass, 180,000 tons, placed on the markets at any one time, has recently been sold by the British Government interests. Some fifty thousand tons of this material, shell noses, etc., have been re-sold to German concerns, thus giving Germany's brass factories a much lower ratio of production cost than manufacturers who have to use virgin metal. It is considered likely that a large proportion of the remainder—130,000 tons, will find its way into the United States, as that country allows scrap brass to enter duty free, the same as Canada. The difference comes in, however, by adhering to the 'scrap' definition at the U. S. ports; while classing the shell forgings as 'parts of manufactured brass goods' in Canadian custom regulations."

In this connection, it is said that one American dealer in scrap materials had shipped a quantity of these brass leavings to Canada, but when the consignment was held in bond here for duty, this broker had it diverted to the States. Under such conditions, the production of manufacured brass goods can be carried on by U. S. firms on a much lower primary cost basis than is attainable among Canadian branches of the industry. A number of Canadian firms, however, state that they use nothing else but the virgin metal in their products, as certain defects or pieces of iron and steel found in the ordinary scrap brass, frequently play havoc with tools used in the machining of castings. With respect to the shell caps and primers, however, it is pointed out that these are pure brass forgings in the first place, and with such tremendous quantities available, brass goods could be produced at much lower cost.

The vast difference between scrap brass quotations and the cost of virgin metal in the ingot stage, is a factor of consideration. Its importance is accentuated when traced down to the price to the consumer, of the finished brass product. The Canadian Customs authorities, according to Mr. Knight, have repeatedly seen samples of the scrap metal under discussion, but fail to change or re-consider their decision. The last ruling on this topic, received by Frankel Bros., which firm are extensive dealers in scrap materials of almost every description, was, that the law provides the duty and that the officials are not placed there to change the law, but to administer it.

Could Not Be Used as Munitions

Under these circumstances, no steps can be taken by Canadian concerns to offset the handicap given domestic brass industries. Other factors entering into the case are, that in addition to being taken from shells, and damaged in that process, these caps, primers and so on, could not be re-modelled to meet the strict measurement requirements exercised in the use of their original purpose. Yet another phase of the situation, governing their definition as to "scrap, or not," is the fact that they could not again be used in the manufacture of munitions except under Government order.

It is further pointed out that fairly substantial supplies of scrap brass from munitions were purchased in Canada shortly after the Armistice by United States interests, and shipped to that country duty free. Should this be re-imported into Canada, the Ottawa decision is that such material would be subject to the 30 per cent duty on "manufactured" brass articles from the United States. The keynote of the whole affair hinges upon the question, "What is scrap?"; and the decision of Canadian customs authorities that this class of material does not belong to that category, but is considered as subject to the duty.

A SALES TAX DECISION

Ottawa, Ont.—An important decision affecting the Dominion Sales Tax was rendered by Judge Gunn here in an action brought by the Leader Company, Limited, of Sault Ste. Marie, to compel the Capital Rawhide and Fur Company of Ottawa to pay a sales tax after a transaction had been closed. The judge ruled that the defendants were not liable and stated that if he ordered them to pay the tax, he would place others in an awkard position. At the time the Leader Company sold a consignment of furs to the Ottawa Company they did not show separately on the invoice the amount of the sales tax. It was not until months afterwards that they brought suit to compel the Ottawa company to pay the tax.

Merchants Urge "Do It Electrically"

Statistics Show that Only Small Percentage of Canadian Households Use Various Electrical Appliances for Facilitating Work and Increasing Comfort of Home Life—Value of Co-operative Advertising Among Merchants — Every Home a Prospect for $800 Worth of Electrical Goods

THERE are some pointers for electrical merchants in connection with the experience of certain Hamilton merchants who co-operatively advertised the "Do It Electrically" slogan in a recent campaign. These ad. insertions appeared on one of the electrical pages of the local newspaper in a Saturday edition.

With retail merchants combining along these lines for concentrated activity in any line of product, a great deal of mutual benefit can thus be secured, not only in the way of increased sales, but in building up mutual confidence, and developing up-to-date selling methods.

Modern "home helps" offered the principal attraction, and these were featured by the various advertisers. The fact that a drive of this nature, is practically sure to "pull" adequate returns, has evidently been realized by these Hamilton merchants, and a series of attractive, forceful and skillful ads is the result.

Making Specific Suggestions

There is a source of potential sales and increased business in many arguments, properly applied, which advance the merits of such electrical devices as, cleaners, washing machines, lighting fixtures, dish-washers, kitchen range heaters, irons, toasters, grills, and numerous other products. The suggestion that one or more of these articles should form the household Christmas present and thus serve to lessen the burden of household drugery, may often be presented with telling effect.

Some pertinent paragraphs which can be utilized by the retail merchant as useful pointers in local advertising are as follows:—

Be modern—Do it electrically.

One-half of the dwellings throughout Canada are wired for electrical services.

Only 3 per cent. of Canadian homes have an electric range.

Only 4 per cent. possess electric coffee percolators.

But 5 per cent. of Canadian housewives have their labors lightened by an electric vacuum cleaner.

Only 6 per cent. are able to enjoy the pleasure of doing their washing electrically.

Eighteen per cent. of Canadian households have their breakfast toast made on an electric toaster.

Ninty-four per cent. are minus the possession of an electric fan.

Only 5 per cent. have electric air heaters.

But one per cent. have an appliance for heating water electrically.

And even with the widespread popularity of electric irons, still 55 per cent. are without them.

Big Field For Business

These statistics also give a comprehensive idea of the wide field for the movement of electrical goods. It can readily be seen that only a comparatively small minority at present possesses the advantages of electrical commodities Not only does this offer an extensive market with an increasing volume of sales, but the list of electrical devices is continually being added to, and with the introduction of new products, fresh opportunities are presented, to the progressive retail merchant.

Many Opportunities Overlooked

Addressing a recent gathering of electrical dealers, an authority stated that there was much overlooking of good op-

(Continued on page 56)

Fall housecleaning and the advent of the early darkness in the evenings give the hardware merchant some useful leads for the Fall window display of electrical goods. In the arrangement shown herewith by Allins, Lindsay, Ont., vacuum cleaners, grills, portable lamps, heaters, etc., are shown, and the interior of the electrical department shows a wide range of wall and ceiling fixtures. With proper illumination this makes a very attractive setting.

Briefs

IT IS interesting to note that on recent contracts placed in British Columbia for 1,500,000 boxes of tin plate, Welsh mills have secured the business in competition with the U.S. product. A delivered price of $4.90 is named. At the time these contracts were placed the U.S. mills were quoting $5 a box for tin plate, but this has just been reduced to $4.75.

A REPRESENTATIVE of Labor has been appointed to the Dominion Railway Board and protests should be made by merchants' associations in various parts of Canada that if class representation is to be extended to the Dominion Railway Board the retail merchants are entitled to a representative on that body. The retailers of Canada pay a large share of the freight rates collected by the railways in the distribution of merchandise and should be given equal representation with labor when matters concerning freight rates are to be considered. Particularly should this be the case at present when the question of freight classification is being undertaken.

CANADIAN business men who have recently visited the United States and European countries have returned to find that domestic conditions are considerably better than those abroad. While these Canadian business men have thus found confirmation of their belief in the ability of Canadians to surmount the difficulties of readjustment they have been too modest to say much on the point. It has remained for a prominent paint company official to point out that the sanely optimistic sentiment of the Canadian combined with the quiet, determined way he has gone about the reconstruction work has been responsible for the rapid progress made in this direction in Canada. A continuation of this sentiment will eventually bring about healthy business conditions.

Business-like Methods

THE MERCHANT himself issues a bill for any debt owed him and according to law, before he can recover the amount due him he must show that he has made proper demand for that amount. It would save a great deal of the retail merchants' time if the Government adopted the same businesslike plan in connection with the income tax collection. Instead the government in collecting this debt requires the taxable party to make out his own bill and he is fined if he delays. If the bill was simple it would not be so laborious but there is a complicated series of calculations bristling with penalty clauses for mistakes. It would probably be an advantage to all concerned if the government merely secured a simple statement of income and exemptions claimed from each individual and made out their own bills taking responsibility for any mistakes made.

Liquidating Stocks

A FAIR index of the trend of general business conditions in Canada is given by the consolidated statement of the chartered banks. In this connection it is significant to note that commercial loans for the month of September show some slight increase over August but show a decline of $177,000,000 in comparison with September 1920. While this statement would seem to confirm the objection recently heard, that banks were pressing too severely for the reducing of banking indebtedness, it really indicates a healthy condition in that it represents substantial progress in the liquidation of high priced merchandise stock. Until such stocks have been replaced with others which represent a fair price to the consumer and which bring a fair profit to the distributor and manufacturer, the process of readjustment will be impeded. Meanwhile shrewd business men are following the plan of moving out high priced stocks at replacement prices, thereby giving buyers confidence and hastening the introduction of stocks at prices on which the maximum amount of trading can be done with fair returns.

A Severe Handicap

IT WOULD seem as though a distinct injustice was being done the brass industry of Canada by the interpretation of Customs officials put upon clauses 348 and 352 of the tariff regulations, under which the importation from Britain of large quantities of brass cartridge cases, fuses and other similar war left-overs cannot be made except in the category of manufactured product and subject to the 20 per cent. preferential ad valorem duty applied to such imports from Britain. This material is being sold in large quantities by the British Government War Stocks Disposal Board and is being sold as "scrap" brass. As such it is being imported into the United States, Germany and other countries, and to the brass industries of those countries comes a distinct advantage over the Canadian manufacturers who would be willing to purchase part of these huge stocks of brass but cannot do so advantageously. Certain Canadian importers on receiving notice that shipments of such material are being sold in bond in Canada for duty, have had them diverted to the United States. When this material has been worked into a finished product in United States plants, the article, on being exported to Canada, would then carry the 30 per cent. duty which applies on such articles imported to Canada from the U.S.

As an ordinary rule only virgin metal is used by the majority of Canadian brass goods manufacturers. This is due to the fact that in ordinary scrap brass there is considerable foreign matter which hinders the machine process and provides a serious danger to the machinery used. No such foreign matter is present in the bulk of the munition left-overs, as outlined herewith, and it would be a distinct advantage to Canadian brass manufacturers in lowering costs, if the Customs interpretation were amended to give domestic industries an equal footing with foreign manufacturers as far as the securing of such material is concerned.

Lower Prices and Better Selling Way to Bring Back Normal Times

Recommendations of Washington Conference for the Recovery of Business—Firms Increase Business Despite Dull Times—In One Instance Cost of Product Reduced 50 Per Cent.

A CONFERENCE was opened in Washington recently with the object of enquiring into the volume and distributing of unemployment, to advise upon emergency measures that could be properly taken by employers and local authorities and civic bodies and to consider such measures as would tend to give impulse to the recovery of business and commerce to normal.

Roy Dickenson, associate editor of "Printers Ink" was a member of the committee. In "Printers Ink" he gives some of the conclusions arrived at and recommendations made, which are equally applicable to business conditions in Canada as to those in the United States.

Mr. Dickenson was appointed to the Manufacturers' Committee which included Charles M. Schwab, Samuel Gompers, and several prominent manufacturers.

Some of these men were operating their plants one or two days a week. Others not at all, and a few at full time. The discussion soon resolved itself into an informative debate between two distinct schools of production and merchandising, the two labor delegates, of course, arguing against any horizontal and general cut in wages. Wages, they maintained, were merely another name for purchasing power. Jackson Johnson, of the International Shoe Company, for example, was operating his plant at full production capacity, employing 23,000 men and women and doing the best business in his company's history. He was of the decided opinion, in which I joined, that the recommendations then adopted, such as rotation of jobs and putting men at work to improve the condition of the plant when they had no orders for goods, were merely supplementary and of little fundamental avail.

Mr. Johnson had reduced the price of his product 50 per cent by savings in overhead, distribution, and increased plant efficiency. He had reduced wages not at all. He believed we should touch at once upon one of the fundamental causes of stagnation—high prices. Selling at current replacement costs based upon full time production, not on a two or three days a week schedule, urging all manufacturers and retailers, who have not already done so, to take the inflation out of their prices all at once, not by piecemeal, and to get more trade by selling at a price the consumer would pay. Those were the things some of us believed would do more than any one thing to start factories running again. The consumer, we realized, was the man who not only fixed prices but when they strike him as right, by his purchases sets the wheels of industry in motion and pays both labor its wages

(Continued on Page 46)

Getting an Early Start on Christmas Trade

Seasonable goods in a wide range are tastefully displayed and many useful gifts for various members of the family are shown without any appearance of overcrowding. Price tickets are used generously, as are also window cards and advertising literature. The three pyramids make an effective background for the display; a novel means is used of showing pocket cutlery, and the Christmas decorations are not overdone. This window was dressed by C. H. Johnston, of Gibb, Brown and Odell, Ltd., Hanna, Alta., and won first prize in places under 5000 in the 1920 Hardware and Metal Xmas Window Contest.

News of Western Canada

Active Movement of Hardware in B. C.

Big Rush to Complete Buildings Before Wet Weather Has Aided Movement of Builders' Hardware

VANCOUVER, B. C.—Though the British Columbia hardware distributors and retailers are not experiencing the volume of trade which accompanied the days of 1910 and 1911, when lumbering, mining and fishing were at their height, no complaint is heard with regard to the business which is being turned over.

The general tendency in prices continues downward. Exceptions to the downward trend include all lines of copper and cotton goods, which have firmed up slightly as a result of the advance in the raw materials. Lamp chimneys have been adjusted on a lower basis to the extent of about fifteen per cent. Corrugated sheets are down 50 cents per square. The six, seven and eight foot lengths are now quoted at $3.35 per hundred while the nine and ten foot lengths are fifteen cents higher.

Distributors report that turnover has assumed very satisfactory proportions, although they cannot point to any particular reason for the activity. The rush to complete buildings before the start of the wet weather has unquestionably had a very decided effect on all lines of building hardware, the outward movement of which is heavy.

The recent unusually heavy rains have temporarily restricted the paint trade.

No Hardware Failures

Hardware distributors, retailers and wholesalers alike offer no complaint as to the volume of business being transacted. There have been no failures and sensational scare sales are not on the regular programme of things, as they appear to be in some other lines of trade.

One prominent wholesaler stated to Hardware & Metal that the month of October had shown a slight improvement over September and this is considered very satisfactory in view of the fact that last month, toward the latter part, there was a surplus of rain. He said that business generally was improving due to a better demand in the lumbering industry, on the success of which, business on the coast in a large measure depends. Money appears to be a little more plentiful and the trade is showing more optimism.

Steel Goods May Be Higher

While there have been no price changes of note during the week, there is a decidedly firm tone to all lines in which steel forms a component part and it is believed that higher quotations will soon be in order.

As before stated, there have been no big sales, but in the case of several of the larger stores, "specials" have been put on for a day or so. For instance, the Vancouver washing machine which regularly sells for $22 has been marked down to $18.75; garbage cans are down to $2.79 from $3.15; nickle plated teapots from $2.35 to $1.98; aluminum double boilers from $5.35 to $4; galvanized wash tubs from $2.50 to $1.95; $2.59. Mortise lock sets are retailing at 95 cents.

Good Movement of Stoves

With the cooler days and nights there has been a good business this week in stove and furnace repair parts while the outward movement in stoves and furnaces both imported from the east and locally built, has been quite satisfactory. This latter trade is largely of local origin and comes as a result of the continued building activity in Point Grey, a neighboring municipality. The same cause is responsible for a good sale of window glass, and a full line of building hardware.

In the paint section, rain has interfered with the house painting business and a quiet period is anticipated during the next two months which are usually the slow months of the year. On interior paints, however, sales are well up to the average. Particular reference should be made to basketry painting which is quite active. Many housewives are taking the common wicker chair and are working out many original effects in colors. Some of the dealers are catering to this trade and are having good success. These paints, which are available in greens, fires, pale gold, aluminum, brown, dull gold, lemon, silver and other colors are retailing at 25 cents per ounce paper.

WESTERN CANADA NOTES

Vancouver, B. C.—Stanley Carman, managing director of the Belleville Hardware and Lock Manufacturing Co., was on a visit to the coast and in company with his local representative, A. T. Chambers, made the rounds of the trade.

Vancouver.—Alderman W. R. Owen, of Owen and McCallum, Main street, hardware merchants, was over to Victoria where he is taking an active part in the securing of charter amendments for the City of Vaucouver. Mr. Owen is chairman of the finance committee of the city council. He is being talked of as a possible mayoral aspirant this year.

Vancouver.—W. C. Stearman, of W. C. Stearman & Co., Granville street, has returned with his family from their summer cottage at Caulfields, where he was located during the summer. Mr. Stearman was able to motor to his camp each evening after business.

Vancouver.—A. B. Weeks, managing director of the Canadian Northwest Steel Co., left with the Board of Trade party for Calgary, Edmonton and other prairie points, where he will attend the sittings of the Board of Railway Commissioners which is hearing the freight rates case.

MAY OPEN PLANT IN VANCOUVER

Vancouver, B.C.—Geo. S. Pettapiece, managing director of Geo. Cradock & Co., B.C., Limited, leaves next week for Wakefield, England, where he will take up with his principals, several matters relative to the operations of the company in this province. While at the head office he will take up the question of the establishment of a branch factory in Vancouver, the site for which was secured a short time ago.

Before leaving Mr. Pettapiece emphasized the fact that upon the satisfactory settlement of the freight rates case now before the Dominion Railway Commission will depend largely on the construction of a manufacturing plant on the coast.

"We with other concerns in British Columbia," he said, "are deeply interested in the application for equalizing of freight rates, mainly because we know that the prairie markets are open to us if we obtain a rate equal to that enjoyed by eastern manufacturers. On our ability to develop these markets depend our plans for future development of our plant here. If British Columbia's application is successful, we will probably go ahead with our proposed plant."

B. C. MERCHANTS DOING ACTIVE TRADE

Vancouver, B.C.—John Dunsmuir, president of the B.C. branch of the Canadian Credit Men's Trust Association and Director of Wood, Vallance & Leggat, Vancouver, has just returned from a trip through the Okanagan, Kootenay and Similkameen Valleys. He reports conditions in the interior as being unusually good as a result of the big apple crop. The crop this year will total $7,000,000 in value, he says, and packing will be concluded much earlier than usual. He noted that more attention is being given this year to grading and this will result in a better demand at higher prices. Mr. Dunsmuir had ample opportunity to size up the business situation, in all of the districts, and he reports that the merchants are doing a good business with splendid prospects for future trade. Stocks are in excellent condition and accounts are being met regularly.

WINNIPEG FIGHTS B.C. ON FREIGHT RATE QUESTION

Winnipeg.—Declaring that the British Columbia application for the abolition of the "mountain scale" of freight rates was an organized effort to expand business generally in the Coast Province, and that equalization of that freight rate would tend to destroy business and industries and manufactures in Winnipeg, Isaac Pitblado, K. C., counsel for the Winnipeg Board of Trade, told the Board of Railway Commissioners his clients would oppose it most strongly.

A claim that high freight rates on lumber between British Columbia and the prairies shut out the coast product in favor of that of Manitoba and Saskatchewan, and thus created high prices and a virtual monopoly for prairie mills to the detriment of building operations here, was made by the United Grain Growers, Limited, in applying for a reduction in coast-to-prairie freight rates.

The board reserved its decision.

WESTERN CANADA NOTES

Vancouver, B. C.—At the regular luncheon of the Electric Club this week an address was given by Rev. Capt. Geo. Pringle on reminiscences of the Yukon and experiences overseas. A resolution of sympathy to the relatives of the late Senator Hon. Frederick Nicholls of the Canadian General Electric was passed.

MISLEADING IMPRESSION GIVEN

E. M. Trowern, secretary of the Dominion Board, Retail Merchants' Association of Canada, in an interview with Hardware and Metal, characterized as misleading, an impression created by an address of Roger W. Babson, of Wellesley Hills, Mass., before a board of trade luncheon in Ottawa. The impression left by a part of Mr. Babson's speech was that retail prices had not been reduced and that the middleman, who might be termed the retailer, was eventually going to pass out of the community. He said this impression was erroneous and false.

"Retail merchants and middlemen have been here before corn was sold in Egypt," said Mr. Trowern, "and they will be here to the last man."

Mr. Trowern said the retail merchants of Canada had given considerable attention to the problem of reducing prices as figures showed. The actual list of retail price declines was said to be much wider than the published lists of the government.

Another thing Mr. Trowern took strong exception to was the visits here of alleged American business experts who, he said, unfairly compared conditions in the United States with those in Canada. The retail merchants, he said, desired to emphasize that conditions in the United States and in Canada could not be honestly compared unless similar conditions prevailed in the two countries, which was by no means the case.

Duck Shooting Season In Full Swing

Duck shooting continues practically until the end of the year in most districts and may therefore be made the subject of many effective window displays at this time. A very realistic setting has been secured by the dresser of the above window by the Capital Hardware and Sporting Goods Co., Regina, Sask. The use of a mirror on the floor of the window on which decoys have been placed in a natural position near the rushes lends effectiveness to the setting. Long grass is plentifully distributed throughout the rest of the window as a typical grain field for prairie chicken hunters. Note the wheat stocks with the stubble for a bed. Guns, ammunition and hunters' apparel are each shown effectively.

Christmas Window Contest

EIGHT PRIZES are offered by **Hardware and Metal** for the best window displays of Christmas lines, as arranged for this year's trade by hardware merchants or their retail salesmen.

The contest is open to anyone engaged in the retail hardware business in Canada and the displays will be given a fair and authoritative judgment.

The essential point to keep in mind is that the display will be judged on its effectiveness as a business puller. Many points outlined in past contests of Hardware and Metal as to most effective window trims, should be kept in mind in arranging the contest display. Attractiveness without effectiveness is of little use in a window trim.

Arrange a window which will, literally, draw the passers-by right into your store, then send a photo of it to be entered in the contest.

THE EIGHT CASH PRIZES

Places under 5,000		Places 5,000 and Over	
First prize	$10.00	First prize	$10.00
Second prize	5.00	Second prize	5.00
Third prize	3.00	Third prize	3.00
Fourth prize	2.00	Fourth prize	2.00

Dealers in small communities have just as much chance under this arrangement as those in larger districts. Getting selling ideas into the display is what counts.

The contest closes on Monday, January 2. Photos placed in the mail after that date will not be entered.

All matter must be addressed to The Editor, Hardware and Metal, 143 University Avenue, Toronto, and marked "For Christmas Window Contest."

Don't overlook the prizes and the honor of winning one

A Valuable Opportunity For You!

Mr. Hardware Merchant

IF YOU have never stopped to figure out the advantages of taking part in the annual Hardware and Metal Christmas Window Contest you are doing yourself an injustice.

You know from your own experience that direct evidence of the value of effective display in stimulating retail sales is found almost everywhere you turn. You will therefore agree that too much cannot be done to improve window dressing ability.

Hardware and Metal Christmas Window Contest provides you with unequalled opportunity of seeing how your window dressing compares with that of other successful merchants. The interchange of ideas and the suggestion of new styles of display will prove of great value to you in 1922 business.

Apart from this value do not overlook the fact that it means

Distinction For You

to have a prize winning window display of hardware in this contest.

The readers of Hardware and Metal include practically everyone interested in the manufacture and distribution of hardware in Canada and these readers are always interested in noting who are the prize winners and runners-up in this contest each year.

Get Your Entry In Early

for this year's contest. All former contestants are welcomed and with the prize winning windows of previous contests as a guide the chances are good for those who have not won prizes in the past to win one in this year's contest. New contestants are also welcomed to join. To the latter we would recommend a thorough reading of the rules on the opposite page. **DO IT EARLY.**

Events in the Trade

BUSINESS CHANGES

Elmer Weber, of Neustadt, Ont., who recently purchased the Central Hardware from M. J. Weber has moved to Cargill, Ont., and taken over the business.

The Durham Furniture Co. has purchased the assets of the Sellers Kitchen Cabinet Co., at Southampton, Ont.

George A. Nelson, of Harriston, Ont., who recently sold his hardware business to A. Carter, of Clifford, plans to move to Windsor shortly. Another Harriston change of interest to the trade is the purchase by J. A. Mundy, tinsmith and sanitary engineer, of the McCready block.

NEW FIRMS

Hamilton, Ont.—Davison's Hardware House have commenced business with a new store and stock at 296 Ottawa street.

OBITUARY

John Linton, for many years connected with the Hamilton Stove and Heater Co., Hamilton, Ont., is dead.

FIRE LOSS

Chatham, Ont.—Two three-storey business blocks were visited by a disastrous confiagration. One building was owned by the Brisco Wholesale Accessories, Limited, of this city, and used as a storehouse and, together with its contents, was completely destroyed. The loss will exceed $12,000, and is partly covered by insurance.

INCORPORATION

Master Tires Ltd., has been incorporated in Ontario with capital of $1,000,000, and head office in Toronto to manufacture rubber goods.

STOVE AND FURNACE CATALOGUES

The Dowswell Hardware Co., of Fort William, Ont., announce that they would be pleased to receive catalogues covering stoves and furnaces.

BURGLARS VISIT HARDWARE STORE

Thieves who made a Sunday morning raid on a number of business places at Waterford, Ont., took a quantity of cutlery, silver-plated ware, and a rifle from the hardware store of Foster Bauslaugh. The merchants of the town are offering a reward of $50 for the conviction of the thieves.

PERSONAL

At the annual election of the Chamber of Commerce at London, John J. Foote, Sales Manager of the McClary Mfg. Co. was chosen as a director.

A. W. Poole, Managing Director of Stewart & Wood, Limited, this week attended the funeral of his father, who died at Mallory Town, Ont.

A. Birmingham, of John H. Graham & Co., New York; E. H. Rotsinger, Columbian Hardware, Cleveland, and H. Balmer, of the American Pad and Textile, Chatham, were among those calling on the Montreal trade this week.

Sir Edward Kemp, president Sheet Metal Products Co., Toronto, has been appointed to the Canadian Senate, succeeding the late Hon. Frederic Nicholls, whose death was recently announced in Hardware and Metal.

H. W. Burver, representing the Foreman Cutlery Company, of Sheffield, England, called on the wholesale hardware firms in Toronto, this week.

J. H. Flack, Toronto manager of the Thos. Davidson Manufacturing Co., is located temporarily at the Montreal office, according to a recent statement from an official of the firm. W. F. Franco, is assuming the duties in the Toronto office, in the absence of Mr. Flack.

G. HOOD JOINS ONTARIO STEEL PRODUCTS CO.

Garfield Hood, who for some years has been connected with The Steel Company of Canada, Ltd., latterly at the Swansea office of the company in Toronto, is severing his connection with this firm at the end of November to become sales manager of the Ontario Steel Products Company with headquarters in Gananoque, Ontario. This is a newly created position with the latter company.

Mr. Hood's identification with The Steel Company of Canada extends over a period of seventeen years, part of which time was spent at the head office in Hamilton, Ont. Practically throughout this time he has been connected with the bolt, nut and forgings branch of the firm's business.

Hardware and Metal is informed that no appointment has yet been made of a successor to Mr. Hood at the Swansea office of The Steel Co. of Canada.

CITY RETAIL MERCHANTS ENTER CIVIC CAMPAIGN

The Toronto branch of the Retail Merchants' Association, now in process of organization, intends taking an active part in civic politics this fall. The branch is to get under way this week.

While nothing will be done until the Dominion election is over, the branch intends putting in from December 7 to New Year's Day in active campaigning.

The various civic candidates will be invited to attend a big gathering of the merchants, at which they will state their views on various civic matters in which the retailers have an interest. A slate, it is said, will then be drawn up and ward committees of retailers selected to make every effort to elect the candidates chosen.

RAIL ORDER WILL KEEP PLANT BUSY TWO MONTHS

Sydney.—That the 20,000-ton rail order recently obtained from the Canadian National Railways will keep the Sydney plant going until after Christmas, is the statement of local officials of Dominion Steel.

HARDWARE MEN HELP FORM PRODUCTION CLUB

Hamilton, Ont.—The first general meeting of the Modern Production club was held this week. The realization of this club is due entirely to two courses in modern production methods sponsored by the Y.M.C.A. during the past winter and spring. Ninety-nine enrolled for the training, representing among others the following firms: N. Slater Co., P. B. Yates Co., Hamilton Bridge Works, Canadian Westinghouse Co., George H. Lees & Co., Dominion Sheet Metal Co., Appleford Counter Check Book Co., Graselli Chemical Co., Meakins Brush Co., Dominion Glass Co., McPhie & Kelly, Bloom & Brittain.

Mr. Slater, of the N. Slater Co., Ltd., was the speaker of the evening, and his helpful suggestions were very much appreciated by all present.

The following officers were appointed: W. Sweeting, Imperial Cotton Co., president; W. Burkholder, N. Slater Co., Ltd., vice-president; F. Hoth, N. Slater Co., Ltd., secretary-treasurer.

These, with W. W. Lees, of George H. Lees Co.; G. Wood, Canadian Westinghouse; Mr. Moore, McLaren's Ltd.; J. Hunter, Hamilton Bridge, form the executive committee of the club.

TORONTO SECURES NEW WHEEL PLANT

It has just been announced that a syndicate of capitalists of Toronto, Montreal and Hamilton has formed a company under Dominion laws and a charter has been granted to the International Wheel and Rim Company, Limited, for the purpose of manufacturing a double-disc steel automobile-wheel under the Culp and Crenan patents and the new Culp demountable rim. The company has decided to locate its factory in Toronto.

WESTERN ONTARIO NOTES

Work is in progress on an addition to the new premises which W. H. Goodhue, of Ridgetown, purchased, and when completed the new building will be used as a storeroom and workshop.

The London Concrete Machinery Company, of London, Ont., has purchased outright the business of the Ideal Concrete Machinery Co., of Windsor, and the plant will be moved to London. President Henry Pocock stated to Hardware and Metal that a meeting will be held shortly to discuss whether the business will be operated separately or in connection with the London Concrete Machinery Co.

Colonial Motors, Limited, capitalized at $1,000,000 is negotiating for the purchase of the factory of the Canadian Detroit Lubricator Co., at Walkerville, and plans to start manufacturing a new five passenger auto as soon as possible. Colonel Lee A. McCalla, of Detroit, is the vice-president and general manager.

CONSIDER HARDWARE PRICE REVISIONS

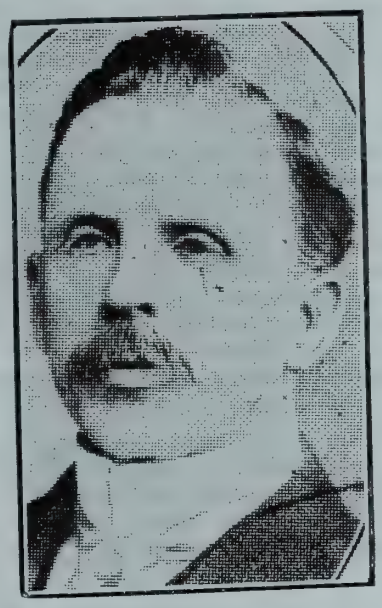
London, Ont.—At the regular meeting of the London Retail Hardware Dealers' Association the entire evening was devoted to price revision. The members have been giving this matter the most careful attention for some time and have followed the markets downward.

Keen interest is being shown among the local hardware merchants in the advertisement of J. H. Slater, of Ridgetown, Ont., reproduced in last week's issue of Hardware and Metal and several dealers are planning to follow out the idea of giving comparative prices.

"I think it is a splendid move," said secretary Thomas H. Purdom, of the Purdom Hardware. "Many merchants have been advertising that prices are down and that things are considerably cheaper than they were a year or so ago but the idea is still uppermost in the minds of thousands of buyers that any reductions that have been made are only trifling. By giving comparative prices and showing exactly the big reductions that have been made hardware merchants, and other merchants too for that matter, can get people thinking along a new line and one which will prove a stimulus to buying and that is what we all want."

DEATH OF S. H. CHAPMAN

The death is anounced of Stephen H. Chapman, for many years connected with various business enterprises in Ontario and a resident of Toronto for over forty years. The late Mr. Chapman was in his 61st year, was born at Holland Landing, Ontario, and came to Toronto when 18 years of age. After spending



LATE S. H. CHAPMAN

some years in various occupations in this city, he reorganized the Ontario Pump Company, afterward known as the Ontario Wind Engine and Pump Company. He was president of the Hurley Machine Company, Ltd., Toronto. In recent years Mr. Chapman had devoted much of his time to religious effort, being president of a number of religious organizations.

NEW PLAN FOR MARKING IMPORTS OF OIL CLOTH, ETC.

Ottawa.—Customs regulations respecting the marking of imported goods with an indication of the country of origin have been considerably changed insofar as they concern piece goods, carpets and oil cloths, it is announced by the Department of Customs.

Under the new regulations, cloth and material in the web or roll will be marked with an indication of the country of origin on one end of each web, and on the piece ticket. Carpets will be marked by means of a protruding ticket attached to the edge of each roll at the centre and linoleums and oil cloths will be marked at one end of each roll either by stamping, stencilling or adhesive label.

The former regulation called for markings every three yards on piece goods capable of being marked without injury, and every five yards on carpets.

HANDLE EXPORT BUSINESS FROM CANADIAN PLANT

Rock Island, Que.—The Butterfield Company, Rock Island, Que., and Derby Line, Vermont, have just completed their new Derby Line factory which is to entirely replace the old Derby Line plant in the manufacture of their goods. Derby Line, Vt., is just across the street from Rock Island, Que., where the Canadian plant of the firm is established. The new plant in the latter place has been in operation for about a year. The management have announced that the Canadian plant will in future handle their entire export business, a fact that will mean a considerable increase in their Canadian business. It is also reported that they have plans out for an extension to the Canadian plant to double the present size for this export trade.

Canada's Foreign Hardware Trade

DECLINE IN CANADA'S IMPORTS OF BRITISH TIN PLATES

SEPTEMBER brought about a marked improvement in British exports of tinned and black plates, though Canada's imports of these lines show marked falling off as compared with pre-war times. In August, 1913, Canada imported 744 tons of British tinned plates valued at £11,262, whereas in August, 1921, imports amounted to 194 tons valued at £5,063.

U. S. IRON AND STEEL IMPORTS FROM CANADA

Some details of United States imports of iron and steel from Canada in the month of September are interesting. Canada supplied all but 13 of the 5,549 tons of scrap iron imported by the U.S. in that month, and of the 28,946 tons of this commodity imported by the U.S. since the beginning of the year, nearly 60 per cent was from Canada. Total imports of iron and steel into the U.S. in September amounted to 11,741 long tons, of which Canada supplied 8,593 tons, consisting of 5,536 tons of scrap iron, 2,850 tons of pig iron, 86 tons of steel bars and small tonnages of other products.

IMPORTS OF ELECTRICAL EQUIPMENT FROM U.S.

Imports of electrical equipment to Canada from the United States during the month of September were as follows:

Batteries (primary and storage)	$65,823
Carbons	27,405
Dynamos and generators	139,253
Interior wiring supplies, including fixtures	22,181
Meters and measuring instruments	20,933
Motors	93,138
Switches and accessories	33,765
Telephones	87,725
All other electrical supplies	344,651

Brenner Co. Officials Committed for Trial

On various charges of theft and conspiracy Nathan Brenner, Meyer Brenner and Gordon I. Blackford have been committed for trial.

In the latest evidence Egmont Frankel, General Manager of Frankel Brothers, metal dealers, identified a cheque for the sum of $20,000 paid by his firm in 1920 to N. Brenner & Company, Ltd., on account of payment for steel purchased. This cheque was endorsed "M. Brenner, Vice-President," and contained a further endorsation, "Pay to the order of the Bank of Toronto."

It was thought by Magistrate Jones that the evidence was sufficient to show conspiracy on the part of the Brenners to defraud their creditors and to warrant a committal for trial.

It was contended by A. C. McMaster, counsel for Meyer Brenner, that no evidence had been adduced to point to any conspiracy on the part of his client.

It was also argued by I. F. Hellmuth, K.C., that the evidence did not warrant Nathan Brenner, his client, being sent to trial.

In the case of Blackford it was argued by Mr. McMaster that it should be shown that there was an attempt to defraud on his part. Such evidence, Magistrate Jones considered, was shown by the fact that Blackford admitted he had torn stubs out of the cheque books.

CANADIAN CARS SHIPPED FOR RUSSIAN OIL TRADE

Montreal.—Approximately a mile of harbor tracks were occupied by the first cargo to leave this country for Soviet Russia. The cargo consists of specially constructed steel cars made to the specifications of the Soviet Government.

The new cars are designed for the oil traffic and are expected to help considerably in the business ventures of the Soviets.

The Canadian Government Merchant Marine have the freighting of the cars from Montreal to Novvorissk, a Black Sea port. There are 500 cars in all, built at a cost of $2,000,000.

ANOTHER WAGE REDUCTION AT SYDNEY STEEL PLANT

Sudney, N. S.—A further wage reduction of 10 per cent., affecting all employees of the local steel plant and office, was announced by E. P. Merrill, general manager of the British Empire Steel Corporation.

A wage-cut of 20 per cent. was made at the local plant on January 17, and a second of 10 per cent. on June 5. Company officials state that the minimum wage for a 12-hour day under the new schedule will be $2.94 to $3.12. Three hundred men were laid off at the Sydney plant following the completion of the last Government rail order, and approximately 2,600 men are working a three-day week.

WHO CAN MAKE WOODEN VINEGAR MEASURES?

A number of inquiries have recently been received by Hardware & Metal, chiefly from various wholesale houses throughout the country, as to where they can procure wooden vinegar measures and funnels.

The only Canadian manufacturer that is known, at present, to make these products, apparently never answers any correspondence, and little satisfaction, if any, has been derived from this situation by those who have placed orders with this concern.

Should there be any other firms in Canada, who make, or contemplate making these wooden vinegar measures and funnels, a communication addressed to Hardware & Metal will result in their name being placed before the various wholesalers whose enquiries have been received by this office.

LOWER PRICES & BETTER SELLING

(Continued from Page 49)

and capital its dividend rewards. Mr. Johnson, though his factory is oversold several months in advance, is again reducing his prices.

Sub-Committee Drafts Resolution

But we had with us men who are so far away from their consumers that they really could not see our point as we did. As the difference in viewpoint was sincere and earnest, a subcommittee, consisting of Mr. Johnson, chairman of the International Shoe Co.; Mr. Gompers and myself, were appointed to draft a resolution embodying our ideas for submission to the entire conference. Here is the result discussed and changed word by word and comma by comma but finally agreed upon unanimously by the full committee:

"Specific methods for solution of our economic problems will be effective only so far as they are applied in a spirit of patriotic patience on the part of all our people.

"During the period of drastic economic readjustment, through which we are now passing, the continued efforts of anyone to profit beyond the requirements of safe business practice or economic consistency should be condemned. One of the important obstacles to a resumption of normal business activity will be removed as prices reach replacement values in terms of efficient producing and distributing cost plus reasonable profit.

"We, therefore, strongly urge all manufacturers and wholesalers who may not yet have adopted this policy to do so, but it is essential to the success of these measures when put into effect that retail prices shall promptly and fairly reflect the price adjustment of the producer, manufacturer, and the wholesaler.

"When these principles have been recognized and the recommendations complied with, we are confident that the public will increase their purchases, thereby increasing the operations of the mills, factories and transportation companies, and consequently reducing the number of unemployed."

Making The Resolution Effective

The recommendation didn't offer a panacea, and touched upon only one of the fundamental causes. The above resolution was number 7 of our entire list. The other six I consider obvious and temporary measures. This one I think will have teeth.

For the machinery for turning it into action is already being built up by Herbert Hoover, whose action in other emergencies proves him a man who knows that mere resolutions butter no parsnips. And in its recognition of the final consumer as the key man to prosperity the statement forms a fundamental endorsement of advertising as a real economic force. It offers a direct challenge to those industries which have continued doing business on the we-make-it-let-somebody-buy-it basis.

It should result in making such industries search for their final consumer, to sell him and to reach him by consistent advertising.

When men like Wm. C. Proctor, of Ivory Soap, H. S. Dennison, of the Dennison Mfg. Co., and Jackson Johnson, all advertisers, could point to 100 per cent employment, it was an endorsement of the merchandising methods of which advertising is so important a part as is seldom heard by men in other lines of industry where it is not used.

What will be the results of a statement like the above on prices? What has the conference accomplished? Has it put one man back at work? What will it mean to advertising? These are some of the questions I have been asked.

Officials and Clubs Urged To Work

Remember this is an emergency measure only. This week permanent measures such as how to turn a seasonable industry into a twelve-month business and the like will be discussed. But on the price resolution alone, which among the other emergency measures is to be passed on probably by Presidential Proclamation to the Mayors of towns and cities, and the Rotary Clubs, Chambers of Commerce and other local bodies for action, says Mr. Dickenson, there is a business principle which is now having wide application and will have a wider one. Low prices made possible by better merchandising and elimination of waste mean more trade.

BUSINESS CHANGES

Toronto.—Albert R. Hamilton, hardware, has been succeeded by Louis Wainer.

Vancouver.—Luther Smith, managing director of the Greenfield Tap and Die Company, of Galt, Ont., was in Vancouver during the week calling on his customers.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

LOWER quotations on bar iron and steel constitute one of the feature development on the current hardware markets. This change reflects easier tones in the steel industry generally, a condition described as a reaction from the firm demand recently experienced in sheets, plates, and other steel products.

Other price changes cover poultry netting; Dart unions; many lines of zinc and glass wash-boards; poultry netting staples; "D" top snow shovel handles; bench screws; certain makes of rat and mouse traps; cotter pins, and genuine Cannon oilers. Revised quotations also appear on axle and cup greases. Through a change in the discount, a new higher price level is given on canvas belting.

Prices on many other primary markets have recently registered a more stable tendency. Tin plates are again described as easier; a decline having been made by some southern steel mills. The approach of the Christmas trade season, is a contributory factor to the steady gain recorded in the proportion of current business activity. Toys and specialties supply an indication of the average anticipations in this direction, while prevailing shipments of winter goods and receipt of orders for other seasonal lines, are cited as conditions which indicate that a fairly brisk period is generally considered imminent.

MONTREAL MARKETS

MONTREAL, November 10.—New lower quotations on practically all grades of bar iron and steel constitute the feature attraction of the markets this week. Although higher prices on these lines were hardly expected owing to existing conditions at the primary sources, the decline came as more or less of a surprise at this time. Dart unions also have reduced prices through a change in discounts, and iron bench screws will now cost less. Cotter pins are lower in price, the discount now being 89 per cent. off. "D" top snow shovel handles have been reduced to $4.75 per dozen. Polarine lubricating oils, in the four grades, are advanced ten cents per gallon with other lubricants decidedly firm.

With the Christmas holiday season fast approaching, business in the seasonable lines has now taken the active turn. Jobbing houses also state that other winter goods continue to move in a satisfactory manner, and indications point to a brisk autumn and early winter trade.

POLARINE OILS ARE ADVANCED 10 CENTS

Montreal

Polarine lubricating oils, in the four grades, show an advance in quotations of ten cents per gallon. Other lubricants are remaining unchanged, but it is noticeable that crude oil continues to advance and it is felt that further revisions will follow on other lines if this continues.

POULTRY NETTING LESS 12½ PER CENT

Montreal.

In our last issue poultry netting was quoted at less 15 per cent. This quotation was not for long standing, being immediately followed by a further revision bringing the present quotation to less 12½ per cent.

CORRUGATED SHEETS ARE NOW QUIETER

Montreal

Current sales of corrugated sheets are now reported with a seasonable slackening, and with the open weather now drawing to a close, little increased activity is looked for. A spasmodic improvement in the movement may take place from week to week, with the weather permitting outside work. List prices and discounts remain unchanged, with little alteration in the market generally.

Corrugated.—

No. 28 gauge	7 00
No. 26 gauge	7 50
No. 24 gauge	10 50
No. 22 gauge	12 50
No. 20 gauge	14 00
No. 18 gauge	18 50

Less 7 ½ per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

BENCH SCREWS HAVE NEW LOWER PRICES

Montreal.

New lower prices are announced on double screw iron bench screws. This is the second reduction in recent weeks, and they are now lowered from $1.00 to $1.25 per dozen on the different sizes. Following are the new quotations:

BENCH SCREWS—	
1 inch, per dozen	$11 25
1¼ inch, per dozen	13 50
1¼ inch, per dozen	15 65

WASTE MATERIALS QUIET BUT ON A BETTER BASIS

Montreal.

There appears to be no marked improvement in sight this season in the movement of waste materials. Slight signs of a more active market were evident in recent weeks, but an increase in actual sales has as yet failed to materialize. The season is gradually drawing to the closed winter weather which usually produces added dullness for dealers, and little hope is now expressed for improved conditions this year. The tone of the market has advanced to a firmer standing, and while dealers locally have not advanced quotations to any extent, a healthier basis is now in evidence. Following are nominal prices:

Automobile tires	....	0 75
Rubber shoes	....	0 02½
Yellow brass	....	0 05
Red brass	....	0 08½
Light brass	....	0 04
Scrap zinc	....	0 03½

No. 2 busheling,	....	4 00
Boiler plate	....	8 00
No. 1 machinery cast	....	20 00

BAR IRON AND STEEL SHOW LOWER PRICES THROUGHOUT

Montreal.

The trend of steel products, insofar as bar iron and steel is concerned, took rather a sudden turn this week when quotations were lowered on practically all grades. While it was generally shown that bars, shapes, etc., did not improve in past weeks to the extent that was evident on the sheet market, it was thought by many that the market would continue quite steady for the meantime at least.

It is noticeable that conditions now at the mills have not the improved standing that prevailed last month, when a brighter outlook was furnished, and it appeared that the chances of easier prices to any extent were more remote. However, the return of previous conditions seems to have settled, and in order to obtain orders, lower quotations are extended. The extent of the decline varies on the different grades from 10 cents to 50 cents per hundred pounds. Following are local current prices:

Common bar iron. 100 lbs.	2 90
Refined iron	4 40
Irish finish machinery steel	2 95
Mild steel	2 90
Single reeled machinery steel	4 75
Band steel	2 90
Spring steel	4 50
Slighshoe steel	2 90
Tire steel	3 10
Toe calk steel	3 80
Harrow tooth steel, per lb.	3 05
Mining tool steel per lb.	0 22
Black Diamond tool and cast steel, per lb.	0 22

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

Flats, iron and steel, 3-16 and thinner, 50c per 100 lbs. extra.

LEAD PRODUCTS STILL AWAIT DEVELOPMENTS

Montreal.

The various lines of lead products remain unchanged, with the tendency also little changed. These products are apparently waiting for more marked developments in the metals on the primary markets, which continue to show slight fluctuations but resulting in little ultimate change. The recent stronger showing firmed the finished products, but not to the extent of increasing prices. This improvement is not as evident at present, leaving the chances of an early revision at least, more remote on solders and other lines. The market is, however, by no means weak but is on the other hand quite steady. Present prices are as follows;

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3* lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½

Cut sheets ¼c lb. extra, and cut sheets to size, ¾c lb. extra.

Solder, guaranteed, lb.	0 25½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 20½
Do., wiping, lb.	0 21½
Do., wire, lb.	0 35
Zinc sheets, casks	0 11½
Do., broken lots	0 12

BOILER TUBE PRICES HOLD

Montreal.

Local quotations on the various sizes of boiler tubes are holding unchanged. The recent improvement throughout the steel industry would appear to offer a firmer undertone in the tube market, but the strength is not manifest in these as would seem probable. The winter season, which usually stimulates the movement for repair work, may develop better sales than are now being made, but at present the movement is seasonably slow. Following are unchanged quotations:

BOILER TUBES—	Seamless	Lapweld
1 inch	24 70	....
1¼ inch	24 50	....
1½ inch	24 00	....
1¾ inch	26 00	27 00
2 inch	24 50	22 30
2¼ inch	27 75	25 50
½ inch	25 00	26 75
3 inch	42 50	34 00
3½ inch	54 50	49 50
4 inch	75 00	49 50

DART UNIONS SHOW A REDUCTION IN PRICE

Montreal

Through a change in discounts, Dart unions are lowered in price. Black are now quoted at less 33 per cent., galvanized at less 13 per cent. off list prices. Former discounts were 29 and 8 per cent. respectively. Other lines of fittings are holding unchanged with sales continuing of a small and sorting character. Following are present discount

FITTINGS—		
Cast Iron fittings		20%
Bushings, cast		27½%
Do., malleable		25%
Flanges		37%
Plugs		27½%
Flange unions		22½%
Malleable unions		42½%
Dart unions, black		33
Do., galvanized		13
Nipples, ⅛ to 4 in, close and short		50%

Do., 4½ to 8 in., close and short		40%
Do., long		50%
Couplings, 4 in. and under		30%
Do., 4 in. and longer		10%
Class A	0 53	0 65
Class B	0 21½	0 28¼
Class C	0 14	0 21½

IMPROVED CONDITIONS ON RANGE BOILERS

The standard list on range boilers is now more generally maintained, and the 30-gallon boiler is on a more settled quotation at $9.25. Dealers who were offering the lower price in the hope of reducing their holdings before the winter months set in, have in some instances brought their surplus to a satisfactory lower amount, and it is felt a more settled market will again prevail. Manufacturers are upholding the standard prices and believe distributors should again ask the higher price which offers a reasonable profit for their handling. Following are standard quotations:

RANGE BOILERS—	Standard.	Ex.Heavy
30 gallon	9 25	11 75
52 gallon	21 00	26 00
35 gallon	12 00	14 50
40 gallon	14 50	17 00
52 gallon	21 00	26 00
66 gallon	30 00	36 00
82 gallon	37 50	50 00
100 gallon	48 00	58 00

SHEETS ARE SLIGHTLY EASIER WITH PRICES HOLDING

Montreal

Quotations on all kinds of sheets show no change from former levels, notwithstanding other markets are reported as recording a decline in some prices. New mill prices are now announced on bright tin plates but do not warrant the announcement of lower prices. The market does not show such a marked degree of strength as was manifest during recent weeks, although the decided easing is more pronounced on other lines in the steel industry than in the sheet market. Considering the small margin of profit now obtainable, it is felt that easier prices to any extent are unlikely even if conditions at the primary sources do not uphold the recent improvement. Local quotations are as follows;

BLACK SHEETS

10 gauge	4 30 to	4 65
12 gauge	4 40	4 75
14 gauge	4 50	4 85
16 gauge	4 60	4 95
18-20 gauge	4 80	5 20
22-24 gauge	4 90	5 35
26 gauge	4 95	5 40
28 gauge	5 00	5 50

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

COTTER PINS NOW 89 PER CENT. OFF

Montreal

A reduction is made in the prices on cotter pins through a change in discounts. These are now quoted less 89 per cent.

"D" TOP SNOW SHOVEL HANDLES ARE REDUCED

A reduction has been made in the price of "D" top snow shovel handles, and these are now quoted at $4.75 per dozen.

ROOFING BUSINESS CONTINUES ON ACTIVE SCALE

Montreal

The volume of current business in ready roofing is satisfactory with the continuance of open weather. An increased demand is usually evident at this season, for the roofing and repair of buildings before the colder winter weather sets in. The beginning of December brings the booking season for next year's supplies. With dealer stocks low, manufacturers and distributors anticipate a good amount of booked business. Prices on all lines are at lower levels than last year at this time, which should assist towards greater sales. However, whether a further change in quotations will be announced for next season is not yet ascertained. It is thought that any revision in prices would be in a downward direction, as higher prices are hardly warranted with raw materials and other productive costs at their present levels. If the revision is forthcoming, changes will be announced to the trade before buying for future commences with the usual protection to cover over the spring buying period.

INGOTS STEADY WITH UNCHANGED PRICES

Montreal.

With no changes in local quotations on the different ingot metals the markets seem to have settled on a fairly steady footing. Slight fluctuations continue in some metals but not of such a definite character as to cause any marked change in local conditions or prices.

TIN.—The changes in this metal have been very slight, the market advancing one day and then re-acting. There is nothing to indicate any marked change in the near future, and local price remains at 35½ cents.

COPPER.—This metal is more or less quiet with the market steady and a small volume of business passing. Producers are apparently marking time with the present state of affairs and are awaiting the next buying movement. Local prices are unchanged at 17¼ cts. for electro, and 17 cts. for casting.

LEAD.—London is fairly strong and while it would seem as though a slight re-action was due, the metal is strongly controlled in that market. Local prices are firm in view of the anticipated advance when navigation closes, at 6¾ cents.

SPELTER.—London holds firm but East St. Louis is slightly easier although without any sign of continued weakness. There is no special feature of interest, and local market is unchanged at 7¾ cents.

ANTIMONY.—This metal is quiet and unchanged at 7 cents for Chinese, and 8 cents for high grade English.

ALUMINUM.—Remaining very dull on the market, aluminum is again weaker in price this week and is now quoted at 27 cents.

TORONTO MARKETS

TORONTO, November 10.—Price developments continue to constitute the feature attraction on the current hardware markets. Interest centres around the prevailing lower prices on bar iron and steel; a downward revision which reflects the recent easier tone in the primary steel markets. Other revisions include lower prices on many lines of zinc and glass washboards; Dart unions, and poultry netting staples.

The new quotation on poultry netting is less 12½ per cent.; a change which was outlined in last week's issue of Hardware and Metal. The Victor and Hold-Fast makes of rat and mouse traps again show slight price reductions; while there is also another downward revision in cotter pin prices. Revised quotations also appear on the Mica axle grease, and the Arctic grade of cup greases. Tin plates are easier in primary market circles.

The proportion of current business continues to reflect a steady gain in activity; the approach of the Christmas season being considered a contributory factor in this situation. Preliminary conditions indicate that a fair period of trade is anticipated, with shipments of winter and early spring goods now firmly in evidence. The toy industry supplies a practical example in this connection.

POULTRY NETTING STAPLES SHOW PRICE REDUCTION

Toronto.

New lower quotations are now given on galvanized poultry netting staples, in conjunction with the recent revision in prices on poultry netting and fencing. The latest prices on staples are as follows:

POULTRY NETTING STAPLES—

Galvanized.	¾″	⅞″ Per cwt.	1″
In 100 lb. lots	7 50	....	....
In 25 lb. quantities	8 50	....	....
In 10-lb. packets	9 00	....	....

MOUSE AND RAT TRAPS AGAIN SLIGHTLY LOWER

Toronto.

Quotations on mouse and rat traps have again undergone a slight downward revision. These new prices on both the Victor, and Hold-Fast lines are as follows:

TRAPS—	
Mouse—	
Victor, per gross	3 00
Hold-Fast, per gross	3 50
Rat—	
Victor, per dozen	1 35
Hold-Fast	1 40

ANOTHER REVISION IN COTTER PIN DISCOUNTS

Toronto

Another revision now appears in the discount on cotter pins, the new quotations being, list less 82½, 30 and 10. The previous discount was 82½, 20 and 10 per cent.

DECIDE ON NEW DISCOUNT FOR POULTRY NETTING

Toronto.

As pointed out in the Toronto market section of last week's Hardware & Metal quotations on poultry nettings are now revised. The extent of the decline is fairly substantial and the new discount is now 12½ per cent. off list. This applies to both the 1-inch and 2-inch mesh.

An additional discount of 5 per cent. is being given on all orders placed prior to December 31.

DISCOUNT ON WIRE CLOTH FOR EARLY BOOKING

Toronto.

Referring to the new lower prices on screen wire cloth which were contained in the Toronto market section of last week's issue; an extra discount of 5 per cent is being given on all orders placed before the end of the year.

In connection with the revised quotation of $3.00 per 100 square feet, on the painted black screen wire cloth, a typographical error appeared in the Hardware & Metal report covering this price change, and the figure "100" was inadvertently omitted.

REVISED PRICES APPEAR ON AXLE GREASES

Toronto.

Higher quotations, which reflect the strength of the oil markets generally, now appear on axle grease and cup grease. These revised prices on the Mica axle grease, and No. 2, and No. 3, grades of Arctic cup grease, are as follows:

MICA AXLE GREASE—	
In cases of 24 3-lb. tins	$10 15
In cases of 12 3-lb. tins	5 40
In cases of 48 1-lb. tins	7 35
Above quotations, less 15 per cent.	
ARCTIC CUP GREASE, No. 2—	
In cases of 6 5-lb. tins	4 55
In cases of 36 1-lb. tins	6 15
In cases of 24 1-lb. tins	4 30
In cases of 12 1-lb. tins	2 35
Less 15 per cent.	
ARCTIC CUP GREASE, No. 3—	
In case of 6 5-lb. tins	4 90
In cases of 36 1-lb. tins	6 35
In cases of 24 1-lb. tins	4 45
In cases of 12 1-lb. tins	2 50
All less 15 per cent.	

LOWER QUOTATIONS APPEAR ON WASH BOARDS

Toronto.

Wash boards of both zinc and glass manufacture now register a decline in prices. The easier levels are attributed by manufacturers and distributors as being primarily due to lower costs of the raw material, notably zinc and glass. While the decline in zinc prices has

been obtained through importation from Belgium, yet it is pointed out very little reduction has been made in glass costs, but that quotations on all the finished products have been lowered by the makers in proportion. Some glass for this purpose has recently been imported from England. The price lists therefore, still retain their uniformity as regards the variance between the prices on different makes and styles. The new quotations follow:

BOARDS, WASH—

Zinc and Glass.	Per doz.
Baby Globe	2 45
Beaver (brass)	8 00
Canada (glass)	9 00
Competition Globe (metal)	5 90
Diamond King (glass)	8 00
Enamel Queen	9 00
Glass Globe	8 00
Improved Globe	5 25
Jubilee	5 80
Neptune	5 25
Newmarket King	5 80
Pony	2 45
Royal Globe (zinc)	5 25
Original Globe, solid back	5 95
Standard Globe	5 25
Supreme (zinc)	6 50
Western King (enamel)	9 00

F. o. b. factory.

DART UNION DISCOUNTS ARE NOW REVISED

Toronto.

Through a revision in the discounts, quotations on the various sizes of Dart black unions are now lowered. The extent of the decline is approximately 10 per cent. Prices on other lines of pipe fittings generally remain unchanged this week, with an average volume of sales being recorded. Only moderate business is anticipated, according to distributors of these products, during the current season of the year. The list on pipe fittings, including the revised discounts on Dart union, is as follows:

PIPE FITTINGS—

	Per cent.
Cast iron fittings	25%
Plugs, cast iron	28%
Do., solid	28%
Do., countersunk	28%
Bushings, mall	28%
Bushings cast	28%
Unions ¼ in. to 2 in.	45%
Unions, ⅛ in., 2½ to 4 in.	45%
Flanged Unions	25%
Dart Unions, blk., ⅛ to 2 in.	33½%
Do., ⅛ in., 2½ in. and larger	23%
Nipples, blk., and galvd. ⅛ to 4 in., close and short	50%
Do., 4½ in. and larger	40%
Do., long, ⅛ in. to 4 in.	60%
Do, 4½ inch and larger	50%
Do., running thread	30%
Couplings, 4 in. and under	30%
Do., 4½ in. and larger	10%

MALLEABLE FITTINGS—

	Black	Galvanized
Class A	0 55	0 68
Class B	0 23	0 33
Class C	0 15	0 23

RANGE BOILER QUOTATIONS NOW WELL MAINTAINED

Toronto.

While a slight tendency was recently noticeable in the direction of price shading on the revised list quotations on range boilers, principally due to efforts to lower supplies of the 30-gallon size,—this situation has now improved and prices are generally being maintained. Distributors state that these products are now entering the season when the volume of sales is naturally more confined, and current conditions are such that dealers with stocks heavier than usual are naturally anxious to dispose of their holdings prior to the arrival of the winter months. The prevailing list remains as follows:

RANGE BOILERS—	Standard	Ex. Heavy
30 gallon	$ 9 25	$ 11 75
35 gallon	12 00	14 50
40 gallon	14 50	17 00
52 gallon	21 00	26 00
66 gallon	30 00	36 00
82 gallon	37 50	50 00
100 gallon	48 00	58 00
120 gallon	57 00	67 00
144 gallon	.....	76 00

PRICE DECLINES IN IRON AND STEEL MARKETS

Toronto.

Declines of varying extent on the different products now appear in the iron and steel markets This condition has resulted from the recent easier tone of the industry generally, when the degree of improvement somewhat slackened, and the tendency towards firm prices was not maintained The current reductions, therefore, indicate the lower mill prices combined with a return of similar elements in these markets which developed during the dull summer period. Following are the easier price levels:—

Mild Steel bars, base	3 00	3 25
Mild steel bands, 3-16 in. base	3 50	3 75
Bar iron, base	3 00	3 25
Angle iron, base	3 10	3 45
Horseshoe iron	3 75	4 10
Tire steel	3 50	3 75
Spring steel	5 00	5 50
Crucible cast sheet steel	30 00	.35 00
Mining drill steel	.. ..	18 52
Cast tool steel, high grade	20 00	23 00
Cast tool steel, medium	30 00	36 00
Sleigh shoe steel	3 00	3 25
Hoop steel	3 50	3 75
Toe caulk iron	4 00	4 50
Norway iron	12 50	15 00

EXPECT FAIR SEASON IN TOYS AND SPECIALTIES

Toronto.

With the approach of the Christmas season, preparations are being made for the prospective annual trade in toys, specialties, and other lines, enjoyed by the hardware industry during this period of the year. Early indications in this direction are generally regarded as promising from the viewpoint of normal business.

As referred to in a previous market report contained in a former issue of Hardware & Metal, the influx of German manufactured goods is now manifest. This is particularly noticeable in the supplies of toys now appearing on the markets. A larger representation of toys of this European origin is now evident, but it is pointed out that deliveries of foreign goods of this nature are undoubtedly smaller in volume than they would probably have been, on account of the revised valuation plan adopted in recent tariff regulations.

Under existing circumstances, the United States markets offer a better opportunity to German toy manufacturers, and it is said that in the mechanical toy field, goods of foreign origin predominate. The Canadian toy market is far from being flooded in this respect, for the usual proportion of British and American articles are to be observed, but with a much smaller quantity of Japanese products this season than has been the case during previous years when European goods were not available.

Up to the present, the activity in the toy field is described as fair. The conservative buying policy generally adopted by retail merchants in practically all lines of trade, is also evident with regard to purchases of toys, and stocks are of a moderate nature. The increased range and greater variety of toys coming on the market, is claimed as an indication that business in these lines will be up to expectations, in spite of the smaller-sized orders. For this reason, both manufacturers and distributors are preparing for a bigger rush than usual later in the season, as the requirements of the retailer and the public becomes manifest.

SCRAP MATERIAL MARKETS GENERALLY QUIET

Toronto.

The scrap material markets are generally in a quiet state, with the undertone holding to the recent slight improvement. The attitude of dealers is presented in the fact that accumulations of iron and steel scrap are strongly held, and future activity is still being anticipated in many quarters. Copper and brass scrap have been a little more prominent than the other metals, but business in these markets generally has been of a subdued nature, with no marked developments having been recorded. Following are dealers average prices for fairly large quantities:

Scrap Iron		
Gross Tons—		
Heavy melting steel (Hamilton)	9 50	10 00
Borings and turnings	2 50	3 50
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	5 50	6 00
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	15 00	16 00
Stove plate	11 00	12 00
Grate bars	10 00	11 00
Standard car wheels	13 50	14 00
Scrap Metals.		
Heavy copper and wire	9 25	10 00
Light copper	7 50	8 00
No. 1 composition	8 00	8 50
No. 1 comp. turnings	6 00	6 50
Light brass	3 00	3 50
Heavy yellow brass	5 00	6 00
Heavy lead	3 75	4 00
Tea lead	2 00	2 50
Scrap zinc	3 50	4 00
Scrap Rubber		
Boots and Shoes	2 00	2 50
Lumbermen's Rubber boots	1 25	1 75
Auto tires	0 50	1 00
Solid tires	0 75	1 25

WOOD HANDLE PRICES IN UNSETTLED CONDITION

Quotations on wood handles are now reported to be in an unsettled condition. Advice recently received from one manufacturer of wood handles indicates that as circumstances now exist, there are practically no longer any standard prices remaining. The tendency has been outlined to some extent in previous issues of Hardware & Metal, when expected lowerings materialized on harvest tool handles during the latter part of October. Easier quotations now appear on certain makes of snow shovel handles also.

TIN PLATES EASIER IN PRIMARY CENTRES

Toronto.

Recent reports from southern primary steel markets indicate that some of the largest producers are putting into effect lower quotations on tinplates. The extent of the decline is approximately $1.00 per ton, and the new prices are stated as good until the end of March, 1922.

The tinplate markets have been far from strong during the past few weeks, and some lowerings have recently developed in local prices on coke tin and Canada plates. These are now generally holding at the following levels:

	Per box
PLATES, CANADA—	
Dull 60 sheets	$5 65
Ordinary, 52 sheets	5 60
PLATES, COKE TIN—	
I.C., 20 x 28, 112 sheets	16 00
IX, 20 x 28, 112 sheets	19 00
1X, 20 x 28, 56 sheets	12 00
PLATES, CHARCOAL TIN—	
1X, 20 x 28, 56 sheets	14 00
1XX, 20 x 28, 56 sheets	16 00
PLATES, TERNE—	
1C, 14 x 20, 112 sheets	12 00

PENDULUM MOVEMENT IN INGOT COPPER

Toronto.

The pendulum in the ingot metal markets is alternately swinging towards improvement with increased demand and higher prices, and then in the direction of price fluctuation with easier tones generally. This procedure has been especially marked in the copper markets, and prices on this metal are again firming up, due to a slight recovery in demand. This upward movement shows a return, at least to some extent, of the betterment in copper evidenced a few weeks ago; from which higher levels, quotations have since receded. Producers are still claiming that the prevailing markets are not attractive, and state that their hope lies in the direction of higher prices being maintained on futures, coupled with increased consumption.

The primary tin markets still retain varying fluctuations, but the general trend seems to be in an upward direction. The recent gains in the exchange rate, have served to enhance tin values. Aluminum quotations are showing signs of easing in the primary stage; but changes in the ingot markets generally have not been sufficiently marked to reflect on the current local quotations, which remain practically unchanged.

COPPER.—After the rise in the copper markets, tabulated a few weeks ago, the strengthened inquiry and the price gains were not retained, and a re-action set in. Quotations receded from the higher levels attained on the primary markets, and the proportion of inquiry for copper fell away in a marked degree. Recent reports from primary sources, now indicate that the copper markets are again on the mend, having resumed the upward tendency. How far these repeated fluctuations are likely to develop, at present seems difficult to discern. It is noticeable that the frequent changes both upward and downward on outside markets have not been considered of sufficient importance by prominent local dealers in metals to reflect any corresponding revision in domestic prices. The average current quotation on copper, therefore remains locally at 17 cents.

TIN. — The recent marked fluctuations in sterling exchange have had the result of keeping the trade guessing as to absolutely correct values in tin. This atmosphere of change on the primary markets, has not been reflected locally however, the quotations remaining unchanged at 35 cents. Some degree of importance is attached by southern producers to the report that more tin plate mills will be starting in the near future. It is expected that this development should lead to some increased buying of tin; but on the other hand accumulations are still said to be fairly heavy.

LEAD.—Primary markets report a slight increase in the demand for lead, and now that the railroad strike controversy has been satisfactorily settled in the States, the lead markets there have again resumed a firmer attitude. Prices are generally unchanged, and the local quotation of $6.50 still prevails.

SPELTER.—Several of the leading producers of spelter are still out of the market, but report a confident feeling that under these circumstances, the present depression will not be of long duration. Judging by the recent slight increase in current purchasing, consumers' stocks are getting down to the point where a resumption in heavier buying is looked forward to in the not far distant future. Outside of this factor, the markets are generally quiet. Local prices still remain at $7.00.

ANTIMONY.—No sales of any consequence have been recorded in this market. There has been a slight easing in quotations on the southern primary markets, but it is said that the lower offerings have not been taken up. The local situation holds steady, with prices unchanged from 8 to 10 cents.

ALUMINUM.—This market contains no new features. The prevailing price levels continue to hold unchanged, and this can also be said of local quotations, which remain at 28 cents.

LONDON MARKETS

LONDON, November 9.—Canvas belting, poultry netting, and screen wire cloth, offer the principal price changes on this week's hardware markets. Interest is attached to the revision in poultry netting in view of the fact that the new quotations are approximately 20 per cent. lower. The current decline in prices on the painted black screen wire cloth is also 15 per cent. lower; while the change in canvas belting quotations is of an upward nature, the higher level being attained through revised discounts.

Prices on other commodities generally remain unchanged, with the prevailing trend of business continuing seasonably good. There is an increasing demand for winter goods; such lines as stoves and furnaces, with their various accessories, enjoying a marked degree of activity at present. Reports on collections continue fairly good.

CANVAS BELTING PRICES ARE INCREASED

London, Ont.

New higher prices are now in effect on canvas belting, the extent of the increase being around 7½ per cent. The revised quotation is list less 60 per cent.

SPRING BOOKING PRICES ON SCREEN WIRE CLOTH

London, Ont.

New lower prices for Spring booking now appear on screen wire cloth. The downward revision in this respect now brings quotations on the painted black to $3.00 per 100 square feet, with an extra discount of 5 per cent on orders being placed prior to December 31.

LOWER QUOTATIONS ON POULTRY NETTING

London, Ont.

The revised quotations on poultry netting are now announced as list less 12½ per cent, with an additional 5 per cent on all orders received prior to December 31. This revision applies to the Canadian poultry netting, on both the one-inch and two-inch mesh.

LINSEED OIL PRICES HOLD UNCHANGED

London, Ont.

While linseed oil quotations are primarily holding unchanged at the level of 87 cents per gallon for raw, and 90 cents for boiled, yet these markets generally continue of a fluctuating nature. However, the following quotations are generally conceded to represent the average of present values in this commodity:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrels, per Imp. gal.	0 87	0 90
3 to 5 bbls., per Imp. gal.	0 86	0 89
6 to 9 barrels., per Imp. gal.	0 84	0 87

Less barrels add 15 cents gallon.

SEASON FOR BUCK SAWS

London, Ont.

The season for the more strenuous application and general practical use of the buck saw is now at hand. There is a fair demand at present in evidence. Prices are remaining steady, at the following levels:

BUCK SAWS—	
Happy Medium, per doz.	15 50
Prince Rupert, per doz.	20 50
Arrow Head, per doz.	20 50

HIGH PRICES STILL NOTED ON TURPENTINE

London, Ont.

Prices on turpentine are reported as remaining firm, with the recent higher quotations still prevailing. Whether this tendency will hold, or easier tones develop, is difficult to ascertain, for in view of the recent fluctuations in the turpentine markets, almost any trend is primarily based upon southern costs, and is stated to be merely a reflection of the current demand coupled with the state of available supplies at Savannah centres. The following prices, therefore, still hold, with fair sales reported:

TURPENTINE—	Imp. Gal.
1 barrel lots	1 22
2 and 4 barrel lots	1 21
5 gallon lots	1 37

PUTTY SALES INCREASE

London, Ont.

Increasing demand is the only feature of the putty market. Quotations are holding steady to firm with sales now very active. This may be expected to continue during the month, as November marks the busy season for this product. Following are unchanged quotations:

PUTTY—	
Standards, 100-lb. drums, per 100 lbs.	6 30
Standard, 25 lbs., per 100 lbs.	6 55
Pure, 100 lb. drums, per 100 lbs.	7 80
Do., 25 lb drums, per 100 lbs.	8 05

FAIR SALE CONTINUES FOR WHITE LEAD IN OIL

London, Ont.

The mild weather has recently assisted in the current sales of white lead in oil. At present, however, sales are usually in small quantities only. Following are the unchanged quotations:

WHITE LEAD IN OIL—	Tons.	Less Tons.
Pure, Per 100 lbs.	13 30	13 65
Elephant, per 100 lbs.	13 80	14 15

REPORT AVERAGE DEMAND FOR MANURE FORKS

London, Ont.

Dealers now report a seasonal sale for harvest tools, especially ensilage forks, vegetable scoops, beet forks and similar products. The demand is stated to be well in keeping with the average expectations. Quotations remain at list, less 60 per cent.

GOOD DEMAND EXISTS FOR LANTERNS & GLOBES

London, Ont.

There is a good seasonal sale at present for lanterns and lantern globes. Prices on these products remain at the recent downward revisions, which are as follows:

LANTERNS—	
Tin short or long pattern, per doz.	12 00
Dietz D Lite, per doz.	19 75
Coleman Gasoline, each	7 50
Lantern Globes. Short or long pattern.	
1 doz. to case, per doz.	1 35
3 doz. to case, per doz.	1 25
6 doz. to case, per doz.	1 20

PYREX GLASS OVENWARE IN FALL MOVEMENT

Toronto.

Among the products at present experiencing a good Fall sale is the Pyrex line of glass ovenware. There has been no recent change in prices, the quotation remaining at list less 30 per cent.

SEASONABLE SALES FOR ASH SIFTERS

London, Ont.

The approach of the cold weather and the commencement of the furnace season, has been reflected in current demands for ash sifters. Many dealers report sales of these products being good at present. Following are unchanged quotations on popular lines:

ASH SIFTERS—	
Banner, No. 2, each	3 00
Banner, No. 3, each	2 00
Common Wood Sides, dozen	3 00

FAIR DEMAND FOR SPADES, SHOVELS AND SCOOPS

London, Ont.

Dealers also report a good sesonable sale of draining spades, scoops, and shovels. The recent price revision on these products, which lowered the quotations almost 20 per cent, has undoubtedly stimulated the current demand. The discount of 55 per cent. is now given.

IMPROVED MOVEMENT OF WINDOW GLASS

London, Ont.

The current sales in window glass are noticeably improving and good sorting sales now prevail. This betterment is seasonable, and has been generally anticipated since the advent of the Fall at the revised net list for both single and double diamond: with cut lights quoted at 75 per cent. off light list.

BETTER MOVEMENT IN CUTLERY PRODUCTS

London, Ont.

There is a fair proportion of sales recorded for pocket knives, carvers and table cutlery generally. Quotations have been lowered in many of these lines this Fall, and the prevailing demand noticeably heavier for the English makes.

WEATHER STRIP SALES NOW ON THE INCREASE

London, Ont.

Weather strip sales are now increasing with the advent of colder weather. The seasonal demand for this product is now under way, and a fair movement is generally reported. Quotations are as follows:

WEATHER STRIP—	
Frost King Felt .	
Per doz. pkgs.	5 00
Wood and Felt.	
No. 60, list, per foot	0 05
..o. 61, list. per foot	0 05
No. 61½, list, per foot	0 07
No. 64, list, per foot	0 10
Less 45 per cent.	

NAIL DEMAND BETTER WITH FIRMER TONE

London, Ont.

There has recently been a firming up in the tone of the nail market generally, and a fair movement in these products is evident at present. Since the lest revision on wire nails a few weeks ago, quotations have remained unchanged at the following levels:

Wire nails ..... $4.25 base
Cut do ..... $4.95 base
Miscellaneous wire, list, less 70 per cent.

BRISK SALE FOR ROOFING AND BUILDING PAPERS

London, Ont.

Roofing and building papers are included among those products recently showing a fair proportion of activity. The demand in this line is considered seasonal. There has been no further revision in prices, which are as follows:

ROOFING—	
Ontario, 1 ply, sq.	1 95
Ontario, 2 ply, sq.	2 40
Ontario, 3 ply, sq.	2 85
BUILDING PAPERS—	
Plain Fibre, No. 2, roll	0 70
Tarred Fibre, No. 2, roll	1 00

WINNIPEG MARKETS

WINNIPEG, November 9.—Reduced prices appear on a number of hardware lines this week, the principal changes being as follows: galvanized clothes lines; screen wire cloth; poultry netting and fence wire; screen doors; genuine Cannon oilers; and hay fork, manure fork, hoe, and rake handles. Through revised discounts, a decline of almost 20 per cent. is given on shovels, scoops and spades.

Other primary commodities remain unchanged, with quotations in some lines having developed a steadier attitude generally. Trade in seasonal lines is now quite brisk; this degree of activity being especially noticeable in stoves, ranges and heaters, and furnace accessories. Winter goods are being shipped, and a fair period of trade in these products is anticipated.

SLIGHT SHADING IN BOILERS TO LOWER STOCKS

Winnipeg.

The undertone of the market for range boilers continues firm, as do most other sheet products. The season is now advancing and jobbers are finding a slight slackening in sales. Some houses are offering reduced prices in order to dispose of their surplus stocks. Following are the prices prevailing generally:

RANGE BOILERS—	
20 gallons, each	10 00
30 gallons, each	10 00
35 gallons, each	13 25
40 gallons, each	16 25
52 gallons, each	23 45
66 gallons, each	33 15
82 gallons, each	40 60
100 gallons, each	62 50
120 gallons, each	75 00

GALVANIZED CLOTHES LINES SLIGHTLY REDUCED

Winnipeg.

The prices on galvanized clothes lines are a trifle lower this week. The following are the latest quotations:

CLOTHES LINES—

No. 19, (galv.), 100 ft. per doz.	7 00
Do., 50 ft., per doz.	4 25

SCREEN WIRE CLOTH NOW ALSO COSTS LESS

Winnipeg.

Reduced quotations also appear on screen wire cloth, for spring booking. The new ruling price is $3.10 per 100 square feet.

SUBSTANTIAL REDUCTION IN SCREEN DOOR PRICES

Winnipeg.

A big reduction has been announced in prices on both common and Kasement screen doors. Following are the latest quotations:

SCREEN DOORS—

Common.	Price per doz.
No. 1	21 50
No. 2	27 50
No. 9	47 50
Kasement.	**Price per doz.**
No. 1	33 50
No. 2	41 00
No. 3	33 50
No. 4	41 00

CANNON PUMP OILERS HAVE LOWER PRICES

Winnipeg.

Lower prices are quoted this week on Genuine Cannon Oilers: Following are the revised quotations;

PUMP OILERS—

Genuine Cannon.	
No. 351, per doz.	14 50
No. 353, per doz.	16 25
No. 355, per doz.	18 00

POULTRY NETTING PRICES ARE NOW LOWER

Winnipeg.

Lower quotations are now given on the Lay Flat poultry fencing, and prices on the old style netting also register a slight decline. The revised quotations on both grades are as follows:

POULTRY NETTING—

Lay flat. Price per roll.
2 x 24, $3.40; 2 x 30, $4.00; 2 x 36, $4.75; 2 x 48, $6.20; 2 x 60, $7.75; 2 x 72, $9.20.

Old style. Price per roll.
1 x 24, $6.75; 1 x 30, $8.20; 1 x 36, $ 9.70.

HARVEST TOOL HANDLES HAVE LOWER PRICES

Winnipeg.

All lines of harvest tool handles are reduced in price this week. Following are a few of the latest quotations:

WOOD HANDLES—

Hay fork, 4 ft., per doz.	3 50
Do., 4½ ft., per doz.	3 90
Do., 5 ft., per doz.	4 60
Do., 5½ ft., per doz.	5 20
Straw fork, 4½ ft., per doz.	4 50
Do., 4½ ft., per doz.	5 20
D. Manure fork, per doz.	8 20
Long manure fork, per doz.	7 55
Rake, per doz.	6 00
Hoe, per doz.	3 40

SHEET MARKETS FIRM; PRICES HOLDING

Winnipeg

It was generally indicated that quotations would be higher this week on both black and galvanized sheets, but former prices are still holding. The tone in the primary steel markets continues firm. It is thought that as long as stocks hold out, prices will not change, but as soon as it becomes necessary to replenish stocks, prices will go up. Local current quotations are as follows:

SHEETS—

Black Price per 100 lbs.		Galvanized	
10 gauge	$5 70		
12 gauge	5 70		
14 gauge	5 80		
16 gauge	5 90	16 gauge	$6 75
18 gauge	6 30	18 gauge	6 90
20 gauge	6 30	20 gauge	6 90
22 gauge	6 35	22 gauge	7 05
24 gauge	6 35	24 gauge	7 05
26 gauge	6 40	26 gauge	7 20
28 gauge	6 65	28 gauge	7 80
		10¾ oz.	8 20

PITTSBURG MARKETS

PITTSBURGH, November 10—Production of pig iron in October was at the rate of about 14,600,000 gross tons a year, or 22 per cent higher than in September. If steel ingot production increased in the same ratio it was at close to 40 per cent of capacity in October, against 32 per cent in September and 21 per cent in July.

Unfortunately the fact is not altogether as good as it looks. Increased production is excellent when it proves there is increased demand, but production without demand is not good. Of course there was demand in October, but in not a few quarters it is doubted whether the demand was sufficient to justify so large an increase in production over September. After the middle of October the general iron and steel market turned distinctly quieter, and producers fear that in consequence the softening in prices will be accentuated. As prices of steel products are already relatively low it does not seem that lower prices are needed for the purpose of broadening demand. Pig iron does not present altogether the same case, as pig iron is relatively higher than steel, by reason of the greatly increased freight rates having more effect on pig iron costs than on steel making costs.

General Situation

For many months the matter of demand upon the steel mills has been conspicuous, the relationship between steel demand and what is called "general business" being complicated. Ordinarily, steel activity is considered an index to general activity, and indeed the adage that "iron is the barometer of trade" goes farther than that, for it counts upon iron and steel activity coming somewhat before general business activity. There was a divergence between steel activity and general activity last July, of one sort, and now there is a divergence of another sort. Last July the case was that there were stocks of steel and manufactured wares that had to be liquidated, and the demand upon the steel mills was far below a relation to actual consumption. For a week or two the mills operated at less than 20 per cent of capacity, but the actual consumption of steel and steel products was not as low as that. As stocks were liquidated demand upon the mills increased, until in the fore part of October it was 35 to 40 per cent of mill capacity.

The divergence is that the commercial activity is of such a character that it does not absorb its usual proportion of steel. There is very active work in building garages and dwelling houses, but that takes little steel. The same amount of money spent on power stations, factories and hotel and office skyscrapers would mean much more steel. There is much activity in road-building, but that consumes very little steel. The same amount of money spent on railroad track, freight cars and locomotives would mean a great deal of steel.

What the steel industry needs for its business to get better is not for business in general to get better, but for it to run more to construction work and the various kinds of activity that involve steel consumption. Perhaps general business is not getting better. Perhaps it is getting worse, and quite possibly that will be a good thing for steel. The secretary of the treasury, who was Pittsburg's leading banker before he was called into President Harding's cabinet, is quoted in the daily press as saying he favors the secretary of war giving Pittsburg an extension of time in raising the bridges here, ruled by the previous war secretary to constitute an obstruction to navigation, on the basis that construction costs are likely to come down still more in the future.

Steel Prices

For a fortnight, the American Steel and Wire Company (Steel Corporation) has been soliciting its customers for contracts at present prices, as advanced September 12th, on the ground that prices are going to be advanced. The first report had it that nails were to go up 15 cents a keg, but it is understood now the contemplated advance is $2 a ton all around, which would make plain wire $2.70 and wire nails $3. Usually when a wire advance is undertaken the date for the advance is set. This time no date is named, the fact suggesting that it takes more time than usual to round up the contracts. The Youngstown Sheet & Tube Company, which did not make the September 12th advance at the time, announced its advance November 1st.

In sheets our report of a week ago noted that the $5 a ton advance attempted by independents had failed, the market being easier in tone instead of stronger. Now not a few independents are cut-

(Continued on page 60)

Fall Rearrangement of Paint Stock

Paint Stock Can be Rearranged to Advantage at This Season of Year Keeping Seasonable Specialties to the Front—Keep Accessory Products Close to Main Products—Keep Shelves Well Stocked as Customer Cannot See Your Reserve Stock—Importance of Carrying Adequate Stock.

A HARDWARE merchant who has made a good success of paint trade at this season of the year states that much of his success is due to the fact that he watches carefully the arrangement of the paint stock. He believes in keeping the specialties well up to the front as they are much in demand for light household work and they carry a good profit. He believes in keeping accessory products close to the main products. For instance the dressing for automobile tops is kept close to the automobile enamel so that a customer looking over the stock for one or the other cannot help but see the other line which will probably carry an equally important appeal for his requirements. In the fall there are many motorists who believe in giving their car a coating of enamel and the top some top dressing so as to protect it against the wet rains of fall and the melting snows of winter. These are good lines to feature at this time for they also reach the motorist who lays his car up in the winter and spends his spare time overhauling and repainting it for next summer's use. Grouping all possible automobile lines will increase trade in these specialties.

Shelves Well Stocked

"See that the shelves are kept well stocked up and well to the front of the store," says this merchant, pointing out that the customer cannot guess what you have in your stock room and only judges the stock by what is seen. Another item of good advice handed out by this merchant is never to sell a customer anything he does not want or for which he has no practical use. This is apt to follow too enthusiastic salesmanship on the part of some paint department salesman. On the other hand there are undoubtedly many ways in which paint business can be created and salesmanship must be used to develop these ways.

Some panels finished up with various stains provide an effective means of securing interest in paints and specialties in the fall. Oftentimes the housewife cannot visualize as effectively what the woodwork, floors or walls will look like when finished with paints as shown on color cards, as when seen on a large panel. Interest in these panels when displayed in the store will show the merchant that he has a prospect and this prospect can probably be developed not only for business in paints, but in varnishes, specialties, brushes and many other lines, according to circumstances. Very often the customer has overlooked the possibilities for improved appearance of the home interior which follow the use of furniture or stove specialties, floor stains and paints, wall and ceiling finishes, etc.

Specific Instructions

Service is an important factor which cannot be too much emphasized, for as a hardware merchant recently stated to Hardware and Metal, the average purchaser of paints has little appreciation of the technical knowledge required to make satisfactory application of paints and varnishes. and he must be given specific instructions in order to secure best results. If such is not done the reflection is apt to come on the retailer, not on the brand of paint. Hints on the selection and use of brushes is an important element in making satisfactory application of paints for if the tools are not right, all the skill in the world will not make a good job when completed.

The necessity for carrying adequate stocks has been much emphasized by numerous authorities quoted in recent issues of Hardware and Metal. The suggestion has been put forward that new stocks should be averaged up with old stocks bought at higher prices and the customer then given the advantage without so much cut in profit for the merchant. These suggestions apply equally well to the paint department. It would be hard to estimate the amount of business lost because of too low stocks due either to too many restrictions on buying or to too faulty stockkeeping record.

It is unlikely that anything but conservative buying will be experienced for some time to come, and this is as it should be, but when this plan is followed closer attention must be paid to such factors as selection and range so as to be able to take advantage of all possible trade and not have to send a customer to a competitive store because you could not supply the color of paint or the specialty line required. The chances are that the customer who finds the one store cannot supply such requirements, will turn much business to the store which can supply them. Money cannot be tied up in large amounts in slow moving stocks as was the case a couple of years ago. The same condition applies to wholesalers and manufacturers. Stocks must be moved more rapidly and supplies kept within easy and quick reach. To do this requires more care in merchandising on the part of the retailer for he is the ultimate outlet for the goods and if he does not properly estimate the needs of his trade then everyone suffers.

The importance of having a fairly complete stock on hand is such as to justify the merchant in anticipating his wants in a conservative manner. The plan of leaving his ordering client almost until the customer has asked for the goods would result, if followed by many merchants, in the manufacturer being forced to disappoint some if not all such merchants, and the loss of prestige in the eyes of customers would also result.

SERVICE

CONFIDENCE

FAIR DEALING

A PEBBLE.

"A pebble dropped within the margin of a pond
Sends circling waves to farthest banks beyond,
So, the kind word spoken by a friend,
In wid'ning circle spreads. Who knows the end?"

With a sincere and kindly courtesy Mr. Thos. Marshall of Congdon & Marshall, Dunnville, Ontario, in the following letter pays us a compliment which will not be soon forgotten. It is just such sentiment which makes business more than a fight for money—that inspires us to better things; gives us real pleasure, and "Sends circling waves to farthest banks beyond."

"Because we looked upon it as a serious step to change our Paint line, we determined to make such independent investigations as would reasonably assure us that we would never find it necessary to change again. *At our own time and expense* we called upon dealers thruout the Continent who had long been in the Mixed Paint business, and from all the information we could gather, found that the Firm of Lowe Bros. excelled in the quality of its goods, while it took the lead in results obtained from Advertising and Selling Service. And, what is most important—they *always carried out their promises.* Qur experience as your Agent has borne out fully the truth of this estimate. We have never had a complaint as to the quality of your goods, and are perfectly satisfied with our connection. We are looking forward to a good Fall trade and a largely increased business next Spring."

Could anything but a genuine appreciation of "promises fulfilled" and a real friendship have prompted this expression?

Using Current Events In Brush Selling

Much Housecleaning Being Done at This Season and More to Follow in Preparation for Christmas Holiday Tim When Friends Make Annual Visits to Each Other.

TAKING advantage of current events is perhaps one of the most effective means of stimulating trade in paint and household brushes. The average housewife is little acquainted with the wide range of brushes which have been provided to lighten the labor of housework and make the cleaning much more effective. Therefore, when an opportunity presents itself in the shape of current events, the merchant might well turn that event to advantage by pointing out the relation of certain of his brush stock to that event.

For instance, there is much fall housecleaning, which is still under way. To such prospects it might be well to address some advertising matter or personal sales talk along the line that such work delayed will probably now be done in a hurry and when such is the case there can be no better way to make a hurried and thorough job of the cleaning than by using the most effective weapons provided for the purpose.

Accompanying this housecleaning activity at this season is the desire to repaint certain floors, woodwork, furniture, etc. in order to give the home a clean, well-preserved appearance for the indoor months of winter. Such work is also necessary in many cases for protection against wet and snow of fall and winter.

Whether housewives are in the habit of housecleaning at this time of year or not it will generally be found that some cleaning work will be undertaken prior to the Christmas holidays and in preparation for the visit of relatives and friends for the merry festivities. This is the time of year when country friends visit city folk and vice versa, because the country people as a rule are not so busy at this time of year. Much activity will precede these interchanges of visits and household brushes might well be featured in the windows and advertisements for such trade. Some snappy showcards could be written to suggest the use of certain brushes for this purpose.

ANOTHER FATAL POISONING FROM SHAVING BRUSH

New York.—Michael F. Farley, former member of the House of Representatives died from anthrax, believed to have been caused by infection from a shaving brush. Mr. Farley died exactly six hours and 35 minutes after he had walked into the hospital to find out what was the matter with him. Physicians said that he had the malady in a singularly malignant form. Mr. Farley purchased a new shaving brush last week, and soon after using it a rash appeared on his face.

URGE DO IT ELECTRICALLY

(Continued from page 37)

portunities to develop electrical business in the trade.

"Occasionally our anxiety to get the order 'leads to pruning,' as Bill Goodwin says, or an endeavor to see how much of a given installation can be omitted in order to 'keep the price down' rather than trying to see how much can be added to a reasonable degree, thereby increasing our own business and helping the industry," said the speaker, continuing.

"Frequently in our haste to get off one job and onto another we forget that the proverbial 'bird in the hand is worth two in the bush.' We should undoubtedly make the most of the job in hand before jumping to the one in view. Incessant jumping increases overhead and therefore eats into profits, when there are any.

"Show me a better prospect than the customer who proudly boasts that his home is wired for a range, appliances or convenience outlets. Many of these appliances are necessities today.

"The cheap rates available for current, offer an invincible argument in favor of the complete wiring of every home.

"The contractor who fails to remind the customer of these rates deserves only what he gets in business."

Minor Building Cost

"Electric wiring is one of the least of building costs and contractors should discourage every attempt by anyone to cheapen, or eliminate any part of an installation.

"The customer who finds after awhile his house is half wired and that things have to be torn to pieces, or at least he so imagines, is not so very enthusiastic about adopting the 'cook by wire' method.

"Every contractor owes it to himself, his customers and the industry to see that every installation is as complete and convenient as possible. This is not only a duty, but a profitable one.

"Often a suggestion or recommendation from the contractor will accomplish much. Most people realize that the contractor is an authority and qualified to handle this detail of building.

"We should never lose sight of the fact that each home is a prospect for equipment from $800 up, in addition to the wiring. The $800 represents a modest equipment and can be easily increased by three or four hundred dollars under present conditions. At the present rate of development it is not difficult to forecast that the above amount can be largely augumented."

An Extensive Field

"Remember, that while the simple outlet seems a small item and perhaps looks like two dollars worth of business and probably twenty cents profit, some day a $75 vacuum cleaner or $200 washer will be bought and attached to the humble outlet. You, Mr. Contractor, by remembering the little outlet will have a good argument with which to approach your prospect. If you don't sell him some one else will and you in turn will, no doubt, reciprocate by connecting your goods to another fellow's outlets.

"As time progresses, the owner of the hame begins to look for means to improve the place—why not assist him to attain convenience and to enhance the beauty of the home? Don't let the furniture man and the decorator do it all. Judicious expenditure on many useful appliances, beautiful lighting fixtures and convenient portable lamps is a field he should not be permitted to overlook.

"We should endeavor to see that he does not have to tear the floors up and the walls down to provide outlets sufficient for connection of his many requirements.

"A complete and convenient wiring installation is remembered long after the price is forgotten."

MEANING OF SEGMENT GRINDING

A wrong impression was given as to the meaning of segment grinding due to the transposition of two illustrations which appeared in the advertisement of E. C. Atkins & Co., Hamilton, Ont., on page 24 of October 1 issue of Hardware and Metal. The illustrations appearing herewith show what is meant by segment grinding and the imitation. The cross-cut saw segment ground as is the Atkins Sterling Quality Cross Cut saw is given clearance with very little set as will be noted from the illustrations.

Segment Grinding

The Imitation

Boeckh's Brush News

The Retail Salesman

IT IS generally recognized by progressive manufacturers that the Retail Salesman is a most important factor in connecting the product of his factory with the public and ultimate customer.

He will, if efficient and has the best interests of his employer at heart, do all he can to push all lines of goods handled by the store, but he can always give special attention to goods which give a good margin of profit, in place of pushing the sale of cheap competitive lines.

He will see to it, of course, that such goods are the kind which will please the customer and help to bring him back to the store for similar goods, or when open to buy anything he requires.

He will see that the goods are such as are strictly reliable and guaranteed by the manufacturer, and also well advertised, which is a most important point, as the buyer is already in a frame of mind to buy such goods when he sees them displayed or his attention is called to them either by the clerk or by a show card, etc.

When goods are sold under a guarantee he will impress this on the buyer, but will see that he is not imposed on by goods being returned which have not had fair usage.

For instance, if an amateur Carpenter buys a chisel and nicks it by driving against a nail, he will take a firm stand in the matter and not recognize this as a fair claim. Also, if a buyer brings back a brush which has been soaked in water, or has the bristles injured by lime or other injurious substances, he will, if there is any doubt, submit it to the manufacturer, who will either show that there is no defect in the manufacture, or if there is any defect he will promptly make good in the matter.

By attention to such details he will make himself invaluable to his employers and pave the way for the time when he can have a business of his own.

Weekly Paint Markets

MONTREAL

MONTREAL, Nov, 10—Further advanced quotations on turpentine offer the feature of the paint markets this week. The tone of this product continues on a strong basis, and current quotations in some quarters locally are again higher than those given in the report. Those quoting $1.15 a gallon anticipate higher prices with the continuance of the present undertone. Linseed oil has also improved in the last few days, although current quotations locally remain on former levels.

Window glass is little changed, still selling at net list. The shortage on the local market is relieved by the arrival of a shipment from Belgium that will meet requirements in the meantime. Stocks of some of the better selling cuts are at a very low ebb, but this is overcome by substituting the next larger size. Dealers are still hopeful that they will pull through without any serious shortage.

Putty and white lead in oil are now a little quieter, the season advancing to the usual quiet period for these products. The market tone on both products remains fairly steady to firm.

LINSEED OIL FIRMER BUT PRICES HOLD

Montreal.

The tone of the linseed oil market has shown further improvement in the past few days, and although present quotations are holding, a continuance of the present undertone may increase oil prices in the near future. The gain of flaxseed is said to be in sympathy with other grains, which has improved considerably in recent weeks. Whether this betterment is only another phase of the fluctuations that have featured the market for some time, is problematic. Crushers too are facing a quiet period for the remainder of the year, and this may tend to hold prices from any marked advance due from seed conditions. The demand locally continues quiet with little improvement looked for till the close of the year. Following are existing quotations.

LINSEED OIL—

	Raw.	Boiled
1 to 2 barrel lots, per gal.	0 83	0 85
3 to 5 barrel lots, per gal.	0 81	0 83

Less barrels, add 10 cents per gallon.

PUTTY AND WHITE LEAD QUIETER

Montreal.

The season for putty and white lead in oil is now advancing to the quiet period. Corroders and distributors report business as slackening in the past week, and attribute the cause to the nearing holiday time. The movement of both products has continued very satisfac or during the late summer and fall months, and the market is now closing on a very steady to firm basis. Raw materials with their present tone do not indicate an easier tendency as likely to appear for some time at least, but next season's prices are yet considered problematic.

PUTTY—

Standard, per 100 lbs.	5-ton lots	1-ton lots.	Less
Bulk barrels, 800 lbs. .. .	4 00	4 50	4 75
Bulk drums, 100 lbs.	5 00	5 50	5 75
Do., or tins, loose, 25 lbs.	5 25	5 75	6 00
Drums or tins, cased, 25 lb.	6 00	6 50	6 75
1-lb. tins	8 75	9 25	9 50

Pure Linseed Oil Putty, $1.50 per 100 lbs. ad-

GLASS SHORTAGE RELIEVED BY SHIPMENT

Montreal.

The arrival of a shipment of Belgian glass now relieves the local situation to an extent, and the anxiety on the part of distributors is lessened considerably. Although a shortage of some of the better selling sizes is still evident, it is felt the season will pass without any serious development. Supplying larger cuts for those now short will overcome the difficulty. Prices remain at Montreal net prices with no change thought likely till the active season closes.

TURPENTINE PRICES ARE ADVANCED THREE CENTS

Montreal.

Current quotations on turpentine are advanced three cents, bringing the gallon price to $1.15 in one barrel lots..

The firmer tone in the market continues, due to movements of the primary sources of supply. In some quarters locally prices are still higher than those quoted above, and with the continuance of the present situation on other markets, still higher prices are looked for. Much depends on the primary sources, as domestic stocks are in a low st-t because of the uncertainty of turpentine at this season.

Savannah markets do not report any further spurts such as occurred last week. Quotations are holding fairly well, and although a slight recession is recorded this is not considered of very long standing if the demand continues on its present showing. The following prices represent the average local values.

TURPENTINE—	Imp. gal.
1 barrel lots	$1 15
2 to 4 barrel lots	1 13
Broken lots	1 25

TORONTO

TORONTO, November 10.—Turpentine again features the current paint markets with further increased values appearing in many quarters. The extent of this advance is 3 cents per gallon; and demonstrates the continued basic strength in the primary turpentine markets. One prime factor for this is found in foreign shipments having surpassed expectations. Other reasons appear in the advent of the non-productive period, and the meagre stocks on hand generally.

Linseed oil prices again remain unchanged this week, but the gains in shellac gum continue to be directly reflected in the strong tone of the shellac markets. The prevailing tendency, at present is to higher prices on this product.

Window glass is described as very scarce in some quarters, this condition applying to double-diamond. Stocks are generally fairly low, and recent arrivals of Belgian and English glass have failed to relieve the situation to any great extent; these shipments not having been of sufficient quantity at this season.

SOME HIGHER QUOTATIONS APPEAR ON SHELLAC

Toronto.

The firm trend of the shellac markets continues in evidence. This strength is gaining in prominence, and some higher quotations on shellac have appeared in local market circles. The current price of $4.65 per gallon for white in barrels has risen to $4.90 in some quarters; while a similar advance of 25 cents is also noticed on Orange.

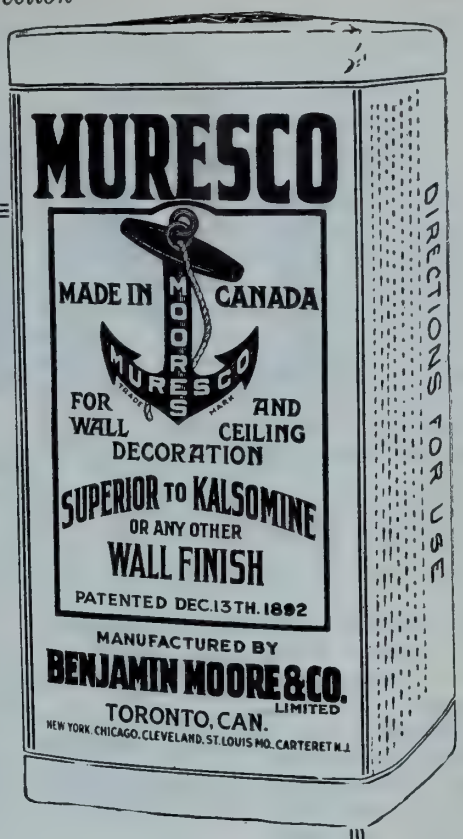
However, the higher levels are not general, although doubt is expressed as to how long quotations will be mantained under the existing strength of gum shellac on the primary markets. The scarcity of gum is pointed out as one of the prime factors in the current upward movement, while the Calcutta markets are said to be in a disturbed condition. As a consequence, distributors point out that there is not much shellac on hand at present; this condition applying to foreign, as well as domestic markets. Prevailing prices are contained in the paint market quotation page.

LINSEED OIL QUOTATIONS HOLDING UNCHANGED

Toronto.

Quotations on linseed oil remain unchanged at the levels of 87 cents for

(Continued on Page 60)



"Muresco

Creates a 'Homey' Feeling When Applied to Wall or Ceiling"

Muresco gives the most satisfying results in beautifying walls and ceilings; a soft, rich artistic finish of velvety texture.

To get the most effective decoration, a suitable brush is important. Its use enhances the appearance of the finished job. It is to the best interests of the consumer, the merchants, and ourselves, that a suitable brush be used.

This is a brush of absolutely pure Chinese Bristles. There is absolutely no horse hair used, or other hair of any kind. As can be seen, it is a broad, full, generous brush, suitable in every way to get the best results from Muresco with consequent satisfaction to all concerned.

"Quality Forever-Moore"

LIMITED

Paints, Varnishes and Muresco

Halifax Toronto Winnipeg

TORONTO PAINT MARKETS

(Continued from Page 58)

raw, and 90 cents for boiled in one and two barrel lots. Primary conditions in these markets show little signs of change, at present; the various fluctuations in flax seed prices not having directly affected oil quotations to the same ratio as previously. While the demand for linseed is still of a subdued nature, crushers are said to be firmly adhering to prevailing levels. Some increase of activity in these markets is looked for in the near future. Following are current quotations:

LINSEED OIL—

1 to 2 barrel lots, per gal.	0 87	0 90
3 to 4 barrel lots, per gal.	0 86	0 89
6 to 9 barrel lots, per gal. ...	0 84	0 87

Less barrels, add 15 cents per gallon.

TURPENTINE MARKETS RETAIN BASIC STRENGTH—SOME FURTHER INCREASES

Toronto.

Another 3-cent advance in turpentine prices has appeared on the local markets. This additional increase places the current price levels at $1.25 per gallon in one barrel lots.

While other distributors are still reported to be maintaining prices from 3 to 5 cents below this average, the low condition of stocks, and the fact that distributors have been relying upon current shipments to meet immediate requirements, has been a prime factor in almost minutely reflecting the various fluctuations apparent on the primary turpentine markets.

It is pointed out that the non-productive period is now at hand, and as a consequence the usual scarcity of fresh supplies is likely to develop. Present holdings, while of average volume, are stated as being in stronger demand for foreign export trade, with the result that the basic strength of turpentine is expected to be maintained. Under these circumstances, prevailing conditions lend themselves to firmness, with the likelihood of marked recessions being more remote. Following are the quotations on turpentine containing the recent 3-cent advance:

TURPENTINE	Imp. gal.
1 barrel lots	1 25
2 to 4 barrel lots	1 24
5 gallon lots	1 40

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton London, Brantford, Collingwood, Guelph, Windsor, or Montreal, but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots, 15 cents per gallon additional.

SHORTAGE IN DOUBLE-DIAMOND WINDOW GLASS

Toronto.

While ample supplies of some sizes of window glass are still noted to be conspicuous by their absence, yet the general situation is slightly improved as regards the quantity available to meet the seasonal demand now apparent. Further somewhat meagre shipments of Belgian glass have recently arrived, and these supplies coupled with the efforts of Canadian manufacturers, are stated as likely to cover the prevailing requirements. While the current month generally sees the full tide of the annual seasonal demand for window glass, yet it is pointed out that dealers are not stocking up heavily. Purchases are usually of small quantity, as merchants are buying for immediate requirements only; a principle which has now been adopted in many lines of trade. This factor consequently, tends to expand the period when the firm demand is evident.

The ability of Canadian manufacturers to meet current requirements of glass is generally considered to be a factor fast gaining in importance. Such operations may be expected to gain in prominence on the domestic markets in the future. In the meantime, the prevailing tendencies point towards firm prices on glass, and while no immediate indications to higher quotations have been made apparent, yet it is considered in some well-informed sources in the industry that in the event of any price changes developing, such revisions are likely to be in the upward direction.

PREVAILING LEVELS HOLD FOR WHITE LEAD IN OIL

Toronto.

Quotations on white lead in oil are holding unchanged at the new levels announced early in September, and authorities in the paint industry are mainly of the opinion that the prevailing prices are considered likely to remain for some time. The rise and fall of prices on pig lead in the primary markets, is not of paramount importance at this time, as it is pointed out that corroders are now entering the quiet period of the industry. In spite of the recent gains in pig lead, and the possibility of firmer prices in the future, supplies have already been contracted for when lead prices were generally considered well down to bottom. Also the fluctuations in linseed oil quotations are not the prime factor in the production costs of white lead in oil, which it is generally considered. The variation in the cost of one gallon of linseed oil is reflected in the price on every 100 lbs. of white lead, and under this proportion, it is pointed out that any gains that have recently developed in pig lead prices, might be offset by the present easier quotations on oil. However, dealers seem to be of the opinion that linseed oil prices will have again firmed up considerably by the time corroders feel the return of a better demand for white lead in oil. Following are the prevailing levels:

WHITE LEAD IN OIL—

Toronto.	Per 100 lbs.
In 5-ton lots	12 45
In 1-ton lots	13 20
Less quantities	13 55

CURRENT PAINT ACTIVITY UP TO EXPECTATIONS

Toronto.

The proportion of current business in the paint industry as a whole is being looked upon as satisfactory. This activity, while naturally falling away during the quiet period, is considered as holding up fairly well considerng existing trade conditions, and the fact that the Fall weather has not been as favorable to painting activities as usually expected. The receipt of spring bookings is conducive to a steady business in paint manufacturing and distributing circles, while retail reports indicate a fair volume of demand for indoor varnishes and paint products.

PITTSBURG MARKETS

(Continued from Page 53)

ting the old price, commonly by $2 a ton, but there are cases in which a cut price of $5 a ton has been quoted, which means the old price, the minimum before the September advance. Regular prices, shaded in some cases as indicated, are $2.25 for blue annealed, $3.00 for black and $4.00 for galvanized.

On the afternoon of November 3rd, the American Sheet and Tin Plate Company announced a reduction in its tin plate price from $5.25 to $4.75. Independents had been doing $5.00 and less for some time past, and the remarkable thing is that the Steel Corporation did not act on this cutting several weeks ago, for the corporation's general policy for months past has been to meet competition when important.

In tubular goods the shading of the lists of September 16th is slightly more pronounced, but the amount of the shading is small, except in line pipe. Bars shapes and plates show approximately as much irregularity as formerly, which means that there is no set price. Each mill has various prices according to the nature of the inquiry and the circumstances and every order of importance is competed for separately. The general average in bars, shapes and plates is about $1.60.

Pig Iron and Coke

The pig iron market has been extremely dull, and it looks as if consumers do not expect to need as much pig iron in the next couple months as was expected. That buying is being postponed on account of expected freight rate reductions is not altogether likely, since the buying has been of hand-to-mouth character in the past, and such buying could not well be postponed for such a problematical event as freight rate reductions. Prices are not quotably changed, but might be shaded if important inquiry arose. We still quote $20 for Bessemer, $19 for basic and $21 for foundry, f.o.b. valley furnaces, freight to Pittsburg being $1.96.

Connellsville coke is quotable a shade lower and is softer in general tone. We quote spot furnace at $3.25 to $3.35, contract furnace at $3.35 to $3.40 and spot foundry at $4.25 to $4.75.

DECOTINT

The Sanitary Cold Water Paint for Walls and Ceilings

DECOTINT is an ideal wall paint—artistic, easy to apply and entirely sanitary. It is the most satisfactory finish on the market for decorating all interior wall surfaces.

It will pay you to stock and recommend DECOTINT. Your customers will be quick to appreciate the superior advantages of this economical wall paint and, from among the twenty-two delicate DECOTINT colors, it will be an easy matter for the most critical among them to select the right combination for their particular problem.

Throughout the Spring months, a strong campaign of Consumer advertising will run in all important publications, circulating throughout Canada — Order your Spring supply of DECOTINT now and be one of those to reap the benefit of sales which this publicity is sure to create.

The Early "Skate" Bird

JUST as the early bird gets the big, fat worms, so does the dealer who goes after the skate business early get the big hockey club orders.

Have you placed C. C. M. Automobile Skates in your show cases?

The earlier you make an attractive window display of skates the better. It reminds people that you are headquarters for C. C. M. Automobile Skates. The effect is bound to be noticed when they are ready to buy.

Why not run some skate advertising of your own to tie up with ours?

RAMSAY'S

Anti-Freeze

Harmless to rubber and will not clog the cooling system

Good displays in your windows and around the store will serve to remind passing and visiting motorists. It is easy and profitable to turn the conversation to winter protection for the motorist.

Every Motorist Needs Winter Protection

The annoyance and trouble caused by cold engines in freezing weather is a matter of sore experience and recollection to every man who owns or drives an auto.

You Can Sell Every Auto Man

Keep Ramsay's Anti-Freeze before them. Send your orders to us now and be prepared before the opportunity for sales has partly passed. Orders sent too late mean business and profits lost. Why not write today?

Household Brushes
MEAKINS

In the keen air of fall and winter people hurry past your windows. A telling display of Meakins Brushes will stop them and lead them in.

Household Brushes in Fall and Winter suggest the dust and dirt that accompany grates, fireplaces, stoves and hot-air furnaces. Meakins Household Brushes are needed and bought.

The new Meakins Catalogue for 1922 with the lower prices shows all the Meakins line.

The Best Sheets to Use for Furnace Pipes

One of the hardest tests for a galvanized sheet is to use it to hook up the furnace to the flue.

Corrosion takes an awful wallop under these conditions—the smoke, soot and acid vapors all accelerated by heat.

Now the PEACE HEATING COMPANY of Toronto, mindful of their good reputation adopted for such work the best sheet ever made by man.

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Beautify Walls Economically

Silkstone beautifies walls at less cost than wall paper. It can be washed easily without rubbing off. Its soft, silky finish gives an artistic effect much appreciated by home lovers. The economical side of Silkstone, its beauty, its durability and gratifying service are all factors in the splendid sales it enjoys. It sells profitably with mutual satisfaction to merchant and customer.

The satisfaction it gives is a delight to the conscientious merchant who tries to serve his customers well and build permanent trade. Silkstone fills the bill for the Canadian housewife. She has tried it and liked it, and uses it whenever walls need beautifying, without regard to season. Silkstone is a year-round seller. Let us show you what's in it for you—write.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

"DURO"
ALUMINUM WARE
99% PURE

No. 1700 Oval Roaster, Seamless, 18¼ in. long.

No. 175 Roaster, 12 in. diameter.

This is one of the dependable, saleable lines that Ashdown's put before the trade for Christmas selling. We need hardly enlarge on the sales and profits that "Duro" brings.

Tea-Kettle

Cover, 5½ in. over all, dome-shaped with ebonized knob. Handle, flat steel, heavily retinned, with ebonized wood grip. Ears have notched handle rest to prevent handle from contact with kettle and becoming hot. Handle will stand erect when desired. Opening at end of spout large enough to fill from faucet without removing cover. Spouts are welded to the body.

For Christmas Trade

Sauce-Pan

Cool Steel Handles, heavily retinned, attached to pan with three rivets, which are not countersunk, and grip the utensil firmly and securely. Closely turned bead, to prevent dirt and grease from entering. Raised bottom centres to avoid burning and prevent warping. Polished finish. Inside X-Ray Finish. Inset cover.

You can order Creonoid NOW for Spring delivery

THE new low prices for Creonoid quoted in our October 15th price List, are guaranteed against further reduction during the coming fly season.

By sending in your order now, you will be sure to have your supply of Creonoid on hand when you need it. We will make shipment at any time you specify between January 1st and May 1st, 1922, and *will date your invoice May 1st.*

When you decide upon the size of your order, don't forget—

Creonoid is the first choice of Canadian farmers.
Creonoid is the fastest selling Fly Oil on the Canadian market.
It is easy and economical to use.
It is a Barrett product—that, in itself, guarantees its high quality.
It meets every claim made for it—never fails to give satisfaction.

For years wide-awake farmers all over the Dominion have been looking for a really effective remedy for flies, hog-lice and chicken mites. In Creonoid Fly Oil they have found exactly what they want.

Creonoid requires no mixing; it comes all ready for use, and is put up in various sized packages as follows: Steel Barrels, complete with cast-brass vent and faucet, and containing forty-three (43) gallons. Steel Half-Barrels, complete with cast-brass vent and faucet, and containing twenty-five (25) gallons. Oak-Stave, Iron-Bound Wooden Barrels, containing approximately forty (40) gallons. Oak-Stave, Iron-Bound Wooden Half-Barrels, containing approximately twenty (20) gallons. Five Gallon Cans. One-Gallon handsome lithographed Cans. Half-Gallon handsome lithographed Cans.

Copies of our October 15th Price List, giving new low prices and special discounts, free on request.

Why has Hardware and Metal Such a Large Western Canada Circulation?

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 33 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

Should Retailers Display Your Goods?

Do You Set a Good Example?

RETAILERS have their displays in "silent salesmen," and in windows where the goods appeal silently to the desire of every passer-by.

And your goods—where do you display them to create desire in the buyers of the Canadian hardware trade?

There is one street, with one great national display window, where the hardware buyers of the Dominion throng each week eager and interested to see what new goods, new models or new messages are displayed to the trade there. This national display window is the advertising section of HARDWARE AND METAL. Its pages are intently studied each week by all the wholesale hardware buyers of Canada and over 90% of the retailers.

Let us show in detail that it pays you to display your goods in HARDWARE AND METAL's National Show Window.

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

A Winner From The Word Go

MODERATE in price, beautiful in design, this Miller Library Lamp is distinctive enough for a mansion, yet within the means of all.

For a quick mover, we can conscientiously recommend this lamp. The extremely reasonable price coupled with its charming appearance combine to make a real business-getter.

Portable Lamps make a very seasonable window display at this time of the year. Our district office you do business with, will be more than pleased to make suggestions and render every assistance.

CARTER'S

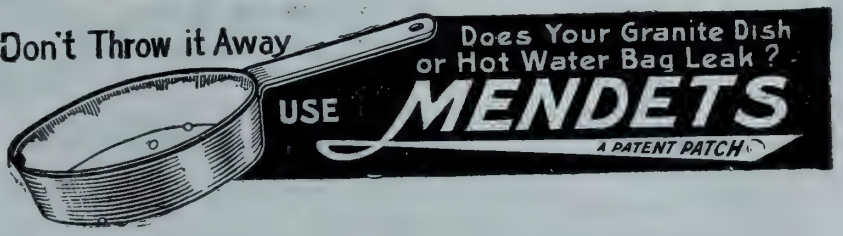
Your Paint Customers Know It.
CARTER'S GENUINE DRY RED LEAD.

Carter's has won the confidence of the Canadian paint user because of its never changing Quality. Recommend Carter's. It is made from the very best grade of Canadian pig lead, highly oxidized and very finely ground. Mixed with pure linseed oil it furnishes a free flowing protective paint for all manner of metal work.

Carter's Genuine Orange Lead, Genuine Dry White Lead and Litharge are three other Carter products worth stocking.

The Carter White Lead Co. of Canada, Limited, 91 Delorimier Ave., Montreal.

Don't Throw it Away



They sell while you are busy with other sales The simplicity, economy and effectiveness of Mendets makes them popular favorites —they are actually selling by the millions of boxes!

Collette Mfg. Company, Collingwood, Ont.

VIKO

A Practical Non-Scald Saucepan

Only one hand is required to drain contents. Has a coarse strainer in cover for draining stews, etc., and a fine strainer for soups, etc. Also has a special opening for draining potatoes. Cover locks tight on Sauce Pan, and can only be removed by pressing special attachment on handle. Makes a perfect Non-Scald Sauce Pan, Colander, Strainer Cooker and Covered Sauce Pan.

KESTER ACID CORE
FLUX IN POCKETS **WIRE-SOLDER**

—a self-fluxing solder for automotive and general work. Flux and solder are applied in one operation, because the flux is contained inside the hollow wire of solder. In great demand by all solder users because it saves half of the workman's time and gives a strong bond the first time. Comes in convenient packages and spools that are easily stocked. Write for free sample—investigate this easy-to-sell, easy-to-use, easy-to-stock solder.
Kester Rosin-Core Wire Solder is also manufactured for delicate electrical work.

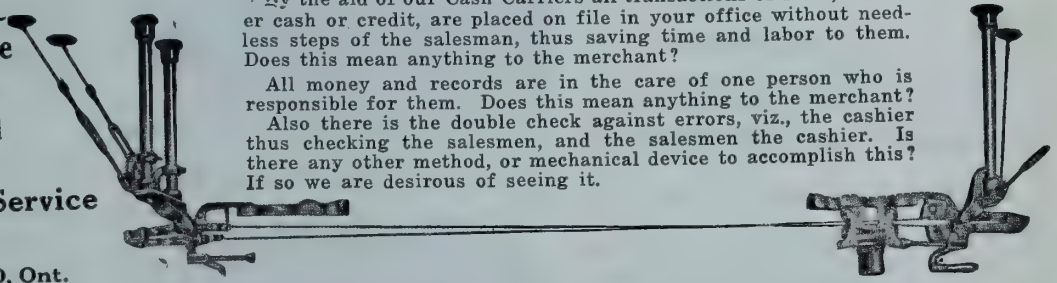
Why Not Have a Double Check on all Sales?

Al kinds of Cash and Parcel Carriers

Gipe-Hazard Store Service Co., Limited
113 SUMACH ST., TORONTO, Ont.



By the aid of our Cash Carriers all transactions of sales, whether cash or credit, are placed on file in your office without needless steps of the salesman, thus saving time and labor to them. Does this mean anything to the merchant?

All money and records are in the care of one person who is responsible for them. Does this mean anything to the merchant?

Also there is the double check against errors, viz., the cashier thus checking the salesmen, and the salesmen the cashier. Is there any other method, or mechanical device to accomplish this? If so we are desirous of seeing it.

BOULTON & PAUL, LIMITED — — NORWICH, ENGLAND

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2¼ inches wide. additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as

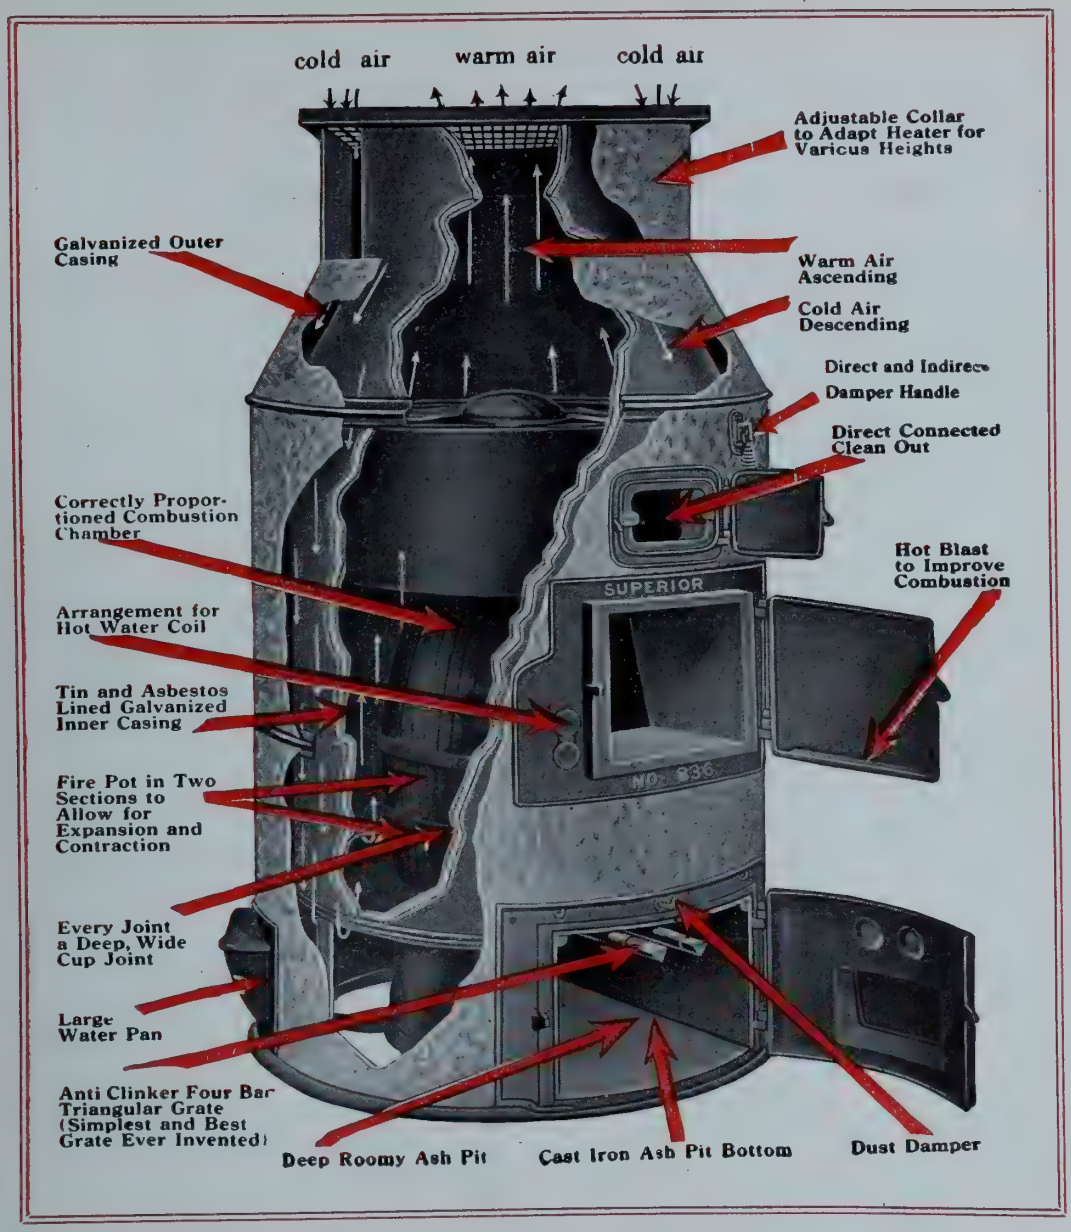
STOCKED BY JOBBERS. SEND FOR CATALOGUE.

MECHANICS' TOOLS, TAPES, RULES

THE LUFKIN RULE CO. OF CANADA, LTD.
WINDSOR, ONT.



More Installations in the Same Time--- That's More Turnovers of Your Capital!

The Pilot Superior Pipeless is very simple to install. There is only one hole to be cut in the floor for the insertion of the register. No time is required for all the fussy, messy, tinsmith work of installing the bewildering tangle of pipes.

A good mechanic can put in the Pilot Superior, on the same day it is sold. And that's a pulling point with consumers, sale, installation and enjoyment of the Pilot without delay.

TRADE ELASTICA MARK.

For Any and Every Requirement of the Paint Buying Public

In the matter of Paint and Varnish sales it means a good deal to have a complete line on your shelves, a line which enables you to meet every customer's requirement in Paint, Varnish, Stain or Enamel.

The Elastica group includes a Paint, a Varnish, a Stain or an enamel for every need—made for the purpose, made to wear and made to satisfy.

THE COMPLETE LINE

This completeness coupled with sales-producing publicity and intelligent dealer selling helps make the Elastica Agency offer a proposition of unusual possibilities.

May we send you all particulars? We believe you will be interested and of course you incur no obligation when you investigate.

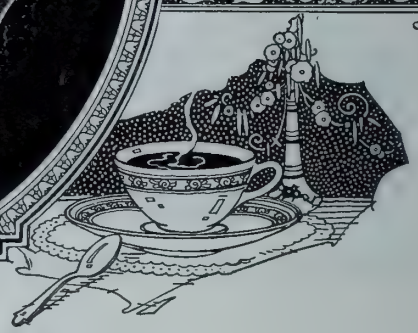
UNIVERSAL

Universal Aluminum Percolator, No. 476



MONEY MAKERS FOR THE DEALER
MONEY SAVERS FOR THE HOUSEWIFE

ECONOMY is always a virtue but with most people it is a necessity. The thrifty housewife is stewardess of the family budget. She is ready to buy anything that saves something. Devices that effect saving on food bills are as welcome to her as a fresh egg. The Universal Aluminum Percolator, Food Chopper and Bread Maker are a trio of thrift and economy in the home.

Bigger loaves of better bread at less cost and with less work; money saved by chopping scraps of food for appetizing dishes; coffee cost reduced by using less coffee in the percolator for a better drink in the cup. These are savings that appeal to the housewife and speed sales of the UNIVERSAL Thrift Trio.

Days of feasting are days to feature the Universal Bread Maker, Food Chopper and Percolator. Display and advertise these goods during the holidays. Write for Newspaper cuts and other forms of advertising material.

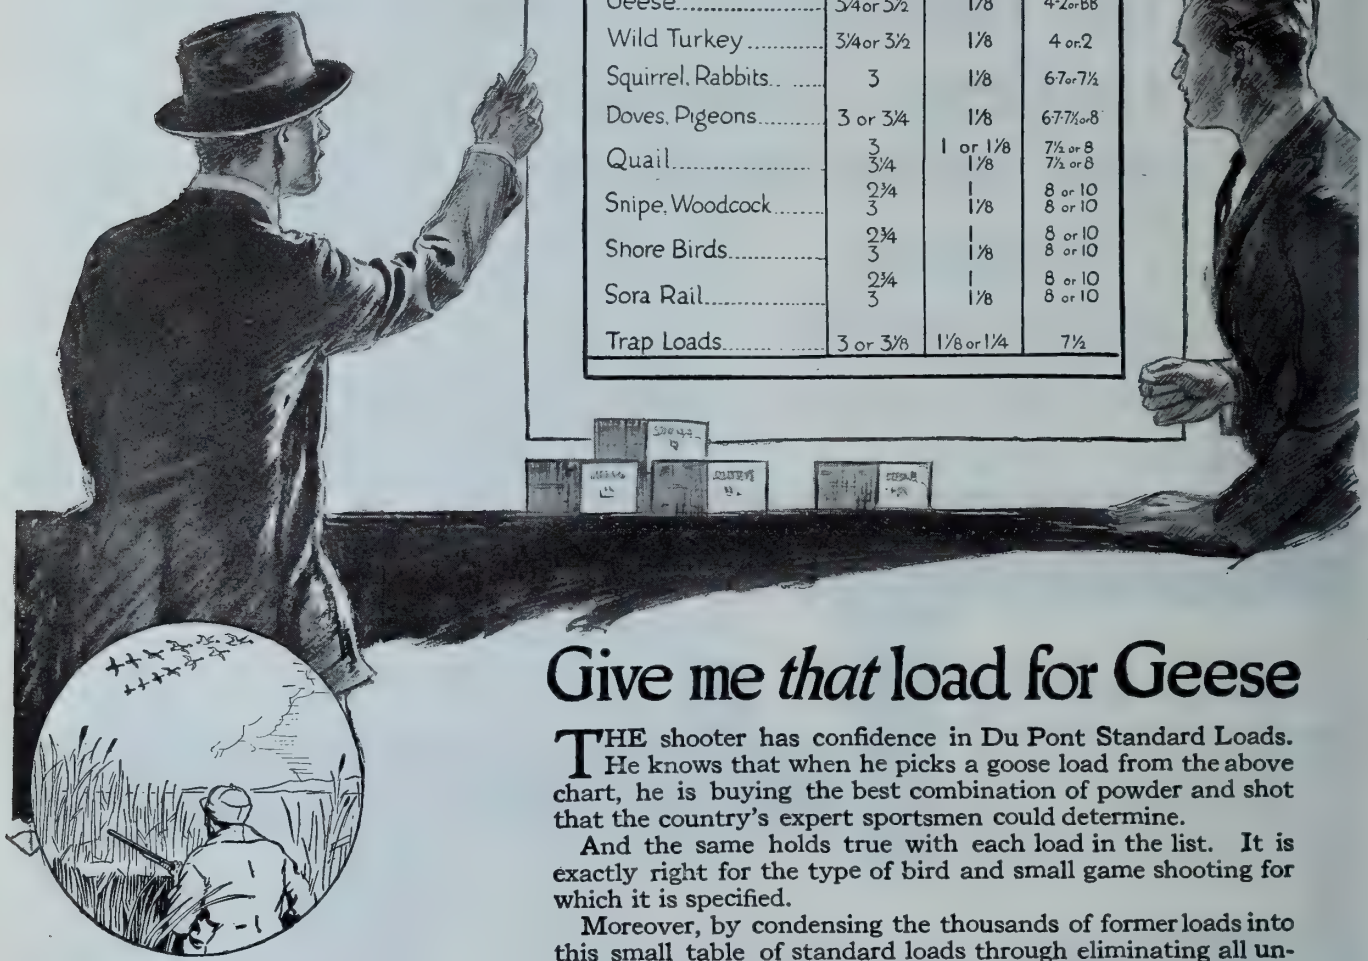
"A TOUGH old customer is the goose and I know I've got to hit him *hard* and hit him *frequent* or he's going to get away. That's why I always order my shells direct from the chart of Du Pont Standard Loads because I know the load wouldn't be on the chart unless it was *right*."

STANDARD DU PONT 12 GAUGE LOADS	DU PONT SMOKELESS Drams	OUNCES Shot	SIZE Shot
Large Ducks	3¼ or 3½	1⅛ or 1¼	4-5 or 6
Small and Medium Ducks	3 3¼	1⅛ 1⅛ or 1¼	5-6 or 7½ 5-6 or 7½
Grouse, Partridge, Prairie Chicken	3 or 3¼	1⅛	6 or 7½
Pheasants	3	1⅛	5-6 or 7½
Geese	3¼ or 3½	1⅛	4-2 or BB
Wild Turkey	3¼ or 3½	1⅛	4 or 2
Squirrel, Rabbits	3	1⅛	6-7 or 7½
Doves, Pigeons	3 or 3¼	1⅛	6-7-7½ or 8
Quail	3 3¼	1 or 1⅛ 1⅛	7½ or 8 7½ or 8
Snipe, Woodcock	2¾ 3	1 1⅛	8 or 10 8 or 10
Shore Birds	2¾ 3	1 1⅛	8 or 10 8 or 10
Sora Rail	2¾ 3	1 1⅛	8 or 10 8 or 10
Trap Loads	3 or 3⅛	1⅛ or 1¼	7½



STANDARD GOOSE LOADS:

Powders: Dupont, 3¼ or 3½ drs.

Shot: Ounces—1⅛
Size—2, 4 or BB

Give me *that* load for Geese

THE shooter has confidence in Du Pont Standard Loads. He knows that when he picks a goose load from the above chart, he is buying the best combination of powder and shot that the country's expert sportsmen could determine.

And the same holds true with each load in the list. It is exactly right for the type of bird and small game shooting for which it is specified.

Moreover, by condensing the thousands of former loads into this small table of standard loads through eliminating all unnecessary combinations, you can now meet the demand of every shooter with a smaller and less expensive stock. With a stock of Du Pont Standard Loads there are no "dead ones"—just a few fast selling loads for each type of shooting. The result is larger and quicker turnover and increased profits.

If you haven't received a counter display and a steel-bound card (for use by your clerks) both of which feature the list of Du Pont Standard Loads, write us today. They will be sent free of charge.

Westinghouse
Washing-Machine Motors

Today you will find it easiest to sell washing machines driven by Westinghouse Trouble-Proof Motors. They supplement the good qualities of the machine.

The housewife now realizes that the success of an electric washing machine is measured by the reliability of the motor that operates it. Tell her it has a Westinghouse Trouble-Proof Motor and she is satisfied.

Remind her that she is buying not only for to-day, but for the future as well—for next year and the years to come. Sell her years of faithful service.

Reliability is a Westinghouse Watchword.

Our Future Captains of Industry

A market that the dealer in Dry Batteries cannot afford to neglect

YOUNGSTERS need Columbia "Hot Shot" Dry Batteries to operate their Lighting Plants, miniature electric railways, telegraphs and telephones, experimental magnets, and all sorts of kindred amusing and educational things.

Columbia "Hot Shot" Dry Batteries are superior for the kiddies. Columbias are self-sufficient, never connected to the *house lighting system, and are safe from shock and fire risk.* Besides, they are portable—can be toted anywhere.

Here is a Christmas Toy Market you should not overlook. If you sell electrical toys, connect up a Hot Shot and show your customers how they operate. Put a display in your window—it will draw a crowd and make sales for you.

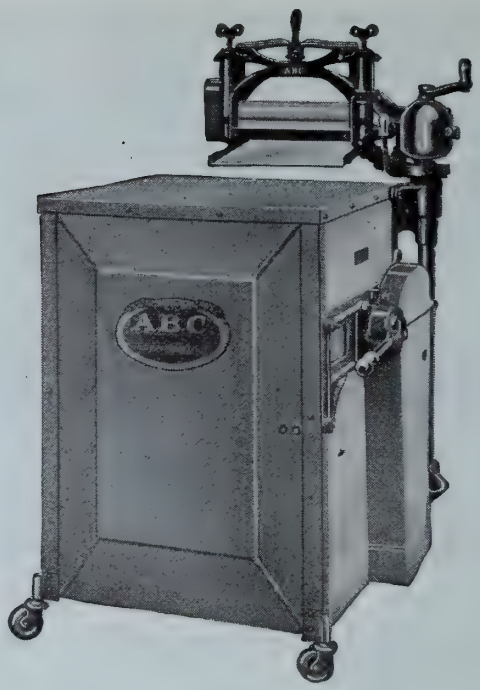
The new 1922 model A B C Electric Laundress — "the Packard of Electric Washers."



You see a handsome cabinet; you hear no noise; you feel no vibration.

The "Packard" *of the* Complete A. B. C. Line

The new 1922 model A B C **Electric Laundress,** embodying no less than 24 vital refinements as a result of our thirteen years' success in this business, out-ranks other washers as the Packard Twin-Six shoulders above ordinary automobiles.

Graceful in its proportions, handsomely finished in gray and nickel, powerfully and reliably motored, extremely quiet and smooth in operation, and finely constructed in every part, it stands unexcelled.

And yet it sells at a moderate price—a price that also allows the dealer a liberal profit, from which he will need to deduct little or no expense for service. For A B C Washers are built to minimize that necessity.

Other A B C electric and power-driven washers similarly excel in their respective classes. There are ten ABC washers in all — washers from the "Ford" class up to the "Packard." Every price demand is met by the A B C line.

Each electric A B C is also equipped to operate the A B C Electric Ironer, without need for an additional motor.

A few A B C territories are still open for exclusive dealers. Continent-wide distribution, quick service, effective sales co-operation and liberal discounts, make the A B C Line worthy of your immediate consideration.

Write direct to C. D. Henderson, or to any of the distributors listed below.

A Seasonable Product to Advertise
for the Winter and Holiday time

For Winter because Workmen need Thermos Kits for the Hot noon-day lunch. For Holiday time because your customers are depending on you to help complete their list. No one article is so acceptable and joyously received as THERMOS. Useful to everyone throughout the seven ages of man.

Keeps Hot **THERMOS** **Keeps Cold**

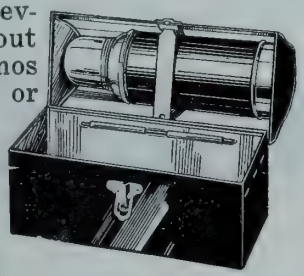
THE BOTTLE

An Ideal Gift for Anyone from Babyhood to Old Age.

Bottle in ½Pt. 1Pt. 1½ Pt. and 1Qt.

For baby in the nursery Thermos is indispensable. For the young man in college or office at work or play. For mother in the home or father in the office a Thermos Carafe or Jug provides Hot or Cold nourishment.

For the workman everywhere, in or out of doors, Thermos provides a hot or cold home lunch.



This Kit made in Pint and 1½ Pints.

Home Lunch
vs.
Down-Town Lunch

Lunch down town 1 Day, 50 cents
300 days $150.00
A Home Lunch
Average 1 day 19 cts.
300 days $57.00
Thermos Kit $4.50
Saving in one year $88.50
It will pay the taxes on your home. — Thermos Saves.

Thermos Kit made in metal or fibroid to suit all workers—a Kit for every need—see our display, now it's complete.

This two column by six inch ad. placed in your own town or city paper over your name and address at this season means sales for this popular and seasonable article. It will also advise customers of the place to get their bottles repaired—where they can buy corks for Thermos bottles—and advertises your store as a depot for all Thermos products.

Cuts will be supplied as shown in the ad. to any dealer requesting same.

Increased car fare in many localities, more moderate wages and part time compel the workmen and school girl or boy to carry a home lunch. Why not with a Thermos Kit? The best and most nourishing way to carry a Hot or Cold home lunch. The Thermos Kit has taken the place of the old time Tin Dinner Pail. Many other uses for Thermos make sales of Thermos Products regular and profitable.

Name of Hardware Merchant and further detail supplied upon request

The Answer is—He Didn't!

THE crowd was drawn by a hardware firm in an Ontario town of 700 population. This crowd of over 1,000 people represents customers of the store, drawn from miles around, to attend the picnic given by this firm to its customers. Surely this is evidence of the close relationship between this hardware firm and its customers.

The close relationship between retailer and customer in this instance is typical of conditions existing in hundreds of Canadian towns, villages and cities.

The average hardware merchant (particularly in the smaller cities and towns) has been established for many years. He has a big business connection built up through years of efficient service to his customers. He is well rated, and a desirable man with whom to do business. He influences the buying habits of the people in his community, and in over 90% of the sales made, he is the deciding factor.

"Which one do you recommend?" is a question asked thousands of times each day in the hardware stores of Canada.

If you can get the effort and enthusiasm of the retail hardware merchants and their clerks, plus their window and interior displays and local advertising behind your goods, you will have secured the co-operation of one of the greatest available selling forces.

HARDWARE AND METAL is paid for, and read, by all the wholesale hardware buyers of Canada, and over 90% of the retailers from coast to coast. They are the men who control the sale of your products to the hardware consumers. HARDWARE AND METAL can put your story before, practically, the entire Canadian hardware trade. One of our representatives would be glad to give further details.

(Only hardware paper in Canada with membership in the Audit Bureau of Circulations).

HARDWARE & METAL

Canada's National Hardware Weekly since 1888

143-153 University Avenue - - Toronto, Canada

Published every Saturday since 1888. The only weekly hardware paper in Canada, and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations

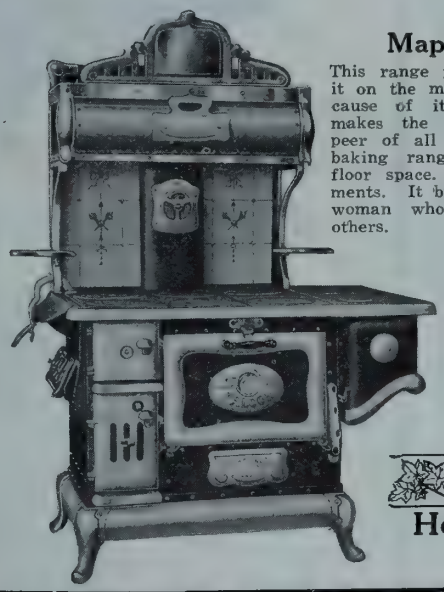
Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

If interested tear out this page and place with letters to be answered.

Your Christmas Trade

THERE is no reason why the hardware man should not get his good generous share of the Christmas money that will change hands for the next few weeks. All that is necessary is to get into the Christmas spirit and especially feature the useful gift. For instance, what more useful and permanent gift could be suggested than a Maple Leaf range or heater? It would always be a visible reminder of the Christmas spirit because it is on the job every day of the year.

Feature the Maple Leaf Line for Christmas

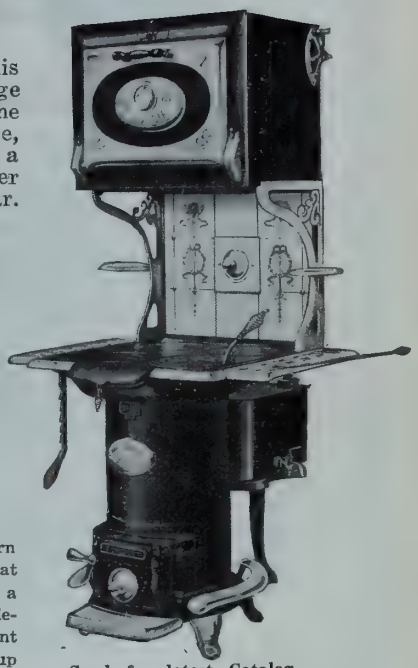


Maple Leaf Composite

This range is unique—there is nothing like it on the market. There never will be, because of its patented flue system which makes the high oven possible. It is the peer of all "Quebec" heating, cooking and baking ranges. It occupies only a small floor space. It has all the modern attachments. It burns all kinds of fuel and every woman who buys one will help you sell others.

Maple Leaf Falcon

A steel range with all the modern attachments and appliances that the housekeeper appreciates in a kitchen range. Beautiful in design and made in several different styles. The Falcon will back up any claim that you can make.



Send for latest Catalog and prices.

TRADE MARK

Roofing and Building Papers That Continually Boost Your Store

Building Papers, Tarred Felt, Sheathings and Tar Products, and Wrapping Paper of all kinds that give service in use, reflecting credit on the dealer and inspiring confidence in all the lines he sells—that's the McArthur line.

Drop us a line for an interesting little booklet on Roofing Materials. It will tell you of each one of our lines—reasons why they sell, and serve the consumer so that you hold his future trade.

We cannot tell of all the lines here, but, for instance, "Black Diamond" Tarred Felt is pure wool tarred roofing felt, from selected woollen rags saturated with pure coal tar, producing the most durable roofing felt possible to make.

Hamilton, Ontario.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

Be Prepared for a Christmas of Practical Giving

IT'S to be the Christmas of practical giving. Folks that in other years went out and bought at random are this season going to snoop around for days on end, seeking out the most practical gifts on the market.

And what gifts more practical than electrical appliances or an electric heater! What gift could be more downright sensible and practical than a trim Canadian Beauty Electric Iron, a Toaster, a Three-Heat Grill or any of the other members of our popular family of electrical appliances?

Can you think of a gift that could be of greater use than a Majestic Electric Heater?

The dealer that handles New Canadian Beauty Appliances and who goes out vigorously after all the business he can get will benefit by this condition—unquestionably.

Every New Canadian Beauty Appliance sold creates an everlastingly favorable impression, because it gives such perfect service. Build wisely, then—Look ahead. Think of the many future sales that will spring from every single sale made this season!

Are you ready? Fully stocked? Equipped to do a roaring trade? If not, act **now.** Wire your order, write it or 'phone it to your nearest jobber or direct to us. But take our tip. Don't delay. Get your order in at once.

Canada's National Hardware Weekly

Hardware and Metal

Published Every Saturday Since 1888

Vol. XXXIII NOVEMBER 19, 1921. No. 47

Stabilization in the Hardware Trade

Trend to Normalcy Seems Gradual but Healthy—Manufacturer, Jobber and Retailer Still Have Important Part to Play—Labor Sometimes Over-blamed—Prices Will be Lower, Pending Lower Freight and Labor Costs — Business and Personal Economy Is Essential—Foreign Competition.

Based on Interview of Hardware & Metal with A. Prudhomme, President A. Prudhomme and Fils, Montreal

THE NECESSITY of continued effort on the part of manufacturer, jobber and retailer in assisting to untangle trade from the web which has been woven around our industrial fields for the past year or so, was emphasized to Hardware and Metal by Alec Prudhomme, president A. Prudhomme & Fils, Limited, Montreal, when discussing recent business developments in the hardware trade. It was the opinion that after long months of waiting, the turn in conditions is apparently now commencing, and must not be checked by any participant in the trade from manufacturer to consumer.

"The manufacturer must not place too big a profit on his goods, likewise ourselves and the retailer. The time of the rising market offered bigger profits for all of us, but not so to-day," said Mr. Prudhomme.

Labor Too Often Blamed

"Sometimes I believe we place too much blame on labor," he continued, pointing out that apart from a few of the "would be" ardent leaders, the laboring man and the mechanic were both broad minded and well thinking fellows, and undoubtedly good men for the hardware store to keep in touch with. Recalling an incident where some repair work was recently made to one of his buildings, Mr. Prudhomme said the contractor, when questioned, had stated the cost of the work was less than would have been necessary last year or the year previous. This builder said he was now able to procure labor at lower wages, thus bringing the cost of the job down considerably. There were cases, no doubt, where the laboring man and the mechanic were still obtaining outrageous wages but Mr. Prudhomme believed labor on the whole was willing to make concessions.

They are perhaps waiting for the retailer to take the initative, and show substantial reductions in the cost of his living. While this, in many cases, is yet impossible, the close following of market tendencies and recessions of prices carried right through to the consumer should, in the opinion of Mr. Prudhomme, be carried out.

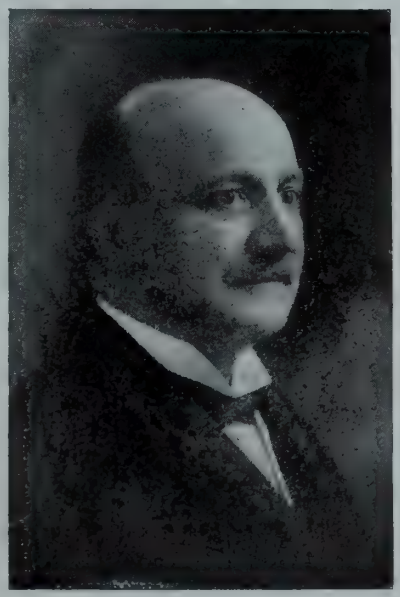
Recent Price Advances

The increases in prices of goods of cotton manufacture, and the more recent advance in certain steel products clearly demonstrates that the trend of many stable commodities is changed for the present at least. This was thought to be a step towards advancement in the trade, and would do more to instil confidence in the buying public than any development since the depression began in the closing months of 1919. While advances in prices of any commodity are now closely questioned, in the steel industry, higher prices were seemingly fully warranted. The base price of bar iron and sheets to-day, in comparison with 1914 levels, showed not the variation that might be expected, and with increased cost of raw materials and labor, it was thought to be surprising that higher prices were not announced at an earlier date.

Prices Will be Lower

It was the opinion of Mr. Prudhomme that there is yet a recession to be made in the prices of practically all lines connected with the hardware trade, but solely dependent on the gradual decline in production and transportation costs. For example, lower prices may be expected on steel products but not until an adjustment is made in favor of the producers.

"The progress may seem slow, but with proper legislation and continued conscientious business methods by us all, we will be surprised at the progress that will be made by next spring, and I believe by that time buyers will not have to exercise the great care in their purchases as is necessary to-day," said Mr. Prudhomme.



ALEC PRUDHOMME

President A. Prudhomme and Fils, wholesale hardware merchants, Montreal, who outlines some interesting points concerning the trend of business in the hardware trade.

Necessity of Economy

"We are sometimes astounded by the number of failures that are announced from week to week, but in 50 per cent. of the cases, I believe, extravagance has played an important part," continued Mr. Prudhomme. "They have taken advantage of the good times, the inclining market, have made money and spent it."

Business is by no means stagnant to-day, and on the whole Mr. Prudhomme anticipated a good fall and early winter trade. It is his opinion that with con-

(Continued on page 36)

Weights Officials Forced to Action

Controversy Initiated by Hardware and Metal Concerning Sale by Toronto Department Store of Scale Denied Admission to Country for Distribution in Hardware Trade, Ends in Scale Being "Removed from Sale" and Rendered Useless Except As An "Ornament"

LATEST developments in the controversy which Hardware and Metal initiated concerning the alleged discrimination in favor of a Toronto department store in allowing the latter to offer for sale a scale of a type which was denied admission into the country for distribution through the hardware trade, indicate that the cause for complaint has now been removed.

It will be recalled that a scale of the dead load spring variety which is unauthorized according to the Weights & Measures regulations was found on sale in a Toronto department store by Hardware and Metal. On vain endeavors being made to secure the permission of the Department to import similar scales for sale in the hardware trade, the attention of the officials of this department was drawn to the fact that a similar scale was being sold in the department store. The reply was that this scale was not being sold, but merely used as an ornament. Enquiries made by Hardware and Metal revealed the fact that the scale was displayed in a silent salesmen and no opposition whatever was presented by the salespeople of that store when an offer to purchase was put forward. A price of $33 was quoted and a real selling talk was given outlining the various points in connection with the scale.

No Opposition to Purchase

Inspector J. J. McConvey of the Weights & Measures Department in Toronto claimed to have made several unsuccessful attempts to purchase the scale, but it was significant that each time Hardware and Metal attempted to buy it there was no opposition whatever. The actual purchase was not made because an offer for sale was all that was necessary to prove the points in question, and the offer was made on each occasion in the presence of witnesses.

On the matter being drawn to the attention of E. O. Way, Director of Weights & Measures, Ottawa, a visit was paid by this official to the office of Hardware and Metal, details of which have been outlined in a previous issue. In the discussion which took place on the subject at that time Mr. Way endeavored to discount the importance of the matter, pointing out that the department store in question had no possible way of getting further scales to make a paying commercial proposition of the sale of these articles, and that the scale being offered was one of a number of machines which this firm had on hand before the regulations prohibiting their admission were effective. On being questioned as to whether or not the "ornament" should be fixed so that it could not be used, Mr. Way expressed the opinion that the springs had been removed and that therefore it was not a "scale." However, at the time of the second last attempt to purchase the scale Hardware and Metal noted that the machine was in perfect working order with springs intact, and the dial registering the weight of some ornaments displayed on the scale.

Springs Removed

In a communication just received from Mr. Way, Hardware and Metal is informed that the scale is not now being offered for sale and that the springs have been removed from it. This is in accordance with what was found on the latest attempt to purchase it.

In his communication Mr. Way states "I have, just to hand, your write-up of our interview. I note Hardware and Metal is of the same opinion still and proof against conversion. You may harp upon the "discrimination" so positively charged to this Service in this case but actually the matter is so superlatively small as not to merit the attention and time of serious men. If.....store had the exclusive privilege of handling this scale for the whole of Canada it would inflict no hardship upon the hardware trade. The sale of such an article is so limited as to offer no return upon the money invested."

In conclusion Mr. Way points out that the department store in question has assured him that they are not offering this scale for sale and this has been confirmed by the local inspector's latest attempt to purchase it.

"The springs have been removed even if they happened to be in action when you tried to make a purchase" said Mr. Way.

Action Was Forced

The foregoing action, taken only after the matter had been brought to a head by the activities of Hardware and Metal, indicates that there was a laxity somewhere in the administration of these regulations even if there was no contemplated discrimination. The hardware trade has been much interested in this controversy, not so much from the standpoint that the department store in question might still be importing such scales and making a regular business of their sale but from the standpoint that according to the regulations the department store had no business to endeavor to offer this scale for sale and had no right to keep it even as an "ornament" without it being fixed in such a way as to render it useless as a scale. It does not necessarily follow that Hardware and Metal is in sympathy with the regulations, but when they exist they should be equally applied. Hardware merchants in all parts of the country have had experiences with Government officials compelling them to live up to the letter of the law and this is where no discrimination in favor of any other class of business will be tolerated.

Constant vigilance is necessary to see that the interests of the retail hardware merchants are protected and charges that this matter does not warrant the attention of serious business men, are certainly not substantiated by the action which the Department of Weights and Measures has taken now that the alleged laxity in enforcing the regulations had been given a full airing through Hardware and Metal.

STABILIZATION IN THE HARDWARE TRADE

(Continued from page 35)

tinued economizing careful buying and close attention to other expenditures, the merchant who has thus far weathered the storm will have no difficulty in coming out on top.

The Arrival of Foreign Goods

Speaking of the appearance of foreign merchandise on our home market, Mr. Prudhomme stated that perhaps some European countries were "beating us to it" in marketing goods at lower figures. Belgium was again in the glass industry in earnest, and had been able to sell steel rails in the United States in competition with American producers. Even Germany had surprised us in recovering so rapidly. "However, we must not pay too much attention to this," said Mr. Prudhomme, "but give all support possible to our home industry, and even if slower than other countries, we are almost always sure of quality which is in other cases questionable.

GRINDING WHEEL FACTORY SECURED FOR BROCKVILLE

Brockville,—Negotiations for the location of another new factory here were completed with the signing of agreements between the J. R. Baxter Co., Ltd. Montreal, and J. Amos Johnston, Industrial Commissioner of Brockville, for the immediate erection of a grinding wheel factory, 200 feet by 50 feet, to be built on Pear steet east, at an approximate cost of $24,000.

May Tax Gasoline Sales in Ontario

Tentative Regulations Placing Tax of One Cent Per Gallon On Sales of Gasoline To All Motor Vehicles—Would Add $750,000 Annual Revenue for Road Work—Strips of Tickets More Favored Than Tax Collected and Returned to Government by Vendors—Not in Effect Before Next May

IT IS learned by Hardware and Metal that there is a strong possibility of the application in Ontario of a gasoline tax similar to that now in effect in parts of the United States. The revenue raised in this manner would be for the purpose of aiding the Provincial Highways Department's plans for road rehabilitation and maintenance. While no official statement has been made yet on the subject it is likely that a tax of one cent per gallon of gasoline will probably be the extent of the levy, this being the amount of the tax in effect in most places elsewhere.

The Province of Ontario is anxious to establish an annual revenue fund of $5,000,000 for road work. This year's motor tax revenue is approximately $3,000,000 and it is estimated another $750,000 of revenue can be added each year by the tax on gasoline. Thus within a year or two the desired fund can be secured.

As far as the matter has been considered no distinction has been made between the motor vehicle operated for commercial purposes and that operated for pleasure. Whether or not there should be any distinction is open to question, but it is held as quite probable that unless subsequent representations change matters, a one cent per gallon tax will be placed upon gasoline purchased by all motor vehicles. This will not be made effective until after the next session of the Legislature.

It is understood there is some question as to whether or not the provincial government has authority to place a tax of this nature on the sale of gasoline as it is, in effect, a sales tax, power to enforce which lies only with the Federal Government.

Not Applied Before May

Discussing the proposed legislation with W. A. MacLean, Deputy Minister of Highways in Ontario, Hardware and Metal was advised that this tax could not be applied prior to next May at the earliest, in view of the fact that it cannot be made law until after the next session of the Legislature.

Questioned as to the likely means to be employed for the collection of this tax, Mr. MacLean stated that this phase of the matter was still under advisement and that enquiries were being made as to the most practicable plan in use in other places where this tax is being collected. Mr. MacLean intimated that it was not unlikely that the tickets in books or strips would be sold to motorists who would hand over to the vendor the number of tickets covering the tax on the number of gallons of gasoline purchased. This plan would be something similar to that used to collect the present Amusement Tax under which people have been encouraged to purchase a supply of tickets in advance. This has not been a common practice however, due to the fact that tickets of varying denominations are required according to the extent of the fee paid for admission. In the case of gasoline the amount of the tax does not vary to the same degree and the use of books would facilitate matters greatly.

Tax Motorist's Gasoline Only

Discussing the other alternative, that of collecting the tax periodically from vendors of gasoline, who would be compelled to collect the tax from customers and keep an accounting of it, it was pointed out that this plan would place a tax upon all gasoline whether sold for automobile propulsion or for household use. In this way the purchaser of gasoline for household or similar purposes would be paying a tax which was designed to affect only the motorist, in so far as the revenue to be raised is for road building and maintenance work, present sales tax of 1½ per cent. is collected by the oil company from the gasoline vendor and returns are made to the Government by the oil company each month. A similar tax applied to gasoline sales would probably be collected from the vendor who would have to keep track separately of sales made for automobile and household purposes and make periodic returns to the Government. Under this plan the merchant who sells gasoline would be called upon to collect tax and make returns as do the oil companies at present in dealing with the Federal Sales Tax. It would appear therefore to be a much simpler job for the merchant to have motorists use tickets.

Won't Affect Consumption

Dealing with the possible affect upon gasoline trade, Mr. McNeil, Sales Manager Imperial Oil Company, Ltd., stated to Hardware and Metal that a variation of one cent per gallon had never been found to seriously affect gasoline consumption. It was pointed out that a similar tax is in effect in several places in the United States, chiefly towards the Pacific Coast, and that the money derived from motorists in this way was generally used to the advantage of this class in the building of better roads.

W. G. Robertson, Secretary Ontario Motor League is collecting information on the subject from other places where the plan has been tried out. He is of the opinion that the strips of tickets similar to the amusement tax would be the easiest and most effective way of collecting this tax. It was his opinion that while every increase or decrease in price affects consumption of gasoline to some degree that a tax of one cent per gallon, levied for the purpose of improving road conditions would not deter motorists from using their cars as much as ever and that the effect in this connection would be very slight. He pointed out that the Ontario Government was spending a very large sum of money this year upon road improvement in the province and that such work would prove of big help to the business of the province.

Importing Brass Munitions as Scrap

Concerning the article which appeared in November 12th issue of Hardware and Metal, pointing out that Canadian importers were handicapped when compared with importers of other countries in that they were not enabled to import brass cartridge cases, fuses, etc., as "scrap" brass, R. R. Farrow, Commissioner of Customs and Excise, Ottawa, Ont., has answered enquiries on this subject by Hardware and Metal, as follows:—

> "Item 348 (b) of the Customs Tariff provides for the entry free of duty of brass scrap and importations which are brass scrap in condition as imported are so admitted by this department. Whilst brass cartridge cases, fuses and other munition parts which have been crushed or otherwise rendered into condition of scrap would be admissible free of duty under the above mentioned tariff item, this department cannot admit to entry thereunder as being scrap, brass cartridge cases or other articles of brass which are not crushed or otherwise rendered into condition of scrap, simply on the ground that they are surplus materials and have been sold by The British Munitions Board or other foreign Munitions Boards at greatly reduced prices or at prices equivalent to those of scrap."

Estimating and Increasing Turnover

Following a New Method of Stock-Control a Remarkably Simple and Impressive Record of Turnover Can be Kept, and the Number of Turns can be Increased—The Number of Turns is Just as Vital As the Amount of Profit on Each Turn

THERE should be no difficulty in expressing the idea that the number of turnovers is just as vital to a business as the amount of profit on each turnover, says the New York Retailer: "If there are four turnovers in any given period the profit on the stock investment of twenty per cent., and if the number of turnovers is doubled the profit will be doubled, we are told by the Department of Domestic Distribution of the U. S. Chamber of Commerce," says the New York World Retailer.

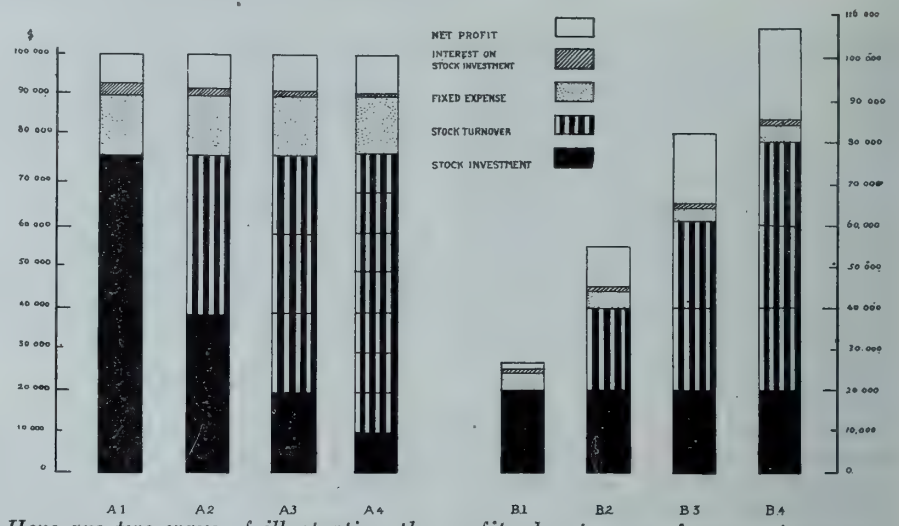
Many years ago merchants and manufacturers who had studied distribution with exactitude, as if it were a science or at least an art, learned that the rate of turnover is one of the most important factors in business. If all of its relations are taken into consideration perhaps it is the most important factor, except always an accurate form of cost accounting, without which it is almost inconceivable that any business, large or small, can be conducted really well. We use the expression "almost inconceivable" because we know that some business heads have not established cost accounting. This is not an argument against it any more than if a merchant does no advertising his failure to utilize this sales method is an argument against the need of publicity. If a business man does not keep his costs separated from each other, we are forced to ask:

How does he know when some of his expenses are too high?

Clear as the importance of the turnover appears and universally as it is accepted, there are frequent violations of its most fundamental principle—not to overbuy—even among comparatively progressive merchants. An addition to the cash discount or an attractive price concession sometimes will induce the purchase of considerably more goods than can be sold within a reasonable turnover period. This entails the likelihood that a season will pass leaving a costly lot of goods in stock and the resultant mark-downs and sacrifice sales as the only way of moving them.

It is, of course, possible to be too conservative and to buy less than could be sold. This is not really a serious condition because, unless transportation facilities are very poor or the distance from supplies is very great, a shortage usually can be made up in a few days and often in a few hours. Average conditions only can be discussed here. Special cases demand special methods.

When the various expenses and wastes involved in slow turnovers are stated separately the subject becomes



Here are two ways of illustrating the profits due to more frequent turnovers. Series A is based on a given period and shows how the investment and interest grow less while profit increases.
Series B is based on a given investment so that interest remains the same although profit increases.

even more easily understood. What are the elements in which losses due to slow turnovers may be found?

(a) Investment
(b) Interest
(c) Mark-down
(d) Salaries and wages
(e) Shelf or storage room
(f) Prestige-Reputation
(g) Inefficiency

An examination of these elements shows their relation to each other.

(a) Invested money is the source of profit which in turn depends upon the amount of goods in stock and upon the length of time which these goods are carried. It is evident that to double the turnover comes to the same thing as doubling the amount of stock without increasing the investment. Or, vice versa, one-half as many turnovers results in doubling the amount of money invested for the same quality of goods.

(b) Interest must be paid upon all borrowed money and most merchants are borrowers. If the turnover is reduced from a period of six months to one of three months the interest on a given loan is reduced in the same proportion.

(c) Mark-downs are required for three principal reasons:

1. The goods have proved unsaleable at the original mark-up.
2. Too many were bought and a change in the style or season has left some of them on the shelves—
3. With the result that they have been soiled, chipped, bent or otherwise defaced by frequent handling.

(d) Salaries and wages must be included because every operation in every establishment costs something. When an unprofitable operation is performed it represents a loss. Roughly these losses are due to:

1. Waste of time by management in reaching decisions as to when and what mark-downs are to take place.
2. Waste of time by sales force.
3. Rewriting tickets.
4. Rearranging goods for mark-down sales.

(e) Shelf or storage room is a definite part of the expense of doing business, and that portion which is devoted to slow-selling merchandise is wasted.

(f) Prestige-Reputation--for the high character or timeliness of merchandise is sought by most stores. There is a distinct waste measurable in dollars and cents when the reputation of an establishment is lowered by shopworn goods.

(g) Inefficiency always results in waste. The buyer whose judgment often is wrong usually makes the mistakes from lack of knowledge as to the stock and the speed or slowness with which it is moving. Frequent mistakes cause uncertainty in the mind of the one who makes them and tend to worse errors as time goes on, unless some measures are taken to make them improbable.

Have you ever figured or even estimated the amount of these costs in your own business?

More losses which take the form of waste may be thought of, such as insurance on mark-down merchandise and other overhead items, but these cannot be divided conveniently and only need be mentioned.

Playing for the Customer's Xmas Eye

Customer is Very Susceptible to Sales Arguments at Christmas —Hardware Store Can be Made Christmas Headquarters For Gifts For All Members of the Family—Planning the Window Display of Christmas Goods.

WITH Thanksgiving over, and the crisp cool mornings of November well upon us, we are reminded of the approach of the Christmas holiday season. The time of year that offers to the hardware merchant the possibility of a big volume of business. The season at which, more so than any other period, the merchant secures the amount of business he goes after. All merchants realize that sales are more easily made at Christmas time than at any other season because the customer is more susceptible to sales arguments. His or her mind is in harmony with the holiday spirit. The very thought of "Peace on earth, Goodwill to all mankind" has its moral effect on the buying public. This places greater responsibility on the efforts of the store, as a whole, whether an extensive trade will be enjoyed, or just the usual improvement over the previous quiet months. People may be in the buying mood, but where are they going to buy? The hardware store offers a variety of gifts for all members of the family and if this is brought home to the gift purchaser through window and store decorations and displays, accompanied by extra personal effort, the share of the holiday trade will be forthcoming.

Hardware as Christmas Headquarters

Both sex and age are usually fully represented in the seekers of Christmas gifts. The fortunate position of the hardware store is that its lines cover a wide variety of merchandise suitable for every representation. Cutlery, silverplated flatware and hollow-ware, brass goods, aluminumware and electrical goods are the most staple lines appealing to Christmas shoppers, but do not by any means constitute the full array of goods that will appeal to all ages of both sex. Toys and chinaware have been added by many enterprising hardware merchants in all parts of the country, also furniture and victrolas which are of all importance for holiday gifts. However, apart from these which might be termed "additions" we have skates, hockey sticks, sleighs, vacuum cleaners, carpet sweepers, polishing mops, and scores of other articles which can be brought to the front, and prove of great interest from now until the Christmas season is past.

"The Customer Sees You Through Your Windows."

Selecting gifts comes harder to some than to others, and many people almost dread the commencement of Christmas shopping. For no other reason, however, than that they find it very hard to select what they believe will be a suitable gift for the relatives or friends who must not be forgotten. Although there are those who do not find the art of selecting so troublesome, they too are glad of suggestions, and the merchant who offers these is always helpful.

Christmas shopping usually commences through the windows. Towards the latter end of November people are on the lookout, and early windows are here suggested to catch the earlier purchasers. It may be, the gift must travel a long distance before it reaches its receiver, and a decision may be reached for this article before an enquiry is made inside the store. Again, it is sur-

(Continued on Page 60)

Encourage Early Shopping For Christmas

A list of gift suggestions for father, mother, sister or brother is an effective means of stimulating trade in Christmas lines. Many Christmas shoppers look to the store windows as a means of suggesting suitable gifts and this is where the hardware merchant can cash in, by the display of a range of gift lines such as is made in the above display by J. H. Rush, Plummer Ferguson Co., Sault Ste. Marie, Ont., which won second prize in places of 5000 and over in the 1920 Hardware and Metal Christmas Window Contest.

News of Western Canada

Shovels and Heavy Hardware Decline

Said to Be Due to Receipt in East of British and French Goods — Week's Trade in Hardware Active—Collections in Good Shape—Christmas Trade Commencing

VANCOUVER, B.C.—Trading in wholesale lines has been unusually good in Vancouver during the last week but it is not due to any particular improvement in business conditions, which, however are not the subject of any complaint. On account of the washout of bridges on the Canadian Pacific and Candaian National lines, the mail service was badly disrupted and it is the accumulation of orders that is now being felt. This business comes chiefly from the Okanagan and Kootenay districts and along the main line of the C.P.R. as far as Revelstoke. For the first couple of days the postoffice held the mails, there being no effort to take advantage of the service afforded by the Great Northern to Spokane and from there, through the Crow's Nest.

Retailers and wholesale distributors alike, join in saying that their sales volume this year is quite satisfactory and collections are being regularly looked after by the buyers. Credit men are seeing to it that there shall be no recurrence of the boom days nine and ten years ago when almost unlimited credit was the order of the day.

Paint Movement Improved

Paint men report a slightly improved outward movement during the week and this is probably due to the favorable weather which has existed for the last seven or eight days. There have been no price changes and none are anticipated further than alterations in oils or turpentine from time to time. It is believed that paints will remain stationary until about the first of next May. Many retailers are specializing on room decoration materials and are reported to be having a considerable degree of success.

Slight reductions have been made effective in shovels and other items of heavy hardware this week on account of the receipt in the east of a quantity of British and French goocs which it is alleged have been dumped on this side at prices of which forced the manufacturers to reduce their lists to hold the trade.

Chimneys are a "shade" off but other lines remain the same as last week. Ladels, spoons, tubs and other articles of wooden manufacture are still firm although the trade has been looking for a drop.

With the cooler weather at nights there has been a good volume of trade in heaters, both electric and coal and repair parts have come in for their share of replacing orders.

Some orders have been received for seasonable Christmas goods particularly from the interior of the province consisting mainly of aluminum ware, nut crackers, cutlery and some lines of graniteware.

WESTERN CANADA NOTES

J. A. Hossack of the Lufkin Rule Co., of Windsor, Ont., was on the coast this week and expressed himself as well pleased with the condition of the trade here. He made the rounds of the trade.

Thos. Mortimer of Thos. Mortimer & Co., manufacturers' agents of Toronto was in Vancouver during the week calling on the distributing trade. He reported prairie conditions quiet due to the slump in wheat and oats.

C. C. Craig of the C. C. Craig Co., of Winnipeg spent several days of last week in various coast cities calling on the hardware trade.

W. J. Kilmer, hardware dealer of Spokane, was a visitor in Vancouver this week. Accompanied by his wife, he will sail on the Niagara on a trip to Australia. In the late '70s he was attached to the staff of the Manitoba Free Press in association with Frank Oliver.

It was sated in these columns last week that Alderman Owen of the hardware firm of Owen and McCallum would probably run for the mayoralty in Vancouver in the January elections. The alderman has now definitely announced he will be in the running. He has acted in this capacity on several occasions during the absence east and in Scotland of Mayor Gale.

At the quarterly meeting this week of the British Columbia Electrical Co-operative Association, it was decided to change the name to the Electrical Service League of British Columbia, to be more in keeping with the objects of the association. The league has connection with buying or selling. H. Pim of the Canadian General Electric Company and W. C. Mainwaring of the Northern Electric Company were the prime movers in the change.

Peace River, Alta.—J. H. Fraser has taken over new store premises and is commencing business with a complete stock of hardware, house furnishings and harness.

John Dunsmuir, director of Wood, Vallance & Leggatt presided this week at the opening session of the Y.M.C.A. special course on credits and collections. Mr. Dunsmuir is president of the Canadian Credit Men's Trust Association here and he is taking an active interest in everything which will tend to establish better credit conditions and in educating credit men to the advisability of coming into closer contact with their customers.

LOOKING TO THE FUTURE

Some support for the predictions being made by busines men that an improvement in business is to be expected in 1922 was given by Roger W. Babson, head of the Babson Statistical organization in a recent address in Montreal. On this occasion Mr. Babson outlined twelve periods which he claimed formed a business cycle. He showed how the country had experienced three such cycles, each requiring about fifty years to complete. In these cyles commodity prices rise for about twenty years and decline for thirty years. The twelve periods are as follows;—

1. The peak of prosperity, large profits, high wages; 2. Period of inefficiency, declining bond prices; 3. Period of dishonesty and profiteering, declining stock prices; 4. Periodical crime wave, declining commodity prices; 5. Lack of confidence resulting in unemployment; 6. Decline in real estate due to curtailment of living expenses and doubling up of families. This ends the general decline and improvement commences. 7. Thrift more evident, declining interest rates, banks loan money for building, 8. Greater efficiency in labor due to unemployment, increasing bond prices. 9. Fairer prices existing. Dollar reaches normal buying value. 10. Renewed religious interest, improved confidence, greater buying with firming of commodity prices. 11. Greater activity in all lines, labor fully employed. 12 Extravgance again in evidence, high interest rates. Cycle is completed.

It was the opinion of the speaker that we are now entering the sixth period and that the rapidity of recovery would depend upon districts and trades, those trades that were affected the earliest being the first to recover.

Hardware Business on a Cash Basis

Merchandising Problems of Merchants Located Long Distances From Source of Supplies When Declining Market is in Evidence —Necessity of Eliminating Bad Debts From Credit Business When Large Stocks Must be Carried to Give Service.

STARTING with a small shack, size 9x20, the Leith Bros., launched their hardware business in Prince George, B.C., in 1914, the year that steel was linked up on the Grand Trunk Pacific between Prince Rupert and Edmonton.

Times were good; money was plentiful and there was activity everywhere. In those days everybody did a credit business, and with money coming easily it was not hard for the customers to pay up their accounts. Seven years experience has now shown the firm, according to J. Leith, that a much smaller volume of cash business would show just as much net profit at the end of the year and save a tremendous lot of "grief".

Some of the problems of maintaining turnover at a profit when carrying a large stock on a price declining market are outlined herewith by the management of Leith Bros. hardware store, Prince George, B. C. Above is a view of the store showing part of the complete stock of hardware carried and the means used for displaying it. Modern showcases extend down the one side of the store displaying tools, chinaware, etc. Stoves, kitchenware and household utensils are grouped on the opposite side with some tables of seasonable lines down the centre. For the Fall shooting season a rack of guns faces the store entrance.

Discount on Purchases

At the present time, therefore, the business is being change went into effect on the first of October and for two months a ten per cent. discount on all purchases is being allowed, to help make the saving by cash purchase more apparent to the citizens of Prince George.

In commenting on interior business conditions Mr. Leith said; "You must notice in going around, that the retailers in the smaller, more remote centres must carry four times the stock to make the same yearly turnover that the city merchant achieves. Whereas the merchant in Vancouver or Montreal need not carry much more stock than he displays, buying from the jobbers at his door every day, we retailers in a place like this must lay in our stocks many months in advance and at all times carry stocks far heavier than we should. With the stock turned only half as frequently or only a quarter as frequently in many lines, our profits are considerably less even though we collect the high freight in full and get the fairest margin. It is most apparent during quiet times that losses due to credit account cannot be borne except out of net profits; and the amount of business that had to be done before the loss due to one bad account can be regained, is something to startle a merchant. Much better to be without a good share of the business altogether than to hire help, pay rent, light and heat, and conduct a regular enterprise and do a few thousand dollars worth of good business only to have a dead-beat rob you of the profit on all your efforts."

Consistent Advertising

Leith Bros. have always been consistent advertisers. You can pick up either of the Prince George papers and find their announcement of seasonable merchandise, or you can pick up the Directory of the Province of British Columbia and when you turn to Prince George, you have turned to the announcement of the service that Leith Brothers can be to you whether you intend to open up a tie camp or whether you are merely "hiking for the hill' with "grizzley bear blood in your eye."

One of the wisest moves that the merchants of Prince George have made to date, according to Mr. Leith, is the organizing of a local Retail Merchants Association, with a credit rating bureau. "Too bad we didn't have such a bureau functioning five years ago," said Mr. Leith, "but it will help from now on We have a very able credit manager in the person of Mr. Bunting, accountant in our competitor's store here, the Northern Hardware Company, and he will give the association good credit rating service."

WESTERN CANADA NOTES

The trade extends its sympathy to James Bending, Western Manager the Ideal Aluminum Products, Ltd., in the loss of his wife. Mrs. Bending was sick only for a few days.

James Bending, Western Manager the Ideal Aluminum Products, Ltd., is on a business trip to the head office in Toronto. He is accompanied by his daughter.

A. E. Wyatt, retail hardware merchant, Winnipeg, has moved from his former location and is now doing business at 312 Main Street.

COMMERCIAL TRAVELLERS ELECT OFFICERS

Montreal—At the annual meeting of the Dominion Commercial Travellers' Association, all officers were returned by acclamation. Those assuming the executive offices for next year are; Raoul O. Grothe, president; Frank Sumner, 1st. vice-president; E. Fred Dugan, 2nd. vice-president; Maxwell Murdock, treasurer.

Constituting the Board of Directors for the coming year, are Wm. J. Bryant. J. A. Giard, Geo. R. MacGregor, J. B. Poirier, R. C. Stewart, C. D. Bertrand, A. DesRosiers, R. A. Eaton, H. C. Hollond, John Perry and J. M. S. Carroll as past president.

The annual general meeting of the members will be held in the Windsor hotel on December 17.

Disarmament Conference

THE DISARMAMENT CONFERENCE, now proceeding in Washington, to which the representatives of the leading nations of the world have gathered, is the centre of the world's interest at the present time. Great results are expected from the deliberations being conducted, and if, as result of the conference, the world will be liberated from the yoke of terrific annual expenditures for the maintenance of armaments the gathering will have achieved its greatest object. The limitation of armaments among the nations of the world will remove much of the cause of friction which frequently is fanned into flame. With the dogs of war destroyed there will be much less likelihood of war. Another important phase is that the unending drain upon the nations' financial resources for the building and maintenance of such armaments will be stopped and much capital diverted to more productive channels with consequent aid to business in general.

As to the influence of the limitation of armament construction on the metal trades it is evident that preliminary reports have greatly exaggerated the probable effect. Analysis of the situation shows that in the United States the steel requirements of the Navy in the last five years equals about one-half of one per cent. of the finished output of the mills and for 34 years about one-third of one per cent. Judging by the size of the U. S. Navy this situation would probably be very similar in Britain, France, Japan and other leading naval powers. As a matter of fact the suggested limitation of naval construction has made a favorable appeal to steel manufacturers, because the initial effect would not be serious and the ultimate effect of the large release of capital and labor for merchant ship-building and other peaceful purposes, would be to help industry.

The Marking Act

WHILE THERE have recently been reports in circulation to the effect that the proposed regulations governing the marking of imports were to be postponed again from the date set of December 31, it would appear from a message received by Hardware and Metal from the Department of Customs, Ottawa, that no action has yet been taken along this line and under the circumstances importers are justified in making their plans accordingly. The message stated that no further postponement had been authorized by Order in Council and that the Act is effective from December 31.

Some relaxation is said to have been made in the regulations, however, as result of representations made by the U. S. Department of Commerce on behalf of U. S. firms doing business in Canada. This relaxation takes the form of a provision that no extra duty for failure in proper marking is to be imposed on goods imported into Canada prior to next July.

It was pointed out by the Department of Commerce that trade with Canada would be seriously injured were the proposed regulations to go into effect as announced. As result, assurances are said to have been given by the Canadian Government that the regulations will be materially modified. The revision of the regulations as applying to linoleum, oilcoth, carpets etc., were outlined in a recent issue of Hardware and Metal.

This regulation has caused great confusion among importers for they have not known what their responsibility would be in placing foreign orders for delivery during January and February and did not wish to face a penalty of 10 per cent. and the final necessity of marking imports here before they could be marketed. Such marking in Canada would, in the case of many lines, be well nigh impracticable. For instance in the case of cutlery and metal goods the majority of imports from England are marked "Eng." and this style of marking would be prohibited by the regulations.

The foregoing are only a few of the obstacles in the way of administering these regulations and it is to be hoped that before the law is applied in a hard and fast manner that it will be amended on the basis of information supplied by business men who know something of how such regulations will work out in practice.

Political Garbling

CERTAIN politicians in connection with pre-election addresses in various parts of Canada have made radical statements concerning the growth of combines under the tariff protection now afforded. The paint trade was mentioned in connection with this so-called "exposure," it being stated that as a result of the 30 per cent. tariff on paints one company was able to pay dividends on watered capitalization This and other statements were designed to show the thriving and monopolistic condition of this industry under tariff protection.

Any one who is acquainted to any extent with the paint trade of Canada is aware of the fact that this represents one of the most highly competitive industries in the country, there being approximately fifty-two separate companies engaged in the production of paints and kindred lines. Taking into consideration the different basis of gallon measurement in Canada and the United States, the average price of paint made in Canada and sold to Canadian consumers compares favorably with prices charged U. S. consumers by U. S. manufacturers. In fact it has frequently occurred that had U. S. paint been allowed to enter Canada duty free it could not have been sold in this country any lower than the Canadian product.

Paint manufacturers have done a great deal in the upbuilding of Canadian industry and if economies of operation and production have been brought about by the mergers which have taken place, such developments have resulted in advantage to Canadian consumers as well as to the industries involved. We hold no brief for mergers which become monopolistic and turn this situation to their own advantage but the allegations made by the politician in connection with the paint trade would seem to have little foundation in view of the facts outlined.

IT HAS BEEN reported that the co-operative stores operated by the United Farmers of Ontario are bankrupt. Whether or not this is merely a statement circulated by some political opponents of the U. F. O. it is nevertheless a fact that these co-operative stores have been losing money this year due to carrying heavy stocks, and even leaders among the farmers themselves agree that it would be advisable for such organizations to abandon retail selling.

Events in the Trade

BUSINESS CHANGES

Ottawa, Ont. The hardware stock of D. Gosselin (Est. of) has been sold out.

Dutton, Ont.—John A. Campbell (Est. of), hardware, has been sold to W. Patton.

Glencoe, Ont.—J. W. Edwards who has recently disposed of his hardware at Glencoe, Ont., moved this week to Strathroy where he has purchased the grocery business of J. Davis.

NEW FIRMS

Long Branch, Ont.:—Chas. McFarland has commenced hardware business here.

FIRE LOSS

Montreal, Zenophile Boudreau hardware merchant has suffered loss through fire.

OBITUARY

Kingston, Ont.—Frank V. Samwell, owner Dominion Supply Co., wholesale and retail hardware, is dead.

In the death at London, Ont., of Thomas Bryan an outstanding figure in the brush manufacturing business is removed. Mr. Bryan was the founder of the London Brush Manufacturing Company and was for many years manager of the business.

PERSONAL

W. B. Pickard, head of the hardware department of the T. Eaton Co., Winnipeg, Man., was a visitor in Toronto this week.

F. J. Penberthy, general manager Lowe Bros., Co., Toronto, has returned to business after a prolonged illness due to influenza.

At the annual meeting of the Merchants Association at Fergus. Ont., J. Imlah of Imlah Bros., hardware, was elected as second vice-president. A motion was carried to boycott any wholesalers who sell direct to consumers.

J. B. Adamson of Orangeville is one of the active workers in a project for the erection of a new skating rink for the town. At a meeting of those interested it was decided to form a company and Mr. Adamson was elected to the directorate.

George Henderson, president Brandram-Henderson, Limited, is visiting Toronto and Chicago this week. In the latter city Mr. Henderson will attend an executive meeting of the National Paint, Oil and Varnish Association, to which he has been elected Canadian vice-president.

Maurice Gonon representing Societe Generale de Coutellerie & Orfevrerie, Paris, France, called on the Montreal office of Hardware and Metal this week. This firm is now arranging for a Canadian agency for their line of silverware and cutlery.

Among the men elected as officers of the Association of Canadian Advertisers, at their annual convention in Toronto were the following;—H. S. Van Scoyoc, Canada Cement Co., Ltd., Vice-President H. E. Mihell, Imperial Varnish & Color Co., Toronto, Vice-President. D. George Clarke, McClary Mfg. Co., London, Ont., is a member of the Board of Directors.

INCORPORATION

Prest-o-lock Company of Canada, Ltd., has been incorporated in Ontario with head office in St. Catharines, Ont., and capital of $50,000 to manufacture automobile locks, more particularly the Prest-o-Lock.

GARFIELD HOOD

For a number of years connected with The Steel Company of Canada Limited, latterly at the Swansea office of the company in Toronto, who, as announced in last week's issue of Hardware and Metal will take over the position of sales manager of the Ontario Steel Products Company, Gananoque, Ont., at the end of this month.

Floor Coverings Ltd., has been incorporated in Ontario with capital of $40,000 and head office in Toronto to manufacture and deal in linoleum, oil cloths and other floor coverings, leather goods, utensils, etc.

Rice Wire and Metal Goods, Ltd., has been incorporated in Ontario with capital of $50,000 and head office in Toronto, to manufacture and deal in wire and metal goods.

WHITES LIMITED ONTARIO DISTRIBUTORS

Collingwood, Ont.—Whites Limited has been appointed distributors for the Province of Ontario for the ranges and heaters manufactured by Dominion Stove and Foundry Co., Penetang, Ont. Up until the present these products have been marketed by the manufacturer in Ontario, and formerly the whole output of this plant was handled by one Western Canada wholesale hardware firm.

TRUE BILL AGAINST BRENNER COMPANY OFFICIALS

The Grand Jury has brought in a true bill against Nathan Brenner, Meyer Brenner and Gordon Blackford, of the defunct firm of N. Brenner & Co., Toronto, metal dealers, who are charged with the theft of some $700,000 from the company, in addition to various other charges involving falsification of books, concealment of assets and conspiring to defraud creditors. The Grand Jury has returned a true bill upon all counts of the indictment. The Crown has asked that the case be traversed to the next sitting of the Criminal Assizes in January.

ROBT. B. EMERSON IS DEAD

St. John, N.B.—Robert Bickerdike Emerson, senior member of the hardware firm of Emerson & Fisher, Ltd., is dead after a long illness. He was 73 years of age, and has for some years been an outstanding figure in the hardware trade of the Maritime Provinces. His partner, W. Shives Fisher, is President of the Canadian Manufacturers' Association. Mr. Emerson was formerly President of the Board of Trade and Chairman of the School Board. He was President of the Natural History Society. He was an active Conservative.

He leaves his wife, three sons and a daughter, Mrs. George H. McCallum of Ottawa. C. Sydney Emerson of Belbutte, Sask., is one of his sons.

Christmas Window Contest

EIGHT PRIZES are offered by **Hardware and Metal** for the best window displays of Christmas lines, as arranged for this year's trade by hardware merchants or their retail salesmen.

The contest is open to anyone engaged in the retail hardware business in Canada and the displays will be given a fair and authoritative judgment.

The essential point to keep in mind is that the display will be judged on its effectiveness as a business puller. Many points outlined in past contests of Hardware and Metal as to most effective window trims, should be kept in mind in arranging the contest display. Attractiveness without effectiveness is of little use in a window trim.

Arrange a window which will, literally, draw the passers-by right into your store, then send a photo of it to be entered in the contest.

THE EIGHT CASH PRIZES

Places under 5,000		Places 5,000 and Over	
First prize	$10.00	First prize	$10.00
Second prize	5.00	Second prize	5.00
Third prize	3.00	Third prize	3.00
Fourth prize	2.00	Fourth prize	2.00

Dealers in small communities have just as much chance under this arrangement as those in larger districts. Getting selling ideas into the display is what counts.

The contest closes on Monday, January 2. Photos placed in the mail after that date will not be entered.

All matter must be addressed to The Editor, Hardware and Metal, 143 University Avenue, Toronto, and marked "For Christmas Window Contest."

Don't overlook the prizes and the honor of winning one

Test Your Salesmanship

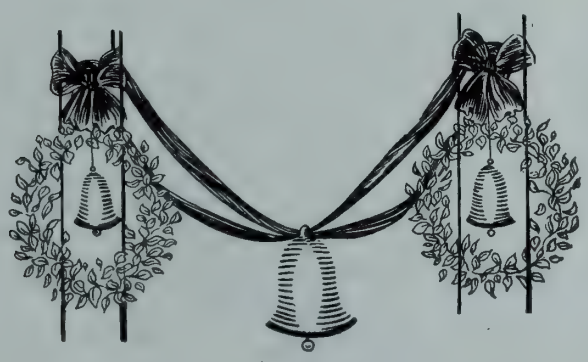
EVERY retail salesman of hardware has a certain pride in his ability to secure the prospect's interest and develop him into an enthusiastic customer, but no matter how competent we may be in that direction there is still something for us to learn.

Participating in the annual Hardware and Metal Christmas Window Contest is a splendid means of comparing selling ability through the medium of the window display. This is a good opportunity to test out your original selling methods and see how they compare in effectiveness with those adopted by other merchants.

What It Means To You

To be a prize winner or to receive honorable mention in this contest is indicated by the fact that the contestants who have won honors in this contest in past years have achieved substantial benefit from the encouragement given them in arranging displays and also from the wide publicity given the results of the contest.

Former participants who have been runners-up in previous contests will benefit from the comparing of their window displays with prize winners, and new entries are wanted from merchants or their retail salesmen in all parts of Canada. Don't forget GET YOUR ENTRY IN EARLY.



The Automobile Tire Situation in Canada

Recent Lowering of Tire Prices in U.S. May Be Only Temporary Development—Canadian Tire Prices Said to be in Keeping with Replacement Costs

SEVERAL of the tire manufacturers in the United States have recently reduced prices on their products ranging from 10 to 30 per cent. This information has been conveyed in reports recently received from southern markets, and in discussing with Hardware and Metal the possibility of this recession in tire prices being followed on the Canadian markets, officials of large tire manufacturers stated that no decision had, as yet, been reached in this connection.

"The situation in the U. S. field as regards reductions in tire prices," according to H. C. Lower, General Sales Manager, Goodyear Tire & Rubber Co., Toronto, "seems to be based upon rather false conditions, and may only be of a temporary nature. It is doubtful, at present, whether Canadian tire manufacturers would endeavor to follow this development, or attempt to adhere to a more even trend." In this connection, it was pointed out that present tire prices are well down to normal, and generally considered to be well in keeping with replacement costs, and the raw material markets.

"The condition in the States is not always an indication of the general market trend" stated the Asst. Gen'l Sales Manager, of the Dunlop Tire Co., Toronto. Mr. Mac Campbell indicated that a rate war was in progress, with the object of apparently squeezing out the smaller manufacturers. A continuance of the market prices on tires in this direction might eventually force some lowering in Canadian tire quotations; but producers and distributors do not look for any general price changes, at present. According to Mr. Mac Campbell, manufacturers here have no indication of any contemplated revision, but as he stated "there is no telling from day to day just what might develop. The present basic market conditions hardly warrant further reductions," he added.

On the other hand, the general tendency lies in the direction of an easier level on tires, especially with the advent of the quieter period and slackening demand for products of this nature. One primary motive towards lower quotations is stated to be the present stocks of tires, which are described as heavy. These supplies, together with the large quantities of inner tubes now on hand. represent much capital tied up. Therefore, it is expected in some quarters, that sooner or later some determined efforts will be made to move these accumulations now on hand in factories and warehouses.

Propose Control of Rubber Market

World-wide Depression in Rubber Industry Necessitates Formation of Organizations To Encourage Wider Use of Rubber Products

THE depression in the world rubber trade for the last 19 months has had a great effect on the price of crude rubber and has brought about a situation of interest to every purchaser of that commodity.

Between January 1, 1920, and July 28, 1921, the London stock of crude rubber climbed from 21,992 tons to 70,859 tons; in the same period the price declined from 2s. 10½d. (70 cents) per pound to 9 pence (18 cents). As it is estimated that rubber laid down in London generally costs well above that figure, it will be seen that rubber production today is decidedly a losing proposition.

Two remedies for this present trouble have been proposed by the Rubber Growers' Association (British) — restriction of output and increased use of cheaper rubber. This organization also proposed the formation of the Rubber Producers' Corporation (Ltd.), whose fivefold purpose is stated as follows:

(1) To control the rubber output of its members.

(2) To fix the selling price and regulate the sale of the rubber produced by its members.

(3) To regulate the opening of further rubber lands by its members.

(4) To purchase or make advances on the rubber harvested or to be harvested by its members.

(5) If deemed desirable, to make advances on security and on terms to be agreed to approved rubber estates belonging to its members.

The proposal also includes a scheme for the formation of a similar Dutch Company, which would control a large percentage of the Netherlands East India rubber acreage. A working agreement between these two corporations is to provide the organizers with the control of rubber production.

Some producers feel that more satisfactory relief from the present period of overproduction, or underconsumption as it is sometimes called, can be found in the increased use of rubber. Cheaper rubber, it is thought, should result in more popular uses for it, which will mean to the producer a smaller profit on larger quantities, instead of larger profits on smaller quantities, as the corporation scheme proposes.

Recently the Rubber Growers' Association offered a list of cash prizes totaling $5,000 for the best suggestions for new uses of rubber. Improved roadways, ruber linoleums, etc., shown at the Rubber Exhibition in London, indicate the lines which new uses of the cheapened raw material are likely to follow.

Opinion in London is quite unanimous that rubber has "not turned the corner as yet," but it is generally felt that the worst is over.

Canada Good Market For Rubber Goods

The Province of Quebec offers a splendid market for rubber tires. Recent statistics show that the total number of Motor vehicles registered in 1920 on the island of Montreal was 19,443. This included 13,898 touring cars, 1,537 roadsters, 2,746 trucks, and 1,262 motor cycles. Registered touring cars increased in 1920 over the previous year by 3,663, roadsters by 156, trucks by 1,014, and motor cycles by 373. In the entire Province of Quebec there were registered in 1920 47,730 automobiles and motor trucks, an increase of 18,547 over the previous year. These figures show the great rate at which the number of motor vehicles is increasing in Quebec and give an idea of the extent of the market for rubber tires and tubes in only one Canadian province

With a tariff of 35 per cent on rubber tires it is difficult for American manufacturers to compete with those situated in Canada, especially at present with a premium on American funds. In spite of the tariff and exchange situation, American tires are still imported, the total value of solid rubber tires, casings, and tubes for pneumatic tires coming into Canada from the United States in the 12 months ended March 31, 1921, amounting to $2,193,992.

A considerable part of the tires imported from the United States come in as original equipment on American-made cars, and repeat orders are frequently given for them if found satisfactory, particularly for imported cars of the expensive type, the purchasers being willing to pay more to get the tires that suit them. Solid tires for trucks are still imported from the United States to a considerable extent, since a full range of sizes is not yet manufactured in Canada.

In 1919 there were manufactured in Canada:

	Number	Value
Automobile tires, casings all sizes,	1,293,007	$23,298,673
Rubber tires, all sizes, ...	1,117,913	2,892,487
Rubber tires, solid,	158,781	510,942
Motorcycle tires ..	8,586	74,131
Motorcycle tubes .	8,717	12,396
Bicycle tires	185,613	244,521

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

PRICE changes on the hardware markets this week are of particular interest, and several absorbing developments are recorded. One of the feature revisions provides lower quotations on many lines of galvanized products, such as corrugated sheets; eavestrough, both ridge roll and valley; conductor pipe, and elbows; galvanized siding and shingles. Other reductions cover "S" wrenches, both nut and pipe; Samson car movers; both lap-weld and seamless boiler tubes; Canadian makes of pocket knives; carpenter's pincers; and railroad spikes; while one line of tools shows a 10 per cent. reduction.

The fourth successive price decline this season on building papers, both dry and tarred; sheathings, and tarred felt, is announced on eastern markets. This development is attributed to competitive conditions in that locality, but whether the tendency to lower prices on these products will spread and the reduction become general, is a factor being closely watched by the trade.

An easier tendency is also noted in some quarters on soil pipe and fittings; while other quotations remain steady. The influx of materials being placed on the markets through War Disposal Boards has now been recorded in British Columbia circles, where alleged foreign quantities of shovels and scoops have forced Canadian manufacturers to lower prices to meet this style of competition.

Quietness again reigns in the scrap material markets. The prevailing interest in ingot metals once more centres around copper, this metal having established signs of recovery in both inquiry and price. The business horizon continues to improve, with the basic contributory elements of confidence and optimism being substantiated by trade activity in general, and preparations for seasonal briskness in particular.

MONTREAL MARKETS

MONTREAL, November 17.—A long list of price revisions attract attention to the hardware markets this week. All changes, with the exception of coal oil, which is now quoted one cent per gallon higher, are in a downward direction, and many important staple lines are affected. The feature change is perhaps on building papers, both tarred and dry, sheathings and tarred felt, practically all grades and weights being shown at reduced figures. Another important decline is in the prices of galvanized products. Eavetrough, conductor pipe, conductor pipe elbows, siding, shingles, and corrugated sheets are all quoted at lower levels. Eavetrough and conductor pipe will now sell at less 70 per cent; elbows at 60 per cent. off; while galvanized shingles and siding are lowered 50 cents per square, painted siding 25 cents a square. Corrugated sheets have new lower list prices, the reduction ranging from 7 to 12 per cent. Soil pipe and fittings will now cost considerably less through the changing of discounts, and boiler tubes also come under a revision this week. A slight reduction is made in black sheets, while both glass and metal wash boards show new lower prices. Pocket knives of Canadian manufacture are approximately 10 per cent. lower. Curry combs have new lower prices and "S" wrenches are reduced about 10 per cent. L. S. Starrett line of tools also shows a price decline of approximately 10 per cent. on the many tools.

"S" WRENCHES ARE LOWER IN PRICE

Montreal

New lower quotations are now given on the various sizes of pipe and nut "S" wrenches. Following are net prices on sizes of both kinds;

"S" WRENCHES—	Nut.	Pipe.
6 inch, per dozen	10 00	10 60
8 inch, per dozen	12 60	13 20
10 inch, per dozen	14 80	16 00
12 inch, per dozen	22 80	24 00
14 inch, per dozen	30 50	31 80

CURRY COMBS HAVE NEW LOWER PRICES

Montreal.

A reduction of approximately 10 per cent is shown on curry combs, and following are prices and discounts on some of the well known lines;

CURRY COMBS—No. 127, $3.80; No. 121, $2.86; No. 101, $2.36; No 111, $2.64

CATTLE COMBS—No. 98, $3.40; No. 100, $4.80.

Less 40 per cent.

EAVESTROUGH, CONDUCTOR PIPE AND ELBOWS REDUCED IN PRICE

Montreal

Through a change in discounts, net prices on eavetrough, conductor pipe and conductor pipe elbows have been lowered in price. The discount on pipe and trough is now 70 per cent, formerly being 60—10 per cent. Elbows will now sell for 60 off, former discount being 55 per cent. Price declines are annouced on these lines to keep pace with the trend of the plain galvanized sheets which have been on an easier market since the last revision made in the above products.

The recent first touch of winter weather has had its effect on the current movement of eavestrough, etc. Sales are now reported as showing a decided falling off in the past two weeks. Business has, however, been fairly well maintained all during the late summer and fall months in comparison with other years. Following are list prices and revised discounts;

EAVESTROUGH—

O. G., Square Bead, per 100 ft., 8 inch, $15.90; 10 inch, $17.70; 12 inch, $21.20; 15 inch, $28.80; 18 inch, $36.80.

O. G. Round and Half Round, per 100 ft.—8 inch, $16.90; 10 inch, $18.70; 12 inch, $22.20; 15 inch, $29.80; 18 inch, $37.80.

CONDUCTOR PIPE—2 inch, $18.40; 3 inch, $22.30; 4 inch, $29.60; 5 inch, $40; 5 inch, $49. Discount 70 per cent. off list.

CONDUCTOR ELBOWS—

Plain round or round corrugated:

2 inch, list	$ 5 25
3 inch, list	6 00
4 inch, list	10 50
5 inch, list	24 00
6 inch. list	29 00

Less 60 per cent.

REDUCTION ANNOUNCED IN WASH BOARD PRICES

Montreal

New lower prices are announced on both metal and glass wash boards. The reduction is uniform on both boards, notwithstanding glass used in the manufacture of the glass boards shows very little reduction. Following are new prices on some of the well know lines;

WASHBOARDS—	Ont. and Que.	Mar. Prov.
Glass	8 00	8 50
Royal Globe	5 25	5 25
Waverly	5 25	5 50
Baby	2 4	2 60

BAR IRON REMAINS AT PREVIOUS DCELINE

Montreal.

No further change is announced in quotations of bar iron and steel since the revision on all grades last week. There is also no new developement in market conditions in general, the easier tone remaining. At primary sources a seasonable quietness now adds to the former situation, although a buying movement is reported in certain lines of the industry. Locally, business is fairly quiet, due to the absence of the larger contract work. Dealer purchases are fair, however, and one large jobber states that while large orders are not obtainable, the smaller trade is being kept up to expectations when trade conditions in general are considered. Little improvement is now looked for until after the turn of the year, when it is felt that present price levels should offer a stimulus for increased sales. Following are present quotations.

Common bar iron, 100 lbs.	2 90
Refined iron	4 40
Irish finish machinery steel	2 95
Mild steel	2 90
Single reeled machinery steel	4 75
Band steel	2 90
Spring steel	4 50
Slighshoe steel	2 90
Tire steel	3 10
Toe calk steel	3 80
Harrow tooth steel, per lb.	3 05
Mining tool steel per lb.	0 22
Black Diamond tool and cast steel, per lb.	0 22

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

BUSINESS VERY QUIET IN WASTE MATERIALS

Montreal.

Dealers in scrap report very little change in the market from last week, with prices remaining normally unchanged. With the season now well advanced, little hope is held forth for increased business during the winter months. Prices are considered inducement to stimulate business at the present time. Local prices given are as follows:

Automobile tires		0 75
Rubber shoes		0 02½
Yellow brass		0 05
Red brass		0.08½
Light brass		0 04
Scrap zinc		0 03½
Lead, heavy		0 04
Lead, tea		0 02½
Light copper		0 07¾
Heavy copper		0 10½
Wrought iron, R. Rd., No. 1 per gr. ton		10 50
Malleable scrap (ton)		10 50
Pipe scrap (ton)		7 00
Heavy melting steel	7 50	8 00
No. 2 busheling.		4 00
Boiler plate		8 00
No. 1 machinery cast		20 00

BLACK SHEETS SHOW A SLIGHT REDUCTION

Montreal.

Curent quotations on all gauges of black sheets show a slight decline this week. The reduction is very small, averaging 5 cents per 100 pounds, and is made by only some distributors while others are maintaining the former levels.

All other sheets remain nominally unchanged with conditions at the mills dull in most instances. There is an increased buying movement reported in bright tin plate, due to canners placing contracts for their containers. The season for Canada plate is now well spent and business in galvanized sheets is of a spasmodic nature, one week bringing increased sales, followed by a quieter period. Distributors now look for a little improvement until after the close of the year. Current prices are as follows;

BLACK SHEETS

10 gauge	4 25	4 65
12 gauge	4 35	4 75
14 gauge	4 50	4 85
16 gauge	4 50	4 95
18-20 gauge	4 75	5 20
22-24 gauge	4 85	5 35
26 gauge	4 90	5 40
28 gauge	5 00	5 50

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

GALVANIZED SHEETS.

U. S. Standard.		
10¾ oz.	6 85	7 75
28 gauge	6 45	7 35
26 gauge	6 15	7 00
22-24 gauge	5 95	6 75
20 gauge	5 80	6 60
18 gauge	5 80	6 50
16 gauge	5 70	6 50
14 gauge	5 60	6 50
12 gauge	540	6 50
10 gauge	5 30	6 50

English Standard—	Queen's Head	Fleur-de-lis
28 gauge	8 25	7 75
26 gauge	8 00	7 50
24 gauge	7 40	7 10
18-20 gauge	6 35	6 50
22 gauge	7 05	6 65

NOTE.—These prices are full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. Extra for sheets 4 ft. wide, 50 cents per 100 pounds. Extra for sheets 3 ft. wide, 28 ga. and 10¾ oz. 25 cents per 100 lbs.

BRIGHT TIN PLATES

20 x 28 x 100 lb. basis	$17 50
20 x 28 IC, 112s	18 00
20 x 28 IX, 112s	20 00
20 x 28 IXX., 56s	11 25
20 x 28 IXXX., 56s	12 00

TERNE PLATES

20 x 28 IC., 112s	17 50

CANADA PLATES

18 x 24 x 60s	5 80 box
18 x 24 x 75s	6 10 box

WELSH CANADA PLATES

Polished—	
18 x 24 x 52s	8 25 box
18x24 x 60s	8 50 box

NEW LOWER LIST ON CORRUGATED SHEETS

Montreal.

Accompany other products of the galvanized iron, new lower prices are announced on corrugated sheets. The trade discount remains unchanged, but list prices have been reduced on all gauges. The amount of reduction varies on the different gauges, but is from 7 to 12 per cent. Sales of corrugated sheets have eased off considerably wth the appearance of winter weather, this lack of demand no doubt assising towards the present lower quotations. The chief factor however, is said to be the easier trend of the plain galvanized sheets, distributors of corrugated being anxious to keep in line with the plain sheet market. Following are the reprices:

Corrugated—	
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 7 ½ per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

PRICE REDUCTION AGAIN ANNOUNCED ON BUILDING PAPERS

Montreal

The trend of the market on building papers and sheathings is clearly defined in the announcement of another decline in prices. This is the fourth successive reduction made in these products only last month a revision was recorded on many of the same lines as are now shown at lower figures. The revisions now affect No. 1 dry fibre; No's. 1 and 2 tarred fibre; dry and tarred heavy straw sheathings and tarred felt in all weights. Following are present prices;

PAPER—	Per 400 ft. roll
Dry Fibre, No. 1 Anchor	1 25
Do., No. 2 Anchor	0 70
Do., No. 2 Elephant	0 70
Tarred Fibre, No. 1 Anchor	1 35
Do., No. 2	0 85
Elephant Brand, tarred, No. 2	0 85
Surprise Fibre	0 80
Stag Sheathing	0 80
Cyclone, dry	1 25
Do., tarred	1 35
Joliette Sheathing	0 70
Do., tarred	0 85
	Per 100 lbs.
Monarch Sheathing, white	5 75
Do., gray	4 75
Straw Sheathing, heavy dry	3 15
Red Star heavy tarred straw	3 40
Imp. White Sheathing	5 75
Imp. Grey Sheathing	4 75
Scythe Brand dry straw	3 15
Spruce Sheathing, 36" and 72" wide	7 25

LEAD PRODUCTS REMAIN ON A FIRM BASIS

Montreal.

Quotations on lead and zinc products are firm and unchanged. Current business in the various lines shows a slight improvement, but it has been noticeable that these products have been on a more or less irregular market all season. With the approach of winter weather, a little improvement can be expected. The tendency of the market is one of firmness, although no actual change is yet in sight. Following are present quotations;

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3* lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½

Cut sheets ¼c lb. extra, and cut sheets to size, ¾c lb. extra.

Solder, guaranteed, lb.	0 25½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 20½
Do., wiping, lb.	0 21½
Do., wire, lb.	0 35
Zinc sheets, casks	0 11½
Do., broken lots	0 12

To the Paint Dealers of Canada

NAAMLOOZE Vennootschap **„Le Ripolin"**, Amsterdam, Paris and London, through a stock interest, have become associated with The Glidden Company and its affiliated Companies and transferred to this great paint and varnish organization the Canadian rights for the manufacture and distribution of Ripolin Enamel Products.

Ripolin is the original Holland enamel. Its secret process, which has never been duplicated, was developed more than thirty years ago by Riep, Holland's celebrated paint chemist. Ripolin is today the leading enamel paint in all European countries. It has won recognition throughout the world for its enduring and satisfying quality.

Since the first introduction of Ripolin in Canada, it has been used in buildings of the finest type, in Canada's most beautiful homes, in hospitals, hotels, commercial structures, college buildings and institutions. During the great war, the production and Canadian importation were necessarily curtailed. But the demand has steadily increased. Our association with the affiliated Glidden Companies (listed herein) has therefore been formed for the purpose of providing the Canadian paint dealer with direct, "close at hand" and economical Ripolin service through an established chain of distributing facilities.

The Glidden Company will manufacture Ripolin under our direction and in exact accordance with our secret processes and formulae so that all dealers and users can be assured of having genuine Ripolin at prices in fair relation to the cost. In order that our trade may be properly supplied until such time as manufacturing plans in Canada can be fully developed, The Glidden Company has taken over our Canadian stock and has imported a very liberal stock direct from Holland.

We take this occasion to express appreciation for the interest of our patrons during the last eighteen years of Ripolin importation and to bespeak a continuance of that support for our Canadian associates.

Naamlooze Vennootschap „LE RIPOLIN"
Amsterdam Paris London

RIPOLIN

THE ORIGINAL HOLLAND ENAMEL PAINT

The Story of

It happened in Holland—thirty years ago. Riep was looking for a job. He had been turned down many times that day, but our Holland paint chemist was of the "never say quit" type, and his oft expressed claim, "I can make an enamel that will stand outside exposure; I can give you an enamel that no one can duplicate", was finally challenged by an old Holland paint maker in Amsterdam.

So Riep went to work. The deliberate methods of the old country gave him all the time he needed. But Riep could not hurry. It wasn't in his make-up. He took his own time and carried on his experiments and tests in secret. A month passed. Then two more without result. And another. But at the end of the fifth month Riep was ready. He was confident of the result.

Riep Made Enamel History

The final tests were made and the results proved Riep's claims to be well founded. *A new kind of enamel had been discovered*—a white enamel that would pass many more tests than Riep had promised. It *would* stand outside exposure. The white *was* the clearest and purest white that had ever been produced. It *could* not check or crawl. It met the most exacting requirements in working, drying, covering, spreading and wearing properties. IT COULD NOT BE DUPLICATED THEN *and never has been equalled since.* Riep produced the original Holland enamel paint.

Because of the wonderful "long oil" qualities of Riep's invention it was first called Riep's Oil. Then these two words were combined in Riepsol, from which the name Ripolin was finally evolved.

The Small Beginning of a Great Success

Little by little Ripolin added to its reputation in Holland. Its remarkable qualities soon became known in other countries. England and France were the first to enthusiastically accept it. Ripolin quickly found its way into the hands of the best European decorators who carried it into the finest branches of their work. It was a delight to the old country workmen. Wherever the tourist may go Ripolin will be found on the old familiar landmarks, where it has given service for many years, as well as in the newer historical buildings.

RIPOLIN

The Original Holland Enamel Meets Instant Canadian Success

Eighteen years ago Ripolin came to Canada. It met with immediate recognition among the discriminating architects, decorators and master painters. Efforts to imitate it by Canadian manufacturers were futile. Today its process still remains a "secret". Through a recent market investigation Ripolin has fully demonstrated its absolute leadership. Every important city of Canada has its Ripolin examples. Every city has its expert workmen who know the worth of Ripolin and who will testify to its wonderful qualities.

Prominent buildings of every type in Europe as well as in Canada and the United States furnish conclusive proof of Ripolin serviceability.

Ripolin Reputation the Dealer's Asset

The story of Ripolin in Canada is a story of a continuous procession of one successful operation after another. In the most beautiful of Canadian homes, in banks, hotels, apartments, office buildings and public institutions, in colleges and hospitals, wherever there is need for enameled surfaces of beauty and long life, Ripolin will be found in use.

Now this reputation is to be made an even greater asset for the Canadian paint dealer. Ripolin will be distributed throughout the Dominion by the Greater Glidden Organization. It will be available in every locality—delivered with dispatch and at lowest possible freight rates. The needs of every possible customer of the Ripolin dealer will be fully satisfied.

Ripolin Will Be Extensively Advertised

Advertising will carry the Ripolin message from one end of the Dominion to the other. Local helps of every worthy type will be furnished the dealer. Beautiful plates will be sent to the Architect. Painters and Decorators will know of Ripolin progress by direct promoting methods. The demands of the Canadian home for *the true enamel result* will be focused upon Ripolin dealers. *Ripolin reputation will be a very real asset. Write today for price list and merchandising data.* Address that constituent of the Glidden organization most conveniently located or the one with whom you now have trade relations.

Ripolin Quality Rules the Price

AND always will. But Ripolin prices will always be placed at the lowest possible point consistent with the *established quality*—they will represent a handsome net profit for the dealer because the continuous, steady demand for Ripolin will mean frequent turnover.

Ripolin will always cost the consumer slightly more than other enamels—imported or Canadian made—when measured by the gallon. Its quality—its high character demands the use of certain definite materials, *aged*, *treated*, *ground*, *prepared* by a secret process, and these highest grade materials cost more. But when measured by performance, enamel users cannot buy a product that will give the same year-by-year economy. The difference in cost per gallon or quart is quickly offset by great spreading and covering capacity and then offset again and again by the *long life* of Ripolin.

A Word to Present Ripolin Dealers

Your Ripolin requirements will be supplied without interruption. You will now have the full advantage to accrue from Dominion-wide distributing facilities. Your shipments will be made from the most advantageous shipping points—at the lowest freight cost. A most complete and efficient organization is at your service.

A Word to Prospective Ripolin Dealers

The story of Ripolin brings unusual profit opportunities to you. It will be still more convincing when you have prices, discounts, merchandising data and our quick-selling plans before you. You can quickly have this information by merely dropping a postal to any one of the well known companies listed below. The salesman or salesmen that cover your territory are ready to serve you in the buying of Ripolin and then *in the selling of Ripolin.*

MONTREAL MARKETS

(Continued from page 48)

SAMSON CAR MOVERS NOW $75.00 DOZEN

A reduction has been made in the price of the Samson car movers, and these are now quoted at $75.00 a dozen.

BOILER TUBES COME UNDER A REVISION

Montreal

A revision is made in all sizes of Lapweld boiler tubes, also in 2½ inch and larger Seamless tubes. Revised prices are in all cases in the nature of a reduction which varies according to size. This price change is said to be in accordance with the general easier movement in the steel industry, but governed by local stocks where dealers are apparently anxious to keep well in line with the trend of the market. The buying movement in tubes is rather spasmodic, although on the whole remains seasonably dull. Following are revised prices on the various sizes;

BOILER TUBES—	Seamless	Lapweld
1 inch	24 70	....
1¼ inch	24 50	....
1½ inch	24 00	....
1¾ inch	26 00	26 00
2 inch	24 50	20 50
2¼ inch	27 75	23 50
2* inch	32 50	24 50
3 inch	40 00	30 50
3 inch	52 50	34 75
4 inch	65 00	44 00

RANGE BOILERS SHOW NO CHANGE

Standard list on all sizes of range boilers remains unchanged, with practically all manufactuers and jobbers maintaining these prices. The recent cutting of prices, especially on the 30 gallon boiler, has almost ceased, although an isolated case is reported where this size can still be purchased for a lower figure. Sales are continuing with little change, being chiefly of small quantities;

RANGE BOILERS—	Standard.	Ex.Heavy
30 gallon	9 25	11 75
52 gallon	21 00	26 00
35 gallon	12 00	14 50
40 gallon	14 50	17 00
52 gallon	21 00	26 00
66 gallon	30 00	36 00
82 gallon	37 50	50 00
100 gallon	48 00	58 00
120 gallon	57 00	67 00

LOWER PRICES IN SOIL PIPE AND FITTINGS

Montreal.

Through an increase in discounts, quotations on both soil pipe and fittings have been reduced in price. The 2 and 3 inch pipe shows an approximate reduction of 15 per cent., and 4 inch nearly 17 per per cent. Larger sizes, 5 and 6 inch, do not record qiute so extensive a decline, while all sizes of fittings are now quoted 10 per cent. lower. There is a fair amount of activity in soil pipe at present, the demand no doubt assisted by the approach of colder weather. when the frozen ground will not permit the laying on such an extensive scale. Following are revised discounts;

SOIL PIPE—	
2 and 3 inch	45%
4 inch	50%
5 and 6 inch	45%
Fittings—	
2 to 6 inch	50-10%

COAL OIL PRICE ADVANCED ONE CENT

Montreal.

Following the trend of crude oil, is advanced one cent per gallon, bringing the quotation now to 22 cents. Gasoline prices are holding unchanged for the present.

STARRETT'S TOOLS ARE REDUCED IN PRICE

Montreal.

The L. S. Starrett line of tools will now sell for less, a reduction of approximately 10 per cent being announced on the many lines.

SIDING AND SHINGLES SHOW REDUCTION IN PRICE

Montreal.

The general reduction in products of galvanized sheet manufacture has also reached siding and shingles. Painted siding is reduced 25 cents per 100 square feet, galvanized 50 cents square. Shingles shows a decline of 50 cents per square.

PIPE FITTING PRICES HOLD

Montreal.

Discounts and net prices on both malleable and cast pipe fittings remain unchanged this week. The current movement also shows very little change, orders being small and sorting character among the various kinds and sizes, Following are prevailing prices;

FITTINGS—		
Cast Iron fittings		20%
Bushings, cast		27½%
Do., malleable		25%
Flanges		37%
Plugs		27½%
Flange unions		22½%
Malleable unions		42½%
Dart unions, black		33
Do., galvanized		13
Nipples, ⅛ to 4 in, close and short		50%
Do., long		60%
Do., 4½ to 8 in., close and short		40%
Do., long		50%
Couplings, 4 in. and under		30%
Do., 4 in. and longer		10%
Class A	0 53	0 65
Class B	0 21½	0 28¼
Class C	0 14	0 21½

CANADIAN POCKET KNIVES ARE NOW LOWER IN PRICE

Montreal.

Pocket knives of Canadian manufacture, the products of the Canada Cutlery Company, will now sell for less. In the new quotations, all lines are reduced approximately 10 per cent.

MAY BE SHORTAGE OF GLASS OVEN WARE

Montreal

With the approach of the Christmas season, sales of glass oven wares are reported more and more active. Stocks of this line are said to be none too ample, and a shortage may occur before the busy holiday season is over if an improvement in deliveries from the manufacturers is not forthcoming.

FEW CHANGES IN INGOT METALS

The ingot metal markets are more or less featureless, with very few changes in prices and the volume of business perhaps a little less than recently. Indications point to no marked change taking place in the near future.

TIN—There has been a slight improvement in London, and the market here is also higher owing to the advance in Sterling exchange. Opinions seem to differ as to the future of this metal, but it is probable it will work higher after the turn of the year. Local price 35 cents.

COPPER—The New York market seems to be slightly firmer, especially for forward deliveries. However, unless conditions in Germany improve and thus enable the resumption of export business, it is difficult to see how prices can advance to any great extent. London is now expected to present a better appearance after the recent decline. Electro is quoted at 17½ cents, casting at 17½ cents.

LEAD—The London market maintains its firm tone, but it is not expected that prices will go any higher in view of more plentiful supplies. There is nothing new as far as the American market is concerned, where the situation between supply and demand seems to be pretty well balanced. Quotation locally, 6¾ cents.

SPELTER—London eased off somewhat this week, but this is only regarded as temporary. It is significant that Germany is not offering any spelter despite the decline in the mark. East St. Louis is steady at about $4.75, and producers are not anxious to sell at this figure. Local market is quoted at 7 3-4 cents.

TORONTO MARKETS

TORONTO, November 17.—Changes to a lower price level affecting galvanized products generally appear in the current hardware markets. These reductions have been noted on corrugated sheets; eavestrough, both ridge roll and valley; conductor pipe, and elbows; sidings, and shingles.

Another development of interest is the reported easier prices on building papers and sheathings, which have become operative in eastern markets. Similar changes have not yet been announced in local circles, and the situation is being followed with keen interest. An easier tendency has been recorded in some quarters on soil pipe and fittings also, but local quotations again remain unchanged at levels which have prevailed for several months.

Other price changes registering an advance are given on coal and black oils. There has been a slight increase in the revised list prices on soldering coppers. The primary sheet markets have a gen-

eral easier tone, with the demand not so strong as previously. Locally, however, the volume of sheet inquiry continues to remain the brightest feature of the steel industry.

Bar iron and steel quotations are holding at the recent new levels. The lead market tendency has been gradually registering improvement. Quietness again reigns in the scrap markets; while the prevailing interest in the ingot metals again centres around copper, this metal having established signs of recovery in both inquiry and price.

ANOTHER PRICE DECLINE ON CORRUGATED SHEETS

Toronto.

A further downward revision of prices on corrugated sheets has now been announced. This decline is chiefly attributed to the recent easier tone in the markets generally, particularly on galvanized sheets and plates on the primary centres. While the recent strength in sheet inquiry was being maintained, the firmer tendency was reflected on corrugated, but with the recession in demand, this downward price movement then materialized. The extent of the reduction varies with each gauge, commencing with 50 cents per 100 sq. ft. base. Substantial changes are recorded on the heavier sheets.

With the advent of early winter, the weather conditions do not contribute to outdoor building activities, and consequently the current sales of corrugated sheets have suffered a recession. However, dealers express the opinion that the demand has been maintained in a satisfactory fashion all through the summer and fall months, and a decline in the movement at this time of the year is generally expected. The new quotations are as follow:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 7½ per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

LEAD MARKET TREND GRADUALLY BETTER

Toronto.

The current demand for lead and zinc goods is stated to be holding up fairly well, and prices are being maintained at previous levels. The recent price fluctuations on primary metals, which enter chiefly into the production of these goods,—and especially solders,—have not been of sufficient duration or extent to show reflection in the domestic quotations on the manufactured commodities. Primary lead and tin markets, however, are generally registering a gradual trend towards improvement. Prevailing quotations remain at the following unchanged levels:

LEAD AND ZINC GOODS—	
Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subjected to a discount of	10%
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft. in rolls, lb.	09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 29
Do., strictly, lb.	0 22
Do., commercial, lb.	0 20
Do., guaranteed, lb.	0 24
Do., wiping, lb.	0 20
Zinc sheets, per lb.	0 13

REDUCED PRICES APPEAR ON SIDING AND SHINGLES

Toronto.

A decline of between 6 and 7 per cent. also appears on galvanized siding and shingles. This change is in accordance with the recent revision to easier levels in prices on other lines of galvanized sheet manufacture. The new quotations on siding are $7.50 per square: and on shingles, $8.50 per square. There is a discount of 7½ per cent. applicable in both cases. These levels are 50 cents lower than the previous prices.

PRIMARY SHEET MARKETS HAVE EASIER TONE

Toronto.

The brisk demand for sheets on the primary steel markets has recently subsided to some extent, and these easier tones are reflected on the domestic markets generally. Another attempt by certain southern sheet producers to place still a further advance on prices, failed to hold in view of the slackening demand. Quotations are therefore, being watched with keen interest in all circles generally. The local situation remains fair, with prices holding unchanged, at present. No marked developments have been recorded. The current quotations follow:

BLUE ANNEALED—		
10 gauge, base	4 00	4 50
12 gauge	4 05	4 55
14 gauge	4 10	4 60
16 gauge	4 15	4 65
BLACK—		
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 10
26 gauge	4 65	5 15
28 gauge	4 75	5 25

Charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	Queen's Head	Fleur-de-lis.
28 gauge	9 25	8 75
26 gauge	9 00	8 50
24 gauge	8 40	8 10
22 gauge	8 05	7 65
18 and 20 gauge	7 35	7 50
Premier and Apollo.		
10¾ oz	6 50	7 00
U. S. 28 base	6 10	6 60
U. S. 26	5 80	6 30
22 and 24	5 65	6 15
18 and 20	5 50	6 00
16	5 35	5 85
12 and 14	5 20	5 70

An extra 40c per 100 lbs. is charged for Keystone and Premier brands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10 3-4 oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

PLATES, CANADA—	
Dull 60 sheets	$5 65
Ordinary, 52 sheets	5 60
PLATES, COKE TIN—

ONLY MODERATE SALE FOR COMPRESSION GOODS

Toronto.

The general situation in compression goods has failed to develop any marked features. The current demand is of a moderate nature, with the proportion of sales having registered a seasonable decline since the advent of early winter weather. Interior building activities, and repairs of this nature, still combine to constitute periodical requirements of these products.

Quotations on the various makes, styles and sizes of valves and cocks, are holding at the latest revised levels, and no current changes have been reported. Following are prevailing discounts:

Compression work, standard	43%
Fuller work, standard	30%
Bath cocks, compression	32%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Round-way stop and waste cocks, standard	46%
Brass steam cocks, standard	10%
Globe, angle and check valves, standard	20%
J. M. T.	20%

Emco Globe valves, ¼" to 2"	30%
Do., Do., Do., 2½" to 3"	20%
BASIN COCKS—	
No. 0 and 1, Fuller pattern	30%
Quick opening No. 3633	43%

EASIER TENDENCY NOTED IN SOIL PIPE MARKET

Toronto.

While there has recently developed some anticipation of revisions in the discounts on soil pipe and fittings, no change had been announced and none could be determined at the time of going to press. One of the most prominent and well-informed dealers in these products, described the tendency to change at the present time as being uncalled for, when discussing this situation with Hardware and Metal. It was pointed out that with but a few weeks before the end of the year, both distributors and merchants will be busily engaged upon the annual inventory work, with very little time or incentive for placing orders or receiving fresh stocks. Whether the local quotations on soil pipe and fittings will follow the lead of certain Eastern markets and register reductions in the near future, could not be ascertained. Predictions in this direction were difficult to secure, and the consensus of opinion indicated an attitude of watchful waiting. Other tubular goods, however, are remaining unchanged with regard to price levels, and the primary factors do not contain any changes of marked interest. Prevailing quotations on soil pipe and fittings are as follows:

SOIL PIPE—	
2 inch	25%
3 inch	30%
4-inch	30%
5 and 6 inch.	30%
8 inch.	net
FITTINGS—	
2 to 6 inch fittings	40-10%
8 inch fittings	net

COPPER HOLDS INTEREST IN INGOT CIRCLES

Toronto.

Prevailing interest in the ingot metal markets again centres around copper. This metal on primary circles has established a recovery in both price and demand. One of the contributory elements in this direction is said to be the fact that some manufacturers have shown an inclination to accumulate copper for anticipated spring business. Another factor assisting the firmer tendency in this market is the report that certain wire makers and foundries have been inquiring for supplies for fairly early shipment. Germany's renewed inquiries have also helped to strengthen the British copper markets, and this condition has naturally been reflected in American circles.

The local situation in ingot metals generally is described as still being on the dull side. The tendency recently has been slightly firmer. however, this being principally due to the fact that quotations have been scraping bottom for some time; but there is no real substantial demand apparent. The fluctuations which have periodically appeared on certain primary markets, have mainly been of a temporary nature, and failed to reflect any change in local quotations.

COAL AND BLACK OILS SHOW FURTHER PRICE ADVANCES

Toronto.

The recent ascendency in the oil markets generally, has resulted in further advances in coal oil prices. Another 1 cent increase has been announced on both the Royalite and Palacine grades of refined coal oil.

Black oils have also reflected the strength of the crude petroleum, the summer grade being quoted 2 cents higher in price this week, and the winter black oil approximately being increased 2½ cents per gallon.

Whether the higher levels on crude oil however will be further reflected in future quotations on the refined products cannot be ascertained. The price of gasoline is at present holding unchanged at the recent upward revisions. This condition also applies to other lubricating oils, and the general tendency of the oil markets is firm with a decidedly strong undertone. There are no indications available as to whether any further changes are being contemplated by the majority interests. But one factor retarding marked increases on gasoline is found in the reduced proportion of consumption with the advent of the winter months. On the other hand, behind the advance in prices on oil products generally, lies the expectation by some of the larger oil companies of an increase in both the foreign and domestic demand for refined oils, especially with the anticipated revival of industry in the spring. The inquiry for fuel oil supplies is also growing. New quotations on coal and black oils are contained in the current market pages.

QUIETNESS AGAIN REIGNS IN SCRAP MARKETS

Toronto

There is little change to report this week in the scrap material markets, and no outstanding development has been recorded. With prices and demand remaining practically stationary, there seems to be very little incentive to activity. Some small sales have been noted, however, to consumers whose stocks had become depleted; and with this situation occurring more frequently, dealers generally retain hopes for future improvement in the scrap trade circles. The recent easier tone of the steel industry, has been naturally reflected to some extent in scrap iron. This affect, however, is only seen in anticipations for future betterment, and prevailing prices remain unchanged. Rubber scrap is still quiet. and there is little marked activity in any line. The following are averages of dealers, nominal buying prices for fairly large quantities:

Gross Tons— Scrap Iron		
Heavy melting steel (Hamilton)	9 50	10 00
Borings and turnings	2 50	3 50
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	5 50	6 00
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	15 00	16 00
Stove plate	11 00	12 00
Grate bars	10 00	11 00
Standard car wheels	13 50	14 00
Scrap Metals.		
Heavy copper and wire	9 25	10 00
Light copper	7 50	8 00
No. 1 composition	8 00	8 50
No. 1 comp. turnings	6 00	6 50
Light brass	3 00	3 50
Heavy yellow brass	5 00	6 00
Heavy lead	3 75	4 00
Tea lead	2 00	2 50
Scrap zinc	3 50	4 00
Scrap Rubber		
Boots and Shoes	2 00	2 50
Lumbermen's Rubber boots	1 25	1 75
Auto tires	0 50	1 00
Solid tires	0 75	1 25

REPORTED UNSETTLEMENT IN BUILDING PAPERS

Toronto.

Reports that some lower prices would likely become effective on building papers, sheathings, and tarred felt, have appeared on the local hardware markets; but up to the time of going to press no actual reductions had been announced. It is noticeable that quotations on these products have been reduced in Montreal, but this situation was described by one prominent manufacturer as being chiefly due to a competitive proposition in that locality. Such conditions have developed among certain distributors of these products and did not indicate any weakness in the market. There has been no change in Toronto quotations at present, continued this report, and none is being contemplated.

On the other hand, another well-informed source stated that easier prices on some building papers and similar products were expected, but just when the change would become effective could not be ascertained. The fact that Montreal distributors have lowered quotations, did not directly signify that there will be any similar move on the local markets. It was the general impression that Toronto manufacturers and distributors would not institute any changes unless the movement gained momemtum. Prices are temporarily holding unchanged, but further developments are looked for in the near future.

REVISED DISCOUNTS GIVEN ON TROUGH AND PIPING

Toronto.

Another decline of approximately 17 per cent. has been announced on conductor pipe and eavestrough; both ridge roll and valley. This change is in keeping with the easier tendency which has been noted in these markets during the last week or two, with the advent of the early winter season and the slackening in outdoor building and repair activities of this nature. The falling off in the primary steel markets generally, has also been reflected in many semi-finished and finished products.

The new discounts on eavestrough and piping are 70 per cent. off list; while elbows are quoted at list less less 60 per cent. which represents a reduction of 10 per cent. Following are the revisions:

TROUGH (Eave)— O. G. Square Bead and half round. Size in girth:	Per 100 ft.
8 in.	15 90
10 in.	17 70
12 in.	21 20
15 in.	28 80
18 in.	36 50
Less 70 per cent.	
PIPE (Conductor) Plain, round or corrugated.	Per 100 ft. in 10 ft. lengths.
2 in., in 10 ft. lengths, list	18 40
3 in. in 10 ft. lengths, list	22 30
4 in. in 10 ft. lengths, list	29 60
5 in. in 10 ft. lengths, list	40 00
6 in. in 10 ft. lengths, list	49 00
Less 70 per cent.	
ELBOWS (Conductor)	
2 inch, list	5 25
3 inch. list	6 00
4 inch. list	10 50
5 inch, list	24 00
6 inch, list	29 00
Less 60 per cent.	

COTTON MOVEMENT SPENT: WASTE PRICES HOLD.

Toronto

The recent upward trend in the raw cotton markets has now obviously receded to some extent, and the brisk activity in these circles has also spent itself. As a consequence the stronger feeling in cotton waste markets is no longer evident, and there is no indication, at present, of any development towards recovery. One dealer expressed the opinion that the demand for cotton, and the resultant higher quotations on manufactured cotton goods generally, merely had an effect of making future declines in cotton waste prices more uncertain than might otherwise have been the case. Prevailing levels are therefore unchanged, as contained in the current market quotation pages.

SLIGHT INCREASES ON SOLDERING COPPERS

Toronto

A slight increase has now been announced in prices on soldering coppers. The revised quotations are as follows:

SOLDERING COPPERS—Base, 4 to 8 lbs., 35 cents per lb; 3-lb., 38 cents; 2½ lbs., 39 cents; 2-lb., 41 cents; 1½-lb., 44 cents; 1-lb., 48 cents per lb.

LONDON MARKETS

LONDON, November 16.—The recent snowfall and colder weather has stimulated business considerably and snow shovels; hand sleighs; and other winter goods have been added to the lines that were already in good demand.

The sale of Christmas goods, including cutlery; razors; silver-plated ware; and cut glass, is steadily improving and is very fair at present.

Most prices remain firm this week and the list of changes is light, being confined to wash-boards and turpentine. Collections continue in good shape.

NEW LOWER PRICES GIVEN WASH BOARDS

London, Ont.

A reduction has been made this week in the prices on certain lines of zinc and glass wash boards. The extent of the decline is approximately 10 per cent. Following are some of the revised quotations:

WASH BOARDS—	
Pony, dozen	2 45
Improved Globe, zinc, dozen	5 25
Diamond King, glass, dozen	8 00

ANOTHER INCREASE IN TURPENTINE PRICES

London, Ont.

Another 3-cent advance in turpentine prices has appeared on the local markets. This additional increase places the current price levels at $1.25 per gallon in one barrel lots.

It is pointed out that the non-productive period is now at hand, and as a consequence the usual scarcity of fresh supplies is likely to develop.

	Imp. Gal.
TURPENTINE—	
1 barrel lots	1 25
2 and 4 barrel lots	1 24
5 gallon lots	1 40

SNOW SHOVELS REGISTER BRISK DEMAND

London, Ont.

There has been a very brisk demand for snow shovels during the past week, owing to the advent of the winter season. Prices are steady at the following levels:

	Doz.
SNOW SHOVELS—	
Common Japanned	4 00
Prince L. handle	5 50
Prince D handle	7 20
Kink D handle	8 00
Moose D handle	10 50
FURNACE SCOOPS—	
Long handle	5 50
D. handle	5 50

BRISK SALE THIS MONTH FOR SHELLS AND CARTRIDGES

London, Ont.

Loaded shells and cartridges are enjoying a good seasonal volume of sales this month. The shooting activities are now in full swing, and ammunition is in steady demand. Prices are unchanged, with the Dominion make being quoted at list less 30 and 20 per cent.: and the American make at U.S. list, plus 22½ per cent.

STOVE BOARDS CONTINUE IN FAIR DEMAND

London, Ont.

Stove boards continue to record a good seasonable sale. Prices remain steady; the wood lined being quoted at list less 15 per cent; and the paper lined at list less 30 per cent.

SLEIGH BELLS COMMENCE TO RECORD SEASONAL MOVE

London, Ont.

With the approach of the early winter season, and the initial fall of snow, sleigh bells are now selling. Prices on these seasonal lines are as follows:

SLEIGH BELLS—

Team—No. 7 stamped, $1.80 per doz.; No. 2, collar on strap, $1.80; No. 3, collar on strap, $2; No. 3, rough cast, $6; No. 4, rough cast, $8.25; No. 5, rough cast, $9; No 6, $9.75; No. 2, Swiss, $7.50; No. 3, Swiss, $9.25; No. 4, Swiss, $11.

Back Bells—No. 1400 Swedish chimes, $3.40 each; No. 1500, $3.85; No. 1700, $4.40.

GLASS OVENWARE IN CHRISTMAS TRADE

London, Ont.

With the approach of the Christmas season, the Pyrex line of glass ovenware is registering an improved movement. This is undoubtedly stimulated by the seasonal trade. Prices are unchanged, list less 30 per cent. being the prevailing quotation.

HAND SLEIGHS NOW SELLING

London, Ont.

The seasonable activity in hand sleighs has now commenced, and dealers report brisk activity in these products. The following are the list prices of some popular lines, which are quoted less 35 per cent.

HAND SLEIGHS—No 85, $2.60 each; No. 86, $3; No. 87, $3.80; No. 26, 80c; No. 30, 98c; No. 33, $1.20; No. 36, $1.40; No. 36c, $1.60; No. 42c, $2; No. 52, $1.96; No. 53, $2.40

Above list less 35 per cent.

SNOW BRINGS BIG SALE FOR AUTO TIRE CHAINS

London, Ont.

Dealers now report that there is an improved demand for automobile tire chains. Quotations on these products remain unchanged at the following levels:

Weed and Rid-O-Skid list less 25 per cent.

In lots of 1 dozen pair in one shipment list less 33 1-3 per cent.

FAIR SALE FOR LANTERNS AND GLOBES

London, Ont.

There has been a fair movement reported for both lanterns and lantern globes. This activity commenced in the Fall, and shows signs of continuing. Unchanged quotations follow:

LANTERNS—	
Tin short or long pattern, per doz.	12 00
Dietz D Lite, per doz.	19 75
Coleman Gasoline, No. 327, each	7 50
Lantern Globes. Short or long pattern.	
1 doz. to case, per doz.	1 35
3 doz. to case, per doz.	1 25

ICE SKATES NOW IN BETTER DEMAND

London, Ont.

A fair proportion of booked orders for ice skates are now going forward. These shipments are not in large quantities, but the orders are numerous. Quotations on the Starr line remains at list less 30 per cent.

CHRISTMAS SEASON IMPROVES SAFETY RAZOR SALES

London, Ont.

There is an improvement noted in the sale of safety razors, with the approach of the Christmas season. A steady demand for blades is also noticeable. Following are prevailing quotation:

SAFETY RAZORS—	
Auto Strop, each	3 75
Gillette, each	3 75
BLADES—	
Gillette, 12 to set, per set	0 75
Do., 6 to set, per set	0 37½
Auto Strop, 10 to set, per set	0 75
Do., 5 to set, per set	0 37½
6 doz. to case, per doz.	1 20

MODERATE SALES OF WHITE LEAD IN OIL

London, Ont.

The current sale of white lead in oil continues to be seasonably fair, with no special developments having been recorded. Prices are remaining unchanged at the following levels:

	Tons.	Less Tons.
WHITE LEAD IN OIL—		
Pure, Per 100 lbs.	13 30	13 65

LINSEED OIL QUOTATIONS HOLDING UNCHANGED

London, Ont.

Quotations on linseed oil remain unchanged at the levels of 87 cents for raw, and 90 cents for boiled in one and two barrel lots. Primary conditions in these markets show little signs of change, at present; the various fluctuations in flax seed prices not having directly affected oil quotations to the same ratio as previously

	Raw.	Boiled.
LINSEED OIL—		
1 to 2 barrels, per Imp. gal.	0 87	0 90
3 to 5 bbls., per Imp. gal.	0 86	0 89
6 to 9 barrels., per Imp. gal.	0 84	0 87

Less barrels add 15 cents gallon.

GOOD SEASONAL MOVEMENT REPORTED IN PUTTY

London, Ont.

A good seasonable sale is reported for putty, with prices remaining unchanged at the following levels:

PUTTY—	
Standards, 100-lb. drums, per 100 lbs.	6 30
Standard, 25 lbs., per 100 lbs.	6 55
Pure, 100 lb. drums, per 100 lbs.	7 80
Do., 25 lb drums, per 100 lbs.	8 05
Elephant, per 100 lbs.	13 80 14 15

BRISK SEASONAL DEMAND FOR WINDOW GLASS

London, Ont.

While ample supplies of some sizes of window glass are still noted to be conspicuous by their absence, yet the general situation is slightly improved as regards the quantity available to meet the seasonal demand now apparent.

Prices remain net list for both single and double diamond; with cut lights quoted at 75 per cent. off light list.

CATTLE CHAINS SELLING MORE LIBERALLY

London, Ont.

Cattle chains are now selling in more liberal quantities, according to reports received from local dealers. There has been no change in the quotations on these products, the prevailing price of list plus 37½ per cent. still being general.

BUCK SAWS STILL POPULAR

London, Ont.

Among the other commodities registering market activity are buck saws. There is a good sale at present for these products, with prices maintained at the following:

BUCK SAWS—

Happy Medium, per doz.	15 50
Prince Rupert, per doz.	20 50
Arrow Head, per doz.	20 50

WINNIPEG MARKETS

WINNIPEG, November 16.—Price developments in the hardware markets this week appear on such items as carpenters' pincers; Westcott wrenches; braces; cow chains; railroad spikes; and carriage and wagon hardware, all of which articles are lowered in price. Other price revisions, however, representing increased quotations have been announced on lamp and stove wick; but few instances have developed of an upward market trend. The majority of the primary products are holding unchanged, at present; with anticipations of a seasonal increase in trade. Preparations for Christmas activities are now under way, and winter goods are in better demand.

The marketing of crops is expected to result in generally improved business conditions throughout the West; at least for a period. Prices on grains, and other agricultural products, however, are undoubtedly low, and as a result a steady trade volume is hoped for, with no marked recovery being anticipated.

CARPENTERS PINCERS NOW REDUCED IN PRICE

Winnipeg.

Prices have been reduced on carpenters pincers, and following are the latest quotations:

CARPENTERS' PINCERS—

No. 26—7", $7.75 per doz.; 8", $8.50 per doz.; 9", $9.75 per doz.; 10", $10.80 per dozen.

P. S. and W.—7", $8.80 per doz.; 8", $9.30 per doz.; 9", $10.60 per doz.; 10", $12 per dozen.

COW CHAIN QUOTATIONS NOW ON LOWER LEVEL

Winnipeg.

A few lines of cow chains are priced lower this week. Following are some of the revised quotations:

COW CHAINS—

	Per dozen.			
	4-0	3-0	2-0	1-0.
Electric Weld	5 90	4 65	4 25	3 35
Brown's	5 90	4 65	4 25	3 35
Three Chain	5 90	4 65	4 25	3 35
Stall Fixture Pattern	4 30	3 75	3 20	2 95

DECLINE IN QUOTATIONS ON WESTCOTT WRENCHES

Winnipeg.

Prices on Wescott Wrenches are lower this week and following are the newest quotations:

WESTCOTT WRENCHES—	Per doz.
No. 76	9 60
No. 78	12 00
No. 80	14 40
No. 82	21 60
No. 84	28 80

REVISED LOWER PRICES ON RAILROAD SPIKES

Winnipeg.

Lower prices are quoted this week on Railroad Spikes. Following are the latest quotations.:

RAILROAD SPIKES—

	Per 100 lbs.
2½ x 5-16"	7 15
3 x 3/8"	6 50
½ x 3/8"	6 50
4 x ½"	6 20
5 x ½"	6 20

ADVANCE RECORDED IN LAMP WICK PRICES

Winnipeg.

Following other lines manufactured from cotton product, lamp wick has been advanced this week to take care of the higher cost of raw materials. Following are some of the last quotations:

LAMP WICK—

In rolls and cut lengths—O, 80c per gross; A, $1; B, $1.46; D, $2.33.

Rochester—2, $7 per gross; 3, $24; 00, $20.

LEAD AND ZINC GOODS STILL MARKING TIME

Winnipeg.

Conditions in the lead and zinc markets remain unchanged, and are holding their own. Prices have been firm for some time; stocks are depleted and prices are considered to be down to rock bottom. Following are the prevailing quotations:—

LEAD AND ZINC GOODS—

Lead pipe, $12.06 per 100 lbs.
Lead waste pipe, $12.96 per 100 lbs.
Lead traps and bends, 5 per cent. off.
Lead shets, full rolls, 10¼c per lb.
Do., less, 11c per lb.
Sheet zinc, 13c per lb.

COPPER GOODS REMAIN ON FIRM LEVEL

Winnipeg.

Although there seems to be a slight improvement in copper goods lines, the prices are still holding firm. Prices now in effect are as follows:

COPPER GOODS—

Sheet Copper, Planished, per lb.	0 60
Do., tinned, per lb.	0 55
Braziers—	
28 gauge, per lb.	0 52
26 gauge, per lb.	0 42
24 gauge, per lb.	0 40
22 gauge, per lb.	0 40
20 gauge, per lb.	0 36
18 gauge, per lb.	0 36
16, 14, 12 and 10 gauge, per lb.	0 36

Pittsburg Markets

PITTSBURG, November 17—Production of steel ingots in October was at the rate of about 23,000,000 gross tons a year, equal to about 44 per cent. of productive capacity, which may be estimated at 52,500,000 tons. The rate of production in October was one-third greater than the rate in September, and was more than double the rate in July.

Steel production is now in harmony with the condition of business generally, that is, there is as much steel production as one would expect there to be when conditions generally hold as they are. There is neither more production nor less production than would expect. From April to August inclusive the condition was different. Steel production was far below the rate one would expect considering the amount and character of the business the country was doing. That was because the country was running in part on stocks of steel. A corollary to this is that there has been little increase in the actual consumption of steel since July. The difference is that what is needed has to be made by the mills from day to day.

Some Lines Active

Despite the great increase since July, steel production is at a low rate compared either with productive capacity or with production in recent years. Probably the most common view is that this is because "business is bad" but business is not really bad all along the line Some lines of business are quite active, some are stagnant. As to steel consumption, there is an absolute stagnation as to railroad consumption of steel and there is almost complete stagnation in large construction work, like hotel and office skyscrapers, bridges, factories and power plants. There is by no means stagnation in "building" generally, for there is a great deal of activity in garage and dwelling house construction. Such building occurs because the owners want the facilities right away. They are getting older day by day and do not want to wait for lower costs. They would save money but lose time. Investor, on the other hand, consider simply the money and they are waiting for lower costs. As to the railroads, everyone knows that they cannot spend money on steel now, one sufficient reason being that they have not the money.

A simple proof that the general line consumption of steel is heavy can be furnished; general line consumption involving machinery, hardware, tools, implements and a wide variety of things, railroad consumption and consumption in large construction projects being light. In 1906 there was heavy demand for steel by all lines of consumption. The mills ran at full capacity throughout the year and produced 22,600,000 tons of ingots, just a trifle under the rate of production shown for last month. In 1906 there were 5,623 miles of new railroad built in the United States, besides many miles of secondary track, and in

(Continued on page 64)

"Paint Prices Not Lower for Spring Trade"

Prices As Low As Any Manufacturer Can Get Them Consistent with Small Profit, Says Paint Manufacturer—Dealers' Stocks Were Low—Demand in Every Town and Hamlet Eliminates Wide Fluctuations in this Industry

DISCUSSING the outlook in the paint and varnish trade with Hardware and Metal, W. S. Fallis, Vice-President and Managing Director The Sherwin Williams Company of Canada, Ltd., on a visit to Toronto to attend the annual convention of the Ontario Division of the company pointed out that the paint business has not suffered in the last two years as have other industries due largely to the fact that there is a demand in every town and hamlet for paints, and that this demand will by every indication, continue and increase in future.

"Industrial and railway sales are not as active as they have been at certain other periods, but the volume of immediate business from store trade and also for future trade shows substantial increase over this time last year," said Mr. Fallis. "This is significant in that the gallonage is increasing against a decline of approximately 25% in price from a year ago. This is principally due to the fact that dealers ran their stocks down to a very low point and are now replenishing."

"There is every indication of the stability of prices" said Mr. Fallis, "the surest evidence of that being that no manufacturer can go lower and make any profit at all. We know exactly where we stand because we have allowed for a depreciation on our stock which would shock many merchants and this depreciation is accounted for before our books are closed at the end of the year. We have written everything down to market price." Mr. Fallis reiterated his opinion that paint and varnish prices would not be lower in spring than at present.

W. S. FALLIS

Vice-President and Managing Director The Sherwin-Williams Company of Canada, Ltd., who attended the annual convention of the Ontario Division of the company in Toronto.

Convention of Ontario Division Sherwin-Williams Co., Ltd.

Now Getting More Co-operation from Dealer Agents, Says C. A. Thomas—Last Two Years' Painting Represents Only Small Part of Necessary Work To Be Done

THE Ontario Division of The Sherwin Williams Company of Canada, held their annual convention last Friday and Saturday in Toronto. For the purpose of holding the gatherings at the company's warehouse on Leslie St., some members of the staff fitted up a very suitable convention hall in one part of the premises, and the representatives were agreeably surprised to find facilities for holding the gatherings at the warehouse. W. S. Fallis, Vice-President and Managing Director of the company was in attendance and the proceedings were under the direction of C. A. Thomas, local manager. Throughout the meetings a spirit of optimism prevailed as to the store trade to be done in paints next season. This feeling was shared equally by the representatives who came fresh from mingling with the retail trade throughout the province.

It was the opinion of Mr. Thomas that the large increase in paint consumption in the past two years was not due to the fact that property owners had been postponing the painting of their properties. On the other hand Mr. Thomas gave it as his opinion that the painting done in the last two years covered only a small part of the work to be done and represented merely a natural increase in volume. He pointed out that the company

Relationship

"He who serves best, profits most"

No one thing do we more need than to appreciate the significance of the meaning of the word "relationship".

Business relationship is *human* relationship, and those who do not so intrepret it are missing, not only much extra profit, but the one worth while condition to a full satisfaction, keen pleasure and ultimate success in Business—this salutary condition arising out of the good will and confidence of our fellow men.

Yes! Without a genuine interest in our customers, who after all are our supporters, business becomes a dull, drab, inhuman machine—irksome and prosaic. At least we believe so, and because we do it is natural for us to strive honestly to put the human touch in our daily intercourse with those on whom we depend for our all round progress.

The result is gratifying. This morning as we write this we received a letter from one whom you probably know—enthusiastically substantiating our belief that Sentiment and Success go hand in hand. With our friend's permission we will publish his remarks in the next issue of this Journal.

We have learned that quality products are but one essential feature in the game of successful Business. In other words, we have learned to SERVE.

Convention of Ontario Div. Canada Paint Co.

THE ANNUAL convention of the Ontario Division, the Canada Paint Company, Ltd., was held on last Friday at the King Edward Hotel, Toronto. The convention was under the direction of Royal Cluxton, Montreal, general manager of the company, assisted by S. M. Ward, Sales Manager. Many interesting topics were brought

ROYAL CLUXTON

Manager Canada Paint Company, Ltd., Montreal, who was present at the annual convention of the Ontario Division of the company in Toronto.

up for discussion during the various sessions and this procedure proved most helpful to all representatives. Optimistic predictions were made concerning the probable trend of paint business next year, as a result of orders and reports received. In the evening a very enjoyable banquet was provided for all those attending the convention. It was shown at the convention that merchants are buying very freely and are booking good stock orders for early shipments which indicate that stocks are very low and a bigger volume of business is available.

CANADA PAINT CO. CONVENTION

(Continued from Page 58)

was receiving better co-operation from dealer agents in the form of more and better window displays, more local advertising and more personal effort to increase consumption.

After a strenuous day's consideration of various matters of interest to the staff a most enjoyable social event took place in the evening when the representatives assembled for the annual banquet. Mr. Fallis presided at the social function with Mr. Thomas acting as vice-chairman. In a very instructive talk Mr. Fallis pointed out that according to the business charts prepared by Babson's Statistical organization, the paint trade is a lap or two ahead of many other industries in the stimulation of trade. The paint industry was listed among the best class, or those which would be first to recover due to the fact that they were least affected by the trend of business in recent years. Following Mr. Fallis's address the social spirit of the gathering made itself felt in hearty style with music, songs and other entertainment.

During the convention Mr. Fallis made brief reference to the statements credited to the leader of the Progressive Party in connection with his recent election addresses.

"Mr. Crerar accused us of holding up prices and bleeding the public and in the same address he went on to say that we were throttling the small industries. We could hardly be doing both at the same time and we are not doing either. It is a fact that in the past few years there have been more paint companies commence business here than anywhere in the world. There are now fifty-two companies operating in Canada. It is also significant that white lead is being sold in Canada to-day one cent a pound less than in the United States," said Mr. Fallis in conclusion.

PLAYING FOR THE CUSTOMERS XMAS EYE

(Continued from Page 39)

prising the number of people who now realize that early shopping offers a wider range to choose from. With the commencement of December the season is well under way, and although sales perhaps have not taken the active turn at this time, "window shopping" has in many cases made people reach a decision.

Dressing The Windows

An advantage is gained by the store, perhaps located on a corner, fortunate in having a "battery" of show windows. Especially at this season when so many different lines may be displayed that are of interest to prospective purchasers. However, for the ordinary store with two front windows there seems no better suggestion to offer than to devote one to the finer wares including silver plated ware, cutlery, brass goods, electrical appliances, and the other to a realistic outlay such as an Xmas tree, a fire place, or a drawing room setting. This scene displaying useful gifts for both children and grown-ups. Apart from the vacuum cleaner, carpet sweeper, polishing mop, smoking stand and gifts suitable for children that might appear in the drawing room scene, the mantel shelf offers fine display space, made more realistic by hanging the stocking of each member of the family along the front. Protruding from the top of each might be a gift suitable for "Daddy," "Mother," Sister," and "Brother," all of which can be purchased in the store. The Christmas tree, while more or less ancient, will prove ever popular especially among the younger folk.

Many suggestions might be offered for window trims and displays, but in all cases it is well to assist your windows by the use of suggestion cards and price tickets. If they are to open the campaign, the more fully they are able to display and explain, the better help they will be in making actual sales at a little later date.

Seasonable Smile on the Inside

Undoubtedly the arrangement of your store counts at the Christmas season. Placing seasonable lines within easy reach of the customer, dressing and cleaning of silent salesmen and the hanging of garlands and other decorations, help to convey the holiday spirit. However, what seems the most important is the Christmas smile on the part of the salesman. A smile of welcome and helpfulness.

ELECTRICAL ASS'N. ELECTS OFFICERS

Montreal—Nearly twenty thousand people visited the model electrical home in the town of Mount Royal, it was announced at the first annual meeting of the Electrical Co-operative Association. In connection with the electrical campaign which the association is undertaking throughout the province it was announced in the report that a permanent electrical exhibition has been established at the Montreal Power Consolidated Building, 605 St. Catharine street, where all the electrical companies who are members of the association display electrical equipment in addition to the demonstrations given in their own showrooms.

The officers and advisory committee include the following: vice presidents, J. W. Pilcher, district manager, Canadian General Electric Co., Ltd.; M. K. Pike, general sales manager, Northern Electric Co., Ltd.; F. J. Parsons, managing director, McDonald & Willson Co., Ltd.

Manufacturers' representatives— C. Duncan, managing director, Duncan Electrical Co., Ltd.; G. Wright, managing director, Monarch Electrical Co., Ltd.; C. F. Medbury, district manager, Canadian Westinghouse Co., Ltd.

Jobbers' representatives—J. W. Pilcher, district manager, Canadian General Electric Co., Ltd.; M. K. Pike, general sales manager, Northern Electric Co., Ltd.; S. W. Smith, president, Electrical Equipment Co., Ltd.

BECOMES WESTERN SALES MANAGER

Owen Sound, Ont.—Fred Park of the Northern Bolt, Screw and Wire Co., has gone to Winnipeg to become Western sales manager of that firm. He has been here for the past eight years. His promotion to the responsible position of sales manager is a tribute to his work for the firm.

Hillcrest Colors in Oil

Weekly Paint Markets

MONTREAL

MONTREAL November 17—Linseed oil and turpentine continue to sell on a firm market, and while prices are holding unchanged for the week, the situation on both products is such that a change in quotations would not be surprising in the near future. There is the usual uncertainty at this season on linseed oil, but from a few well informed sources comes the statement that 90 cent oil would not be surprising for spring shipments. Turpentine displays more strength than its allied product, and it is generally conceded that the market will continue strong with a further upward movement in prices likely. The quiet period of the following two months ahead, however, may be a stumbling block in an advance of a rapid nature.

Belgian shipments of window glass will relieve the situation to an extent, and distributors entertain no fear of a serious shortage this season, although stocks are exceedingly low at present. Shellac prices are held unchanged with a firm tendency continuing in the primary market. Spring bookings in paint, varnishes and specialties are coming to hand in encouraging volumes, indications pointing to a bigger paint year in 1922. Without exception, manufacturers state that business up to the present exceeds last year at this time.

TURPENTINE PRICES SHOW NO CHANGE

Montreal.

Quotations for the week on turpentine have also been maintained at $1.15 per gal. in one barrel lots, with a one cent advance on this price quoted by a few distributors. Current demands are seasonably light, dealers apparenty not interested in future stock, their interest being based on actual consumptive demand which is always light at this season. Although a substantial advance is now given over prices prevailing during the past busier month, the tendency of turpentine is claimed by local distributors to be upwards. Slight recessions may occur, governed by the buying movement, but it is generally conceded that a firm and higher market will prevail for future. However, the trend of this product has been very uncertain during past months, and any development in this direction will no doubt come as more or less of a surprise, especially during the following months when the demand is usually quieter. In the Southern markets a decline was recorded early in the week but this was immediately followed by a stronger tendency which advanced the market until it had recovered all of the slump.

Following are the prevailing prices:

TURPENTINE—	Imp. gal.
1 barrel lots	$1 15
2 to 4 barrel lots	1 13
Broken lots	1 25

QUOTATIONS HOLD ON LINSEED OIL

Montreal.

The linseed oil market has been steady during the week and while the demand continues seasonably light, generally strong conditions are still in evidence. Quotations of 83 cents for raw and 85 cents for boiled are most general, although a few jobbers are holding forth prices 2 cents per gallon higher. Uncertainty for the future is expressed by those well informed, although some are willing to state that 90 cent oil would not be surprising for early spring shipments. Flaxseed at present seems, if anything, more uncertain, fluctuations playing the principal part in the situation.

In outside oil markets a more optimistic feeling is reported, yet quotations for the week have also held unchanged. European oil which has proven quite a disturbing factor, was not as prominent as formerly, the quality of this by-product oil being decidedly less satisfactory. Quotations locally for the week are:

LINSEED OIL—	Raw.	Boiled
1 to 2 barrel lots, per gal.	0 83	0 85
3 to 5 barrel lots, per gal.	0 81	0 83

Less barrels, add 10 cents per gallon.

PAINT BOOKINGS ARE VERY FAVORABLE

Montreal.

The current demand for paint, and paint specialties is gradually becoming of a less proportion and the season is now recognized as well passed. Fall trade is reported as having been very favorable from all quarters, outside painting in practically all sections of the country was carried out in good volume during the late summer and autumn months.

Next season's business is now being looked to by the manufacturers, who state the number of booked orders, and in most cases the volume, are in excess of last year at this time. Shipments of these supplies are being made to some outlying sections, while in the more central parts shipments are being withheld until after the close of the year. Prevailing prices are thought to be the chief factor in increasing sales over that of last year. With these considerably lower and indications pointing to a steady outlook, buyers can be approached with the assurance of protection against further marked decline.

STEADY UNDERTONE IN SHELLAC: PRICES UNCHANGED

Montreal.

A steady situation seems to have settled on shellac, and quotations remain at figures given out some weeks ago. The undertone of the market is one of firmness with little changes looked for in primary markets until the turn of the year at least. Current business is seasonably quiet, although bookings for future are quite favorable. It is stated that shellac is being sold on the local market at considerably less than prevailing prices, but dealers maintain that with the present levels of gum shellac and alcohol, the purity of this product is questionable. Present general quotations are as follows:

SHELLAC	Pure white.	Pure orange.
In bbls., per gal.	4 65	4 15
Gal. jugs, per gal.	5 00	5 00

ARRIVALS OF BELGIAN GLASS CONTINUE TO RELIEVE SHORTAGE

Montreal.

Recent arrivals of Belgian glass and the assurance of further supplies from this source have relieved the shortage to an extent, and importers and distributors are now satisfied the season will have passed without any serious developments in this connection. There is, however, no abundance of window glass available, and while dealers are receiving their orders with a little delay, warehouse stocks remain very low for the present active seaason. Prices are said to be a little firmer if anything, but the tendency is not of such a marked nature as to warrant higher prices for the present. The net list remains at the prevailing prices shown on current market pages.

TORONTO

TORONTO, November 17—For the first time in many recent weeks, both turpentine and linseed oil quotations now remain unchanged. Other interesting factors in the current paint markets revolve around the firm undertone in shellac, and the fact that some shipments of Belgian window glass have tended to relieve the threatened shortage in that direction.

TORONTO PAINT MARKETS

(Continued from page 62)

High prices remain on turpentine, chiefly owing to the fact that the recent increased levels are holding on southern primary markets. Local distributors reflect the changing quotations from time to time, under the existing practice of shipping for immediate requirements only. While Savannah producers point to the increase in foreign export trade as one of the contributory elements to the higher prices, the stability of the recent rise in turpentine quotations is questioned in other sources. The fact that the non-productive period is now at hand, has tended to enhance, to some extent, the value of present holdings. On the other hand, it is inferred that producers have developed the present shortage by withholding supplies from the markets.

TURPENTINE CONTINUES AT HIGH PRICE LEVELS

Toronto.

For the initial time in many weeks, turpentine quotations remain unchanged, with the recent high levels being maintained. The demand in these markets is also light, at present, but this is a condition prevalent at this season of the year. The quiet period in local circles is generally looked for, with no marked activity until the early spring. The turpentine movements are generally continuing in small lots, and due to these circumstances, distributors have little incentive to replenish stocks at the high prices prevailing on southern primary markets. The local quotations therefore, continue to reflect the immediate price variations existing at Savannah, and with high levels remaining at these centres, distributors state that there remains little opportunity for change from the following quotations:

TURPENTINE	Imp. gal.
1 barrel lots	1 25
2 to 4 barrel lots	1 24
5 gallon lots	1 40

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton London, Brantford, Collingwood, Guelph, Windsor, or Montreal, but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots, 15 cents per gallon additional.

PREPARING FOR RECORDS IN PAINT INDUSTRY

While the current movement in paint and paint products is described as generally satisfactory, yet the present Fall season is fast drawing to a close, and prevailing orders are mainly covering early spring anticipations. One prominent manufacturer and distributor of paints and varnishes points out that 1921 has been a prosperous year from the viewpoint of the paint industry, and plans are already being laid to prepare for 1922 activities, and make the coming season the banner year for all concernd.

The fact that three separate price declines took place during the past twelve months, has been described as a great incentive to the movement of paint products generally among consumer circles. In spite of the dull periods in many lines of trade, certain branches of the paint industry have enjoyed a larger proportion of turnover during the 1921 seasons, and new records have been established. In this connection, however, distributors point out that although greater quantities of some lines,—such as ready-mixed paints,— have been handled, yet the total turnover can hardly be expected to reach the sum recorded last year because of the higher business quotations and increase prices that were then available.

Educative Campaign Help

This factor is one of the contributing elements as to why paint men generally look for fresh records to be established during 1922. With the industry back on a plane in keeping with replacement costs, and with stocks throughout the country having been well liquidated and disposed of, those in charge of the coming season's campaign to make 1922 the biggest year in the history of the industry, appear fully confident that the path towards such a goal has thus been cleared of several primary obstacles.

Some recovery in industrial business circles is also anticipated. This applies generally to the paint products consumed by the railroads, automobile manufacturers, furniture makers, and similar trades. Business in these directions has been on a minor scale; with the bulk of paint activity being confined to property owners, new buildings and interior home decoration. This condition in turn, reflects the results of the advertising efforts directed along such channels as "Save-The-Surface." "Paint & Varnish." and other spheres. With a continuance of these educative principles, combined along greater individual and collective activity, a banner season lies ahead in the opinion of many dealers.

DEMAND FOR LINSEED OIL OF LIGHT NATURE

Toronto.

The local quotations on linseed oil again remain unchanged this week, with little variation in the primary markets. Demand for oil at this season of the year continues to be of a light nature, and with flax seed prices holding about even, the current situation has not altered materially. It is stated that European oil remains one of the disturbing factors on the markets, and has also constituted one of the contributory elements towards the prevailing lower quotations. However, the general undertone is described as easy, with the following quotations prevailing:

LINSEED OIL—		
1 to 2 barrel lots, per gal.	0 87	0 90
3 to 4 barrel lots, per gal.	0 86	0 89
6 to 9 barrel lots, per gal.	0 84	0 87

Less barrels, add 15 cents per gallon.

FIRM UNDERTONE HOLDS SHELLAC MARKETS

Toronto.

A steady situation seems to have developed in the shellac markets, and the undertone continues to be one of firmness. The current business in shellac is naturally quieter at this season of the year, and some dealers point to this fact as an obstacle in the way of higher levels, which would adequately reflect the recent increases in shellac gum. However, other distributors are maintaining prices on shellac in advance to those appearing on the current market quotations pages.

PITTSBURG MARKETS

(Continued from page 57)

the United States and Canada there were built 243,670 freight cars and 6,952 locomotives. There were many skyscrapers erected, also power plants, bridges, factories, etc. Of these things there is now very little, yet the total production of steel is a shade greater, hence the consumption in other lines has greatly increased, in a proportion somewhere between 50 and 100 per cent. Population has increased about 23 per cent. since 1906. Precisely where the steel is going now on one can say, simply because it is being so widely distributed both geographically and by lines of consumption.

Production is hardly likely to increase in the next couple of months over the October rate. Consumption usually decreases a little in the winter months. The steel market has been quieter since the middle of October, and this will probably be reflected in somewhat lighter production, but there is no decrease observed thus far.

Steel Prices

The steel price situation is a simple one. There is merely a slight sagging tendency, whereby, to illustrate, one is likely to be able to place a given order now at say a dollar a ton less than he would have to pay on precisely the same order two or three weeks ago, while two or three weeks hence a mill may be willing to concede a dollar more in the price than it would today. There are no clear cut declines, one reason being that in most lines there are no clear cut market prices, a quotation being made on each order according to its desirability to the mill at the time.

Roughly speaking, bars, shapes and plates are between $1.50 and $1.65 depending on circumstances. Regular prices on sheets are $3.00 for black and $4.00 for galvanized, while these prices are being shaded by a number of mills, generally $1 to $3 a ton but possibly $5 in extreme cases. The lists of September 16 on tubular goods are being observed by some mills while others are making slight concessions. These concessions have hardly increased in extreme amount in the past week or two, but they have become more common, applying to a larger number of orders.

The financial reports of the steel companies lately have shown that steel can be made at somewhat lower costs than was assumed. The reports differ widely, the differences evidently being due to some producers having made their adjustments, in inventory, etc., some time ago, while others have had to write off large sums in the September quarter, thus producing losses.

Electric Welding Gives Greater Strength

ELECTRIC WELDING, in addition to soldering, solidly unites the cups to the barrels of C. C. M. Automobile Tube Skates, so that each skate is practically one piece of steel. This feature completely overcomes the common weakness of other tube skates.

The extra strength that Electric Welding gives, is a strong selling point. It enables you to fully satisfy hockey players that C. C. M. Automobile Tube Models are built to stand the shocks and strains of the game.

C·C·M· Automobile SKATES

Registered Floglaze

"The Finish That Endures"

"Home and Farm" Shades

—for bigger turnover and bigger profit

Floglaze "Home and Farm" Shades can be used in practically everything about the home and farm—for finishing all interior and exterior articles, whether wood or metal. Gives a brilliant, high lustre and long-wearing surface.

Floglaze "Home and Farm" brings to your paint department a concentrated and complete line of "Superior to Paint" finishes. This enables you to realize a maximum of profit at a minimum investment of capital.

Floglaze universal increases retail turnover and produces bigger profit.

With strong assurance in and keen enthusiasm about Floglaze Home and Farm you can make ready for a bumper crop of 1922 sales. Get in line to cash in on this proposition.

We invite your enquiry for our booklet, "A Guide to Larger Profits," which shows where larger profits can be made with Floglaze—the finish that endures.

Send in Your Order NOW

THE *new low prices* for Creonoid, with special discounts on quantity orders, which are quoted in our Late Fall Price List (dated October 15th) enable you to add to your own profit and at the same time pass on a saving to your customers.

These new low prices are guaranteed against further reduction during the coming fly season.

Send your order for Creonoid now. Shipment will be made at any time you specify between January 1st, and May 1st, 1922. ***All invoices will be dated May 1st.***

If you have not received a copy of our October 15th Price List, write for it today.

The Popular Fly Oil, Lice Destroyer, Cow Spray

The First Choice of Canadian Farmers

Although a comparatively new product, Creonoid Fly Oil, Lice Destroyer and Cow Spray is already the fastest selling Fly Oil on the Canadian market.

Last season thousands of farmers all over the Dominion used it and liked it. They found it most effective, economical and convenient destroyer of flies, lice and other vermin on the market.

Next season these same farmers—and thousands of others will use it. Sales will be larger than ever before.

Creonoid requires no mixing; it comes all ready for use and is put up in various sized packages, as follows:

Steel Barrels, complete with cast-brass vent and faucet, and containing forty-three (43) gallons. Steel Half-Barrels, complete with cast-brass vent and faucet, and containing twenty-five (25) gallons. Oak-Stave, Iron-Bound Wooden Barrels, containing approximately forty (40) gallons. Oak-Stave, Iron-Bound Wooden Half-Barrels, containing approximately twenty (20) gallons. Five-Gallon cans. One-Gallon handsome lithographed cans. Half-Gallon handsome lithographed cans.

TINKER TOM'S TALKS.

No. 339

Again we emphasize the **Points of a Good Galvanized Sheet.**

1 — MUST BE SOFT TOUGH STEEL

2 — MUST BE FLAT AND SMOOTH

3 — MUST HAVE A UNIFORM HEAVY COATING

4 — MUST BE FREE FROM SURFACE FLAWS

5 — SHOULD BE MADE-IN-CANADA

You can check off 100 per cent. on every point above for **PREMIER GALVANIZED SHEETS.**

In addition we carry stocks of standard sizes so that delivery is far more prompt than if any other make is ordered—

Wa-Ko-Ver Stain
Beautifies All Woodwork

Not only does it beautify, but it wears like iron. You will find it pays in future sales always to recommend Wa-Ko-Ver Stain whenever your customers have worn floors or scratched woodwork to renovate. It restores the freshness of the floors or woodwork, pleases your customers, and makes permanent business for you. The established reputation of this effective, serviceable stain makes it a pleasure to sell. Good displays in your windows, on your counters, or other conspicuous places, remind visitors to your store, and people that would otherwise be "passers-by," of their need for Wa-Ko-Ver stain. This sales-maker will handsomely reward a little sales-effort on your part.

Why has Hardware and Metal Such a Large Western Canada Circulation?

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 38 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

CURLING STONE Headquarters

Mac's Special

Specially designed for us to suit our hard, keen ice. The weight is distributed in such a way as to give the running surface sufficient grip to hold whatever turn may be given, without any tendency to rock or roll.

Kay's Excelsior

Manufactured by Andrew Kay & Co., this stone has a world-wide reputation. An absolutely first-class stone that has given satisfaction wherever the game is played.

ACCESSORIES—We carry a full line of Accessories, Brooms and Boxes

BUILDERS' HARDWARE CALGARY SPECIALISTS

Winnipeg Paint & Glass Co. Limited

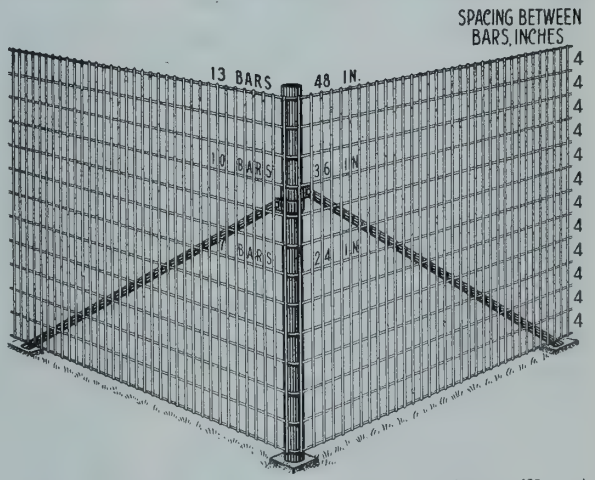
EDMONTON
SASKATOON
SWIFT CURRENT

HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worth-while buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.

Electric-Weld Fencing



This fencing carries a guarantee that wires will not separate, the weld will hold and the welding does not injure wires. Used extensively for Stall Guards, instead of wood, for enclosing gardens, orchards, for grape arbors, tree and window guards, tennis courts, etc. Ideal for partitions in stock rooms, factories and warehouses.

Keep it in Stock -- A Quick Seller -- Good Profits --

Made of No. 11 wire, 1 7-8 inches between stays, 24, 36, 48 inches high. **Write for Prices and Terms to Dealers**

A. R. LUNDY 259-261 King St. West, TORONTO

"Canada's Next Premier"

No matter which he is—all three possibilities are pen-pictured in

November 15 MacLean's

"Scrutator," a writer of rare analytical power, holds the mirror up to Meighen, King and Crerar. Each of the three is "called up" in printers' ink as true to life as if they stood there separate and distinct in flesh and blood. It is one of the most searching, masterly articles ever written with public men as subjects. It is fair to each—and nothing more; a cold-blooded analysis of the virtues and weaknesses of the candidates in turn. It will surprise you, startle you, tantalize you with its subtleness and depth.

Lt.-Colonel John Bayne Maclean

has been a watcher from the hilltops longer than most of the present-day school of Canadian writing men. As usual, in his article on the Dominion political situation in November 15th issue of MACLEAN'S MAGAZINE, he strictly maintains the detached attitude of the true journalist. But in his survey of the field and the political gladiators there is a warmth and an intimacy with both the men and the situations that could be imparted only by one who has long been a close and observant student of governments both Dominion and Imperial. This article appears under the caption—

"All Three Are Good Men."

"Funny Thing That Tariff," —by J. K. Munro.

This number of MACLEAN'S has four timely articles dealing with Big Politics, the whimsical observations of J. K. Munro are, as usual, full of amusement as well as information. Munro just can't help seeing the funny side of politicians and politics. Of Ottawa and Parliament Hill he makes a sort of continuous vaudeville performance. He gets some big laughs out of election activities.

"Our Election Enigma—Woman!" —by Agnes C. Laut.

How are they going to vote? Are they going to vote at all? Are they going to realize citizenship? These are some of the potent questions asked and answered by one of Canada's leading women authors—Agnes C. Laut. What influence will woman with her vote bear on Canadian politics? Will the woman wage-earner join the ranks of labor when it comes to the battle of the ballots? There is a fund of information for both men and women readers in this right-on-the-minute summary of Miss Laut's.

Other Gripping Features in This Issue:

W. A. Fraser.

If you like red-blooded fiction with the tang of the race track in it, W. A. Fraser's short story, **"The Thumb Print,"** is sure to satisfy. It's a case of a pair of sleek double-crossers being neatly double-crossed by what they deemed a rich double-crosser.

"Whose Bride Was Mary?" is a delightful, fast-reading short story of perplexing situations from the pen of Ethel Penman Hope.

The first of Rev. R. G. MacBeth's thrilling articles on old days with the Mounted Police, "Policing the Prairies," is given complete in this issue. Learn how the Mounties first invaded the prairies in the days of Indian scalp-takers and white "bad men," and in the face of tremendous difficulties.

Incidentally there are two generous instalments of the serials, "Mostly Sally," by Pelham Grenville Wodehouse, and "The Yellow Streak," by Valentine Williams.

What do you know about "Relativity" and the Einstein Theory? An illuminating summary of Sir Oliver Lodge's explanation of it is one of the many interesting topics dealt with in MACLEAN'S "Review of Reviews."

"Food Facts You Should Know," by William Fleming French, and the regular departments devoted to Finance, Current Humor and Women and Their Work, complete a number bristling with good things.

Birkett Salesmen See Many Retail Problems
Maybe They Can Solve Yours?

Birkett Salesmen are on the move. They come in contact with many men, in many businesses, in many towns. It is not extraordinary that they should, in this way, acquire much useful information and knowledge about the experience of other merchants in solving problems.

Perhaps just such a difficulty in merchandising, advertising, accounting, buying, or some phase of the complex retail store confronts you now.

It is to your interest, to our interest and to the Birkett Salesman's interest that your difficulty be overcome; so, ask the Birkett Salesman. He'll help you all he can.

Thos. Birkett & Son Co.
LIMITED
Shelf and Heavy Wholesale Hardware
Ottawa, Canada

"Hercules" Sash Cord

The reputation of this brand has been thoroughly established in the Canadian market for the last eighteen years. It compares in quality with the best imported brands, but is sold at a considerably lower price and can be safely recommended for any job.

All wholesale hardware dealers carry "Hercules" Sash Cord and can fill orders promptly.

Manufactured in Canada

The Best Results

CAN ONLY BE OBTAINED FROM THE USE OF THE BEST METAL.

ALUMINIUM

GIVES THESE RESULTS. WE HAVE IT IN STOCK IN EVERY COMMERCIAL FORM.

Should Retailers Display Your Goods?

Do You Set a Good Example?

RETAILERS have their displays in "silent salesmen," and in windows where the goods appeal silently to the desire of every passer-by.

And your goods—where do you display them to create desire in the buyers of the Canadian hardware trade?

There is one street, with one great national display window, where the hardware buyers of the Dominion throng each week eager and interested to see what new goods, new models or new messages are displayed to the trade there. This national display window is the advertising section of HARDWARE AND METAL. Its pages are intently studied each week by all the wholesale hardware buyers of Canada and over 90% of the retailers.

Let us show in detail that it pays you to display your goods in HARDWARE AND METAL's National Show Window.

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

Meet The Demand With Bowser Pumps

Write for Illustrated Booklet C-16

In every locality there is a certain store which serves more gasoline and oil to customers and gets more profits than competitors. Usually Bowser Piston-Type Measuring Pumps will be found in front of those stores. That's because motorists have been learning for 35 years that Bowser Pumps give clean, power-*full* gasoline accurately and quickly.

The Bowser Centrifugal Separator positively extracts all water from gasoline before it is discharged. Clean, dry gasoline burns better, makes more power and less carbon.

By installing Bowser Gasoline and Oil Handling Equipment, you, too, will get into the class of dealers who make big profits from the motor trade.

Bowser Equipment is MADE IN CANADA by

S. F. BOWSER CO., LTD., 1668 Fraser Ave., Toronto, Ont.

BOWSER ESTABLISHED 1885

PISTON-TYPE MEASURING PUMP

Your Furnace Line

Householders and Builders are more and more insisting on a standard make of Furnace. That is why the Happy Thought dealer is favorably situated when preparing estimates and interviewing prospects. The Happy Thought Line of Furnace carries the conviction of positive comfort all through Winter at the lowest possible consumption of fuel. This conviction is universal. It is in evidence in your community, among your prospects, and you can benefit to the extent of your co-operation with us. Our plans will interest you.

These Two Furnaces are

The Happy Thought Pipeless

and the

Reliance Regular

They are the leaders of a Comprehensive Furnace Line

Write us.

HAPPY THOUGHT FOUNDRY COMPANY LIMITED

BRANTFORD - CANADA

Sold and Distributed in Western Canada by

The Hooker Crate Opener

The best pocket tool for opening boxes, crates, barrels, prying off lids, and hammering. Every one is warranted. The cleft or "hook" makes it effective for pulling nails that cannot be drawn by the common crate opener. Nails can be gripped in almost any position at just the right angle to pull easily. One face of the hammer is scored, the other, plain polished. Weighs 15 ounces, and is 9 inches long.

GLASS

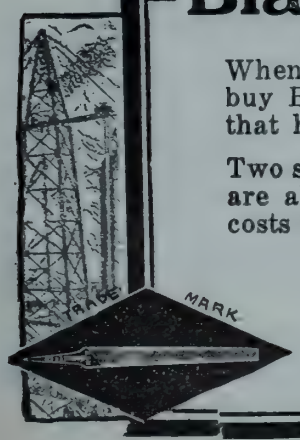
Advertising does not necessarily mean an elaborate display of merchandise prices—or a tricky and often meaningless use of catch phrases—but rather, a setting forth of ideals and principles that permeate the policy of the advertiser.

Our business is glass—but our one aim is to OBTAIN and RETAIN your good will—without it we would close our doors.

If you need glass in any quantity see us and we will satisfy you.

Ontario Plate Glass Limited
HAMILTON, ONTARIO.

Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G.& H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.
Owned and Operated by Nicholson File Co.

A PIECE OF TABLEWARE *may* be solid silver without the "sterling" stamp, the accepted "Hall Mark" of quality.

But you don't know.

A Bank might be honest and efficient without Government inspection.

But you don't know.

A business concern may be absolutely responsible without a commercial rating.

But you don't know.

A publication may have the circulation it claims without verification by the Audit Bureau of Circulations.

But you don't know.

Better be sure.

The circulation of Hardware and Metal is verified by the A. B. C. Hardware and Metal is the only hardware publication in Canada that will supply an A. B. C. Audit.

Real Profit in Canadian Veneer Chair and Toilet Seats

We are talking about real, tangible profit that comes in particularly freely in the Fall months because there is a little extra demand now.

These splendid three-ply, veneer seats are made in a pleasing variety of patterns, carefully shaped, corners rounded, and fastened with genuine, water-proof cement. They will not warp, curl, crack or come apart.

Everlasting 7- and 11-Ply Toilet Seats

These are expertly joined in 7 and 11-ply veneer. They cannot come apart and will outlast any other seat on the market
Write today and let the extra profit come to you as soon as possible.

Canadian Veneering Company, Incorporated
ACTON VALE, QUE.

Advertising in HARDWARE AND METAL is economical, because the advertiser reaches only a class of business men directly interested in his product. The readers of HARDWARE AND METAL are big buyers because they buy for business as well as for private consumption.

If interested tear out this page and place with letters to be answered.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide. additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

HELP WANTED

WANTED IMMEDIATELY, HARDWARE clerk, must be good salesman and stock keeper. State age, experience and salary required. Box 300, Hardware & Metal.

EXPERIENCED HARDWARE CLERK CAPable of taking charge of store. State experience and salary expected. Platt Bros., 1356 St. Clair Ave., Toronto.

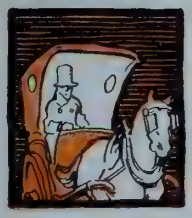
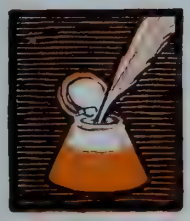
Modern Science *and the* Corroding of White Lead





EVERYTHING upon earth must either advance or recede. Nothing may stand still. This is one of Nature's immutable laws.

In the famous Pickwick's day, the mode of travel was by post-chaise or coach. The papers in the immortal Bardell-Pickwick breach-of-promise suit were laboriously written with quills, and Mr. Pickwick's quarters in the Fleet prison were dimly lit by candles.

But the world progresses—as it must!

Even the post-chaise, the quill and the candle, though in use in the days of Cardinal Richelieu (1600), had been improved and improved down to Mr. Pickwick's advent on this globe, about 1827.

After the candle came oil light—and later, electricity. After the quill came the steel pen point with mineral ink—then the typewriter—after the post-chaise came the gasoline motor-driven car and the aeroplane. Thus do we obey Nature's mandate—and advance.

And who would think of returning to the antiquated methods of two or three hundred years ago?

In keeping with the general advance made in all lines of human endeavour, modern science has given us a new and greatly improved method of corroding white lead. Crown Diamond White Lead is corroded by this modern, scientific method, which insures absolute control of the process and results in a white lead that is positively pure, of a remarkable whiteness, smoothness, freedom from moisture and of uniform quality at all times.

We have, and our immediate predecessors also used the achievements of the white lead corroders of two and three hundred years ago as a basis for *improvement*—and yet greater improvement. To-day

CROWN DIAMOND WHITE LEAD

is without a peer for Quality

Good Hardware is Forgotten

because once installed it continues to serve efficiently and reliably. Canada Steel Goods are serving many of your customers so well that they never come to mind.

These same customers also have defective, unsightly and annoying latches, hinges, hangers, etc. in use that do come to mind. A good display of Canada Steel Goods in your windows and on your counters, coupled with a good reminding talk, will serve to make many sales.

No. 1240 Barn Door Latch

A durable, common-sense latch with japanned frame and handles, tinned bolt, and a sherardized spring of piano wire that cannot rust. A dependable latch that operates effectively and gives smooth, reliable action that wins friends and permanent, lasting trade for the dealer who sells it. Packed one-quarter dozen in a carton, including padlock eyes. Weight, 175 lbs. per case.

The "Challenge" Latch

This desirable latch possesses more points of quality and value—selling points—than any other thumb latch on the market. It is made entirely of wrought steel and it is absolutely impossible for the thumb-piece to work loose or get out of place. Packed one-half dozen in a box. Twelve dozen in a case. Weight, 190 lbs. per case.

Loads of Profit—

Practically every customer who enters your store is a prospect for the sale of Imperial Royalite Coal Oil for at least one of its many uses. That's why the Imperial tank wagon which stops regularly at your door brings loads of profits.

It is the natural tendency for people to buy everything they can at one store and more often than you think coal oil is the **staple** that is the cause of a customer buying exclusively from you. Stock Imperial Royalite Coal Oil and you take advantage of this fact.

No coal oil you might handle will give the satisfaction that Imperial Royalite does. It is the most economical, dependable coal oil on the market. You cannot sell a better oil at any price—yet it is lower in cost than most others.

Imperial Branches and warehouses at convenient distributing centres throughout Canada insure prompt delivery and ample supplies at all times.

'Phone our nearest branch and ask to have the Imperial tank wagon call.

Decorative Wall Burlaps—

Good talking points for your customers

BURLAP is about the most serviceable all-round type of wall covering on the market today. Made of jute canvas, it is extremely hard wearing—may be decorated to match any kind of color scheme—is sanitary and may be washed off and kept clean. In its manufacture it is impregnated with germ-proof pigments, which give it sanitary qualities that should be explained to every customer.

Prices are now lower than they have been for years; a stock can be purchased for a nominal outlay.

Burlap is easy to handle—easy to sell and a thoroughly satisfactory and profitable line.

Supplied in three shades—White, Drab and Green.

Keep our displays well in the foreground—it will pay you

WAYAGAMACK PURE KRAFT

Kraft Means Strength

EVERY time a parcel bursts or a bag leaks it means not only a loss to your customer but often the loss of a customer. It creates a bad impression and bad impressions are not easily eradicated.

All risks of such accidents can be avoided by using the best wrapping paper and having your bags and containers made of the highest quality of Kraft Paper.

Wayagamack Pure Kraft

either in the form of a wrapper or bag is unequalled as a protector for every class of goods from nails to motor cars and for groceries, dry goods and hardware of all descriptions. It is strong and resists moisture; it is economical to use giving fifty per cent. more service than a sheet of an inferior grade of paper of equal weight. Any wholesaler will satisfy you on this point by a practical demonstration.

Insist on being supplied with

Wayagamack Pure Kraft

BUTTERFIELD

Machinists cannot afford to use the Wrong tool. The Wrong tool does a bad job and the casting has to be "scrapped" at heavy loss. Hardwaremen, both wholesale and retail, also need the right tools to build up their tool departments into highly profitable investments. Butterfield Tools are the right tools to build hardware business; for about half a century they have been proving it throughout the Canadian hardware trade. If you have never stocked Butterfield Tools it will pay you to investigate and learn how well they sell and how much you profit.

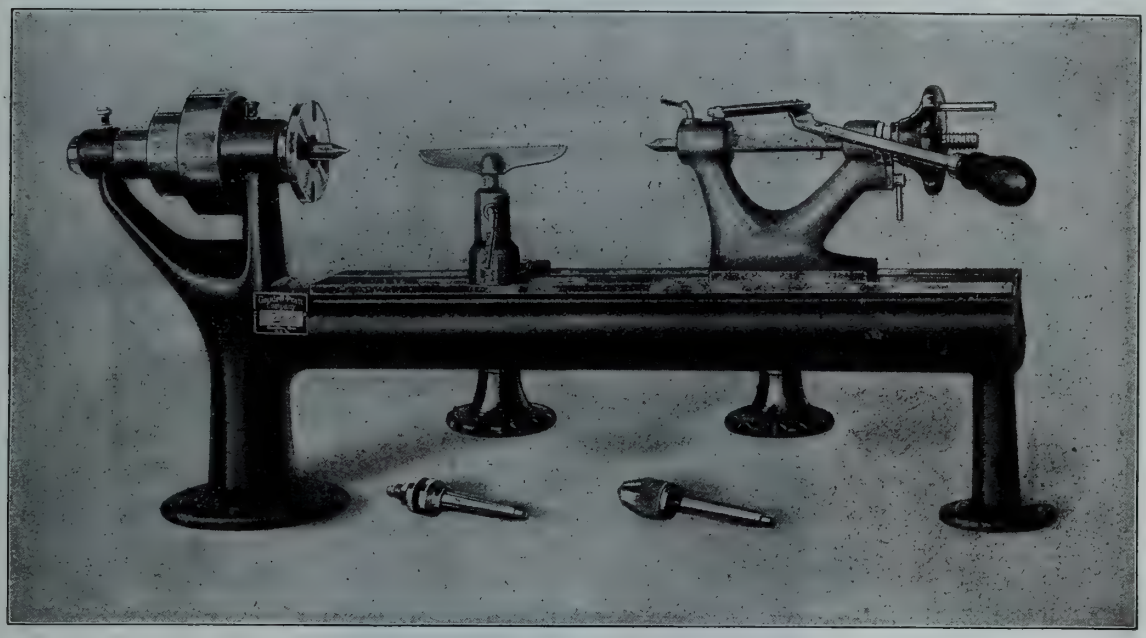
GOODELL-PRATT
1500 GOOD TOOLS



HARDWARE DEALERS
Sell These Lathes

This Lathe is a tool that is sold by hardware dealers, because it is designed primarily for the use of amateurs, and experimenters, and not as a piece of production equipment.

Thousands of boys and men like to make things in their own home shops. Hundreds of live hardware dealers are cashing in on this demand.

No Similar Tool At Anywhere Near The Price

With this Lathe, and the various attachments that we manufacture for use in connection with it, it is possible to do any kind of machine shop operation. Yet the cost is so low that almost any man or boy can afford to buy it.

Steady Stream Of Repeat Orders For Attachments

Once you sell one of these lathes, you are sure of a steady customer for various other attachments and tools for use in connection with it. The retail price of the Lathe as shown above is $36.00. Your margin of profit is liberal.

Making a Pump Sell Accessories

Ever stop to consider how a gasoline pump on your sidewalk will increase the sale of accessories inside your store?

Here is the way it works out: An automobilist drives up for gas. While he is in the buying mood, a suggestion or two from one of your good salesmen will send him away with a purchase of accessories or other needs as well as the gasoline which he wanted.

And it works the other way too. When people come into the store to buy a spare tire, or a spark plug, or a new light bulb, you can cash in on their need for gas, selling them a filling in addition to the article which they stopped to buy.

A Wayne curb pump for gasoline and a Wayne portable tank for lubricating oil will give your store an added volume of sales from these two commodities. Write for Bulletins 227 and 276 and learn more about this way of increasing your business.

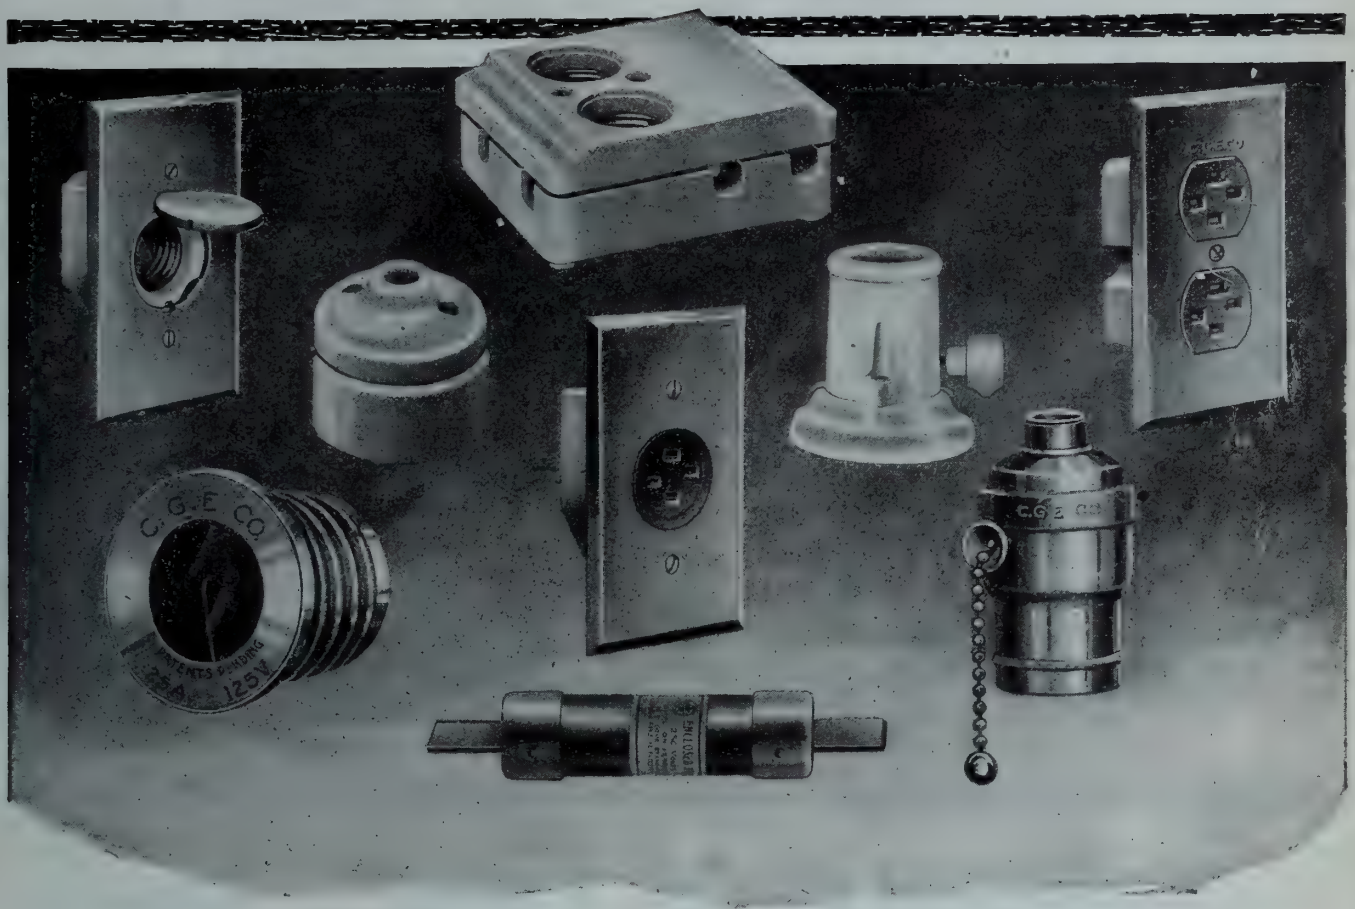
The efficiency of an electric installation is largely dependent on the reliability of its wiring devices



Electricity, the Friend of Mankind

ELECTRICITY has done much to make the lot of man easier. The housewife and the school child, the factory worker and the busy executive all benefit by the co-operation of electricity in their daily tasks.

The degree of satisfaction, derived from any electrical installation, largely depends upon the quality of the Wiring Devices used.

The knowledge that C. G. E. Wiring Devices have been used throughout on an installation, guarantees freedom from trouble and disappointment.

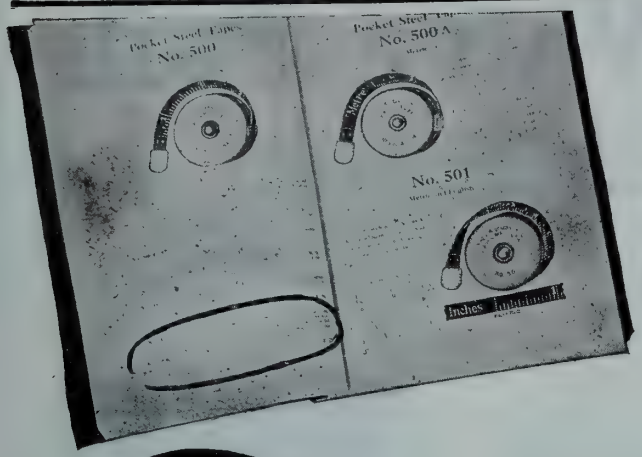
New Tools You Should Know



BUILDERS' TAPE No. 540

An invaluable convenience to Builders, Contractors, or Architects. Calibrated to scale (1-8 inch to the foot, or 1-4 inch to the foot) this tape enables the user to take any measurement of any dimension on any job, direct from the plans. Fully described on Page 42 of the new Starrett Catalog No. 22 "MA" reproduced above. Next time a builder, contractor, or architect comes into your store, ask him what he thinks of this Starrett No. 540 Builders' Tape. There's a demand for it in your town. And write for the Starrett booklet—"The Tools Mechanics Buy."

The L. S. Starrett Company

The World's Greatest Toolmakers

Manufacturers of Hack Saws Unexcelled

Athol, Mass.

Sell Starrett Tools

Your customers have quit replacing these things—

They're Mending Them Now —*With Solder*

Things that would have been discarded and replaced a year ago, are repaired now—that's the "thrift-time" spirit.

More solder is needed to mend the pots, pans, electrical appliances, tanks, and hundreds of other things that are being fixed with solder. So the decrease in sale of new merchandise can be partly made up for by *increased* sale of—

KESTER ACID CORE WIRE SOLDER
FLUX IN POCKETS

The Thrift-Time Seller

Every sale of this handy, genuine tin-and-lead, *Self-Fluxing* Solder makes a permanent customer because Kester-Solder does better work and eliminates separate, mussy flux and the time formerly wasted in applying it.

Try it without cost. Use it on your own work. Note how the scientifically prepared flux flows out of the pockets as the solder is melted off. Note the perfect bond, too—then you'll know why Kester Solder is in such great demand.

Remember it stocks two items in one—flux and solder, so it's easy to handle; easy to sell. Sold in one pound cartons and on one, five and ten pound spools.

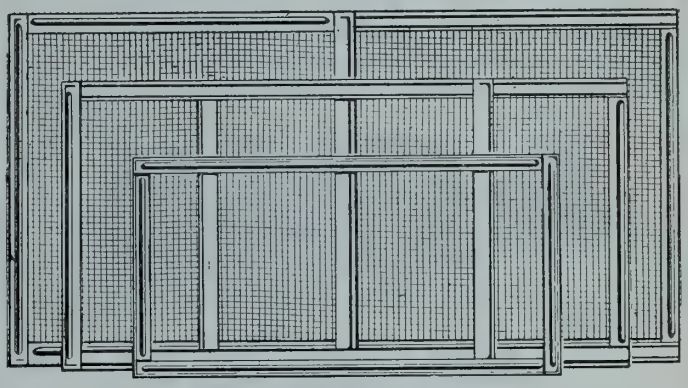
DOUBLE LIFE
ALL METAL EXTENSION
FLY SCREENS



PATENT APPLIED FOR

The Screen of Merit, Durability, Neat Appearance, the Acme of Perfection

Only a Slight Advance in Price over Wood Screens

Contrast the Burrowes All Metal Green Enamelled Fly Screen (which admit 20% more light) with the old style large rimmed screens that warp, get weather worn, bind, and twist out of shape.

The Screen cloth is locked in Double Life frames under heavy pressure then electrically welded together making the two one. The proper way.

Nails, Tacks, Solder or Rivets are not used in D. L. Screens.

All Metal Double Life Screens are made to resist weather conditions, first they are dipped in a rubber coat of enamel and baked hard. This makes a splendid base for the finishing coat of a nice shutter green enamel. Nature's color which gives the nicest effect imaginable as both cloth and frame are green.

D. L. Screens do not telescope but are the same height all along. An offset in on half runs in a U groove in the other. They close to half.

The possibility of blood poisoning is eliminated as all wire ends are not only locked, but welded, and cemented by the enamel.

For genuine service, neatness and value, D. L. Screens merit the name. They are in keeping with the present pace of progress and advancement.

We have spared neither pains nor expense to bring D. L. Screens up to this state of perfection.

9¼ D. L. Screens display more screen cloth than 10 inch screens with large rims and our 12¼ screen is equal to other 14 inch screens.

Takes Little Space

Our No. 42 Auto or Electricians' Torch has oblong tank and is very popular with mechanics desiring a tool that will take up little space in a kit.

Tank is made of heavy brass throughout. Supports on bottom of tank prevent torch from tipping over when placed on bench—not in the way when torch is not in use. Fitted with patented tapered burner, with hook and support for soldering coppers. Valve wheel is of wire and always cool, giving operator full control of flame at all times. Automatic pump of simple construction forms the handle.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

Why has Hardware and Metal Such a Large Western Canada Circulation?

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 33 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

Where Industrial Activity is Found

Manufacturer of Process Parts Required by Various Industries Gives a "Close-Up" of Reasons Why One Plant Is Active and Another in Same Line Is at a Standstill—Same Principles Govern Retailers in Meeting Readjustment Problems of Merchandising

By H. L. Southall, Based on interview with A. W. Taylor, General Manager Parmenter & Bulloch Ltd., Gananoque, Ont.

WHAT MIGHT be considered as a fairly accurate barometer of industrial activity in many branches, is the extent of production of such process parts as nails, rivets, washers, burrs, etc., which enter largely into the manufacture of a very wide range of products. For this reason Hardware and Metal was much interested in the information secured from A. W. Taylor, General Manager of Parmenter & Bulloch Ltd., of Gananoque, Ont., concerning the extent of industrial activity in the manufacture by this firm of such products as have been outlined. This interest, as pointed out, is due to the fact that the extent of activity in this line is a good indication of the prevailing requirements of other important branches of industry, providing manufacturing is being done for current needs and not for stock, as is the case with this firm.

Discussing industrial developments Mr. Taylor pointed out that a distinct improvement has been noted recently. He is in direct touch with many large manufacturers in various parts of Canada and has first hand information concerning them.

In indicating that certain of the manufacturers who are buyers of the products of his firm, have recently shown increasing activity where they were formerly quiet for a considerable length of time, Mr. Taylor emphasized the fact that the business now being secured has followed much aggressive effort and that it was very noticeable that the firms who were putting forth such effort were rapidly overcoming the handicaps peculiar to the recent condition of business.

A Case in Point

Proving this point Mr. Taylor outlined the cases of ten customers, firms engaged in much the same line of industry. Of these ten firms three of them are described as now actively engaged, with production up to fair levels and steadily increasing, while the other seven firms' activities are practically at a standstill.

As to the reason for this condition of affairs among business men engaged in the same line of industry and with much the same obstacles to face, Mr. Taylor pointed out that apart from the aggressiveness displayed on the part of the few, some advantage had accrued to certain of those firms from being quick to base prices on replacement values. Others who followed the short sighted policy of trying to maintain prices in the face of reduced costs, soon found there was no market for their goods. Subsequently when they did reduce their prices to bear a correct relation to prevailing costs they found that their customers had linked up with some competitive line. Mr. Taylor attributes much of the recent industrial improvement to the increasing confidence among buyers as result of more manufacturers and distributors endeavoring to pass on any price advantage. The extent of the improvement would, he said, be gauged accordingly as all branches of the trade accepted or rejected this plan of readjustment. The case of the manufacturer has been outlined in particular but Mr. Taylor emphasized that the case of the retailer is similar in most respects and that the merchant who is attempting to restrain the downward tendency of prices in the fear of loss to himself, is retarding a natural movement which is the only sure road to improved conditions.

Farmer Has Had No "Raw Deal"

Having considerable dealings with the manufacturers of agricultural implements, Mr. Taylor pointed out that the careful buying policy of the farmer is indicated in the reduced extent of operation in this industry. It was his opinion that the farmer had not been given the "raw deal" of which he frequently complained when called upon to pay prices for hardware and other lines which he thought were out of all proportion to the present revenue producing value of his crops.

"The farmer has had no heavy inventories to reduce as have the manufacturers and most retailers," said Mr. Taylor, further enlarging upon this point.

Returning to the comparison made as between manufacturers in similar lines of business, Mr. Taylor stated that competitors have recently been making accusations of price cutting against the firms which have taken steps to secure business and keep the wheels of industry in motion. In this connection, Mr. Taylor pointed out that his own enquiries on the subject had proved that those manufacturers who have recently been operating at fair capacity are in much better shape due to working off high

(Continued on page 64)

A COMPARISON

Of ten manufacturers engaged in the same branch of industry, with similar obstacles to meet, three are now actively engaged in production while seven are practically at a standstill. The three have now worked off high priced stocks by basing prices on replacement values and are all set for new production at low levels which will show profit. The other seven have closed down factories and are sitting back with warehouses filled with high priced stock and are trying to figure ways of liquidating the stock without loss. Overhead costs against stock on hand are constantly mounting and many customers have been lost by firms such as the seven mentioned. Retailers are faced with much the same problem.

Hardware Trade Not To Be Eliminated In Tire Selling; Lower Prices Quoted

Decline of 20% on Cord Tires and 10% on Fabric Tires—Officials Describe as "Foolishness" Reports That Hardware Trade to Be Eliminated—U.S. Competition Forces Prices to Low Levels and Jobbers Being Eliminated in Some Cases as Result

Reports came to Hardware and Metal late this week that a group of four of the largest tire manufacturers in Canada had decided upon a substantial reduction in price, of cord and fabric tires and that simultaneously had decided to eliminate wholesalers in the distribution of tires and also eliminate the retail hardware trade. Statements from officials of these companies are given herewith.

"THE REDUCTION in automobile tire prices is more in the nature of a levelling up in quotations generally, and varies on the different products," said H. C. Lower, General Sales Manager, Goodyear Tire & Rubber Co., Toronto. In discussing the present tire situation, Mr. Lower referred to the decline as being based upon primary market conditions, coupled with some slight reductions in raw material prices and recent lowering in production costs. "The extent of the reduction," said Mr. Lower, "is around 20 per cent on cord tires, and in the neighbourhood of 10 per cent. on fabric tires. These revisions, however, are not exactly uniform, and apply to just certain sizes."

Dealing with the reported decision of tire manufacturers to eliminate the wholesale houses, and also the retail hardware merchants as future sources for marketing their products, Mr. Lower stated that this factor was in the nature of news to him. One reason for this was pointed out in the system for distribution employed by The Goodyear Co. "This method," remarked Mr. Lower to Hardware & Metal, "has been of a direct nature, and the fact that we do not deal through the jobbing houses, or rely on jobber's connections for our dealers, may be the reason why we have not yet heard of such a decision. We have our own representatives travelling throughout the country, in co-ordination with our offices and factories. This Company has branches at various points, and where we have no branch office, we have sales agencies who distribute the Goodyear products through their respective districts. Our list of selected dealers contains the names of many hardware merchants, garages, and general stores. There are a large number of garage men to whom we do not sell our products, and there are many hardware merchants selling our tires to-day." How this development would affect them Mr. Lower was not in a position to discuss, as he preferred to have further information at his disposal. "As far as the decision to eliminate the jobbers is concerned," said Mr. Lower, "this probably refers to some of the smaller manufacturers who have been dealing through these sources in the past, and are without chains of branches and agencies such as we possess."

Other interesting facts gleaned in connection with the prevailing tire situation are to the effect that price developments in the United States markets constituted one of the prime factors in forcing Canadian tire manufacturers to take action, which was not considered either necessary or justified in domestic circles. This opinion was expressed by a well-informed tire company official. It was further pointed out that the current reduction was now necessary, as producers here were bound to keep their prices at such low levels as would tend to prevent U.S. manufacturers flooding the Canadian tire markets. Duty, exchange, sales tax, and the original cost of the United States products, were factors which had to be taken into consideration; but with distributors to the south having instituted a price-cutting war, and selling tires below the cost of production, protective measures along the lines of comparative declines in quotations have had to be adopted by Canadian tire producers in order to preserve their markets and corresponding interests.

Price Factor Eliminates Wholesalers

It was also pointed out that the decision on the part of some tire manufacturers to eliminate the wholesale houses as a distributing factor in future marketing of tires, was entirely due to the

(Continued on Page 46)

Wide Price Range On Oil Heaters

FOLLOWING upon recent information set forth in Hardware and Metal as to prices being quoted on Perfection Oil Heaters, japanned or nickel trimmed, and especially in view of the subsequent statement of this company that prices on these heaters were now uniform a further enquiry was made among twenty-eight stores in Toronto including hardware, furniture and departmental. A wide range of prices was quoted these in many cases being much lower than the "uniform" price of $8.75 for the japanned heater and $9.75 for the nickel trimmed heater.

The following table represents the prices quoted on the two styles of heaters by these twenty-eight dealrs. Names are not given in the list but should these be desired Hardware and Metal will be pleased to submit the list to officials of the Ontario Retail Hardware Association for confirmation.

Practical Hardware Gifts for Xmas

Cry of Economy Increases Opportunity for Sale of Practical Hardware Lines as Christmas Presents—Shoppers Already Busy —Plans of Various Hardware Firms for Stimulating Trade In Christmas Lines

A GREAT many unique plans are being employed by hardware merchants to secure the early attention of the Christmas shoppers and to impress upon them the economy of buying useful gifts for all members of the family. Ingram and Davey Ltd., St. Thomas, advertise that they have received another wire from Santa Claus in which he states that he has been delayed but will be in Toyland as soon as possible. By advertising some message daily, the interest of the children is increased until the arrival of Santa Claus with his various accoutrements and supply of toys.

Two seasonable window displays, widely different, but each a big producer of business, have been arranged in London by the Cowan Hardware Company and J. G. Steele.

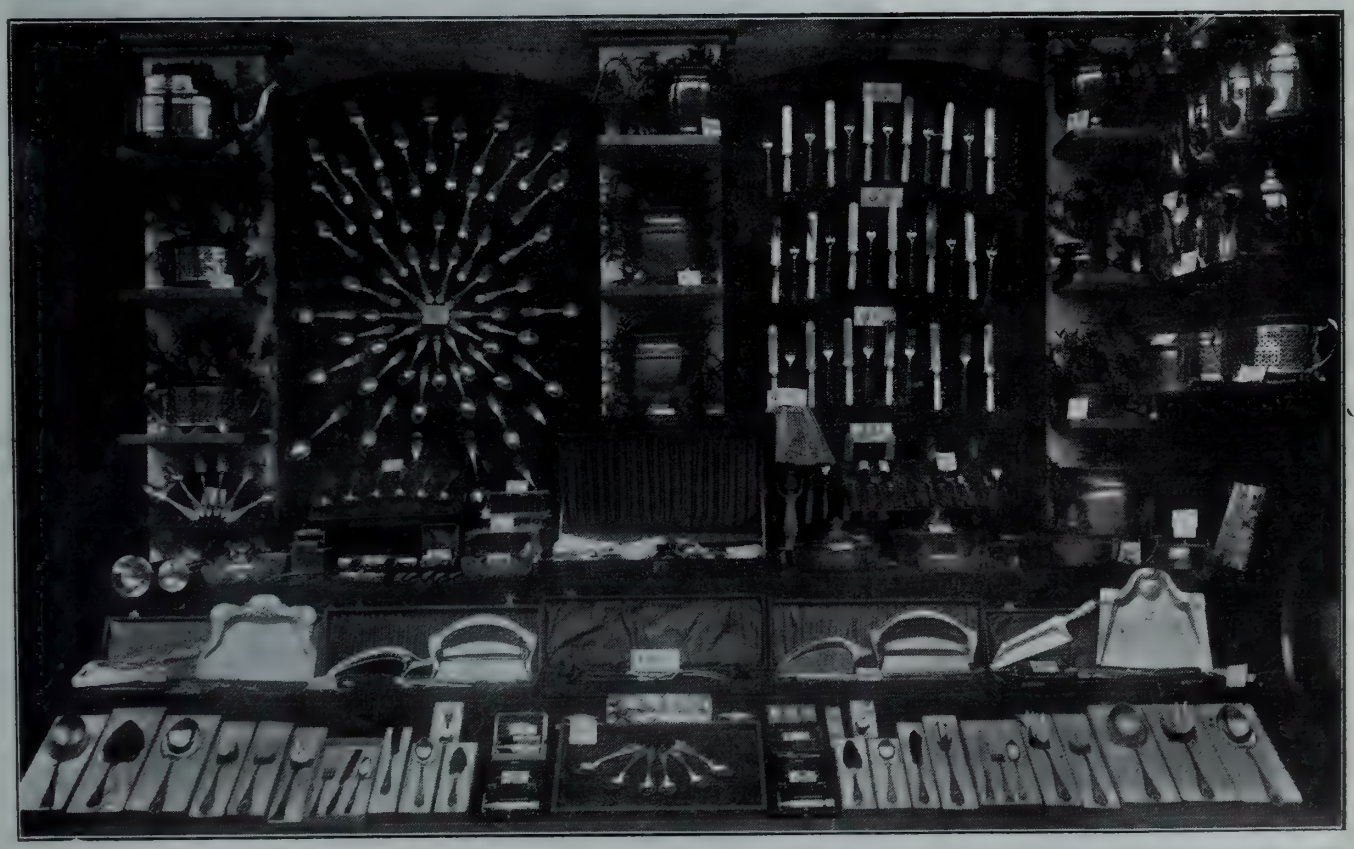
The Cowan window is a combination display aimed to attract the early Christmas shopper and also those interested in purchasing inexpensive but useful articles for the home. On three narrow steps at the back, covered attractively with green cloth, are arranged such lines as electric toasters, thermos bottles, brass goods and small articles of plated ware. On the floor in the centre at the front is an attractively arranged display of nickeled flash lights. At one side is shown a selection of small, reasonably priced cut glass flower vases. On the other side is a showing of cutlery and pocket knives. Both kinds of knives are arranged on show boards covered with green and stand out well. Prices of each pocket knife are marked plainly and the prices of the table knives are also given. Just behind these are shown two handsome cases of carvers. In one corner of the window is an ash tray and stand and adjoining it on a very neat, small pedestal is a shining percolator. In the other corner is a pyramid of small alarm clocks, the pyramid being constructed by using the boxes. Price cards are plentiful and the window has been a big drawing card for scores of men and women who are on the lookout for reasonably priced, useful and good looking Christmas gifts.

Soon Brought Results

"The display was no sooner placed than we began to get results," said Manager Howard Crummer to Hardware and Metal. "There is a good deal of early Christmas buying being done this season and we are finding that it

(Continued on page 46)

Encourage Early Shopping For Christmas



Many suitable gifts of a practical nature are shown in this Christmas display as arranged by Rutherford and Kayser, Hardware, Simcoe, Ont. This display won third prize in places under 5,000 in the 1920 Hardware and Metal Christmas Window Contest. For a comparatively small window there are a great many gift suggestions shown, and each stands out clearly with price tickets generously used. Some evergreen is used to improve the arrangement. Silverware, cutlery, safety razors, flash lights, cut glass, kitchen ware, portable lamps, electrical goods are some of the lines shown.

"Tremendous Influence in Re-Establishment of Normal Business"

So Business Papers are Described by Col. Henry Cockshutt, Ontario's Lieutenant-Governor — Leadership Through Business Press Said to Be a Big Help in Building Business Fabric of the Country

ONTARIO'S Lieutenant-Governor, Col. Henry Cockshutt, himself an outstanding success as a business man, paid an understanding tribute to the business papers of Canada when, speaking at a luncheon in connection with the annual meeting of the Canadian National Newspapers and Periodicals Association at the King Edward Hotel, Toronto, on Thursday, Nov. 10, he said:—

"I am especially glad to be with you to-day because I believe that the influence of the business press will be one of the most important factors in re-establishing business conditions in Canada on a safe and sane basis. I make a distinction between the business newspapers and the daily press because I believe that your papers—the business newspapers of Canada—exert a greater influence than the daily press because of the greater confidence your readers have in them. People read the daily newspapers to keep abreast of the general news of the day. They are interested in what is happening around them and they read to satisfy their desire for excitement or interest or entertainment. What they read in the daily newspapers to-day is forgotten to-morrow.

"But this is not the case with the business newspaper. Business men need the service of these papers in the conduct of their everyday business life. I have noted that they usually have a business paper or two in their pocket when they go home Saturday night. I do not say that they read them on Sunday, that I do not know, but I do know they study them carefully, and that a great number of your readers will come to their business on Monday morning with some clipping from your paper in their pockets. They will say to their associates, 'This is the situation, I can show it to you in this clipping.' For that reason, gentlemen, I say that yours is the greater obligation, because you are leaders, because you are helping to build up the business fabric of the country.

"You should be very careful that everything that appears in your columns bears the imprint of the truth. You must be sure that the news you give is correct beyond question, because there are thousands of your readers ready to set their business course by the news and advice you give them. I am familiar with a good many of your publications and I can personally attest to their high character. It is of vital importance that this high character should be maintained, and that no effort should be spared to give in your columns the maximum of service.

"In these days when there is disorganization, dissension, disruption in all walks—business, politics and religion, there is a great place for the business paper to bring out more complete information, to assist in making us all realize we must work for a common cause, the upbuilding of our country. The business men of this country need your assistance. They are looking to you for information and advice, and are expecting it. On your shoulders therefore perhaps more than on the shoulders of any other single agency, rests the obligation to meet the needs of these trying days, with a sane and sound presentation of the case as it exists at the present time, a presentation free from private bias, or the desire to serve a popular demand.

"You can, and I believe will be one of the largest factors in helping to bring

(Continued on page 46)

The use of a price ticket on every line shown is one of the strong features of this window display by W. A. Schaefer of M. Weichel and Son, Waterloo, Ont., a window which won third prize in places over 5,000 in the 1920 Hardware and Metal Christmas Window Contest. A comprehensive range of suitable gifts is shown including portable heaters, thermos bottles, brass goods, china ware, cut glass, alarm clocks, cutlery, safety razors. A neat card extends an invitation to look over the stock. To a person who has little time for shopping and who is backward about entering the store until the article to be bought is decided upon, such a window as this will be of inestimable help.

News of Western Canada

Seasonable Movement of Hardware in B.C.

Stocks Largely Placed in Retailers' Hands — Shovels Decline—Cutlery Stocks Carried Over— Collections Good in Fruit Districts

FALL business in the wholesale and retail hardware trade has been satisfactory in British Columbia, there has been a noticeable slackening off during the last ten days. Seasonable goods are largely placed in retailers' hands and no special rush anticipated until the Christmas rush which this year is expected to be of a fair volume. The present quietness in the trade has not assumed the proportions of a depression although the distributing trade would like to see a little more activity.

During the present week, the Okanagan, which has been placing good orders all season, received a seven-inch fall of snow and with a temporary lowering of the thermometer, several of the coast wholesalers received hurry-up orders for goods. This pertained particularly to stove and furnace lines and repair parts. Generally speaking the upper country and Victoria business is good and no complaint is heard although the same cannot be said for the north and northern interior. The virtual stoppage of the shipbuilding business at Prince Rupert is undoubtedly having an adverse effect.

Collections appear to be a little slower than at this time last month, though some of the houses report that in some localities, particularly the fruit districts, payments are being regularly met and in some instances discounts are taken.

A price change of importance this week is a drop of two dollars per dozen in shovels. Handles have been gradually easing off for some time but the trade is unable to understand the manipulations in the price of steel. When black iron plates were quoted at $2.75 at Pittsburgh, the manufacturers announced an advance of $5 per ton with an advice to buy. This action is reported to have been repeated again but with indifferent success, the buyers steering clear of further stocks, since which time lower adjustments have been in order.

Representatives of English cutlery firms in the east will probably notice few orders for Christmas goods this season, from the coast. This is said to be due to a heavy carry-over from last year. German agents are in this market but considerable complaint is heard as to the delay in the filling of orders.

A reduction of $36 in the price of Eden washing machines has been announced. These are now selling at $174, on terms.

The Retail Merchants Association has announced the semi-annual "Dollar Day" for Saturday, Nov. 19. Retail hardware firms are co-operating in making special prices for the day. For instance one prominent house is advertising one quart enamel double-boilers, roast pans (regular $1.45), sauce pans, aluminum loaf pans, corn broom with sweeping compound and other articles at a dollar. Reductions of importance on higher priced goods are also announced.

WESTERN CANADA NOTES

Messrs. W. H. and T. A. McManus, of Vancouver, have formed a partnership under the name of the British Columbia Metal Toy Company for the manufacture of toys.

* * *

The firm of Williams, Slanner & Hart, of Victoria, has changed its name style to Williams & Hart, Ltd.

Incorporations of the week include the name of The Scale Shop, Limited, head office in Vancouver, capitalization of $10,000.

* * *

J. R. Davidson, president Thos. Davidson Manufacturing Company, Montreal, accompanied by Mrs. Davidson, was a coast visitor at Vancouver this week. He sailed on the Niagara for New Zealand on a combined business and holiday trip. They will be away about three months.

* * *

The executive of the Made-in-B.C. Campaign is arranging a dinner to be given at Vancouver on the evening of December 28, at which travellers representing the various manufacturing and wholesale firms will be guests of honor. The hardware trade will be well represented.

* * *

G. U. A. Chowne is the new manager of the R. M. Moore Company formerly known as the Moore Light Ltd. in Vancouver. The company is entering the prairie market with its gas heating stove.

Charles E. Houlding who recently disposed of his hardware business in Saskatoon has been a Vancouver visitor during the week. It is understood that after a short holiday, he will locate on the coast. He intimated that farmers on the prairie are endeavoring to secure sufficient representation at Ottawa to exert a strong influence toward raising the price of grain to the consumer.

* * *

The British Columbia Electrical Service League, an announcement about which appeared in last week's issue of Hardware and Metal, is organizing an industrial lighting exhibit at Vancouver with the idea of impressing upon industrial plant managers the value of better illumination.

* * *

Winnipeg—C. H. S. Bamford, sales manager, the J. H. Ashdown Hardware Company, is confined with an attack of influenza.

* * *

W. Reynolds, manufacturers' agent, Winnipeg, is on a business trip to Calgary and Edmonton calling on the jobbing trade.

* * *

Humboldt, Sask.—Manville Hardware Co. have bought out Schoenan Bros. & Co.

* * *

Winnipeg—Walter Woods Ltd. now heads the local merchant's bowling league with Wood Vallance Ltd., standing third, Great West Electric Co. fifth and McClary's tenth.

* * *

Benson E. Dalzell, has joined the staff of the Miller-Morse Hardware Co., Ltd., as manager of the Automobile Accessories department.

C. A. Morrell Miller, son of the late Hyman Miller, one of the original founders of the Miller-Morse Hardware Co., Ltd., is now engaged in the hardware business of this firm.

* * *

Vancouver, B.C.—There has been a registration at Victoria of the Richards Glass Company, head office of which is in Toronto. The company is now allowed to do business in the coast field.

* * *

With a capitalization of $50,000 the Duplex Heater, Limited, has been incorporated in British Columbia with head office at Kaslo in the Kootenays. The company proposes to manufacture and sell duplex heaters, stoves, furnaces and all articles for the generation of heat for dwellings and all other buildings. The incorporators are also empowered to carry on the business of hardware merchants.

How Hardware Lines Will Be Marked

Marking of Country of Origin on Imports of Hardware Outlined Fully—Special Consideration for Imports Ordered Prior to October 1, 1921, Which Are Entered by July 1, 1922

SOME AMENDMENTS have been made to the original regulations of the Department of Customs concerning the marking of country of origin on imports. Changes have been made in regard to the marking of carpets, linoleums, oilcloths, etc., as previously outlined in Hardware and Metal, and some of the exceptions have been made more definite including the following which will not be required to be marked:

Metallic goods not intended for sale to consumer in condition imported but merely raw material for use in manufacture of articles in Canada; crude rubber, crude clay, hides and skins, raw furs, broom corn and bristles, fibre. Partly manufactured materials to be further manufactured or finished in Canada before passing to consumer are also excepted as well as completely manufactured parts for incorporation into articles of Canadian manufacture, provided in both cases that there shall be incurred in Canada at least 25 per cent. of the total cost of production of the article going into consumption in Canada into the manufacture or construction of which such partly manufactured materials or completely manufactured parts shall have entered. Partly or completely manufactured parts for use as repairs to articles made in Canada or imported and already indelibly marked with other country of origin are also excepted.

The most important amendment is as follows: "Goods bona fide ordered prior to October 1, 1921, shall not be subject to the additional duty of 10 per cent. ad valorem to be levied on the value for duty purposes provided such goods are imported into Canada prior to July 1, 1922, but such goods shall not be released from Customs' possession until they have been marked, stamped, branded or labelled with an indication of the country of origin as required by the provisions of the Act under Customs supervision at the expense of the importer."

Specific hardware lines which must be marked according to the regulations or which might be admitted unmarked according to exemptions outlined, are listed as follows:

ALUMINUM GOODS—

1. Following commodities to bear mark of country of origin on each article: Tea Strainers, Percolators.
2. Religious medals are to have country of origin marked on package or container.

AUTOMOBILES AND PARTS AND ACCESSORIES—

1. Articles to be marked: Automobiles, motorcycles, motor trucks, tractors, bicycles.
2. When not imported in compliance with provisions excepting them as entering into construction of finished products in Canada following must be marked: Battery Boxes, Tool Boxes, Spark Plugs, Carburetors, Ignition, Lamps, Distributors, Starter Generators, Fan Belts, Wheels, Steering Wheels.
3. Following articles coming in same category as (2) under the regulations, are to be marked on each carton or container: Ball Bearings, Roller Bearings, Brake Lining, Transmission Lining, Piston Rings, Spark Plug Insulators, Rim Wedges, Rim Clamps, Frame and Body Lining, Gaskets, Shims, Power Belting, Rebound Straps, Tire Straps.
4. Following articles coming in same category as (2) under the regulations are to be marked on a tag or string ticket attached thereto: Radiator Laces, Hood Laces.

CANDLES—

Candles, Wax Tapers to be marked on each package or container

CLOCKS AND WATCHES—

Watch Dials and Movements imported attached as one article need be marked on movement only. Watches imported complete must have movement and case each separately marked. Watch Movements O size (one and one-twelfth inches) or smaller when marked 'Swiss Made" or "U. S. A. Made" will comply with regulations but when larger than O size to be marked as, for example "Made in Switzerland" or "Made in U. S. A."

CHALK AND CRAYONS—

Chalk, Billiard Chalk, Crayons to be marked on containers.

CONTAINERS—

If imported to be filled with Canadian produce and exported, admitted without marking.

CHINA AND CROCKERYWARE—

Each separate piece of China or Crockeryware is required to have thereon permanent indication of country of origin except Egg Cups, Boston Egg Cups, Individual Butters, Custards and Cream Soups which should each have thereon an adhesive label containing required indication of country of origin. Cover Dish Covers and Cover Dish Bottoms, Sugar Dishes and Sugar Dish Covers and similar articles made up in two or more pieces to comprise one unit, need mark on one of the pieces. Re Cups and Saucers, mark may be shown on either of the two pieces.

COAL TAR—

Imported in drums or containers need mark on container. If imported in tank cars no mark required.

CUTLERY AND TABLEWARE—

Each artcle of cutlery including following needs to be marked: Knives, Scissors, Shears, Clippers (toilet and horse), Spoons, Forks.

CORKS—

Each package or container to be marked.

ENAMELWARE—

Each piece of Enamelware to have affixed thereto adhesive label bearing mark of country of origin.

FISHERMEN'S SUPPLIES—

Following supplies when admitted to entry free of duty not required to be marked: Lines, Twines, Nets, Ropes.

FURNACES, STOVES AND HEATING APPLIANCES—

Stoves, Fireless Stoves, Furnaces to be marked on each article.

2. Furnaces imported unassembled or in a number of pieces comprising one complete article to have indication of country of origin on name plate or principal part of each complete article.

FURNITURE—

Following may be marked with metal plate securely affixed on front on which country of origin should be placed: Kitchen Cabinets.

2. Following may be marked with tag attached on which mark may appear: Silk Lamp Shades.
3. Following to be marked with indication of country of origin: Safes, Willow Furniture, Store Display Stands, Antique Furniture, Glass and China Lock Furniture, Metal Beds, Wicker Furniture, Wicker Baskets, Rollers for Blinds.
4. Following articles to have marked on each bundle or roll: Blinds, Reeds, Reed Winding, Chair Cane.

GLASSWARE—

1. Each piece of glassware (except as otherwise provided) to have required mark stencilled thereon or on an adhesive label attached.
2. Following glassware required to be marked on each case or container: Plate Glass, Window Glass, Wire Glass, Sheet Glass for Photo Plates, Glass Tubing.

GLUE—

Mark to be placed on each package or container.

JEWELLERY, GOLD AND SILVERPLATED WARE—

1. Following to be marked on each display card on which mounted: Collar Buttons, Cuff Buttons, Good Luck Charms, Necklace Clasps, Rosaries.
2. Following to be marked on each card on which mounted: Card Jewellery.
3. Following to be marked on each article: Plated Ware, Silver Plated Ware, Brushes, Mirrors, Glove Mirrors.
4. Following to have mark on a tag or string ticket attached: Chains, Chains for Scapulars, String Beads, Necklaces.

METALLIC GOODS—

1. When not imported in compliance with regulations excepting articles entered as repairs or for incorporation in completed article in Canada, following articles to bear mark of country of origin: Cabinet Locks, Furniture Locks, Axles, Skeins, Valves, Steel Stamp Dies, Cast Iron and Steel Die Shoes, Cylinder Keys, Cast Iron Strap Hangers, Malleable Iron Pipe, Pipe Fittings.
2. Following articles answering same description as (1) to bear mark on each separate package or container: Eyelets, Glove, Snap or Envelope Fasteners, Ball Bearings, Roller Bearings, Tin Foil, Mineral Wool, Manganese, Carbon Flour, Nails, Screws, Rivets, Bolts, Lock Nuts, Spikes, Thumb Screws, Hooks and Eyes, on cards and in packages, Furniture Castors, Hose Nipples.
3. Following when imported in lengths of 25 feet or more to have metallic tag securely affixed at intervals of not more than 25 feet on which required indication of country of origin should appear. When imported in separate lengths of less than 25 feet to have metallic tag securely affixed to each separate length on which country of origin is to be marked: Chain, Link Belt Chain, Trace and Halter Chain, Driving Chain.
4. Following when under ¾ in. pitch to have plate or washer inserted so as to be securely affixed at intervals of not more than two and a half feet on which required indication of country is to appear; when ¾ in. and greater, to have plate or washer inserted to be securely affixed at intervals of not more than six feet on which name of country is to appear: Silent Chain, Roller and Block Chain.
5. Following articles to be stamped, stencilled or diesunk, name of country: Oil Cans, Can Openers, Pumps, Horse Bits, Hose Couplings, Door Closers, Door Closer Brackets, Door Hinges, Stands for Geographical Globes.
6. Following articles, where capable, to have mark and where incapable of being marked to have required mark on each package or container: Keys, Key Blanks, Art Metal Work.
7. Following when imported for use on bottles, jars or containers intended to be filled with products of Canadian manufacture exempt from marking: Caps, Covers, Lids (metallic), Aluminum Covers for Jars, Tinfoil Disc Lids.
8. Following to have attached to each roll or bundle a tag bearing mark: Fourdrinier Wires, Wire Rope, Wire, Barbed Wire, Wire Netting.
9. Following to have mark on each package or container: Pins on sheets and cubes and in boxes; Stair Nosings, Stair Plates, Oilcloth Binding, Seam Binding, Carpet Rods, Carpet Pins and Fasteners.
10. Following to have mark stamped, stencilled or diesunk on each length or piece thereof: Copper Bars for window frames and sashes; Mouldings for window frames and sashes; Corners for window frames and sashes.

METALLIC GOODS (EXEMPTIONS)—

Following are not required to be marked: Babbit Metal, Pig Iron, Bars, Cold Rolled Strip Steel, Bar Iron, Silver Bullion, Zinc Spelter, Spiegel Iron, Slab Zinc, Bauxite Ore Concentrates, Crucible Steel, Barytes, Pig Lead, Spiegeleisen, Tin Ingots, Copper Ingots, Aluminum Ingots.

MICA—

Following to have mark on each container: Mica Pulp, Mica Dry.

PAINTS AND OILS—

1. Following to be marked on each drum, keg, barrel or container: Enamel, Paints, Oils, Whiting, Zinc Oxide, Lithargo.
2. Oil imported in tank cars is not required to be marked.

ROPE, TWINE AND CORDAGE—

Following imported in coils, balls, rolls or lengths to have mark on coil, spool or wrapper on each, or on a tag securely attached: Manila Rope, Hemp, Tension Cord for envelope fasteners.

SPORTING GOODS—

1. Following to be stamped, stencilled or otherwise permanently marked: Golf Balls, Tennis Balls, Fire Arms, Cartridges for shot guns, Fishing Rods, Reels for fishing rods.
2. Following to be marked on each wrapper, package or container: Rifle and Revolver Cartridges, Trolls and Spoon Bait.

TINWARE—

Each article of tinware to have required mark stamped, stencilled or diesunk thereon.

TOOLS—

1. Following to have mark stamped, stencilled or diesunk thereon or placed by means of decalcomania transfer: Curry Combs, Hardened Steel Tools, Files and Rasps, Nail Pullers, Screw Drivers, Hammers, Horse Clippers, Saws, Saw Blades (see section 2), Threading Dies, Twist Drills, Wrenches.
2. Following to have mark on each package or container: Hack Saw Blades, Coping Saw Blades

TOYS, NOVELTIES, GAMES—

1. Following to have mark stencilled, stamped or marked thereon: Rubber Balls, Play Balls, Celluloid Balls, Dolls Undressed, Toys, capable of marking, Toy Books, Rattles, Wheel Toys, Balloons, Chess and Checker Boards.
2. Following to bear mark on package, box or container: Games, Chessmen and Checkers.
3. Following when mounted on cards to have mark on each card and when imported unmounted to be marked on each package or container: Woven, Embroidered, Painted or Printed Cloth or Fabric Bookmarks.

WALL BOARD—

Each bundle or package of wallboard to have mark of country of origin.

WALL PAPER—

Each roll of wall paper to have thereon required mark of country of origin.

WEIGHTS AND MEASURES—

1. Following to have required mark: Measures (of quantity), Scales.
2. Following to have mark on each package or container: Weights for scales.

WHEEL GOODS (Not including Autos, Trucks, Tractors, etc.)

Following to have required mark stamped, stencilled or otherwise permanently marked: Children's Vehicles, Wheelbarrows, Road Scrapers, Drag Scrapers, Warehouse Hand Trucks.

WOOD PRODUCTS—

1. Following to have required mark thereon: Butter Plates, Doors, Wooden Paper Knives, Pumps, Willow Baskets, Window Sash.
2. Following to bear mark on an adhesive label: Handles of all kinds.
3. Following are exempted: Cedar Posts, Club Turned Spokes, Rough Lumber, Dressed Lumber, Telephone Poles, Railway Ties, Flooring, Veneers.

Applying The Moral

A STRONG moral can be drawn by retail hardware merchants from the first article appearing in this issue, in which a close up view of conditions among ten units engaged in a similar line of business is outlined. There are reasons why three of these units are actively engaged in production today working on low priced raw material at a profit, while the other seven are sitting back with warehouses filled with high priced stock and industrial activity at a standstill, and these reasons apply equally well to the retail hardware trade.

That there are groups of retail hardware merchants who imagine they are deriving the most benefit from maintaining prices in the face of declines made by manufacturers and wholesalers, was proved to Hardware and Metal by a recent visit to various centres in Ontario. This plan is successful in these centres only because every local merchant is a party to it, but in one of the largest of such centres Hardware and Metal discovered that the number of mail order catalogs coming into that district was on the increase. The merchant must remember that the competition of other local stores is not the only form of competition which he must watch. People in all districts whether rural or urban are becoming closer readers of magazines and newspapers and they keep closely in touch with styles and price tendencies. Hence if the mail order catalog caters more to their taste for style than does the local store, or if the mail order price is lower than that of the local store, there is great danger of the business going afield.

Apart from the necessity of basing prices on replacement values and passing on any price advantage to the buyer, it is shown in the article in question how certain firms combine more aggressive methods with lower prices and they are thus retaining a very fair volume of trade. An application to the retail business of the various principles outlined in this article should be helpful in guiding the merchant along the path which will prove the shortest cut to improved business conditions.

An Economic Help

AS THE conference on disarmament at Washington proceeds and it becomes increasingly evident that the tremendous annual expenditure on naval construction and maintenance is to be curtailed, many reports are in circulation concerning the probable effect on various lines of industry and much ignorance is displayed concerning the effect of this curtailment of construction upon the steel industry. Many have read the staggering figures of expenditures on war craft and they wrongly judge that much of this money is spent on steel. A battleship costing tens of millions of dollars is an extremely refined piece of mechanism comparable to a watch rather than to a steel building. It bears no comparison to a passenger liner, much less with a steel freighter. A prominent steel authority has stated that the warship is to a freighter what a light and refined limousine with a 3,000 r.p.m. motor is to a steel freight car, the limousine containing a fraction of a ton of steel with much non-ferrous metal and costing two or three times as much as the freight car containing 20 tons of steel.

It is evident from this and other facts outlined in regard to this question by Hardware and Metal that the effect upon the steel industry of the naval holiday will not be disadvantageous, and that the consequent improvement in the world's economic position due to the turning of this capital into more productive fields, will be considerable.

Much the same situation confronts the nickel industry of Canada. This metal is used considerably in the building of warships and operations at the Canadian mills are temporarily at a standstill, there being a considerable surplus on hand. This situation is not wholly the result of the disarmament plans however, and it is expected that with the contemplated development of commercial uses for nickel that gradual improvement will be noted. Here, too, improvement in general conditions as result of limitation of armament expenditures will be a direct help in subsequently broadening existing channels of usefulness and in opening up new opportunities for its employment.

The Marking of Imports

THE DATE for the enforcement of the Canadian Customs regulations governing the marking of country of origin on imports, namely January 1, 1922, is drawing near, and recent alterations indicate that the Government is taking action to render the provisions less onerous rather than to further postpone them as many business men have expected. While the marking regulations have come in for considerable abuse, this has been directed more at the severity of certain regulations rather than at the principle of having marks on all imports in order that the Canadian buyer may identify the country of origin on his purchases of imports. As a matter of fact the Canadian law is very similar to the general marking act of the United States which has been in effect for many years. Such Acts are also enforced by other countries and must be observed by Canadian exporters. In principle the legislation has some advantages but there are still many provisions which will cause hardship.

Careful note should be taken of the revised regulations as outlined in this issue. It will be noted that goods ordered prior to October 1, 1921, and imported prior to July 1, 1922, will not be penalized to the extent of the 10 per cent. ad valorem duty if not marked according to the regulations, but such goods will not be released from Customs until they have been marked as required. It is quite evident that importers would be unable to mark many of these imports in as permanent a way as would be done in process of manufacture, and it is likely that the regulations will not be severely enforced on imports until manufacturers have had an opportunity to establish the proper facilities for marking their product according to the regulations. A study of the various provisions, as specifically applied to various items of hardware, is interesting to the trade and will be helpful to manufacturers so affected. These will be found in detail elsewhere in this issue.

While it appears that the marking regulation is to be enforced on the date set, it is possible that events following the general election may be such as to make some radical changes regarding this regulation.

Christmas Window Contest

EIGHT PRIZES are offered by **Hardware and Metal** for the best window displays of Christmas lines, as arranged for this year's trade by hardware merchants or their retail salesmen.

The contest is open to anyone engaged in the retail hardware business in Canada and the displays will be given a fair and authoritative judgment.

The essential point to keep in mind is that the display will be judged on its effectiveness as a business puller. Many points outlined in past contests of Hardware and Metal as to most effective window trims, should be kept in mind in arranging the contest display. Attractiveness without effectiveness is of little use in a window trim.

Arrange a window which will, literally, draw the passers-by right into your store, then send a photo of it to be entered in the contest.

THE EIGHT CASH PRIZES

Places under 5,000		Places 5,000 and Over	
First prize	$10.00	First prize	$10.00
Second prize	5.00	Second prize	5.00
Third prize	3.00	Third prize	3.00
Fourth prize	2.00	Fourth prize	2.00

Dealers in small communities have just as much chance under this arrangement as those in larger districts. Getting selling ideas into the display is what counts.

The contest closes on Monday, January 2. Photos placed in the mail after that date will not be entered.

All matter must be addressed to The Editor, Hardware and Metal, 143 University Avenue, Toronto, and marked "For Christmas Window Contest."

Don't overlook the prizes and the honor of winning one

Events in the Trade

BUSINESS CHANGES

Eganville, Ont.—J. S. Campbell, hardware merchant, is retiring from business.

Grimsby, Ont.—D. L. Baldwin, hardware, has been succeeded by J. F. Richardson & Son.

OPENING NEW STORE

Toronto.—Matthewson Hardware, Ltd., will shortly open a new store at 688 Danforth Avenue.

PERSONAL

A. E. Dyment, president of the Canadian General Electric Company, has been elected president of the Marconi Wireless Telegraph Company of Canada, in succession to the late Senator Frederic Nicholls.

George Ingram of Welland, Ont., is now connected with W. Walker & Son, Co., Toronto, calling on the retail hardware trade in Ontario.

Orland Hemstreet who recently returned from the West has resumed his position in the hardware store of E. Miller, Aylmer, Ont.

W. H. Heard, president of the Spramotor Company, London, Ont., who some time ago acquired property at Port Bruce, Ont. contemplates erecting a modern three storey summer hotel there.

At the annual meeting of the Seaforth Curling Club, G. A. Sills. hardware merchant, Seaforth, Ont., was elected one of the representatives to the Ontario Curling Association.

J. C. Kayser of Simcoe, Ont was awarded second prize in the recent Canadian Edison contest.

Mahlon Ruby of New Hamburg has taken a position with J. Reid, Milverton, Ont.

J. H. Webber, the Toronto office The Steel Co., of Caanda, Ltd.. has been absent from the office for the past two or three weeks through sickness.

OBITUARY

Robert McLaughlin, founder of the McLaughlin Carriage Co., Oshawa, Ont., and known in Canada for his connection with the making of motor cars, died at his home in Oshawa, in his 86th year. His death was not unexpected, as he had been seriously ill for some days, taking sick on Armistice Day.

OBITUARY

Sympathy is extended to G. V. White, The Sumner Co., Ltd., Moncton, N. B., on the death of his mother, Mrs. Hiram B. White.

NEW B.C. REPRESENTATIVE OF BUTTERFIELD & CO.

Vancouver, B.C.—Gormans Ltd., Dominion Building has been appointed representative for British Columbia of Butterfield & Co., Rock Island, Que.

EASTERN CANADA DISTRIBUTOR OF TOOLS

Alex. Gibb, manufacturers' agent, has been appointed Eastern Canada distributor for mechanics' tools manufactured by Canadian Tools Limited, Bridgeburg, Ontario.

LOWER FREIGHT RATES TO BE CONSIDERED

Ottawa—It is probable that the question of a reduction of freight rates on Canadian railways will shortly be taken under consideration by the Dominion Board of Railway Commissioners. An immediate reduction of 10 per cent. has been ordered on United States railways by the executives of the roads. The reduction applies to car-load lots of farm produce, and is for a period of six months.

ELECTRICAL INDUSTRY FOR BROCKVILLE

KINGSTON,Ont.—The acquisition of an industry of such proportions that three years must pass before the plant is entirely equipped and removed from its present place of business to Brockville, is announced by the advisory industrial committee of the Board of Trade at Brockville.

The company is the Eugene Phillips Electrical Works, now of Montreal, manufacturers of copper electric wires and cables of all kinds. The project in a nutshell is that the plant will cost between two and a half and three million dollars, will give employment to between five and six hundred hands, with an annual pay roll between five and six hundred thousand dollars, the building to occupy fifteen acres of floor space and construction work to start within four months after the passing of the by-law.

ANOTHER BIG ORDER FOR STEEL CORPORATION

Sydney, N.S.—Additional rail orders, aggregating 21,000 tons, have been promised to the Sydney mills of the British Empire Steel Corporation by Government railway authorities, according to Mayor Fitzgerald, who has returned from Ottawa.

SAYS CANADA HAS MORE BICYCLES FOR POPULATION THAN U. S.

The eighth annual bicycle and motor cycle show and dealers' convention has just closed in Chicago, and from all indications it was the most successful convention ever held. The whole week throngs went to the Coliseum to see the wonderful display of bicycles, motor cycles and accessories. There were 275 exhibits and all the manufacturers, jobbers and dealers were most optimistic for 1922 business outlook. The exhibitors report the best business ever booked at any previous show.

Hundreds of dealers were there. A large delegation from Canada made themselves known as live dealers and taking part in all discussions and other activities.

Reports were shown that there was invested in the United States and Canada over $100,000,000 in the bicycle industry, and Canada had more bicycles than the United States in proportion to population. Over a half million dollars is to be spent in printers' ink during the coming year by the bicycle manufacturers, and all the dealers present pledged themselves to go after business on a larger scale than ever before.

Tennant Lee, of Los Angeles, Cal., was elected president of the National Cycle Dealers' Association; G. A. Wenige, of London, Ont., was elected vice-president.

MUCH HUNTING IN MARITIMES

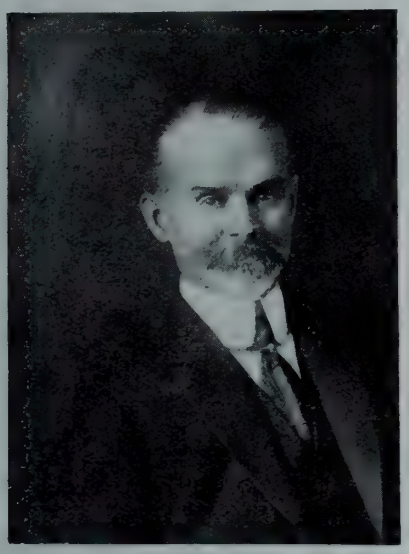
Fredericton, N.B.—The present season for big game hunting in New Brunswick is reported to be the best ever experienced judging by the receipts paid into the provincial treasury from license fees by hunters. A great influx of non-resident hunters is the cause of the record total. Col. T. G. Loggie, deputy Minister of Lands and Mines said that the receipts from the sale of game licenses had totalled $56,000. The increase was about $7,000 over the total of the preceding year.

Death Of Sir Frederick Orr-Lewis Bart.

President of Lewis Bros. Wholesale Hardware, Montreal, and Prominent Among Financial, Shipbuilding, Transportation, Industrial and Other Interests, Dies at His Winter Home in France.

THE recent death of Sir Frederick Orr-Lewis, Bart, at his winter residence in Cannes, south of France, removes one who for some years has been an outstanding figure in connection with Canadian business activity, being identified with financial, shipbuilding, transportation, hardware and other industrial interests.

Although in failing health for some months, he continued an active part in his varied business interests. He was in Montreal this summer, leaving in July to proceed to his Riviera villa, where, on arrival, his health commenced to fail.



LATE SIR FREDERICK ORR-LEWIS BART.

Sir Frederick had always been an extremely hard worker, fourteen to eighteen hours at business not being unusual in the early days when he was building his wholesale hardware business. Unfortunately he neglected, as so many successful men do, to balance the terrific strain of his office work with some physical training. Even then he was in fairly good condition until his experience on the Lusitania when she was torpedoed by the Germans. He was alone and had ample time to escape in safety himself, but he turned his attention to saving others. He did not get into a boat but as the ship was sinking he took Sir Montague Allan's two daughters, one in each hand. He was many hours in the water before being rescued and as result of the exposure he never fully recovered. In fact he is just another war victim.

Born in Hamilton, Ont., in 1861, Sir Frederick here received his early education, embarking in the hardware business with J. Mucck'eston & Co., Kingston. In 1887 he established Lewis Bros., with James Graham Lewis, at present vice-president, as partner, and Sir Frederick remained closely associated with the firm as president.

In 1907 he founded Canadian Vickers, shipbuilders, of which he was president, being also associated with the parent firm of Vickers in England. He was also a director of the Merchants Bank of Canada, Bankers' Trust Co., Montreal Cotton Co., Canada Steamship Lines and other corporations.

In January, 1920, he was honored with a baronetcy, in recognition of special war services more especially in connection with shipbuilding.

Sir Frederick Orr-Lewis was married in 1896 to Maude Helen Booth, daughter of William Booth, London, Ont., who survives him. He leaves one son, Duncan, and two daughters, Miss Helen and Miss Mary Graham. There are four surviving brothers: J. G. Lewis, T. G. Lewis, H. L. Lewis, and W. J. Lewis, also four sisters: Miss Agnes, Miss Adelaide, Miss Mabel and Mrs. J. J. Zealand.

Dominion R.M.A. Celebrates Anniversary

Toronto Retail Merchants Mark 25th Anniversary of Organization of Retail Merchants' Association of Canada With Banquet—Presentation Made to Secretary E. M. Trowern

ABOUT two hundred retail merchants of the newly organized Toronto Retail Merchants' Association, embracing all sections of the retail trade in the city, gathered in Bingham's Rainbow Room, to fittingly celebrate the twenty-fifth anniversary of the foundation of the Retail Merchants' Association in Canada, and to pay a tribute of praise and congratulation to the veteran Dominion secretary E. M. Trowern. It was emphasized by practically all the speakers on this occasion that it is largely due to Mr. Trowern's energy, enterprise and whole hearted devotion to the cause of the retailer, that the association has expanded, as it has done.

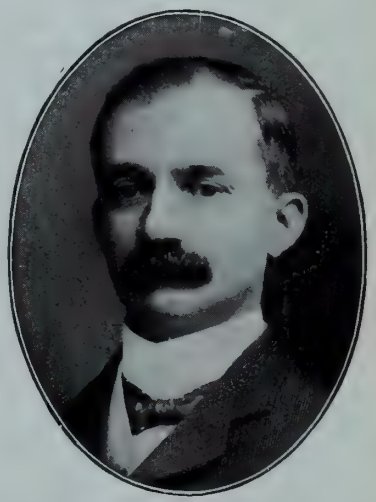
Presented With Cane

In proposing the toast to the honored guest of the evening, B. W. Zieman, president of the Ontario association, took the opportunity of presenting to Mr. Trowern a handsome gold headed cane, with a beautiful bouquet of roses for Mrs. Trowern. The presentation, Mr. Zieman hoped, would serve to remind the Dominion Secretary of the fact that there were some merchants who appreciate what he had done in their interests.

D. W. Clark Presides

D. W. Clark, prominent in the activities of the Retail Merchants' Association for many years, presided, and among the guests present, who were members of the association when it was first organized twenty-five years ago, were Edward Potts, Huntsville, Ont., F. C. Higgins, Toronto, J. E. Jupp, Toronto. Thos. Bertram, Toronto, B. W. Zieman, Carleton Place, and Donald McLean, Toronto.

In opening the proceedings, Mr. Clark referred to some of the activities of the association covering a wide period of years, and he expressed the hope that the time was not far distant when the merchants' association would be represented in the parliament of the country, just as strong as other organizations that are now seeking even greater representation. With active Provincial secretaries in every Province guarding and guiding the best interests of the retailer in every branch of trade, a work was being carried on, that could not be under estimated.



E. M. TROWERN

Dominion Secretary R.M.A. who was honored on the occasion of the 25th Anniversary of the organization.

An Absolute Necessity

At this point in the proceedings the chairman called on Henry Watters, Dominion treasurer who spoke as follows:

"We have had many difficulties and enemies all along the years, but Mr. Trowern possesses those qualities, which

(Continued on Page 60)

War Stocks Of Shovels Again Offered

Recent Reductions on Shovels, Spades and Scoops by Canadian Manufacturers Partially Attributed to Offerings of Foreign War Stocks —Applies Chiefly to Lower Grades.

AS indicated in previous reports appearing in other issues of Hardware & Metal, some shipments of goods continue to appear on Canadian markets which, it is claimed, have their origin in sales by foreign government War Stocks Disposal Boards. Products such as shovels are particularly prominent in this respect, and although some time has elapsed since the initial appearance of such war disposal stocks in Canada, yet it is reported that they are again being offered.

Recent reductions in the quotations on shovels, spades and scoops, by Canadian manufacturers, have been primarily attributed to this cause. In order to meet this class of competition, distributors of shovels were practically forced to lower prices, and guaranteed the prevailing levels against further decline until the end of May, 1922.

It is claimed that many wholesalers and retailers, especially where buyers have had knowledge of these matters, have refused to handle such goods. One wholesaler, in discussing this situation with Hardware & Metal, pointed out that for the most part this condition only applied to inferior grades of shovels, and high-class products were only affected insofar as the wide divergence in range of price was accentuated thereby.

On the other hand, the opinion was expressed that such stocks are liable to re-appear here and there, from time to time, until the surplus represented in this manner has become absorbed through the ordinary channels of consumption. How long this will take primarily depends upon the extent of the quantities available, and the manner in which they were generally received by the trade.

SALE OF AUTO TIRES

(Continued from Page 36)

present element of price. The current recession brings values so low that manufacturers claim they cannot afford to give the jobbers a discount that would provide them with a living rate of earning. The new price levels do not allow manufacturers to quote prices to jobbers, without entailing direct losses. For these reasons, it was stated, distributors had been forced to discontinue marketing through the jobbing sources, but some manufacturers may not decide to do this, and the opinion was expressed that it was purely a personal business matter with each concern. Some tire makers may decide to continue handling their products through the wholesalers' connections rather than increase their handling costs and distributing charges to the extent which individual representatives and sales agencies would entail.

Asked as to whether the rumor that tire manufacturers were seriously considering the elimination of the retail hardware merchants as a medium of selling tires, this official stated that such a course would be "foolishness." The history of the cycle industry was quoted as a paradox wherein many distributing sources were originally listed. This variety had now been reduced to specialized cycle stores, and the retail hardware merchants; which were considered as the legitimate methods now available in this trade. Future developments as regards handling auto tires are likely to follow this trend. The garages will always handle tires, to a greater or less extent--according to this authority—but it was pointed out that the chief usefulness of the hardware merchant came in where many garages were frequently closed down for various reasons. Others again, only remained open during the best season, and motorists generally could always depend upon getting service all the year round through the hardware trade. This point was considered as an important feature, and it was thought that no decision would be made without taking it into full consideration.

PRACTICAL HARDWARE GIFTS

(Continued from Page 37)

pays well to set out before shoppers, medium priced, useful articles that will make acceptable gifts. There is a greater demand than ever for really useful things. If they are attractive so much the better. People are getting away from the idea of buying what might well be termed 'junk' for Christmas. They are really interested in something that can be used, especially in their homes. We are looking forward to a splendid Christmas trade and the buying has already commenced."

In connection with the Cowan display it might be mentioned that the firm follows out its usual policy of backing its window display by a short but snappy double column advertisement, in which illustrations of many lines are shown and prices featured in large figures.

Winter Lines Shown

The window display at the J. R. Steele hardware consists of winter necessities, especially for whoever has to look after the furnace or stove. Ash sifters, coal shovels, snow shovels, oil heaters and ash pails have been placed in the window and so arranged with show cards and price cards that they carry a real interest for the householder.

"We have been doing a most satisfactory trade," said Mr. Steele. "Our turnover has been very steady and I am looking for it to continue so. We are looking for a splendid Christmas trade and early shoppers are already out making purchases. We find an especially good demand and enquiry for articles that are serviceable and can be used in the home. Take such lines for instance as trays, plated ware, cutlery and brass goods. These look well, wear well and are reasonably priced. They make satisfactory gifts in every way and by feafactory gifts in every way and by readisplays we turn over a great many."

TREMENDOUS INFLUENCE

(Continued from Page 38)

about a satisfactory readjustment of the business conditions of this country."

We publish Lieutenant-Governor Col. Hery Cockshutt's talk verbatim because it reflects what our journal stands for. We are always adding one more link to our chain of service, and the convention which has just closed was really a gathering of the force to discuss ways and means of improving and adding to our present policy, so that our readers could be offered only authentic and valuable material.

WANT RETAILERS ON RAILWAY BOARD

Ottawa.—While the Dominion Board, Retail Merchants' Association of Canada, has no personal objection to Calvin Lawrence, the newly appointed member of the Dominion Railway Board, representing labor, its members feel that the retail merchants, who pay the bulk of freight in Canada, have as much right to representation on the board as the labor unions. E. M. Trowern, Dominion secretary of the association, voiced this opinion in an interview with Hardware and Metal.

"We have no objection to the Government appointing suitable men to the Dominion Railway Board, but if it is the policy of the Government to appoint to these boards, men from different organized groups, then we want the Government to follow up this system by appointing men from all the various organized classes. Mr. Lawrence is appointed to this position as a representative of organized labor.

"Iu our opinion the Government has no more right to appoint a labor representative to these boards than it has a farmer representative, a retail merchant representative or a manufacturer representative.

"The Retail Merchants' Association is opposed to class legislation and class representation. But if the system is to be followed, then it wants a retail merchant representative also on the board."

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

DEVELOPMENTS on the current hardware markets continue to offer refreshing interest of vital importance week by week. Price reductions on automobile tires varying in extent from 10 to 20 per cent. on the different types have now materialized. This change was predicted in a recent issue of Hardware and Metal and illustrates the trend of developments in the auto tire industry.

Changes to lower price levels now appear on many lines of Disston saws, such as hand, rip, panel, butcher, compass and tenon. Reductions are also given on several makes of wrenches, including agricultural wrenches, knife-handle and double "S" makes. Through revised discounts the standard steam cocks register a decline, while the lower prices on building papers and sheathings, referred to in last week's reports, have now become general.

Soil pipe and fittings continue to attract direct interest with some lower revisions given on certain sizes of pipe in the eastern markets, while other domestic quotations remain unchanged, with conditions showing signs of unsettlement. Other price reductions cover mops and mop sticks, including self-wringing and crank styles; and additional concessions have been announced by some manufacturers on electric irons, toasters and heaters. Another new list on shoefinders' tacks gives varying reductions on brass wire rivets, heel nails, hob and Hungarian nails, channel nails and shoe tacks. Blued knob screws are now quoted at 40 cents per gross, while western markets register price declines on awning pulleys and lace leather.

Shading of nominal prices on Canada plates has appeared in some quarters. The sheet markets generally are described as lacking the "snap" which was evident during the October activity. The nominal list prices on range boilers again appear to be in danger, from anxiety to reduce stocks. Some signs of interest are seen recently in non-ferrous scrap materials, while copper and tin remain the only active metals in ingot markets. Ice skates, washing machines, flashlights and batteries, ash sifters, ammunition, electric heaters and weather strip are seasonal lines registering improved activity.

MONTREAL MARKETS

MONTREAL, November 24.—Lower prices on saws and wrenches offer an attraction in the hardware markets this week. The Disston line of saws record a varying reduction on the separate kinds. Agricultural wrenches are now quoted at less 47½ per cent., while Coe's knife handles are less 12½ per cent., W. & B. less 27½ per cent. The double head "S" wrenches also have new lower net prices. Blued knob screws are now quoted at 40 cents per gross.

In the heavier goods, soil pipe and fittings again feature, the discount on 2, 3, 5, and 6 pipe being revised from 45 to 47½ per cent. Sheets and bar iron are holding unchanged since the recent revision, with the undertone of the steel industry continuing with an easier tone, and the demand showing a seasonable dullness. Building papers and roofings are also holding in price, but a price development would not be surprising towards the beginning of next month, especially on rubber roofing.

Ingot metals are generally improved, with some of the metals recording a firmer tone accompanied by slightly increased prices. Jobbing circles report activity in holiday lines, although the heavier staple commodities are now showing the usual dullness with the approach of the close of the year.

FURTHER REVISION IN SOIL PIPE

Montreal.

Quotations on the 2, 3, 5 and 6 inch soil pipe are recorded with a further decline this week in changing the discount from 45 per cent. to 47½ per cent. off list prices. This further revision can hardly be stated as resulting from any easier tendency in the primary factors, but is given by sources who claim these sizes should be brought slightly lower in price to correspond with other sizes and fittings. The 4 inch pipe and all sized fittings remain unchanged.

As in the case of other supplies for the plumber, these commodities are rather unsettled on the local market, and some quarters are maintaining the discount quoted last week, namely 45 off. Following are discounts on both pipe and fittings;

SOIL PIPE—	
2 and 3 inch	47½%
4 inch	50%
5 and 6 inch	47½%
Fittings—	
2 to 6 inch	50-10%

DISSTON SAWS ARE REDUCED

Montreal

A general revision is announced in the Henry Disston line of saws, with a reduction in all lines, varying on the different kinds. Hand, rip and panel saws show a decline of approximately 5 per cent., tenon or back, 10 per cent., from 5 to 10 per cent. on compass saws, and 5 per cent. on the butcher saws.

AGRICULTURAL WRENCHES NOW 47½ OFF

Montreal.

New lower prices are announced on agricultural wrenches, and these are now quoted at less 47½ per cent.

ROPE NOW BEING BOOKED

Montreal.

Bookings for spring requirements of rope are now being taken, and are reported as fair in most sections, but while ahead of last year, are not as

(Continued on page 50)

If interested tear out this page and place with letters to be answered.

If interested tear out this page and place with letters to be answered.

MONTREAL MARKETS

(Continued from page 47)

heavy as seasons previous. This year has been comparatively dull all through for the rope and cordage industry, dealers delaying purchases more so perhaps than in other commodities. The trend of the market was clearly demonstrated by the appearance of reductions periodically all through the year, this no doubt offering no inducement for buyers to purchase for future.

The undertone of the different ropes and cordage is now stated to be much improved, and the absence of any change in quotations in recent months would seem to substantiate this. Manilla is on a steady to firm basis, while neither jute nor hemp show any signs of weakness. Cotton rope is held at advanced prices given some time ago, and while the strength of the cotton market prevailing at that time is not in evidence at present, there is no indication of an easier tendency. With stocks decidedly low throughout the country, manufacturers and jobbers look for an increased volume of business, with booking prices at: pure manilla 23 cents base; Beaver or New Zealand 19 cents; sisal 17 cents.

KNIFE HANDLED WRENCHES ALSO REDUCED

Montreal

A reduction is also made in the knife handled wrenches. Coe's will now sell at less 12½ per cent., W. & B. less 27½ per cent.

NEW LOWER PRICES ON DOUBLE HEAD "S" WRENCHES

Montreal

A decline in the prices of the double head "S" wrenches is given, with new quotations on the various sizes as follows;

DOUBLE HEAD "S" WRENCHES—

	Unfinished	Finished
⅜ x 7/16, per doz.	1 55	3 40
½ x 9/16, per doz.	2 80	4 40
¾ x 13/16, per doz.	4 25	8 00
⅞ x 1 ,per doz.	6 00	11 00
1 x 1⅛, per doz.	7 50	13 00
1 13/16 x 1¼, per doz.	9 40	17 20

SHEET PRICES REMAIN UNCHANGED

Montreal.

Sheet quotations are generally unchanged this week, although prices are considered more or less nominal and further price concessions are offered in some quarters for fair sized orders. These are by no means plentiful at present as the spurt in demand, noticeable last month, has now subsided to quite an extent. Distributors claim that lower prices are offered in the hope of obtaining business but little buying is being done either in large orders or small sorting demands. Little improvement is now looked for until after the close of the year, and although the tone of the market would seem to be easier, any price developments will in all probability be of a minor nature.

Mill prices are also being watched with interest, but here too reductions to any extent are not thought likely for some time, not until labor and delivery costs are adjusted to warrant such. Following are present quotations:

BLACK SHEETS

CORRUGATED SHEETS REMAIN AT DECLINE

Montreal.

No further change is recorded in corrugated sheets since the revision to lower levels last week. There is still the easier tone in the plain galvanized sheets, but it is probable that some time will again elapse before this will again reflect on the corrugated sheets. The buying movement is slower, with the season now advanced when weather permits little ouside building. Following are list prices and discount

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00

No. 18 gauge	16 50

Less 7½ per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

IRON AND STEEL PRICES HOLD

Montreal.

The easier tone of the iron and steel industry, due to lack of demand, has not reflected further on the local market since the reduction of two weeks ago. Although business is seasonably dull, this fact is not expected to cause a further slump of any marked nature. It is generally recognized that price is not a factor and lower quotations now would only complicate matters when more activity is shown later on. Little improvement is looked for until the first of the year, and if productive costs are then considered, the trend should be of an upward nature with the increased buying movement. Labor and transportation costs will no doubt figure prominently at that time, but until an adjustment is made along these lines little change is looked for in prices of the many products. Present quotations are as follows:

Common bar iron, 100 lbs.	2 90
Refined iron	4 40
Irish finish machinery steel	2 95
Mild steel	2 90
Single reeled machinery steel	4 75
Band steel	2 90
Spring steel	4 50
Slighshoe steel	2 90
Tire steel	3 10
Toe calk steel	3 80
Harrow tooth steel, per lb.	3 05
Mining tool steel per lb.	0 22
Black Diamond tool and cast steel, per lb.	0 22

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

LEAD AND ZINC PRODUCTS AGAIN FIRMER

Montreal.

Prices on lead and zinc products are being maintained at previous levels with the undertone of the market again showing improvement. Tin, and lead on the primary markets register advances this week, while spelter holds in price. The condition of these metals would tend to strengthen the tone, and there seems a possibility of increased prices in the finished products in the near future. The general opinion has been for some time, that while these products were continuing unchanged, any noticeable improvement would directly reflect on the market. However, for the present, following are existing quotations;

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3* lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½

Cut sheets ¼c lb. extra, and cut sheets to size, ¾c lb. extra.

Solder, guaranteed, lb.	0 25½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 20½
Do., wiping, lb.	0 21½
Do., wire, lb.	0 35
Zinc sheets, casks	0 11½
Do., broken lots	0 12

EASIER TONE IN ROOFING AND PAPERS

Montreal.

Prices on building papers, sheathings and felts remain at the revised quotations of last week. It was noticeable that Montreal recorded the only change at that time, and in this connection manufacturers state that a corresponding decline was not intended in other sections for the present, but owing to an unsettled feeling a general lowering was made this week. Notwithstanding the recent marked declines in the prices of these lines, the market does not yet

appear on a steady basis, and although raw materials and other productive costs hardly warrant a further decline, the feeling is still rather unsettled.

With the approach of the first of next month, when bookings for next year are taken, interest is now shown in ready roofings. Although no definite information relative to a change of prices in either direction can be obtained, it is thought by some who are well informed that a revision is altogether likely in the near future. Rags, which constitute one of the chief ingredients in the manufacture, are still at unchanged prices and are inclined to show a shortage in some quarters. This would tend to offset any chance of a revision to lower levels, but in the meantime interest is attached to the outcome that is altogether probable within the next few weeks.

KNOB SCREWS 40 CENTS GROSS

Montreal.

Blued knob screws will now sell for less, the new price being 40 cents per gross.

COPPER GOODS ARE STRONGER IN TONE

The tone of the copper market is again stronger, an advance in this metal in the primary stage being announced. Rods, sheets and tubing are held unchanged locally, although an advance of one-half cent per pound is made in mill prices. This is hardly sufficient to reflect an increase here, but with the present tone continuing, a slight revision will in all probability be made. Following are present prices;

	Base
BRASS—	
Sheets, base	0 25
Rods, ½ to 1 inch, base	0 23
Tubing, seamless	0 32
COPPER—	
Rods, ½ to 2 inch	0 30
Soft sheets, plain, 16 oz. and heavier	0 32
Plain tinned, 16 oz. and heavier	0 38
Polished and tinned, 16 oz. and hvr.	0 43
Tubing	0 34

FIRMER TONE IN INGOT METALS

Montreal

The ingot metal markets have been somewhat firmer this week, although it is doubtful if the volume of business is much larger. It is only to be expected that a quiet time would soon be in evidence as there is a natural desire to keep stocks as low as possible until after the turn of the year.

TIN—This metal is firmer in London, and while the advance is not rapid, the trend is gradually upward. While statistics would tend to keep prices at around to-day's levels, these are not always reliable in the case of tin which frequently acts in an opposite direction. Local price is firm at 36 cents.

COPPER—Copper is decidedly firm in New York but London does not respond and the situation there is more or less uncertain. If Germany is able to straighten out her finances, exports will continue and prices be maintained. Otherwise a re-action may be seen on this side. Quotations are firm at 17¾c for electro, 17½ for casting.

LEAD—London continues to advance despite more plentiful supplies, and has now reached the highest point since last spring. The American market presents no new features and there is no indication of any change there. As the local market is based on London, prices are firmer especially as the last direct boats have arrived and winter freight rates are in force. Local market is quoted at 7 cents.

SPELTER—This is slightly easier in both London and East St. Louis. The American market is influenced by the impending decline in freight rates, effective next month. Buyers are therefore deferring placing their orders for the present. Price is unchanged at 7¾ cents.

ANTIMONY—The market for antimony is dull with little demand, and no change in price. Chinese is quoted at 7 cents, high grade English 8 cents.

ALUMINUM—Aluminum is holding dull and unchanged, with quotations at 27 cents.

RANGE BOILER IMPROVEMENT PROVES GRADUAL

Montreal

The standard list prices on range boilers is apparently considered too high by some distributors, or else the anxiety to bring stocks to a minimum, regardless of prices, is foremost in their minds. Although the market was thought to have settled at standard prices, quotations considerably lower have again appeared. The 30 gallon boiler seems to have a more general price of $8.75, with even a lower quotation given in isolated cases. Whether total exhaustion of present stocks will furnish the remedy for the unsettled conditions is difficult to determine, but hardly seems likely as this condition has prevailed for some time and stocks in the meantime have been replenished.

TORONTO MARKETS

TORONTO, November 24—This week's hardware market developments show the lower prices now generally effective on building papers and sheathings; with an easier tone also noted on roofings. As outlined in a previous issue of Hardware and Metal, automobile tire manufacturers have now reduced prices, the extent of the decline being approximately 20 per cent. on cord tires and 10 per cent. on fabric makes. Numerous other changes also attract attention. Many lines of Disston saws record price concessions and other price changes to a lower level are given on standard steam cocks, mops and mop sticks, including self-wringing and crank styles, agricultural wrenches, electric irons, toasters and heaters, while another new list on shoefinders' tacks has been issued, showing varying reductions on brass wire rivets, heel or shoe nails, hob and hungarian nails, channel nails and shoe tacks.

Unsettled conditions are now evident in soil pipe and fittings, this situation having developed chiefly through the fact that discount revisions giving lower quotations have appeared on eastern markets. Local prices are at present holding unchanged, but these conditions are attracting keen attention in domestic circles generally.

The shading of nominal prices on Canada plates has been noted in some quarters. The sheet markets now lack the "snap" which was evident during the October activity. The nominal list of range boiler prices is reported to again be in danger. Some semblance of interest is now seen in non-ferrous scrap materials, while copper and tin are the only active metals in ingot markets.

ANOTHER REDUCTION ON ELECTRIC IRONS, TOASTERS, AND HEATERS

Toronto.

Additional price changes have now been announced by some manufacturers, on various electric products, such as irons, toasters, toaster stoves and some lines of heaters. The extent of the decline differs on each class of product, being around 7 or 8 per cent. on some goods, and showing a more marked revision on others. As an example, the Model B electric iron is now priced at $6.50, while the quotation on the Classic iron is now $7.00. Both these levels are subject to the minimum discount of 25 per cent., with a variation up to 33 per cent., according to quantity. The price on the Heatray heater is $12.00, while the Glower is quoted at $10.00. The range of discounts applying are unchanged, and remain similar to the electric iron figures.

EXPECT SEASONAL WINTER TRADE IN BOILER TUBES

Toronto.

The boiler tube situation has failed to take on any strong semblance of recovery, insofar as the expected seasonal proportion of demand is concerned. The current sales have not increased to any great extent, according to recent reports, and the prevailing situation is generally summed up in expectations for future improvement. The winter months contain the hopes of domestic dealers in this respect, and this condi-

tion reflects the upward trend and brisker activity in other steel products generally; a factor which may develop in the boiler tube markets if stock liquidation and replacement values contribute in this direction. The average unchanged local quotations follow:

BOILER TUBES—

	Seamless.	Lapweld.
1 inch	26 00	.....
1¼ inch	27 25	.....
1½ inch	26 25	.....
1¾ inch	29 75	25 00
2 inch	28 00	22 00
2¼ inch	32 00	25 00
2½ inch	40 00	27 00
3 inch	44 00	35 00
3½ inch	60 00	40 00
4 inch	75 00	50 25

AGRICULTURAL WRENCHES HAVE FURTHER REDUCTIONS

Toronto.

A further reduction has been announced in quotations on Agricultural wrenches. The revised level shows a discount of 50 per cent.

LOWER QUOTATIONS SHOWN ON MOPS AND STICKS

Toronto.

New lower quotations are announced this week on both mops and mop sticks. These changes include the self-wringing mops and also the crank style. The revised prices are as follows:

MOPS -

Self-wringing mops, complete, per doz.	4 35
"A" crank mops, per doz.	7 35
No. 2 mop sticks, per doz.	2 25
No. 10 mop sticks, per doz.	2 60
No. 14. Janitor, mop sticks, per doz.	8 50

ANOTHER NEW LIST ON SHOEFINDER'S TACKS

Toronto.

Another new list on shoefinders' tacks has now been issued, effective November 21. This further revision gives lower quotations on various lines such as, brass wire rivets; heel or shoe nails; hob and hungarian nails; channel nails; and also shoe tacks. The recent list which was issued in October is naturally superseded, and following are the latest prices:

SHOE FINDERS' TACK LIST

SHOE RIVETS—In 1 lb. papers—

Steel Wire—16 gauge and heavier, per 100 lbs. —3/8, $25.00; 3½/8, $21.50; 4-4½/8, $18.50; 5-5½/8, $17.75; 6-6½/8, $17.25; 7-7½/8, $16.00; 8-8½/8, $15.25; 9/8-11½/8, $14.25; 12/8-17/8, $13.50. 17 gauge add $1.00; 18 gauge add $2.00.

Clinch Point—3/8, $26.25; 3½/8, $22.75; 4-4½/8, $19.75; 5-5½/8, $19.00; 6-6½/8, $18.50; $15.50; 12/8-17/8, $14.75. 17 gauge add $1.00; 18 gauge add $2.00.

Cobblers' Rivets—3/8, $28.00; 3½/8, $24.75; 4-4½/8, $21.00; 5-5½/8, $20.00; 6-6½/8, $19.50; 7-7½/8, $18.25; 8-8½/8, $17.25; 9/8-11½/8, $16.25; 12/8-17/8, $15.50. 17 gauge add $1.00; 18 gauge add $2.00.

Brass Wire—3/8, $83.60; 3½/8, $71.35; 4-4½/8, $67.35; 5-5½/8, $66.10; 6-6½/8, $65.10; 7-7½/8, $64.35; 8-8½/8, $63.85; 9/8-11½/8, $63.35; 12/8-17/8, $62.85. 17 gauge add $1.50; 18 gauge add $3.50.

7-7½/8, $17.25; 8-8½/8, $16.50; 9/8-11½/8, $64.85; 12/8-17/8, $64.35. 17 gauge add $1.50; 18 gauge add $3.50.

Cobblers' Rivets—3/8, $96.35; 3½/8, $82.35; 4-4½/8, $78.30; 5-5½/8, $76.50; 6-6½/8, $75.25; 7-7½/8, $74.40; 8-8½/8, $73.85; 9/8-11½/8, $73.20; 12/8-17/8, $72.70. 17 gauge add $1.50; 18 gauge add $3.50.

Bulk shipment—Less 25c nett for quantities of 100 lbs. One size.

HEEL OR SHOE NAILS—14 gauge and heavier 4/8 to 16½/8. In bulk, $13.00 per 100 lbs.; in 1-lb. papers, $13.75 per 100 lbs. 15 and 16 gauge, add 65c to above price. In 100-lb. quantities. One size. 17 gauge, add $1.60 to above price. In 100-lb. quantities. One size.

Swedes Iron—14 gauge and heavier, 4/8 to 16½/8. In bulk, $13.75 per 100 lbs.; in 1-lb. papers, $14.50 per 100 lbs. 15 and 16 gauge, add 65c to above price. In 100-lb. quantities. One size. 17 gauge, add $1.60 to above price. In 100-lb. quantities. One size. 17/8 and longer add 65c per 100 lbs.

Silver Point—All sizes. In bulk, $13.75 per 100 lbs.; in 1-lb. papers, $14.50 per 100 lbs.

MANY LINES DISSTON SAWS RECORD EASIER PRICES

Toronto.

Among the price reductions announced this week, is a decline on the Henry Disston line of saws. The reduction recorded on these products is of varying extent on the separate lines, being as high as 10 per cent on tenon saws; with a variation on other grades between 5 and 10 per cent., such as compass saws; and a change of around 5 per cent only on hand, rip, panel, and butcher saws.

Many makes are now quoted with lower prices, however, the latest revisions on the D-8, hand, panel and rip, saws, being as follows:

SAWS—

Disston, rip, hand and panel.

D-8x20 ins., per doz.	33 30
D-8x22 ins., per doz.	35 85
D-8x24 ins., per doz.	38 40
D-8x26 in., per doz.	40 35
D-8x28 ins., per doz.	46 05

LOWER PRICES NOW GIVEN ON BUILDING PAPERS

Toronto

As outlined in the Toronto market report contained in last week's issue of Hardware & Metal, some lower prices have now developed in some quarters on certain lines of building papers. Cyclone tarred has been lowered from $1.45 per roll, to $1.35, and other grades and styles of both dry and tarred papers and sheathings have recorded similar reductions in proportion. Lower quotations on tarred felt have also appeared on the local market, the extent of the decline on this product being 55 cents per 100 lbs. This change brings the current price on tarred felt to $3.45.

Although these changes failed to develop on the Toronto markets last week, in keeping with the easier levels then anounced in Montreal circles, these reductions have since been generally adopted. An easier market tone prevails on practically all papers, and sheathings, as well as roofings. The opinion has been expressed that rubber is especially due for some price development, and while it is inferred that a revision in the prices on these products is considered probable during the early part o December, no definite information was available, and other contemplated developments could not be ascertained. These latest price concessions, however, appear on the current market quotation pages.

STANDARD STEAM COCKS SHOW REVISED DISCOUNT

Toronto.

A revision in the discount on brass standard steam cocks, now shows reduced quotations applying to these products. Other lines of compression goods show no further change, the recent, discounts being generally maintained. Business in these commodities is described as gradually getting quieter, the approach of the Christmas season usually witnessing the period where both distributors and merchants desire to take records for the annual inventory period, and little new buying is anticipated until early in the new year. Prevailing quotations follow:

Compression work, standard	43%
Fuller work, standard	30%
Bath cocks, compression	32%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Round-way stop and waste cocks, standard	46%
Brass steam cocks, standard	40%
Globe, angle and check valves, standard	20%
J. M. T.	20%
J. M. T. C.	25%
J. M. T. Gate Valves	25%
Gate or straightway	16-10%
Jenkins Globe	10-10%
Radiator valves, standard	58%
do., removable disc	58%
Emco. Check Valves	20%
Webber gate valves	25%
Emco Globe valves, ¼" to 2",	30%
Do., Do., Do., 2½" to 3"	20%

BASIN COCKS—

No. 0 and 1, Fuller pattern	30%
Quick opening No. 3633	43%

UNSETTLED CONDITIONS IN SOIL PIPE AND FITTINGS

Toronto.

In spite of the recent reductions which have appeared on both soil pipe and fittings in the eastern markets recently, local quotations on these products continued to remain unchanged. In discussing this situation with one of the largest Toronto distributors, Hardware & Metal elicited the information that the recent market condition in Montreal was not entirely based upon healthy trade fac-

tors. In this opinion, it was due to the fact that one manufacturer in that city had a fairly large quantity of soil pipe on hand, and was in the habit of quoting direct to the trade. To meet this competition, it was suggested that other manufacturers and distributors had imported an inferior grade of soil pipe, and thus recent discounts developed.

It was further pointed out that local manufacturers could not maintain present quality on their products, and contemplate lower prices, without entailing losses. Whether this covers the entire situation, or not, it is understood that business in soil pipe and fittings throughout certain sections of Ontario has been going to the representatives of Montreal houses quoting the latest reductions. Another dealer expressed the opinion that it was hard to see how prevailing local prices could be maintained for long in the face of the present Montreal competition. Any likelihood of further change in the Toronto quotations, therefore, is primarily based upon the looked for action by local manufacturers and distributors who are expected to reach a decision in the near future. Current discounts follow:

SOIL PIPE—	
2 inch	25%
3 inch	30%
4-inch	30%
5 and 6 inch.	30%
8 inch.	net
FITTINGS—	
2 to 6 inch fittings	40-10%
8 inch fittings	net

MAINTAINING NOMINAL LIST ON RANGE BOILERS

Toronto.

Business in range boilers is now very quiet, and little signs of activity are now anticipated. The chief interest in these markets continues to revolve around the quotations on the standard 30 gallon size, there having been some reports recently circulating that shading from the nominal list level of $9.25, had been encountered. This condition, however, is generally attributed to eastern markets, where over-anxiety to reduce present stocks prior to the advent of the dull season, resulted in these rumors of easier prices being met by certain distributors. The revised list, as shown herewith, continues to represent the average local quotations on these markets.

RANGE BOILERS—	Standard	Ex. Heavy
30 gallon	$ 9 25	$ 11 75
35 gallon	12 00	14 50
40 gallon	14 50	17 00
52 gallon	21 00	26 00
66 gallon	30 00	36 00
82 gallon	37 50	50 00
100 gallon	48 00	58 00
120 gallon	57 00	67 00
144 gallon	.....	76 00

SOME INTEREST SEEN IN NON-FERROUS SCRAP

Toronto.

The domestic scrap material markets continue in an apathetic condition as regards business activity, there being very little trade recorded. However in sympathy with the southern primary markets, non-ferrous metals have adopt a slightly firmer tone, and there is some interest being exhibited in this phase of the scrap situation. Generally, however, there remains little new to report, with the average of dealers buying prices for large quantities being as follows:

Gross Tons— Scrap Iron		
Heavy melting steel (Hamilton)	9 50	10 00
Borings and turnings	2 50	3 50
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	5 50	6 00
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	15 00	16 00
Stove plate	11 00	12 00
Grate bars	10 00	11 00
Standard car wheels	13 50	14 00
Scrap Metals.		
Heavy copper and wire	9 25	10 00
Light copper	7 50	8 00
No. 1 composition	8 00	8 50
No. 1 comp. turnings	6 00	6 50
Light brass	3 00	3 50
Heavy yellow brass	5 00	6 00
Heavy lead	3 75	4 00
Tea lead	2 00	2 50
Scrap zinc	3 50	4 00
Scrap Rubber		
Boots and shoes	2 25	2 75
Lumbermen's Rubber boots	1 25	1 75
Auto tires	0 50	1 00
Solid tires	0 75	1 25

COPPER ONLY ACTIVE METAL ON INGOT MARKETS

Toronto.

Little general change has been recorded in the ingot metal markets, copper being the only metal to register signs of activity. On the primary markets, copper quotations have slightly advanced again, but domestic prices are generally unchanged.

COPPER—The primary copper markets continue to show signs of strength, and southern producers have been quick to again advance prices. The outside markets can hardly be described as active, but anticipations evidently exist for export business. The domestic markets maintain a waiting attitude, and prices are holding steady at 17 cents.

TIN—While the undertone in the tin markets is said to be firm, there continues to develop fluctuations on primary markets. The changes in Sterling rates have been directly affecting London advices, and other centres record a sympathetic tendency. The local quotation on tin is also marking time at 35 cents.

LEAD—The lead market is slightly easier in some quarters, but domestic prices are holding unchanged. The undertone locally is said to be fairly firm, but the primary circles have failed to register any developments of note. Local prices of $6.50 still prevail.

SPELTER—Trading in this metal is not quite so active in general, as was the case earlier in the month. Large producing interests in the south, however, are maintaining an attitude of indifference and refusing to entertain any lower quotations. The easier tone in the primary markets is ascribed to a falling off in demand, but some quarters indicate that this condition may only be of a temporary nature. Local quotations remain unchanged at $7.00.

ANTIMONY—This market has developed signs of a slightly easier nature, but generally is reported dull and unchanged. Prices are remaining steady, at present, both on foreign and domestic markets. The local prices are from 8 to 10 cents, as usual.

ALUMINUM—This metal has been in little demand, and there is no evidence of any revival of activity in the market. Prices continue to remain at 28 cents.

LONDON MARKETS

LONDON, November 23—Price changes on the current hardware markets cover such lines as curry and cattle combs; building papers, both dry and tarred; and the Westcott make of nut wrenches. Other primary markets are remaining with unchanged quotations.

Business continues good, and merchants report a very satisfactory volume of sales, at present. There is a very fair movement of fall and winter lines, and Christmas goods are now receiving marked attention. Ice skates; washing machines; flashlights, and batteries; ash sifters; ammunition; electric heaters; and weather strip, are among the seasonable lines registering improved activity. Collections continue in good shape.

CUTLERY LINES REGISTER SEASONABLE ACTIVITY

London, Ont.

The sale of silverware; cutlery; carvers; and other Christmas lines, continues to improve and is good at present Prices on these lines hold firm.

WINDOW GLASS MOVEMENT IN SEASONAL VOLUME

London, Ont.

Dealers report that a good sale now continues for window glass, with the season now being at its height. Stocks of these products are reported to be light and prices remain unchanged with a firm undertone. Both single and double diamond are quoted net list; with cut lights priced at 75 per cent off light list.

LOWER QUOTATIONS APPEAR ON BUILDING PAPERS

London, Ont.

Some lines of building papers have again been lowered in price during the past week. These products have enjoyed a good sale during the current fall season, and the new prices are as follows:—

Plain fibre, No. 2, $0.60 per roll.

Tarred fibre, No. 2, $0.85 per roll.

REVISED QUOTATIONS ON WESTCOTT WRENCHES

London, Ont.

The Westcott line of nut wrenches have been reduced in price, the extent of the decline being approximately 10 per cent. The revised quotations follow:

WESTCOTT WRENCHES—	
6-in., doz.	10 50
8-in., doz.	13 00
10-in., doz.	15 75
12-in., doz.	23 50

GOOD SALES CONTINUE FOR CROSS-CUT SAWS

London, Ont.

Cross-cut saws are now selling well. Prices remain unchanged at the following levels:

CROSS-CUT SAWS—	
Maple Leaf Line—Premier, Lance, Racer, Pangburn—	
5 ft., each	5 50
5½ ft., each	6 25
6 ft., each	7 25
Philadelphia Lance, Champion, ft.	75

BRISK SALES FOR LANTERNS AND LAMP CHIMNEYS

London, Ont.

Lanterns, lantern globes, and lamp chimneys, are included among those products enjoying a brisk sale. There have been no further price changes since the recent revisions. Current quotations follow:

LANTERNS AND GLOBES—	
Tin lanterns, short or long pattern, doz.	12 00
Lantern globes—	
1 doz. to case, per doz.	1 35
3 doz. to case, per doz.	1 25
6 doz. to case, per doz.	1 20
Lamp chimneys—	
A—8 doz. to case, per case	10 75
B—6 doz. to case, per case	9 15

LOWER PRICES IN EFFECT ON CURRY COMBS

London, Ont.

A reduction of approximately 10 per cent is shown to curry combs, and following are net prices on some of the well known lines;

Curry combs, No. 111, per doz.	1 60
Do., No. 121, per doz.	1 70
Do., No. 127, per doz.	2 25
Do., No. 147, per doz.	2 40
Do., No. 270, per doz.	2 50
Cattle comb No. 98, per doz.	2 05
Do., No. 100, per doz.	2 85

RECORD LIGHT DEMAND FOR WHITE LEAD IN OIL

London, Ont.

Prices on white lead in oil are holding unchanged, with the movement generally being seasonably light at present. Current prices follow:

WHITE LEAD IN OIL—	Tons.	Less Tons.
Pure, Per 100 lbs.	13 30	13 65
Elephant, per 100 lbs.	13 80	14 15

CURRENT PUTTY SALES DESCRIBED AS GOOD

London, Ont.

Current putty sales are described as good by many dealers, with present prices holding firm. Orders are small as regards quantity, but heavier in number. Following are prevailing quotations:

PUTTY—	
Standards, 100-lb. drums, per 100 lbs.	6 30
Standard, 25 lbs., per 100 lbs.	6 55
Pure, 100 lb. drums, per 100 lbs.	7 80
Do., 25 lb drums, per 100 lbs.	8 05

TURPENTINE PRICES HOLD AT HIGH LEVELS

London, Ont.

For the initial time in many weeks, turpentine quotations remain unchanged, with the recent high levels being maintained. The demand in these markets is also light, at present, but this is a condition prevalent at this season of the year. The quiet period in local circles is generally looked for, with no marked activity until the early spring. Unchanged prices follow:—

TURPENTINE—	Imp. Gal.
1 barrel lots	1 25
2 and 4 barrel lots	1 24
5 gallon lots	1 40

SEASONAL MARKET FOR ROPE AND TWINES

London, Ont.

There is a fair seasonable sale at present for rope and twines. There has been no further revision in prices, and quotations remain at the following levels:

ROPE—	
ROPE—	
Pure Manila, per lb.	0 23
Beaver Manila, per lb.	0 19
New Zealand hemp	0 19
Sisal	0 17

NAIL DEMAND NOW EASIER

London, Ont.

The demand for nails, both wire and cut, has been very good during the present Fall period. The proportion of sales are however, now registering a decline with the coming of winter weather; thus mitigating opportunities for outdoor building activities. Wire nails are quoted at $4.25 base; and cut nails remain unchanged at $4.95 base.

QUIET DEMAND RECORDED FOR LINSEED OIL

London, Ont.

The local quotations on linseed oil again remain unchanged this week, with little variation in the primary markets. Demand for oil at this season of the year continues to be of a light nature, and with flax seed prices holding about even, the current situation has not altered materially. Following are present price levels.

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrels, per Imp. gal.	0 87	0 90
3 to 5 bbls., per Imp. gal.	0 86	0 89
6 to 9 barrels., per Imp. gal.	0 84	0 87
Less barrels add 15 cents gallon.		

REPORT INCREASED SALES FOR ICE SKATES

London, Ont.

The current sale of ice skates continues to register improved activity, and merchants report a seasonal increase in the demand for these products. Prices remain unchanged, the Starr line being quoted at list, less 30 per cent

SEASONABLE SALE FOR ASH SIFTERS

London, Ont.

The approach of the cold weather and the commencement of the furnace season, has been reflected in current demands for ash sifters. Many dealers report sales of these products being good at present. Following are unchanged quotations on popular lines:

ASH SIFTERS—	
Banner, No. 2, each	3 00
Banner, No. 3, each	2 00
Common Wood Sides, dozen	3 00

WINNIPEG MARKETS

WINNIPEG, November 23.—Lower quotations on bar iron and steel comprise the feature price change on the current hardware markets. Other revisions to a lower level appear in quotations on lace leathers; awning pulleys; and several lines of shelf and builders' hardware. While increased prices are given on turpentine; fuel oil; certain grades of motor lubricants; kerosene oil; pure white lead; and candle wick packing.

The approach of the Christmas trade season is acting as a direct stimulent to current business, and is contributing in large measure to the steady gain recorded in the proportion of recent activity in the hardware trade generally.

REDUCED PRICES ANNOUNCED ON AWNING PULLEYS

Winnipeg.

Lower prices are quoted for awning pulleys. Following are some of the latest quotations;

AWNING PULLEYS—
No. 174—¾, 95c per doz.; 1, $1.15; 1¼, $1.50; 1½, $2.15; 1¾, $3.00; 2, $4.75.
No. 74—¾, 70c; 1, 80c; 1¼, 95c; 1½, $1.15; 1¾, $1.65; 2, $2.30.
No. 173—1, $1.65; 1¼, $2.15; 1½, $3.00; 2, $6.00.
No.176—¾, $1.50; 1, 1.80; 1¼, $2.10; 1½, $3.45; 1¾, $5.70; 2, $6.90.
No. 76—¾, $1.00; 1, $1.15; 1¼, $1.40; 1½, $2.00; 1¾, $2.80.

LUBRICATING MOTOR OIL ADVANCES IN PRICE

Winnipeg.

Polarine lubricating oils in the three grades show an advance of ten cents per gallon. Other lubricating oils are remaining unchanged, but it is noticeable that crude oil continues to advance, and if this continues, it is felt other lines will be advanced accordingly. Following are the latest quotations:

OILS—	
Polarine oil, per gal.	1 25
Polarine A, per gal.	1 25
Polarine heavy, per gal.	1 25
Fuel oil, per gal.	0 14

INCREASE RECORDED ON PURE WHITE LEAD

Winnipeg.

Higher prices are quoted this week on decorators pure white lead.

The present price on 25 lb. drums is $14.35 per 100 lbs.

KEROSENE OIL QUOTATION REGISTERS INCREASE

Winnipeg.

The price of kerosene oil advanced 1½ cents per gallon this week and is now quoted at 23½ cents per gallon.

CANDLE WICK PACKING AGAIN QUOTED HIGHER

Winnipeg.

The price on candle wick packing has advanced 3 cents per pound this week and is now quoted at 55 cents per pound.

SHEET MARKETS EASE; QUOTATIONS UNCHANGED

Winnipeg.

Quotations on all kinds of sheets show no change this week, notwithstanding other markets are reported as recording a decline in some prices. Local quotations are as follows:

SHEETS—
Price per 100 lbs.

	Black	Galv.
No. 10 Gauge	5 70	....
No. 12 Gauge	5 70	....
No. 14 Gauge	5 80	....
No. 16 Gauge	5 90	6 75
No. 18 Gauge	6 30	6 90
No. 20 Gauge	6 30	6 90
No. 22 Gauge	6 35	7 05
No. 24 Gauge	6 35	7 05
No. 26 Gauge	6 40	7 20
No. 28 Gauge	6 65	7 80
10¾ oz.	....	8 20

REDUCTIONS ALSO GIVEN ON LACE LEATHER PRICES

Winnipeg.

Prices on lace leather have been reduced this week. Following are the revised quotations:—

Rawhide $1.35 per lb.
Tanned $1.35 per lb.
Cut laces, Tanned $1.70 per lb.

ADVANCED LEVEL NOW QUOTED ON TURPENTINE

Winnipeg.

Slight advances have been recorded in turpentine quotations, this change being due to the fact that stocks are comparatively low, and fresh supplies ae not easy to obtain on account of the stronger demand experienced from foreign markets. It is also pointed out that the non-productive period is now at hand, and as a consequence, the usual scarcity of fresh turpentine is likely to develop. Under these circumstances the market is expected to maintain its present firmness, and price recessions are not looked for until buying conditions improve. The prevailing quotation is $1.35 per gallon in barrel lots.

LOWER PRICES APPEAR ON BAR IRON AND STEEL

Winnipeg

Prices on bar iron and steel have been reduced this week. The trend of steel products, insofar as bar iron and steel is concerned, assumed an easier attitude this week, and quotations were made lower on nearly all grades.

Following are local current prices.

BAR IRON—	
3-16, 1-4 and 5-16, base	4 90
Rounds and Squares, 3-8 to 2 and flats up to and including 1 x 4, base	4 90
Rounds and Squares over 2, up to and including 2¾ and Flats over 1 x 4 up to 6 wide, base	5 65
Rounds over 2¾ to 6, base	6 15
BAND STEEL—	
Base	5 20
STEEL—(Soft or mild)	
Rounds and Squares, 3-16, 1-4 and 5-16, base	5 20
Rounds and Squares, 3-8 to 2 and Flats up to and including 1 x 4, base	5 20
Rounds and Squares over 2 and up to and including 3 and Flats over 1 x 4 up to 6 wide, base	5 65
Rounds over 3 up to 6, base	6 15

PITTSBURGH MARKETS

PITTSBURGH, Nov. 24th. — The increasing dullness of the steel market is relieved to an extent by resumption in a limited way of railroad buying, orders for more than 5,000 freight cars being reported in the last week, as well as inquiries for more than 10,000 cars in addition.

The gradually improving financial condition of the railroads is no doubt responsible in part for the appearance of this business, but this is not the whole story, for liquidation in prices asked for rolling stock is a necessary and important factor. In the fore part of 1920, prices of $3,000 to $3,500 were being asked for ordinary steel freight cars, and such prices were altogether prohibitive. Railroads were neither able nor willing to pay any such prices, for even if the funds could be found there were no conceivable rates of freight keep at such cost. The first steel cars cost a trifle over $1,000, and gradually the price went down until in 1914 cars were bought for less than $800. The ineradicable increases in costs would prevent such a price from being duplicated now, but to pay four prices was another matter altogether. The largest factor in making the high quotations last year was the fancy prices quoted on appurtenances of various sorts, bought by the car shops, though labor costs at the shops were very high also, on account of high rates and inefficiency. High cost of steel was also a factor, though that influence was frequently exaggerated. It is not known precisely what prices are being quoted now, but the probability is that the price for a standard car is less than double the price late in 1914, when $800 was shaded.

The Santa Fe has contracted for 2,500 refrigerator cars and the Illinois Central 1,000 of the same type. The Chicago & Illinois Midland has ordered 725 gondolas, while the Rio Grande has taken 700 cars and the Tennessee & Northern 300 cars, making a total of 5225 cars. Inquiry now out includes 3,000 cars additional for the Illinois Central and 7,300 freight cars, 127 passenger cars, and 55 locomotives for the Burlington.

Mill Operations

Production of steel appears to have tapered off a trifle from the 44 per cent. rate shown for October, and this would be a natural sequence to the quieter steel market that has been observed since the middle of that month. However, there is no great decrease, for in two respects, apart from the influence that may be exerted by the car buying reported above, operations have been increasing, the increases being in tubular goods and in tin plate. In tubular goods there has been a slight continuous increase, in both standard pipe and oil country goods. A week ago the National Tube Company (Steel Corporation) blew in a third blast furnace at the Lorain plant and the company is now putting in a third at the McKeesport works.

In tin plate the development is that the leading independents are securing specifications from large customers against their first quarter requirements, the intention being to make the tin plate at mill convenience in the next few weeks, shipments not being started until after January 1 so that the tin plate will not appear on the buyer's inventory. With this business added to current business the tin plate mills are likely to average an operation above 75 per cent. in December.

Steel prices naturally exhibit a sagging tendency when producers are anxious for orders to maintain operations and there is not enough tonnage to go around, but now and then a halt is called at one point or another. Thus a few weeks ago a leading wire interest intimated it might advance prices in the near future, and this seems to have arrested the declining tendency that was beginning to be manifested. In sheets there is a stiffening at the present moment. At the beginning of last week shading of 3.00c for black and 4.00c for galvanized, the prices resulting from the $5 a ton advance in September, had gone so far that now and then a mill was quoting the old prices of 2.75c and 3.75c, but beginning last Saturday mills have been calling in all quotations under 3.00c and 4.00c and it looks as if the market is stabilized for the time being at those figures, which are the prices the leading interest has maintained right along since September 22nd.

In bars, shapes and plates 1.50c has been done more frequently in the past week than formerly, but this is not yet a regular quotation applicable to medium or small size lots, unless perhaps in the case of plates. It may be merely a coincidence, but the fact is that steel prices have shown more sagging tendency since the Steel Corporation's earnings report for the third quarter came out late in October. It had been believed in many circles that steel prices were in general below cost, but the corporation was found to have had profits of about $15 a ton, even with its limited rate of operating while in 1912 and 1913, when the independents made money as wel as the corporation, the latter's ran at about $10 a ton. The natural assumption was that after the mills had liquidated inventories and made other adjustments it would be possible to have profits at existing prices, and rather large profits if operations should increase.

Disarmament

At last Friday's meeting of the American Iron and Steel Institute the steel industry through Judge Gary and C. M. Schwab as spokesmen, went on record as strongly favoring discontinuance of the manufacture of armament, predicting that success in the conference at Washington would greatly improve the economic situation.

The Economy of Surface Protection

Increasing Tendency Among Paint Buyers to Respond to Surface Protection Appeal—Importance of Adequate Stocks of Paint and Specialties — Some Original Ideas in Window Display and Advertising of Paints.

ENQUIRIES which have been made among hardware merchants reveal the fact that as a result of the educational effort being put forth by the trade surface protection is being sold as an economic measure, in greater quantity to-day than has ever before been done. Some merchants report that their customers have responded to the educational effort put forth by themselves and by the publicity done in connection with "Save the Surface," and that these customers have an entirely new understanding regarding surface protection. It has been noticed for example that they are beginning to think of paints and varnishes not only as colors but as products which protect their possessions from deterioration.

In connection with the "Save the Surface" campaign the message of the surface saving value of paint is going into over 1,000,000 homes. But this educational force alone is not enough. Important as it is it will not yield the maximum results measured in terms of paint and varnish sales until every merchant looks upon himself as a part of the movement and follow up the campaign with aggressive selling effort on his own part. In order to link up with this campaign to best advantage the merchant might see that every opportunity is taken of associating his paint department with the "Save the Surface" idea so that when the property owner begins to think in terms of "Save the Surface" he thinks of the local merchant's paint department.

Demonstrations

Effort along this line on the merchant's part should go hand in hand with effort to actually demonstrate to customers the real meaning of the surface saving value of paint. Illustrations showing this have appeared in past issues of Hardware and Metal, but it would be even more impressive for the merchant to get some actual evidence himself showing surfaces which have been protected for years with paint and which now reveal a better state of preservation than those surfaces which have been neglected. A piece of woodwork taken from some old home will serve to illustrate this effectively, the old paint being scraped in certain parts to reveal the preservation of the wood surface. A part of the woodwork might be thoroughly scraped and refinished in some good varnish stain, paint or enamel as an indication of the improved appearance secured with a few paint materials. Thus the sample will serve double purpose.

Discussing the importance of retaining adequate stocks of paint, with a merchant recently, some interesting views were expressed to Hardware and Metal. It was stated that adequate stocks convey a psychological effect upon customers. The appearance of full, clean, well arranged shelves properly laid out impress the customer with the fact that the merchant has enough confidence in the paint business to lay in a complete stock. Another point is that if the paint stock is complete the merchant will pay more attention to means of keeping trade active in this department. This will result in increasing the total volume of paint sales and bring more satisfaction to customers and merchants alike.

Importance of Adequate Stocks

Adequate stocks are important as an aid in retaining customers. Many hardware merchants lose regular customers through inability to supply some shade of paint in the right quantity. Customers who cannot get adequate service drift to other stores. If the other merchant in your town carries an adequate paint stock you have a good opportunity to secure some business from his customers by putting in a complete stock and giving it wide publicity. Another phase of this question is that sometimes a person will start painting a few trimmings on the house exterior and later decide to go ahead and paint the whole house. For this or other reasons he may find it necessary to replenish his supply before the job is completed. He will want more paint of the same make and shade and he will want it in a hurry. Much of this class of trade should be anticipated as far as possible and adequate stocks kept on hand for replenishment. This means wide assortments, plenty of each color and size and a study of the best sellers, next best sellers, etc., taken from the sale records. With this information the merchant should have little difficulty retaining the stock which will bring in the maximum amount of business.

Sell Quantity Lots

Keeping well assorted and adequate stocks on hand will encourage the sale of quantity lots of paint where formerly only small job lots were sold. It will make the merchant think of paint in bigger quantities and this impression will be conveyed to customers. It will soon be found that house jobs can be secured where formerly porch jobs were forthcoming because the stock is on hand and good service can be given to back up the sales effort put forth.

Adequate stocks bring all the profit that is coming to the merchant for paint trade and it is only a shortsighted policy that guides some merchants in thinking that they are saving money by carrying inadequate stocks at the expense of losing sales and profits. Get the sales and profits and you can afford to carry good stocks.

Some rather original stunts in advertising have been adopted by some hardware merchants in connection with paint. One of these was the illustration of three typical highway robbers with the underline "Three Tough Guys." The ad. stated that the names of the three toughest guys in town would be printed in the ad. the following week. Some

SERVICE

CONFIDENCE

FAIR DEALING

Friend or Foe?

He made an enemy; and so
He wrought to this fell end:
Not only did he gain a foe—
He thereby lost a friend.

TRUEST thing you know! If the man whose confidence you have the privilege to enjoy; whose good will is pleasant as well as profitable; who spends his money in your establishment thereby contributing to your success; who will inconvenience himself in many ways to patronize you—If that man is not your friend, who is?

Seen in this light, we discover the motive which prompts us to be fair and just with our fellow men. We know what it is that will prompt them to be fair and just with us, and we uncover the fundamental basis of real success in business.

Ideals, principles and morals are the materials with which a sound policy is built, and any Business man worthy the name, will use no other with which to secure a permanent, prosperous and pleasurable business.

A matter of opinion, surely! The only excuse we have for offering it is that our experience, based on such a policy, has proven the soundness of its application.

Fifty years in business and *never* have we lost an Agent because the quality of our products was not right, or because our business methods were not honorable, considerate and progressive.

We exist to serve! Paint and Advertising are but the visible means of expressing this service.

The Brush Department

Care of Brush Stock in Slack Seasons

Damage from Dust and Moths Where Brushes Are Kept in Drawers from One Season to Another—Many Customers Wash New Brushes to Eliminate Dust, thus Reducing Their Value

THOUGH the application of the many effective selling suggestions tends to develop an all year trade in household, paint and other types of brushes, nevertheless it is a fact that there is a temporary slackening of trade after the ending of the Fall painting and housecleaning rush. In this season it is very necessary that every care be given the brush stock so that it will be ready for the next active spell of trade, such for instance, as Christmas business. This care is essential in order that the brush stock may keep its best appearance and not become shopworn. Particularly brushes shown as Christmas gift suggestions must have the best possible appearance in order to appeal to the Christmas gift shopper. Some few pointers on this subject will therefore be timely.

Some merchants, as soon as a shipment of brushes arrives, unwrap the whole consignment and dump the brushes into the drawers or bins where they will stay until sold. In many cases the drawers have not been cleaned for a long time, they are dark and they are warm, making an ideal breeding place for moths. These insects cause great loss in value to brushes when they attack, and the damage done by neglect of this kind runs into many dollars. The larvae of the moths eat the bristles and while they will not eat them all, they seriously impair the usefulness of the brush.

Another danger of handling the brush stock in this way is that the brushes become filled with dust. Some brushes are so dusty that when people take them home they think they had better wash them and into a pail of water they go. No new brush should be put into water as the cells of the bristles absorb the water and then when the brush is dipped into paint for work trouble starts as the paint is not absorbed and streaky work results.

These dangers of neglecting the care of the brush stock are increased by the scratching of the stock when dumped indiscriminately into drawers. The merchant who can hand out a nice looking, spotless brush to the customer will make sales a lot easier than if he shows one from which the dust comes in a cloud and which bears evidence of hard usage.

ECONOMY OF SURFACE PROTECTION

(Continued from page 56)

excitement was aroused and the next week in the ad, appeared the names of three specialty lines for the refinishing of floors, woodwork and out-door varnishing.

Another merchant finished the floor of his display window with the floor varnish which he had on sale. On this he assembled dancing shoes, baby shoes, rubbers, roller skates, etc., and put a reading notice in the window "In all walks of life you will find—floor varnish best."

Color Chips Under Counter Glass

Another merchant suggests the use of an assortment of color chips under a panel of plate glass resting on the counter. It is found that when clerks are engaged the people do not wander aimlessly about but go right up to the counter and elect their colors. This saves sample cards and it gives the store's paint department a distinctive atmosphere which is conducive to good business.

A plan followed by this merchant which may convey some suggestion to others is to turn the paint cans upside down on the shelves during the winter months so that the pigment will not settle and become hardened. This particularly applies to flat wall paints and varnishes.

Taking opportunity of hints dropped by customers when shopping as to future activities is a good way this merchant has of keeping a list of interested prospects at all times. He keeps a paper handy and when a customer says he is going to paint something or if he drops a hint that he will be undertaking some household work, a note is made of the approximate time and the goods in which he will be interested.

Would Restrict Use of White Lead

The International Labor Conference in session in Geneva, has been considering the question of the reported danger to painters from the use of white lead in paints. Much argument was heard on both sides of the question as a result of which a compromise was reached providing that white lead be limited to 2 per cent. of the ingredients of paint to be used for exteriors; that white lead be prohibited entirely in all paints for interiors; that women and children under 16 years of age be not employed where white lead is used in the manufacture of paint and the countries now using white lead be given six years to comply with these regulations.

Philip Roy, Commissioner-General for Canada in Paris, did not share the opinion of the Canadian Government delegates on the question. He thought it was a question of conflict of interests and he favored prohibition of white lead.

In the September 24 issue of Hardware and Metal appeared an article on this subject pointing out that the agitation for the elimination of white lead in paint was not so much an altruistic movement on the part of European interests as much as a contemplated attempt on the part of France to have zinc oxide replace white lead in paint because of the fact that France has practically no lead industries but has an extensive zinc industry. It is significant that the amendment which formed the basis of the compromise at Geneva was put forward by France.

IMPERIAL VARNISH AND COLOR CO. TO HOLD SALES CONVENTION

Commencing Tuesday, November 29, the Imperial Varnish and Color Co., are planning to hold their annual sales convention at the head offices in Toronto. According to H. E. Mihell, plans for the coming year will be outlined, and preparations launched to make 1922, the greatest year in the history of the paint industry.

THE BOECKH COMPANY PRESENTS EMPLOYEES WITH LIFE INSURANCE

The employees of the Boeckh Company, Toronto, recently received a very pleasant surprise when announcement was made by the management that arrangements had been completed whereby they had been provided with One Thousand Dollars of Life Insurance as an evidence of the Company's appreciation of the value of loyalty, co-operation and continued service.

Boeckh's Brush News

Real Economy Lies in Quality

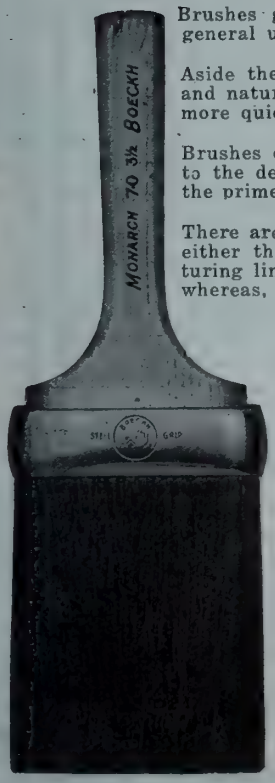
The old proverb "Penny wise and pound foolish" is, perhaps, best exemplified in the purchase of goods of inferior quality which are sold at apparently low prices.

There is little or no satisfaction in the buying, handling or selling of cheap merchandise and the storekeeper who trades in cheap lines at small profits does not benefit himself to any great extent and will not beget the goodwill of his customers.

A good article made and sold by a manufacturer, at a fair profit, will in turn prove profitable to the ultimate purchaser, for the reason that it will give good service for the money expended.

While the above is generally applicable to all lines of goods, it is perhaps of particular interest to consumers of brushes of all kinds.

Of nearly every brush, the principal requisite is good service, not only to be equal to the purpose for which the brush is purchased but to give good service over a certain period of time. In most kinds of brushes, the cost is not a principal consideration, nor is it in any case, one of great moment, therefore, it will prove wise for the purchaser to consider quality first and last, as the difference in price between brushes of poor and good quality is not at most, a matter of any great concern.



Brushes give more service for the money expended than, perhaps, any other article of general use.

Aside then from question of service, there is secondly the fulfilment of a person's desire and naturally a brush of attractive appearance, properly made and put together will appeal more quickly than a brush of inferior workmanship and unattractively or cheaply finished.

Brushes of quality or, in fact, good articles of any kind, will always show a better profit to the dealer and be more readily saleable and will insure future sale, which after all, is the prime factor in any business.

There are two facts closely linked together, which are: that quality goods are well known, either through advertising or general use; and that national advertisers in the manufacturing line are makers of quality goods only. Well advertised lines are usually guaranteed, whereas, buyers of cheap goods are not protected in this way.

In the handling of quality lines a dealer is insured of:

(1) An unqualified pride in the stock he carries.
(2) A ready sale.
(3) A reasonable profit.
(4) A guarantee against loss.
(5) Many repeat orders and satisfied customers.
(6) An established demand through high class advertising.
(7) A sound and well established supplier.
(8) Prompt fulfilment of orders.

Benjamin Moore & Co. Annual Banquet

Enjoyable Gathering of Paint Company's Employees for Dinner and Entertainment — Officials Speak of Splendid Co-operation Among Staff—W.A.A. Chown Elected Director

WITH BANQUET hall and tables tastefully decorated and a feeling of good fellowship prevailing, the annual dinner and entertainment provided for employees by the Benjamin Moore & Co., was held this week at the company's plant in West Toronto. With business cares forgotten and business distinctions eliminated, it was a jolly crowd which sat down to dinner. A tasty meal was provided and much mirth was aroused over the wording and arrangement of the items on the menu card, a number of current events and popular personages being worked into the names of the various edibles. The menu card was a work of art, bearing on its pages the Benjamin Moore trade marks and other identifications in addition to which names of the guests of the evening were noted.

Frederick Moore, Vice-President and General Manager acted as chairman and in addressing the gathering he dwelt at considerable length upon the necessity of service on the part of every member of the organization. Co-operation and good-will toward each other were also cited as desirable attitudes among the members of the staff, in order to attain the ideals which the company had set up. The importance of giving the utmost service on the part of every member of ed. "It is only by each one doing their part faithfully that these results can be achieved," said Mr. Moore in conclusion.

Excels in Service

L. P. Moore, President of the Benjamin Moore & Co., in both United States and Canada also dwelt upon the importance of service, stating that among all the branches of the Benjamin Moore organization it had always seemed to him that the Canadian plant excelled in its endeavor to give service of the highest type to its customers. He also referred to the splendid spirit of good fellowship which seemed to prevail throughout the Canadian organization.

W. C. Belcher, Vice-President of the U. S. companies, spoke of the important part which the employees play in building up and developing an organization.

Among the other speakers were W. P. Talbot, J. H. Shaffer, G. H. Parkes, Directors of the Canadian company, Rev. T. C. Scott, D. D., A. S. Boulton and G. D. Davis, Hardware and Metal.

During the evening Mr. Frederick Moore announced that W. A. A. Chown, who has been associated with the company for the past two years had been that day elected as a director and appointed assistant general manager of the company. In acknowledging the honor which had been conferred upon him Mr. Chown referred to the pleasure it had given him to be associated with the company. He referred to the harmonious feeling which he had noticed throughout the organization which he felt sure was a tangible asset in the upbuilding of the company and its future development.

The evening's entertainment was enlivened with stories and songs by J. S. Dyer in which those present participated with enthusiasm.

Among the special popular music provided for the occasion were the following songs;—

"MOORE BLUES CHASER"

(Tune—"John Brown's Body")

It isn't any trouble just to smile like Frederick Moore;
It isn't any trouble just to smile like Frederick Moore;
If ever you're in trouble
It will vanish like a bubble
If you only take the trouble
Just to smile like Frederick Moore.

G-R-I-N—Grin,
G-I-Giggle-e-
Laugh like Allan Chown.
Ha—Ha—Ha—Ha!

"THE LADIES"

(Tune—"I Love a Lassie")

We love the ladies—the fair "MURESCOED" ladies;
They're the finest ladies in the land.
Their complexions they from birth got
And not from a Moore paint pot—
Say, boys, aren't they grand?

J. H. BLUE APPOINTED TORONTO REPRESENTATIVE CANADA PAINT CO.

James H. Blue has resigned his position with the Vokes Hardware Co., Toronto, to look after the interests of the Canada Paint Company's dealers and agents in Toronto, especially in connection with the Hardware trade where he has a connection.

JAMES H. BLUE
Formerly with the Vokes Hardware Company, Toronto, who has been appointed Toronto representative of The Canada Paint Co.

TORONTO CLUB PLANS 1922 CLEAN UP AND PAINT UP WORK

At the regular monthly meeting of the Paint, Oil & Varnish Club of Toronto, the executives were instructed to act as a committee to organize the retail paint and varnish distributors of Toronto for a Clean Up and Paint Up campaign in the spring of 1922. A subsequent meeting of the executives commenced the initial plans for this organization. Co-operation will be sought from all engaged in both paint and allied trades.

R. M. A. CELEBRATES

(Continued from Page 45)

make him the best fitted to meet these difficulties. I want to say here that the presence of the Dominion Board in Ottawa is absolutely necessary. We are not opposed to governments, but we are opposed to legislation that is a detriment to the successful carrying on of our particular trade."

Telegrams of congratulation and good wishes were read from the secretaries in the various provinces of the Dominion, from Prince Edward Island in the east to British Columbia in the west.

In proposing the toast to the Dominion secretary, E. M. Trowern, B. W. Zieman remarked that the Retail Merchants' Association has been subjected to all sorts of abuse, and had passed through, in its twenty-five years of history, some wonderful struggles. "But we were ever determined to carry on," he added.

The Dominion secretary on rising to speak was greeted with prolonged applause. After acknowledging in much appreciative tones, the gift of his associates, he proceeded as he termed it, to give an account of his stewardship. Mr. Trowern, at the outset, was in a reminiscent mood, and reviewed in an interesting way, some of the early history of the Retail Merchants' Association. The first organization was formed on November 7th, 1896. "We have prospered," he remarked, "but not yet as far as we would like."

"Do you believe in the business you are in?" asked the speaker. "You must believe in it if you are to succeed. If you are ashamed of it, get out. We have had to fight hard to retain the word retailer. They wanted to call the association 'A Business Men's Association,' but I stuck out for the word retailer and it has remained. We are to-day the largest commercial institution in the Dominion. We employ more help, possess greater assets, pay more in stamps to the government, pay more in donations to Sunday School picnics and such like, and take more abuse than any other organization. But we are here to stay. I don't believe in class government, but I do know that the only one who understands the problems of the retailer is a retailer. The theorist is the fellow that we have to watch. The Board of Commerce was a Board of theorists."

"It is only through the united efforts of the retailers all over the country," he concluded, "that we can accomplish anything."

HOW MUCH WILL IT COST?

THERE are many people in your community who long to give to their homes the charm of individuality which only beautifully tinted walls and ceilings can give, and are deterred solely by the idea that such a finish involves a serious monetary outlay.

It doesn't—the Decotint way. Decotint is a beautiful, durable and permanent wall paint that is remarkably inexpensive and is so easy to apply that any amateur can secure excellent results in any one of twenty-two delicate tints or in any color combination desired.

You can recommend Decotint, not only for the beautifying of the home, but also as the most inexpensive and sanitary medium for the interior walls and ceilings of halls, club rooms, schools and public buildings.

Order Decotint now and let the people of your locality know you handle it. Give it display room and watch it sell.

Weekly Paint Markets

MONTREAL

MONTREAL, November 24.—The most interesting factor in the paint markets this week is the very firm situation in turpentine. Although local quotations remain at $1.15 cents per gallon, an increase in prices is expected at any time. This product is maintained at a considerably higher figure in other domestic markets, but due to some distributors having cheaper stocks on hand, and not disposed to raise the price until these supplies had exhausted. Southern markets report a firm tone, with an advancing market expected to continue.

Linseed oil prices are held at previous levels, with fluctuations of a minor nature continuing in the seed market. At every instance of an easing, a stronger tone is evident immediately after, retaining the former, and sometimes a slightly higher standing.

Window glass stocks are by no means heavy, but orders are gradually being filled upon the receipt of Belgian shipments. Canadian glass from the new home industry is expected to reach the local market this week, which should relieve the situation regarding a shortage. Also, as the season is now advancing, stocks should become much more ample from now on. Activity is everywhere evident among paint and varnish manufacturers, orders for next spring's requirements continuing to come to hand in good numbers.

TURPENTINE PRICE HOLDS; MARKET VERY FIRM

Montreal.

Local current quotations on turpentine are still held high at $1.15 per gallon, notwithstanding higher quotations are given in other Canadian markets. However, a change to higher levels is expected in the very near future as the situation here, as undoubtedly elsewhere, is a very firm one. Savannah quotations are comparatively higher than those existing locally, and replacement stocks will necessitate a revision. A light demand is said to be the sole reason for maintaining present prices. Supplies of cheaper turpentine are now well exhausted, and distributors who did not feel disposed to raise their prices until their stock was absorbed, will now be forced to enter the higher market. Although the health of the recent gain, when first in evidence, was questioned by some, there is no present indications of a recession, but every sign of a strong situation continuing as a further advance is now recorded in the Southern market. As the demand almost entirely governs the position of turpentine, a further stiffening of prices seems probable when a bigger buying movement is evident. Thus, if the present standing holds, during the quiet period, higher prices would seem probable for the earlier months of spring. The latest Savannah report states that from all appearances the market is due to advance to higher levels during the next few months. Fluctuations are of course expected, but it will not be very long before the market will recover from the decline. Prevailing prices for the present are as follows:

TURPENTINE—	Imp. gal.
1 barrel lots	$1 15
2 to 4 barrel lots	1 13
Broken lots	1 25

LINSEED OIL PRICES HOLD

Montreal.

Local quotations on linseed oil remain unchanged for the week, with the undertone of the market showing little variation from last week. Earlier in the week a slight easier tendency was evident in the primary market, but this is again overcome and crushers and distributors did not consider it of sufficient importance to reflect a corresponding decrease in oil prices. This again serves to demonstrate the trend of oil in past weeks. Fluctuations occur from time to time with the strength, however, being fully maintained.

The future seems to remain uncertain at present. With the demand of a comparatively light nature and likely to remain so for the remainder of the year, an easier tendency would seem probable. However, when the quiet period has passed, higher ruling prices are predicted by some as the seed market has held remarkably well and no indications of an easing in this direction. Another factor not to be overlooked are present prices, comparative with pre-war levels. Oil is now on a lower basis than generally prevailed in 1914, and it would seem that some unusual occurrence would be necessary to reduce prices below what existed at that time, when present day costs of crushing are taken into consideration. Prices for this week are:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal.	0 83	0 85
3 to 5 barrel lots, per gal.	0 81	0 83

Less barrels, add 10 cents per gallon.

FAIR BOOKINGS OF SHELLAC; MARKET STEADY

Montreal.

The steady situation still remains in shellac markets. Due to conditions in primary centres, outside markets also report a firm tone. Current business is seasonably light, but the buying movement for future is favorable, and shows more activity than existed at this time last year. Shellac at considerably lower prices than those quoted still appear on the local market but other distributors claim the quality of this stuff is questionable.

UNCERTAINTY IN WINDOW GLASS

Montreal.

The Belgian source of supply continues to relieve the situation on window glass, insofar as any serious shortage being felt. Distributors in some cases, however, are forced to hold orders awaiting the first shipments from the new Canadian source. It is expected that supplies from our new home industry will arrive on the local market this week, and with the seasonable rush now advancing, more ample stocks should be available from now on.

Although the close of navigation, with increased transportation costs, usually has a stiffening effect on prices, chances of a revision in this direction are very remote, according to those in close touch with the situation. The Belgian market will undoubtedly control the situation, and until a substantial gain is recorded in the Belgian mark, importers will be able to buy on this market at comparatively low prices.

Demand on the local market continues fair, although the usual busy season is fast advancing. Quotations remain at Montreal net list, with a further slight concession named in some quarters, especially for orders of any size.

PAINT MANUFACTURERS REPORT ACTIVITY

Montreal

From all quarters comes the report of satisfactory paint and varnish bookings for next year. While the current business is now practically closed with the advanced Fall weather, paint houses continue to take on an active appearance in the earlier preparation of future trade. Lower prices and liquidated stocks throughout the country both offer a stimulus for increased business, added to materially by the assurance from manufacturers of a steady market, with chances of lower Spring prices very remote. Enthusiasm is also everywhere prevalent, and with the foundation now laid for 1922, the campaign should become more interesting from week to week.

A Reliable Brush

For a Reliable Product

In order that every merchant handling Benjamin Moore & Co., Limited, Muresco may be assured of satisfied customers, we have designed a brush exactly suitable for bringing the best results with Muresco.

This is a brush of absolutely pure Chinese Bristles; it is 5¾ in. wide. There is absolutely no horse hair used or other hair of any kind. As can be seen, it is a broad, full, generous brush, suitable in every way to get the best results from Muresco with consequent satisfaction to all concerned.

Benjamin Moore & Co.

LIMITED

Paints, Varnishes and Muresco

Toronto **Winnipeg**

"Quality forever Moore"

If interested tear out this page and place with letters to be answered.

TORONTO

TORONTO, Nov. 24.—As is generally the case on a fluctuating market, the demand for turpentine slackened considerably when the recent high price levels receded slightly on primary circles. The local development as regards current business continues on a very moderate character, with supplies also being described as light. Open supplies on the primary markets are said to be of a moderate nature, and taking this development into consideration, coupled with the fact that the production period is now at an end, would serve to maintain the prevailing firm tone in the turpentine markets generally. However, the current demand is of a quiet nature at this time of the year, and quotations on the domestic markets are holding unchanged this week.

Other interesting factors in the current paint markets concentrate chiefly on window glass and paint brushes. Orders for paint brushes in anticipation of spring delivery are being recorded in fairly satisfactory volume. Current shipments of Belgian glass continue to relieve prevailing requirements by timely arrival, while the expectation that glass of Canadian manufacture will shortly appear on the domestic markets, is considered a factor tending to relieve the reported shortage in certain sizes.

FIRM UNDERTONE REMAINS IN TURPENTINE MARKETS

Toronto.

The see-sawing of prices on the primary turpentine markets continues to be one of the interesting factors in the current trend of this commodity. The prevailing demand, generally representing immediate requirements, followed the recent upward developments on southern circles until the high-water mark caused a slackening of interest on the part of consumers generally. An attitude of waiting then materially assisted in easing the price at Savannah; but the undertone remains firm, and the present conditions existing, future recessions are not generally considered as probable, unless merely of a temporary nature.

The fact that certain eastern markets are quoting turpentine at a price several cents below what local distributors are asking, has occasioned some surprise in certain quarters. However, this development is attributed to the fact that some stocks of turpentine contracted for when prices were at a lower level, have been marketed at the prices recorded, and other distributors were forced to meet this competition. The latest reports indicate that a firm market now exists, and the price trend is in the upward direction.

Following are the average local quotations at present in effect:

TURPENTINE	Imp. gal.
1 barrel lots	1 25
2 to 4 barrel lots	1 24
5 gallon lots	1 40

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton London, Brantford, Collingwood, Guelph, Windsor, or Montreal, but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots, 15 cents per gallon additional.

MODERATE CALL PREVAILS FOR LINSEED OIL

Toronto.

With the quiet period now at hand in linseed oil markets, the prevailing demand is of a very moderate character. Prices are being maintained at the recently lowered levels, and with the rise and fall in flax seed prices not being so marked as previously, this development is not reflected in quotations on linseed oil to the same extent. The lack of demand for cake and meal and oil by-products generally, is described as another factor assisting in maintaining the current oil figures, as producers claim that a brisk market for cake meal usually assists in making better prices for linseed. However, the current attitude of dealers is now one of hopeful anticipation for spring improvement; and the prevailing quotations on both raw and boiled follow:

LINSEED OIL—		
1 to 2 barrel lots, per gal.	0 87	0 90
3 to 4 barrel lots, per gal.	0 86	0 89
6 to 9 barrel lots, per gal.	0 84	0 87

Less barrels, add 15 cents per gallon.

PAINT BRUSHES NOW ORDERED FOR SPRING DELIVERY

Toronto.

Paint brushes are now being ordered in fair volume for spring delivery, and with present price levels being guaranteed against manufacturer's decline, a good seasonable demand is anticipated. Requirements are being placed in preparation for spring trade in the brush lines, and the lower quotations on these products which came into effect a few months ago, are expected to be a factor in future market activity.

PREPARE FOR GREATEST YEAR IN PAINT HISTORY

Toronto.

With the current fall seasonal activity in paints and varnishes now practically at a close, the attention of the paint industry generally is naturally drawn to the prospects for next year's business. Both manufacturers and distributors report that bookings of paint and the allied products for spring, have appeared in fairly satisfactory volume, and are already described as an indication of even better activity in these products during the coming season. As a result, dealers are preparing for a strenuous campaign, with the object of making 1922 the greatest year in paint history.

WHERE INDUSTRIAL ACTIVITY IS FOUND

(Continued from page 35)

priced stocks of raw material than are the others who are sitting back waiting for better times. Those who have adopted aggressive selling policies and worked off high prices stocks are now in position to manufacture at lower costs and make a profit. They have, furthermore, secured many valuable accounts from competitors who are holding stocks at high prices while their factories are closed down.

Copper Strengthening Only Temporary

It was Mr. Taylor's opinion that prices on the products manufactured by his firm are likely to be stable for some time. He referred to the recent strengthening of the copper market as a temporary movement. It could not be a permanent movement upward because of the huge stocks of copper held in both Canada and the United States. Mr. Taylor stated that large stocks of copper were left over from war time activities since then there has been little electrical or other development to use up these stocks. Copper mines in the United States have not been very active lately due to the large surplus stocks held and any endeavor to boost prices whilst this condition lasted could only be a speculative movement and short lived. Iron and steel have recently been showing more firmness but it was Mr. Taylor's opinion that prices would not alter a great deal for some time.

The Parmenter & Bulloch plant has been operating on a three day a week schedule but it was expected that this would be increased to four days a week very shortly. The three day a week schedule provides for manufacturing of current requirements only, but the four day a week schedule will allow of some manufacturing for stock.

Lower Prices Stimulate Trade

Prices on these products have always been reduced to conform with reduced costs. It has been found that the lowering of prices has always brought increased trade and so any benefit has always been passed on to the buyer. Retail stocks of these lines are said to be light though wholesalers have recently been ordering in fair quantities and supplies are therefore close at hand for retailers. Mr. Taylor suggests that hardware merchants watch local developments closely for signs of renewal of mill and industrial activity in general.

Credit and collection conditions were said to be very fair, and Mr. Taylor is confidently of the opinion that there will be some improvement in industrial conditions by the Spring of next year, though improvement from the standpoint of agricultural trade may not follow until the next crop has been harvested.

MEAKINS BRUSHES in material, workmanship, durability and service have no superiors.

Since 1852 they have stood for a standard of brushmaking in Canada. "As good as a Meakins Brush" has become a familiar phrase in the time-consuming arguments necessary to sell obscure, little-known lines of brushes.

The favourable reputation that Meakins Brushes bear makes it possible to conclude a sale quickly. This leaves the merchant free to make several other sales in the time saved by the ready acceptance of Meakins Brushes.

The New Meakins Catalogue for 1922 will show you all the line with the lower prices now in effect.

A Keen Edge And a Tough Core

Because they are made of Special Automobile Steels by the C. C. M. process, C. C. M. Automobile Skates have two exceptional features:

1st—**They have a keen, glass-hard running edge.**

2nd—**They have a central core of tough steel that makes the blade practically unbreakable.**

In addition, C. C. M. Automobile Skates are heavily and smoothly nickeled over copper to make them rust-proof.

With such superior features, is it any wonder that dealers find C. C. M. Automobile Skates so easy to sell?

Registered Floglaze

The Finish That Endures

"For Exterior Surfaces"

The can with the black and blue label

An improvement on anything in the line of oil paint for exterior work.

Gives a better and higher gloss.

Brushes, spreads and flows better than anything yet produced for outside finishing.

Dries harder, wears longer, and gives better protection.

A strictly high class line for trade that requires something unusual, both in appearance and lasting qualities.

The Seven **Floglaze** *lines are*

Home and Farm Finishes
Auto Finishes
Art Shades
Velvet Finishes
Porch and Veranda Floors
Lac Shades
Exterior Finishes

Our dealer's booklet "A Guide to large Profits" gives detailed description of Floglaze "Exterior Surfaces" and six other Floglaze lines. Write for a copy.

THE PROOF OF THE PUDDING

Time and *Service* have demonstrated that Pure Iron Galvanized Sheets are more durable than the ordinary Steel quality—

Time and *Service* have also demonstrated that ordinary Steel Galvanized Sheets are greatly improved when it comes to the matter of resisting corrosion, by adding a small per centage of copper.

NOW—

Toncan Metal since 1908 has been a leader of the "PURE IRONS" and now since copper is added, it combines the virtues of both groups. In this it is unique—

No other "PURE IRON" Sheet has the Copper Content—
No other Copper Bearing Sheet has the Pure Iron analysis—

OUR PROPOSAL—

Write us on your business stationery stating that you are interested and we will send you all charges prepaid a full size sheet No. 28 Gauge Galvanized Toncan Metal. Try this in the worst place you know and thus find out for yourself the truth of our slogan—

ENDURES AND INSURES

TONCAN METAL

This offer is limited to three hundred metal workers so do not delay.

CARTER'S

Your Paint Customers Know It.
CARTER'S GENUINE RED LEAD.

Carter's has won the confidence of the Canadian paint user because of its never changing quality. Recommend Carter's. It is made from the very best grade of Canadian pig lead, highly oxidized and very finely ground. Mixed with pure linseed oil it furnishes a free flowing protctive paint for all manner of metal work.
Carter's Genuine Orange Lead, Genuine Dry White Lead and Litharge are three other Carter products worth stocking.

The Carter White Lead Co. of Canada, Limited, 91 Delorimier Ave., Montreal.

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Beautify Walls Economically

Silkstone beautifies walls at less cost than wall paper. It can be washed easily without rubbing off. Its soft, silky finish gives an artistic effect much appreciated by home lovers. The economical side of Silkstone, its beauty, its durability and gratifying service are all factors in the splendid sales it enjoys. It sells profitably with mutual satisfaction to merchant and customer.

The satisfaction it gives is a delight to the conscientious merchant who tries to serve his customers well and build permanent trade. Silkstone fills the bill for the Canadian housewife. She has tried it and liked it, and uses it whenever walls need beautifying, without regard to season. Silkstone is a year-round seller. Let us show you what's in it for you—write.

ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Octagonal Head

This is one of the newest Burgess Cases, equipped with shock absorber that takes the weight of the battery off the lamp, positively preventing breakage from shock. Size 8½ inches by 1½ inches with 3-inch head.

Octagonal Head

Octagonal head prevents rolling when case is put on a flat surface. Equipped with shock absorber. Large reflector and lens give a good light over a wide area. Size 6½ inches by 1½ inches with 3-inch head.

"Spotlight"

The Burgess Focusing Spotlight is a new addition to the BURGESS Line that fills a popular demand. It throws a beam of light hundreds of feet or it can be adjusted, by turning the head, to throw a diffused light over a wide area. Shock absorber. Extra lamp in base compartment for emergency use. Size 10 inches by 1½ inches.

Replenish your stock now for the Christmas trade--
All the newest ideas and improvements are embodied in these--

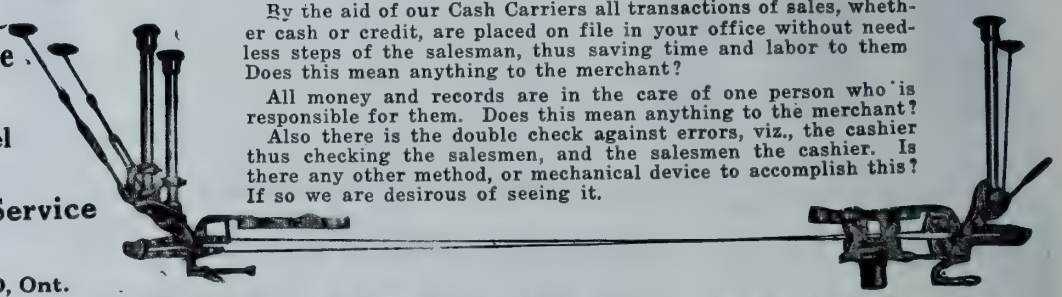
Why Not Have a Double Check on all Sales?

Al kinds of Cash and Parcel Carriers

Gipe-Hazard Store Service Co., Limited
113 SUMACH ST., TORONTO, Ont.



By the aid of our Cash Carriers all transactions of sales, whether cash or credit, are placed on file in your office without needless steps of the salesman, thus saving time and labor to them Does this mean anything to the merchant?

All money and records are in the care of one person who is responsible for them. Does this mean anything to the merchant?

Also there is the double check against errors, viz., the cashier thus checking the salesmen, and the salesmen the cashier. Is there any other method, or mechanical device to accomplish this? If so we are desirous of seeing it.

Just a few words about Hardware and Metal

HARDWARE AND METAL is Canada's national hardware weekly and has been published every Saturday since 1888 by the MacLean Publishing Co., Toronto, who publish fifteen papers.

HARDWARE AND METAL'S circulation is national, and has been audited by the Audit Bureau of Circulations.

HARDWARE AND METAL is edited by a staff of editors who have had practical hardware experience.

HARDWARE AND METAL'S weekly market service is one of its strongest features. Our reports are used as a basis for Canadian Government's annual report on wholesale prices.

Write to any 100 retail hardware dealers in Canada, asking them "Do you subscribe to HARDWARE AND METAL?"

If you will do this, you will use HARDWARE AND METAL too, for it is better than any other medium in Canada, gets your proposals home to the men of value to you as sellers of your goods.

***HARDWARE AND METAL*---Montreal, Toronto, Winnipeg**

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Everlastic "Rubber" Roofing

Plastic Elastigum Patching Cement

Creonoid (Fly Oil) Lice Destroyer and Cow Spray

YOUR customers are getting ready for winter. They're patching the leaky roofs, and painting smokestacks, iron fences, outside piping, farm implements, and other metal that's exposed to the weather.

You can help them do the work right, and at the same time increase your own prestige as a reliable dealer, by selling them dependable Barrett Products---manufactured by Canada's oldest and largest manufacturer of roofingand industrial specialties.

Farm impliments don't wear out—they rust out. Everjet prevents rust.

Everjet Elastic Carbon Paint

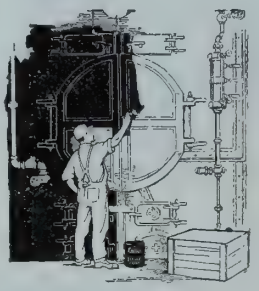
A black carbon paint for industrial purposes. No other paint on the Canadian market has ever enjoyed the same popularity and filled so many demands in the industrial world as Everjet, which was put on the market by our chemists less than ten years ago.

We manufacture no product which we can more thoroughly recommend. For use on all kinds of metal and wood, particularly on materials subject to severe conditions; for use on boilers, smokestacks, machinery, piping; in fact, metal work of all kinds. It is also used extensively for painting metal roofs. It successfully resists the corrosive action of acids, alkalies, fumes and vapors, and will wear stubbornly under the most adverse conditions.

It is being used extensively by big manufacturing concerns, railroads, etc., all over Canada, and has been endorsed by some of the most eminent engineers.

Put up in: 1-Gallon Cans, Lithographed (cases of one doz.), 5 Gallon Cans, ½-Barrels (about 20 gallons), Barrels (about 40 gallons).

Everjet Paint adds years to the life of outdoor metal work.



Everlastic Liquid Roofing Cement

FOR resurfacing old and worn-out "rubber" and prepared roofings, here's a winner!

Comes ready for use, is easy to apply and forms a smooth, tough, durable surface which stubbornly resists moisture, acids, alkalies and fumes. Adds years of service to a worn-out roof at small expense.

Everlastic Liquid Roofing Cement is in a class by itself among roof repair materials.

VIKO
ALUMINUM

Viko Moves Fast Because Prices Are Low—Quality High

The recent reductions in the price of VIKO, The Popular Aluminum, are in line with the established Viko policy of giving big value at moderate cost. Viko cooking utensils are today, more than ever, the leaders of the medium-priced lines of aluminum ware. That is why Viko Ware is giving thousands of dealers an unusually quick turnover.

VIKO, The Popular Aluminum is sturdily constructed from thick sheet aluminum, 99% pure. It gives unusual wear, is finely designed and beautifully finished. The Viko line is complete—it comprises utensils for every cooking requirement.

Put the Viko line in your store. Viko sales are easy to make and bring repeat orders. For full information—

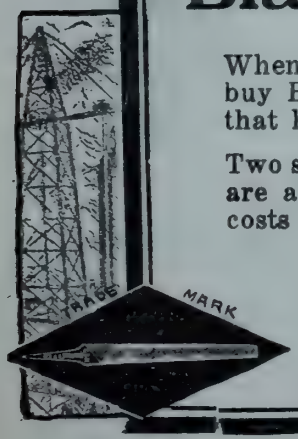
Western Agents: The H. L. Perry Co.,Limited, Winnipeg, Man.

Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G.& H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.

Owned and Operated by Nicholson File Co.

You're the engineer!

Your hand is on the throttle of your business, but have you steam enough? How's your fire? Perhaps you have banked the fires, unconsciously. Perhaps the grate-bars are clogged and the draft cut off by an accumulation of slow stock "clinkers."

Your business is worth the best selected fuel. Clean your fires! Get up steam! Get in touch today with Thos. Birkett & Son Co., Limited. Let us supply salable, well-chosen goods that will give your windows and counters a new look. Show a change to your customers. Begin today—a postcard will do.

Thos. Birkett & Son Co.

LIMITED

Shelf and Heavy Wholesale Hardware

Ottawa, Canada

Concentrated Values and Good Profits

In the REED LINE of Super-Service Garbage and Ash Cans you give to your customers **concentrated value,** for every can is built of heavy weight galvanized steel—stoutly reinforced.

Compare the REED cans with any other make—note the differences all the way through—your decision will be REED'S.

The can illustrated above is our Special 18 in. x 18 in. household can, heavy enough to withstand the ash man's rough handling, but not too heavy to lift when full.

There's a good profit on this can—and on the other type, too. Write NOW for dealer's prices and discounts.

GEO. W. REED & CO.

The Furnace With More Selling Points

PILOT SUPERIOR PIPELESS

You have an advantage from the start, in selling the Pilot Superior Pipeless, because it has so many points in its favor that appeal to the prospective purchaser.

It is very convincing to point out in the Pilot Superior Pipeless: the deep, roomy ash-pit, correctly proportioned combustion chamber, the galvanized outer casing, the tin and asbestos-lined galvanized inner casing, the deep, wide cup joints and its many other superior features.

Write for literature to-day. Get the Pilot business as soon as possible.

Your Customer sees the whole transaction and is satisfied!

Here is the judgment of a merchant who knows.

He tells a big story in a few words, tells why there is always **Double Satisfaction** in every sale made with a

DAYTON HARDWARE SCALE

With the Dayton, both weights and price computations are open, visible, correct beyond question. When the customer leaves the store there is satisfaction and goodwill on both sides over an honest and even transaction.

The Dayton as a money-saver is unequalled by any other store equipment.
